Washington 16, D.C.

Dear Dr. Head:

Thank you for your letter and the material on your activities. I think the man for you to see here is Irving Gitlin, who is our Director in charge of Public Affairs, and I have taken the liberty of passing your letter and material on to him. I myself have no control over what the network does in the way of programming and I think Mr. Gitlin would be of more help to you.

Sincerely yours,

ERM:skh

November 10, 1958.

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York, New York

Dear Mr. Murrow:

It has come to my attention in a few newspapers articles recently which stated that the Communist Party's own records, copies of which are now in evidence, and the authenticity of which was not disputed, showed that ANNIE LEE MOSS of 72 R St. SW Washington, D. C. was a Communist party member in the mid 1940's.

Back in the days of the Army-McCarthy hearings in 1954, I believe it was your belief that she was an innocent victime of Red-Baiting, and that you interviewed her and went to great lengths to show on TV and elsewhere that she was being victimized.

Does the facts mentioned in the first paragraph have any significance and what effect, if any, have they with reference to your opinion concerning Annie Lee Moss?

Very truly yours,

James F. Healy
JAMES F. HEALY

Hearst.

24th of April 1959.

Dear Mr. Murrow,

Many thanks for seeing me. And there isn't much on the whole of this whistle stop jamboree I look more forward to than seeing you and Fred Friendly shape your material.

Thanks for letting me in June.

The BBC brought out a leaflet about my Greek programmes. They might give you an idea whether it's worth your while getting one of the films over. No 2 & 3 are better than No 1.

Sincerely Yours,

Stephen Hearst.

1 The Age of Minos

2 The Age of Victory

3 The Age of Civil War

BBC Television presents

THE GLORY THAT WAS GREECE

three filmed programmes of personal reflections by Sir Compton Mackenzie on the legends and heroic conflicts of Greece which have become part of the fabric of Western civilization.

The producer, **Stephen Hearst,** says: 'These films were planned in Greece in September of last year, and from the first of October Sir Compton Mackenzie, cameraman Charles de Jaeger, and assistant cameraman Johnnie Ray, and I filmed the programmes on the actual sites where the legends arose and the battles were fought . . . in the mountains of Crete, on the Peloponnese and on the Greek mainland. Mules, horse-carts, fishing boats, trucks, and aeroplanes carried us through the sunlit Greek landscape. Sir Compton offered libations to Apollo at the beginning of the filming to bless the venture and to keep the sun high in the sky. He was highly successful; only half a day's filming was lost in seven weeks. The film editor, Harry Hastings, Sir Compton Mackenzie, and I worked on this material in London and Edinburgh afterwards. Some sequences were shot at BBC Television Film Studios, Ealing, and added to the films.

‘In these programmes I am going back to the legendary world of my childhood and to the sites of battles that inspired my youthful imagination . . . In Greece the warmth of legend is not chilled by cold facts. Thanks to the archaeologists we realize that the most improbable myths have an element of fact . . I don't know of any scene that satisfies the mind and the eye like the Greek landscape. Here arose legends which fertilized the poetry of the western world. Here lived a race of superboys whose vitality seemed unquenchable. Here in art, science, philosophy, literature and politics the Greek genius blazed as if fired by the Greek sun. Here the Greeks won that victory over the soul-destroying tyranny of Persian bureaucracy, which made their future achievements possible. And for all of us today faced with the menace of the totalitarian state . . . the victory of Greece should be our inspiration.’

Sir Compton Mackenzie

Sir Compton Mackenzie reflects on

THE GLORY THAT WAS GREECE

in three programmes presented by BBC TELEVISION

PRODUCED BY STEPHEN HEARST PHOTOGRAPHED BY CHARLES DE JAEGER FILM EDITED BY HARRY HASTINGS

The first film, **The Age of Minos,** goes back to the Greek legends and tells of the birth of Zeus in the mountains of Crete, of Minos, of Theseus and his slaying of the Minotaur in the labyrinth. It shows how the ancient legends have inspired great scholars like Hogarth and Sir Arthur Evans to dig and uncover a whole civilization which for sheer beauty and sophistication must rank high amongst past glories of human existence. The Minoan civilization, which is shown in this first programme, lasted some sixteen hundred years, from 3,000 B.C. to 1400 B.C.

The Age of Victory, the second film, goes a thousand years forward in time to the year 491 or 490 B.C., when a vast Persian army advanced into Greece to seek revenge for the revolt of a few Greek cities in Asia Minor which had risen against Persian rule. Athens was the main target. But the Greeks gained the greatest victory of ancient history against all calculable odds. *The Age of Victory* seeks to rekindle the Greek spirit during the Persian wars at the places which have long fired the imagination of the world: Marathon, Salamis, Thermopylae. The images of Greek soldiers on vases, and Persian soldiers and ships from stone reliefs and coins come to life again as Sir Compton wanders over the old battlefields.

The third film, **The Age of Civil War,** describes the period of Greek history fifty years after the Persian wars. The Persian menace had been overcome and the two most powerful of the Greek city states, Athens commanding the greatest sea power, and Sparta the greatest land power, renewed their old antagonisms. The account of the Peloponnesian war as told by Thucydides provides the leading thread of this programme. The war is not remote and insignificant—it is a conflict which in its essence is still with us: there are the motives that drive two equal power blocks to fight one another, the difficulty of realizing and stopping wars once they are embarked on, the mixture of greatness and barbarisms such wars unleash. The Peloponnesian war shows the fight to the death between Athens and Sparta, a fight between two opposing ways of life: Athens, a democracy, Sparta, an oligarchy; a conflict which has continued through Greek history.

Dear Mr. Murrow:

One of our British visitors, Mr. Stephen Hearst, will be arriving in New York on Wednesday, April 22nd. He is coming to this country on an English-Speaking Union/Ford Foundation Travel Grant and will be in New York at the beginning of his trip until Sunday, April 26th. He will return to New York at the end of his tour in about seven weeks for a few days.

You and Mr. Friendly are two of the people he would particularly like to see and the head of his department, Mr. Leonard Miall, has suggested that he get in touch with you.

I will telephone you, if I may, on Monday to see if it would be possible to arrange an appointment.

Sincerely yours,

Ruth C. Ferguson

STEPHEN HEARST

FORD/E-SU TRAVEL GRANTEE, 1958-59

BROADCASTER

NAME: STEPHEN HEARST

Address: 7 Heather Way
Stanmore, Middlesex

Age and place of birth: 39, Vienna

PRESENT POSITION: TELEVISION DOCUMENTARY PRODUCER
BBC Television

Previous experience:

1956-58 Documentary Producer, writing, directing and producing:-

'The More We are Together' - a film portrait of working-class life in East London. (1958)
'Elba Boomerang' - a portrait of life on a Mediterranean island. (1957)
'Onion Johnny' - a study of Breton onion sellers in Brittany and Britain. (1957)
'Half the World Away' - 3 film programs on the outlook of the under-thirties in Hong Kong, Delhi and Singapore. (1957)
'Away From it All' - 4 film investigations on a townsman's chance of earning a livelihood in four remote corners of Britain. (1956)

1955-56 Production Assistant, writing directing and producing:-

'About Europe' - "Traders' Coast" - a travel/current affairs program about Genoa.
'Commonwealth Magazine' - a compilation film program of life in the the British Commonwealth.

1952-55 Script Writer for 'London Town' and 'About Britain' - two studio and film magazine programs with light documentary travel/history and actuality content.

1952 Editor, Historical Maps, Newman & Neame

1950-51 Managerial Trainee, Marks & Spencer, Ltd.

1949-50 Free-lance journalist, feature writer for 'West London Chronicle'.

Education: Reading University, 1938-40, diploma in Horticulture.
Brasenose College, Oxford, 1946-48, 2nd Class Honors in Modern History.

Armed Forces: 1940-46, discharged with the rank of Captain. Service in the Middle East, North Africa Italy and the U.K.

Previous travel outside the U.K. Austria, Switzerland, France, North Africa, Italy, Egypt and Palestine, Germany, Malta India, Malaya, Hong Kong, Brittany.

Special Interests:
professional: Making documentaries without actors, yet interpreting reality creatively; the avoidance of outright statement and its substitution by the unexpected tangential approach to reveal the layers of attitude and feeling beneath the most commonplace life or opinion.

in other fields: The impact of the Mediterranean world upon the Anglo-Saxon world. The Renaissance. Contemporary American writing: Mary McCarthy, J. D. Salinger, Ayn Rand, Lionel Trilling, Edmund Wilson. Sociology, Travel, Writing, Music, Sports, Languages (fluent German, French, and Italian) and keeping up with writings in these languages.

Reason for interest in the United States: The United States is now largely the dynamo of the Western mental and material world and unless one has been to the States, one's knowledge of the present world must be considered sketchy. I have not been to the United States before and above all other countries I am anxious to go there. Secondly, there is no other place where a television producer can learn so much in so short a time.

Heath, William H.

January 20, 1958

Dear Mr. Heath:

Many thanks for your very nice letter of January 8 and for sending me a D-23 hand saw which I look forward to using.

Please thank Mr. Arthur S. Nippes for me. I appreciate your thoughtfulness.

Sincerely yours,

Rec'd.

Dear Mr. Murrow:

We have long enjoyed your interesting program and January 3rd was no exception. However, you will note from the attached letter that it was quite noticeable in Mr. Marx's workshop that a hand saw was not shown. For this reason, we have sent to him a D-23 hand saw.

It was also brought to my attention that you would have use for an item of this type around your farm and your workshop, therefore, we are sending you, under separate cover, a D-23 hand saw with your name etched upon it.

We sincerely hope that you will accept this gift from us in the name of Mr. Arthur S. Nippes, Vice-President and General Manager.

Very truly yours,

William H. Heath

Dear Mr. Marx:

It was very enjoyable seeing you again in the presentation "Person to Person" with Edward R. Murrow on Friday, January 3rd.

Since our Company is one of the foremost manufacturers' of quality garden tools and hand tools, it was noticed by several of our personnel that a hand saw was not shown when a tour was made of your extensive workshop.

Because of this, we are sending you, under separate cover, our D-23 hand saw.

It is evident that you use and appreciate good hand tools and this particular saw is the world's finest quality and also the No. 1 choice of all professional tool users.

We sincerely hope that you will accept this personally etched saw in the name of Mr. Arthur S. Nippes, Vice-President and General Manager.

Very truly yours,

William H. Heath

Hebert, F. Ed

February 4, 1958

Dear Ed:

Who was it that said we Americans either "go crazy or go fishing"? I am afraid most of us were fishing while you and your Committee were issuing warnings.

I had a rather similar experience in trying to broadcast in the last four or five years pointing out what was happening to Russian education -- nobody cared.

I hope now that we have a little moon in orbit the country won't decide to go fishing again.

Sincerely,

The Honorable F. Edward Hebert
House of Representatives
Washington, D.C.

January 22, 1958

Mr. Edward R. Morrow
Colombia Broadcasting Corporation
New York, N.Y.

Dear Ed:

Because of the interest which is NOW being evidenced in so many quarters, government and otherwise, concerning the lack of scientists and engineers in this country, I thought perhaps you might be interested in the enclosed report which I have marked.

Americans are a funny breed, aren't they?

Since Sputnik went up everybody seems to be deeply concerned because Russia has reportedly outstripped us in the production of scientists and engineers. Much is being said about our educational system and its shortcomings. It would appear that this is a newly discovered situation. In reality this situation was called to the attention of the country a year and a half ago in very plain and clear language.

During the year 1956 the Armed Services Investigating committee, of which I am the Chairman, made an extensive investigation of the airframe industry as related to the production of military planes. During the course of this investigation we ran into the deplorable situation relating to scientists and engineers because of the void in our educational system on the elementary school level. Our report on the subject was clear and to the point. Now, rather suddenly, it seems to come as a surprise to some people that we have fallen down.

Continued -

This was all said a year and a half ago (July 13, 1956) but there was no Sputnik then and nobody seemed to care, much less pay any attention to the warning signals which we hoisted. It's the same old story. We must get backed into a corner before we act. Maybe you can do something with the enclosed.

Most sincerely yours,

F. Edw. Hébert

FEH:dg

Enclosure

It is, of course, not true to consider that all of the studies which go into design such as testing, study of friction, weights, stresses and the like is total loss, but, at least, it is immediate cash loss when the design competition fails.

These companies, therefore, have a risk, in addition to the prospect of contract cancellation, as our military requirements ebb and flow. When considering profits as a means to financial stability, this must be taken into account.

VIII. Shortage of Scientists and Engineers

While not stressed in our printed hearings, excepting as an item of expense in recruitment, the matter of scientific and engineering personnel required in this industry assumed alarming proportions as the subcommittee visited plants and talked with the personnel concerned with this subject.

In the course of the hearings, on contributions and donations, some emphasis was placed upon the school programs of several of the companies. These programs were varied in nature. Some were very comprehensive, ranging all the way from scholarship funds to donations for engineering and scientific schools.

We have, at this time, no firm rule among the services, as far as we are able to observe, on the cost allowance of such items.

If America is to maintain superiority, while it knocks at the threshold of space in the developments of both planes and missiles, it is apparent that we will need more scientists and a larger number of engineers.

There is a divided responsibility in this respect.

Both Government and industry share the duty of stimulating the sources which will produce needed personnel, both as an asset to business and as a need for the Nation. The problem of the companies is relatively plain. Such programs take money. They must be financed, obviously, out of the income of these several companies. There is no particular magic in discovering the source of this money. On the other hand, the Government, as the guardian of the national interests, has a duty to do its fair share in filling what is obviously a void in our national resources.

As we view it, the problem properly falls into several parts:

1. What can industry and Government, separately and in combination, do to stimulate a greater potential among our youth for the scientific and engineering vacancies which exist not only in the airframe industry as a matter of immediate concern, but in all industry?

2. What appropriately may be allowed charged against airframe contracts in cost allowances for the contributions, in money, made by industry to stimulate (*a*) the recruitment of scientific and engineering personnel; (*b*) the development of such personnel resources at (1) graduate level, (2) college level, and (3) high-school level?

We consider them in the inverse order. The high-school problem was the matter which stunned the subcommittee. In examining the data which the subcommittee has assembled, in addition to its printed hearings from the Department of Commerce, the Atomic Energy Commission, the Department of Defense, and most educational bodies, we are appalled at the scope of the problem of basic education for scientists and engineers. The fault is not wholly lack of money for our school systems.

A. Heffner

COLUMBIA BROADCASTING SYSTEM

June 22, 1959

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York 22, New York

Dear Mr. Murrow:

As you know, from my conversation with your secretary, William C. Foster was delighted that you should be willing to pursue the matter of FACES OF AFRICA with the higher-ups at Olin Mathieson. Mr. Foster suggested that Mr. Osborne, the President, has a vital interest in Africa and might be the best person to speak with.

I so much appreciate your willingness to help out this project in this way. We have not as yet gotten the kind of support we need. There seems to be an all-pervasive timidity amongst the industrial people with whom we have spoken. I suspect that there is a follow-the-leader psychology upon which we might capitalize, however, for I feel that a first sizeable contribution would lead to Yeses, where Nos have been the order of the day up to this moment.

Sincerely,

Dick Heffner

Presentation sent to Stanley W. Koenig of Olin Mathieson

Quiet Talk On a Sunday Afternoon

By DIANE LEONETTI

The biggest thing in television these days is talk.

Everybody who is anybody in the arts and professions is doing it, from some fairly eminent authorities on matter of public concern all the way to Zsa Zsa Gabor, who has made talk an end in itself.

Three years ago, when Richard D. Heffner launched "The Open Mind" on Channel 4, the idea of people sitting around just talking in front of a camera sounded almost foolish.

They have been doing just that on "The Open Mind" ever since. Three genuine Brains simply sit around a table for a half hour on Sunday afternoons (1-1:30) and discuss a subject they know something about.

Nobody drinks coffee. Nobody attempts to stir up controversy just to enliven things. The program's fascination—and it is sometimes, though not always, enthralling—lies in watching people think, and listening to some opinions that are worth your while.

The subjects—nearly all of them vital and therefore absorbing—have included race prejudice, alcoholism, homosexuality, psychoanalysis, divorce, drug addiction, the Fifth Amendment, censorship (in books, television, movies), the role of the press, leisure, the effects of radiation, the courts, the law, Madison Av., the beat generation, war and peace, love and violence.

Among the heads, egg and otherwise, that have popped up on the show have been those of Isaac Stern, violinist; Lionel Trilling, Columbia professor of literature, author and critic, and Dr. Nathan Kline, psychiatrist, director of research at Rockland State Hospital and winner of the Albert Lasker Award for work with tranquilizers, in a discussion of the connection between art and neuroses. (There is one.) Anthropologist Margaret Mead and Max Lerner, Post columnist, author and historian, grappled with the question of whether the sexes are losing their identity in this country. (No decision.)

The Approach

Dean Lawrence Chamberlain and Professors David Donald and William Leuchtenburg of Columbia's political science department, tackled "The Presidency—Part 1," a discussion of whether the candidates for President are really the people's choice. Professors Allen Nevins, Richard E. Neustadt and William Leuchtenberg, of Columbia's history and political science departments, discussed the contributions of political parties, campaigns and conventions to electing a President in Part 2.

Richard Heffner, the program's originator, producer and moderator, has managed several remarkable feats in connection with "The Open Mind." Just keeping it on the air without a sponsor for three years is one. As moderator, he manages to stay out of the discussion for long stretches when it is going well, something few moderators on television seem able to do.

More important, though, is the manner in which he pins the talk down to one specific area, so that the tendency toward diffused, dull discussion of too broad a subject is minimized.

He doesn't just turn people loose to discuss alcoholism, for example; on a single program the discussion will be limited to "the available methods and agencies for treatment."

A program on homosexuality will be kept to a discussion of "whether or not it can be detected in children, and, if so, how to halt its growth."

This keeps the guests from wandering all over the subject, and brings out hard facts. Finally, the discussion is open and fairly uninhibited, even on controversial matters.

Not that the program, for all its vitality and candor, has a big following. By scheduling it Sunday afternoon, the time set aside by the television industry for intellectual pursuits, and by presenting a vital question and some good minds to work on it, with no gimmicks or palliatives, WRCA-TV has guaranteed the show a minimal audience. Heffner likes to feel that his audience is made up of "opinion makers," and it undoubtedly includes many such, but they are a small group by television standards.

"It's only because of enlightened station management that the program's been kept on the air," Heffner said the other day. "Admittedly it caters to a minority."

The original idea of "The Open Mind" was to try to counteract the atmosphere of caution which kept people from speaking their minds, especially on television, in the years that followed Senator McCarthy's rise and fall. The antidote prescribed by Heffner couldn't have been simpler: quiet, responsible discussion of some of the important issues of our time.

Now and then it has been necessary to stir up audience interest by setting up a controversial show with guests who differ violently, but such occasions are rare.

"I think the best shows are not the controversial ones," Heffner says. "I like the ones where you can really see people thinking. I wish there were more room for open-minded analysis without all this heat, but it's not popular in this country." One wondered why.

"We don't stop to think, we don't listen," he declared. "We have no real tradition of reflection, even those of us who call ourselves intellectuals. 'The Open Mind' couldn't be overwhelmingly popular, because it is based on quiet reflection and thus antithetical to contemporary American philosophy."

"Open Mind's" producer is a serious, mild mannered young man of 33 who is keeping his head above water admirably in a medium that gobbles people like him alive. His program, like all the good public service shows, has been bounced all over the place and had its time changed so often that only the most determined and devoted fan could keep up with it. It was even cut down, for a time, to every other week. But it couldn't be killed off, and now it's back weekly again.

New York City-born and educated (De Witt Clinton, Columbia), Richard Heffner wanted to be a lawyer until, in college, he fell in love with the study of history. He later taught history at Rutgers, Columbia and Sarah Lawrence.

Classroom Romance

He met his wife, Elaine, a former child therapist with the Jewish Board of Guardians, on a blind date, and courted her mostly by sneaking into classes with her at the New York School of Social Work. They were married in July, 1950, and now have two children, Daniel, 3, and Charles, born a couple of months ago.

Heffner got into broadcasting in the spring of 1953 with an idea for a documentary program about Franklin Roosevelt, one of his two heroes in American history (the other is Lincoln). It was his feeling that, eight years after Roosevelt's death, a memorial show ought to be done to help stem the wave of anti-New Deal sentiment then prevalent. He made the rounds of radio and television stations with his proposal, which got him quickly ushered out of every place but one—WMCA. The boss, Nathan Straus, liked it.

On April 12, 1953, the eighth anniversary of Roosevelt's death, WMCA presented Heffner's tribute to FDR, a half-hour documentary that included taped interviews with visitors to Hyde Park, excerpts from Roosevelt's speeches, and an interview with Mrs. Roosevelt.

This led to a weekly half-hour program on WMCA called "History in the News," and Heffner gave up full-time teaching. He later went to NBC Radio, and in 1955 got his first television job as producer, writer and host of "Man of the Year" on WRCA-TV. On this show, he would select a year from the American past, do a bit on the outstanding man of that year, and finish up discussing the man with guests.

In May, 1956, he launched "The Open Mind," which has since won half a dozen awards and which he calls "probably the single most rewarding experience of my professional life." (At first he said "the most rewarding experience of my life," but that, he decided seconds later, is having sons.)

But he still holds to the original dream that brought him into the broadcasting—that news analysis ought to be done by historians like himself. If he could do exactly what he wanted, Heffner would be handling a program of news analysis and "The Open Mind" too.

In the spring of 1957, he got into educational television as program director for the Metropolitan Educational Television Assn. In that capacity, he has presented documentaries, the Budapest String Quartet and Russian language lessons, among other things, over a variety of stations both commercial and educational.

Richard D. Heffner
The fascination: watching people think.

Heffner is also special consultant to the National Educational Television and Radio Center for a massive project called "Faces of Africa," a series of 26 half-hour films to be shown on television and distributed to schools. It will cost a great deal of money, and Heffner is now engaged in raising it.

Although he's deeply involved in educational television, Heffner doesn't take the average intellectual's dim view of the fare on commercial channels.

"I'm a firm believer in alternative programing," he says. "There ought to be something for everybody, and some alternative to commercial programing for those who don't care for it. We should have a full time educational channel.

"But I don't go along with the people who are constantly criticizing commercial television. I say to them, put up or shut up. Get yourselves an educational channel. They have them in 40 cities, why not here?"

Heffner is also working on three books. One is a second volume of his "Documentary History of the United States," dealing with cultural and intellectual aspects. (The first volume was published by Mentor paperbacks in 1952.) Another is "a study of the New Deal and Franklin Roosevelt told in terms of his contemporaries, a documentary history of the whole New Deal period." Lastly, he's trying to put "The Open Mind" between covers.

"It's terribly hard to do," he concedes, "because the flow of talk in ad lib conversation reads badly. I sound like Dwight Eisenhower in his press conferences."

For all his attachment to FDR, whom he just missed being old enough to vote for, Heffner is a political independent, although he leans toward the Democrats.

"I couldn't be anything else but independent," he says, "because I'm opposed to orthodoxy of any kind. Unfortunately, we live in a world tied up in all kinds of orthodoxies—liberal, conservative, progressive, reactionary.

'The 'Open Mind' is not just the title of a show, but an expression of a way of life I happen to believe in. Given what is happening in the world today, I don't see how you can dare have anything else *but* an open mind."

On a recent "Open Mind" program, Heffner (r) presided over a discussion of juvenile delinquency by (l to r) Dr. William C. Kvaraceus, of the National Education Assn., Mary C. Kohler, former juvenile court judge in San Francisco, and Prof. Alfred Kahn, of Columbia's New York School of Social Work.

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York 22, New York

Dear Mr. Murrow:

May I now put to you a plea for help in the matter of Olin Mathieson. John F. White, the President of the National Educational Television and Radio Center, Dr. Emory Ross, the President of the African-American Institute, J. Wayne Fredericks of the Ford Foundation, and James S. Coleman of UCLA and I have just met to discuss the plight of FACES OF AFRICA. It is simply going to take a good deal of pushing at the highest possible levels of American industry to hurdle the objections of the timorous.

I took the liberty of telling these gentlemen about your offer to speak with the President of Olin Mathieson about this project (another copy of which I am enclosing for your use). Would you be so kind as to help us out in this way at this very moment. We are all aware of the fact that you are leaving soon and, in all honesty, we would like to -- and desperately feel the need to -- impose upon your kind offer now. If any of us can, in your estimation, add anything in person to a discussion between you and the President of Olin Mathieson, I know that the Committee members will make every effort to make themselves available at your convenience.

Sincerely,

Richard D. Heffner

Dear Mr. Heffner:

I have looked at the list but I am afraid that, except for International Harvester, I am indeed a broken reed. I have not yet been able to reach Bill Wilson, but will hope to do so next week.

About PERSON TO PERSON, I am sorry to say that we have only four more programs to do and they are all committed. I will communicate with you after I have talked with Wilson.

Sincerely yours,

ERM:skh

27 May 1959

Dear Mr. Murrow-

I suspect that I blocked on this when I saw you today and when I sent off a further note this afternoon. "Blocked" for good reason, for this sounds kind of silly as I write it out (and it sounded equally silly when I wrote Sam Rosenman a note about it some time ago). But I'll never be happy till I make the pitch: in terms of focusing some attention - to be perfectly honest - is there any room left on this year's PERSON TO PERSON for an unknown like me, who is involved in educational television, public affairs, and history sufficiently as to be of some interest?

Now I've gotten it off my chest.

Sincerely,

Dick Heffner

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York 22, New York

Dear Mr. Murrow:

Thanks for seeing me. At the Pearly Gates, ~~we~~ you(!) will still have to answer for the fact that you were the only one to give me encouragement six years ago, when I tried to get into this field! I am still grateful to you -- for then and for now!!

I am enclosing a list of the major corporations with economic involvements in Africa. If you run down this list and find corporations with which you have some association and with which you might help me, FACES OF AFRICA will be that much further along. As you know, right now the project has been read and evaluated with a plus sign by a good many Africanists. And others. But we have got to get that first sizeable contribution before the project can really get rolling. I would like to know whatever word you have on this matter.

Again, I am still very much plagued by this general question of where to go and what to do in this ephemeral field of communicating ideas and information about matters of public policy. Your advice and assistance here, too, will mean a great deal to me.

Sincerely,

Richard D. Heffner
Executive Producer, Africa Project

P.S. If you can make good use of more copies of the FACES OF AFRICA presentation, please let me know. Meanwhile, I will wait out word on Bill Wilson and International Harvester.

Radio Center
10 Columbus Circle
New York 19, New York
JUdson 6-0055

Executive Producer, FACES OF AFRICA, 1959 -
A joint project of the National Educational Television and Radio Center and the African-American Institute, this series of 26 half-hour films is designed both for commercial and educational television and for general viewing by schools, colleges, universities and community groups in this country and abroad.

Producer-Moderator, THE OPEN MIND, NBC-TV, 1956 -
This weekly half-hour TV discussion program, telecast live in New York and Boston, is rebroadcast on radio in New York and several other cities. It has twice received both the Robert E. Sherwood Award and the Freedoms Foundation George Washington Award. Other honors include the Ohio State Award, the National Conference of Christians and Jews Brotherhood Award, and a special George Polk Memorial Award in Journalism.

Director of Programs, Metropolitan Educational Television Association (META), 1957 - 1959

Executive in charge of programming and production.

Producer: CONCEPT OF FREEDOM (CBS-TV, May, 1958; winner of the Robert E. Sherwood Award); THE NEGRO IN AMERICAN LIFE (WCBS-TV, November, 1957; winner of the National Conference of Christians and Jews Brotherhood Award).

Executive Producer: PRESENTING THE BUDAPEST STRING QUARTET (WCBS-TV, October, 1957); LANGUAGE AND LINGUISTICS and ASTRONOMY FOR YOU (for national distribution by the National Educational Television and Radio Center); BASIC RUSSIAN, CONTEMPORARY THEATRE, FRENCH THROUGH TELEVISION (WPIX, September, 1958 - May, 1959).

Director of Public Affairs Programs, WRCA-TV, 1955 - 1957

Executive in charge of programming in the public affairs and public service area. Responsible for the development of program ideas and for the administration of all departmental activities.

Producer-Moderator: MAN OF THE YEAR (winner of the Ohio State Award); PRINCETON '56; ALL ABOUT WOMEN, ALL ABOUT MEN; PROFILE.

Free-lance Writer, Producer, Broadcaster, 1953 - 1955

Producer-Writer-Narrator: HISTORY IN THE NEWS (WMCA, New York; WCPO, Cincinnati; WWDC, Washington, D. C.)

Radio news reporter: ABC Radio

Producer-Writer-Narrator: THIS WEEK IN HISTORY (NBC Radio); COLLECTOR'S ITEM (NBC Radio).

Academic Experience:

Assistant in History, University of California at Berkeley; 1947-48
Instructor in History, Rutgers University; 1948-1950
Lecturer in History, Columbia University; 1950-1952
Professor of History, Sarah Lawrence College; 1952-1953
Lecturer in History and Political Science, The New School for Social Research; 1952-

Author/Editor:

Dear Mr. Murrow:

I rather thought that you might be interested in at least the tenor of the enclosed remarks. Besides, if back last spring in your speech before the A. J. C. you were referring to the "hole in the head" and "The Open Mind" that appear under my producing and moderating auspices on NBC on Sundays, why Thanks!

Many times I think back to the fact that when Chief Justice Warren imposed upon you to talk with me several years ago, you were the only person in the whole damn television industry who encouraged me in my ambition to leave full-time college teaching and turn my energies towards television. I know how very busy you are, but some time I would appreciate an opportunity to talk with you again.

Sincerely,

Richard D. Heffner
Director of Programs

ADDRESS BY RICHARD D. HEFFNER

for the American Women in Television and Radio

January 22, 1958

Many people ask me "What's wrong with Educational Television". And by this they mean the kind of non-commercial educational television I practice at META, not the kind practiced by Brice Howard and Professor Zulli. Well, there isn't anything wrong with educational television that isn't wrong with commercial TV ... but the trouble is that the converse is equally true: that there isn't a blessed thing wrong with commercial TV that isn't wrong with educational television, and with a vengeance!

Commercial TV's uncertainties, confusions, planlessness, jealousies, rivalries, backbiting, glory seeking, dog-in-the-mangering, are all to be found full-blown in what I'll now call ETV for brevity's sake. Unhappily in ETV these are compounded by dint of their very unexpectedness in non-profit land and by a seemingly indigenous kind of naivete which presupposes that the world owes us ETV people a living. Naively we assume that because we have "right" and a terribly real purpose on our side -- and I believe that we do -- somehow and of necessity, no matter what we do or do not do, we will magically end up on top of the heap in regards our dealings with unions, with newspapers, with the government, with commercial stations, with foundations and gift-giving private citizens and - Yes - even with our constituent educational institutions, colleges, museums, libraries, etc. And the trouble is that this just isn't true. We aren't ending up on top of the heap. So that while so many of us in ETV go our merry way, running the gamut of unrealistic expectations, the fact of the matter is that we are losing ground on many scores. We aren't

God's chosen people; nothing is going to be handed to us on a silver platter; and the way ahead for ETV is filled with more boobytraps than any of us can even imagine.

Well, that's quite an indictment of educational television people, and it's a hint -- though not a very subtle one -- of some of the really enormous problems before us. For instance, to be perfectly blunt: we're not having an easy time with the unions -- surely not here in New York where at least for the time being there is no VHF channel assigned by the FCC specifically for non-profit educational use and where educators must telecast over commercial stations which generously contribute their air time but which are -- correctly, I feel -- bound by union requirements which now unfortunately are held to be binding upon us as well. And this -- I feel very strongly -- is totally incorrect. As long as the unions think of us and treat our always non-profit educational programming in just about the same light and from just about the same vantage point that they treat commercial TV, then we are simply lost. We just shan't be able to stand the gaff. There aren't any two ways about it -- and I say this as a loyal, card-carrying union man myself.

META must solve a lot of problems that concern government, too. I mean the state government and the local government, for they are still the primary public agencies responsible for education. Specifically, what financial arrangements can we make with them and with their educational divisions? What help can and will they give us without making us a wholly tax-supported state or municipal function,

in which case we might suffer from the controls that so frequently accompany total subsidization.

To look elsewhere for a moment -- as Jack Gould pointed out even too many months ago -- META must learn now how to reach out to the community at large, how to make our existence known, our influence felt and our needs sympathetically understood and met by an informed and highly solicited as well as solicitous public. We haven't done this adequately as yet...but we must if we are to survive.

And if we are to survive, we must as educators begin to philosophize a great deal more wisely as to what we are about -- what enormous opportunities and tasks lie before us and what are the long range implications of the various approaches to educational television that are being set forth. By this I mean that for the immediate future we had pretty well better get together much more than we have up to now and let the jurisdictional disputes and the petty rivalries go by the boards. Fortunately, META is broadly representative of the metropolitan area's various educational and cultural agencies and institutions at their highest policy-making levels. And I hope that, soon, enough common sense and enough good will shall prevail at other levels as well so that increasingly META can act as education's TV spokesman, as well as a prime educational television programming and producing center in this greatest of all metropolitan areas.

But it's precisely when I begin to talk about our obligation to philosophize about educational television that my very harshly drawn bill

of particulars against ETV's past and partially its present personnel begins to seem less and less of a bitter pill to take. Our mistakes must unquestionably be recognized and corrected -- but they must never blind us to the fact that the promise of educational television is something truly wonderful, something that excites and challenges the imagination of everyone who believes, if not in the infinite, then at least in the finite self-perfectibility of mankind. We have here in non-profit educational television what we can potentially make into the most powerful weapon at our disposal as we try to meet the cultural, educational challenges that stretch before us in this second half of the 20th century.

To be honest with you, as a teacher and as an historian, I'm perfectly terrified by those monomaniacal foundationeers and publicists and educational administrators who define educational television almost exclusively as televised education, as academic courses given electronically, and who see the vhf or the uhf channel as the inexpensive mechanical solution to all of our various educational crises. As a matter of fact, I shudder at the very thought of making the tv set in any important way a substitute for the classroom, face-to-face teacher. Of course, I think that formal televised education can help out in our over-all schoolroom and teacher crises, but only when taken in wise doses and when integrated fully with the idea that in its broadest and best sense ETV is Community TV, the idea that properly speaking, ETV consists of balanced portions of cultural and informational, as well as formally instructional programming.

The giant task before educators today concerns itself just as much with non-academic, community adult education as with formal in-school education. And this will be the case more and more as tomorrow's automated Age of Leisure comes upon us. Which, Ladies and Gentlemen, is why non-profit educational television is so important. For it alone can serve the entire community ... at all times ... persistently catering to different minority educational needs and wants with what I like to call alternative programming, where fine music and art, formal courses, informational programs and what-have-you educationally will all have a real, rather than a unique or "once-in-a-while" place within the framework of a station that offers alternatives to commercial fare 12 to 18 hours every day of the week.

But don't get me wrong. Zulli is great...but he's on the air only because WCBS-TV and the man Jack Gould called the station's "cultural overseer", Sam Cook Digges, want very much to serve the public within the means at their disposal (and by that I mean the time they can snatch away from more financially profitable ventures). Similarly, Brice Howard's IGY and the other NBC-ETRC programs put on by Ed Stanley perform a most important educational function within the framework of commercial TV restrictions. But the hard cold fact is that commercial television -- predicated essentially upon providing profit-making entertainment for the largest possible segment of the population at all or at most times -- commercial television simply cannot provide at length

or in depth the alternative cultural, informational and formally instructional programming so badly needed on any consistent, dependable and extensive basis. Not with all the good will in the world could commercial TV provide this, and we have no right to demand that it should, no more than we have a right to demand of any other legitimate industry that it at all times sacrifice profit to a continuing community service. We must provide that community service ourselves...and for all its present faults and failings, non-profit educational TV can work. But, of course, as for me and META, until we get our own channel, Sam Digges and Brice Howard and Bill Davidson and all of our colleagues -- I've only been kidding, fellows, and I'll continue to beg, borrow and steal all the commercial time and even facilities that aren't nailed down. It's all for the cause!

Heideman, Wm

December 11, 1958

Dear Mr. Heidemann:

I have your nice letter of December 4th.

Unfortunately, due to my extremely busy radio and television schedule, I have been forced to decide not to undertake anything in addition to the planning of my programs, therefore, I cannot accede to your request.

I am sorry, but am sure you understand.

Sincerely,

Mr. William R. Heidemann

Dear Mr. Murrow:

Indiana University's Audio-Visual Center is about to finish a technicolor and sound motion picture devoted to men's social fraternities. In an effort to lend prestige to this film which technically and content wise seems to be a professional product I am seeking to obtain the best possible narration for this film.

It would seem that you are a fraternity man and for this reason I might persuade you to make a brief introductory and closing narration of this film. The strength of your feelings for the fraternity system are not known to me but if you feel strongly on the subject I would hope that you would take this opportunity to facilitate its growth.

The demands upon your time are great and we are in no position to offer you any consequential sum of money beyond expenses for your participation, therefore, your participation would be a labor of love. If you are inclined to accept this invitation and the demands upon your time are not so great as to exclude the possibility, I would be happy to send you any further information which you might desire and work out the details of the project with you.

Sincerely yours,

John H. Heiney

ACTION

2 West 46th Street/New York 36, N.Y.

ANDREW HEISKELL
Chairman of the Board

April 6, 1959

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Ave.
New York, N. Y.

Dear Mr. Murrow:

ACTION's Newark Conference on the American city on May 4, 5, and 6, to which you are receiving a formal invitation, will be our first national meeting. We are going to spend very little time at it in talk about the problems of urban centers. I think we are all well enough aware of what they are, at least in their more dramatic forms.

Instead, we expect with your participation in the sessions to come up with a set of goals for the American city that you and the other persons attending the meeting believe are accurate expressions of the tremendous potential of our urban areas. And to match these goals, we expect to hammer out a practical program for local action. We believe that this effort will help you not only to make better decisions in your business and organizational planning but to play a more decisive role in the future growth and development of your community.

We were determined not to impose upon your time for a working conference like this until we had the facts that are required for the formulation of viable policies. Now that we have completed our three-year investigation of the present condition of American communities, particularly with respect to their housing, we know that our joint effort can be tremendously rewarding in terms of a fresh outlook on the future of the American city.

ACTION's investigations in this field are the most comprehensive to be undertaken since the mid-1940s. Events since the end of the Second World War have changed the face of America, redistributed its population, and raised its gross national product to a level few had believed possible. This great productive capacity of our economy provides us with the highest per capita income any people have ever had. Because of it we own more TV sets, more washing machines, more automobiles than people in other countries. We have access to more telephones, more kilowatts of electric power, more miles of highways. We buy more literature and phonograph records. We travel more widely in our own and other countries. We have more paid vacation time, work shorter hours, and perform less manual labor. We are rich in art museums, symphony orchestras, and educational institutions. We are better fed and better clothed.

All these achievements are essentially the product of activity that goes on in cities - but in cities where blight and decay are more widespread than most of us realize, and spreading faster than most of our present efforts to correct them.

In our investigations of the American city, we emphasized housing and its related facilities because together they make up the largest concentration of this urban decay, and because together they represent the greatest portion of our urban wealth. The value of dwellings alone stands at over $300 billion, a figure twice as large as the assets of the country's 500 biggest manufacturing companies. Moreover, the land area that is devoted to housing in cities is frequently half or even more of the total. Not only is housing the largest single item in our national wealth, but that part of it which is newly constructed amounts on the average to more than a fifth of all our capital expenditures.

If these circumstances are not reason enough to require nationally--and locally-held policies toward them, consider that we have already invested some $600 billion in urban real estate. The safety and stability of our national economy depend on the way we protect and enhance this investment. We are not so rich that we can afford to continue to permit the low standard of efficiency and satisfaction that our cities provide as places to work and do business, nor the staggering loss in social and economic values that arises from the condition of our urban housing and its neighborhoods. Nor, I hope, are we so lacking in imagination and purpose that we do not see in the present situation the opportunity for creating a wholly new urban environment, one that will be consistent with the facts of our expanding economy.

The major components of the urban problem are so well publicized these days that we are all familiar with them:

- the massive concentration in the suburbs of middle-income families with their high purchasing power;
- the simultaneous movement out of the central city of tax-paying business enterprises;
- the traffic congestion that is incalculably costly in time and money;
- the low level of public services and the general inadequacy of community facilities like schools, parks, playgrounds, hospitals, and the like;
- the mounting social and economic costs of slums and unnecessarily rapid obsolescence.

These are matters that worry me and I am sure worry you. However, they have given rise to so many clichés that they tend to obscure the fundamental fact that change is a continuous process of development.

Take the phrase "flight to the suburbs" which conjures up a picture of a 20th century deserted village. Millions of people live in the cities. Indeed, most cities cannot accommodate populations much larger than

their present ones. Isn't the "flight" merely growth - socially and economically unbalanced growth during these early stages, to be sure, but growth that is indicative for the long run of a new urban form?

Or "Interurbia" - that planners' city that stretches from Maine to Virginia or New York to Illinois. Is this really a potential nightmare of urban sprawl - or is it simply a statistical convenience for estimating the vastly increased pulling power of new regional markets?

The "Balkanization" of government in metropolitan areas is another favored cliché to warn of urban malfunctioning. But is the structure of government primarily at fault? It is significant, I think, that whenever the question of metropolitan consolidation is put on the ballot the voters almost always turn it down. They turn it down even when they are critical of the inefficiencies, inadequacies and inequities that clearly do exist within the area with respect to such important matters as housing, transportation, and community facilities and services. ACTION's researchers conclude that local autonomy still provides the better opportunity for the variety of individual choice that is necessary if an urban area is to perform its historical role of diversity.

The migration of the "organization man," which is popularly supposed to have pushed the boundaries of Suburbia into Exurbia, is a well-worn target for jokes as well as for sociological study. But there is no doubt that the single-family detached house that this new environment provides in unending numbers is the preference of most American families.

Then we are told that "downtown is dying." But is this necessarily so? Martin Meyerson, ACTION's vice-president for research, who has recently been in many of the world's large cities, tells me that the kind of change that is taking place in the downtown areas of American cities is typical of all cities that are in a period of dynamic expansion. The very diversity of the downtown area seems to encourage birth, growth, and adaptation of activities which thrive on a concentration of facilities and even on a congestion of space, both characteristics of the central section.

Of course, these and all the other clichés about the urban problem have a basis in fact.

- It is true that retail sales in downtown areas are off.
- It is true that the concentration of middle-income families in the suburbs is creating low-income and minority ghettos in some cities.
- It is true that traffic congestion is worsening, that community facilities are inadequate, and that obsolescence of the city's physical plant is increasing.
- It is true that deficient and inadequate housing is the shame of the American city.

But the point I am making here is that if we are going to take advantage of the opportunities that change presents us with we must challenge existing assumptions and define a new set of directions within which urban policy can be formed.

It is an economist's maxim that the laws of the market place generally rule. High demand and small supply mean large rewards in housing as well as in other consumer goods. But our national interests - particularly as they focus on the continued growth and development of our cities - often will require from us a different set of values from those fixed by the market.

Throughout ACTION's investigations we have come up against the consequences of uninformed and undirected choice. The American passion for specialization encourages us to view problems in isolation, and to try to solve them one by one within the context of the special difficulties each presents. For example, we argue the choice between the automobile and public transit mostly on the evidence of the transportation experts instead of within the context of a sharply defined urban goal that adds the facts of efficiency, privacy, homeownership, labor markets, and recreation facilities to the facts of mobility and cost.

When we make a special case of each problem we lose sight of the relationships among them and thereby lessen our capacity for acting consistently and purposefully.

One of the things that struck me most forcefully when I became chairman of ACTION's board of directors and had to dig into issues like the ones I have been talking about here, was the fact that the kind of problem-solving and programming of effort that is routine in business is just in its infancy in urban policy-making. Life magazine recently spent $1,500,000 on a study of the urban consumer - his habits, his preferences, his individual decisions on the allocation of his income. Although we made the findings of the survey available to scholars and interested institutions for exhaustive analysis of collateral detail, we undertook the study for the principal purpose of finding out all we could about our own market. The point of this personal reference is that a single business spent more to estimate its market than has been spent on all consumer research in housing and community development in the last ten years.

ACTION's investigations, however, now provide us with a vigorous and uncompromised starting point from which to frame an urban agenda.

Everything that happens in a city - and everything that doesn't happen - results from the policies and decisions of five principal actors on the urban scene.

The Investor - without whose money new housing cannot be built or old housing restored to useful life; without whose money business and industry stagnate and imaginative proposals for new urban forms die aborning.

The Producer - whose technological skills, whose productive capacity, and whose marketing genius are still largely unindustrialized in the field of housing as we move into a period of unparalleled demand for dwellings and related facilities.

The Consumer - whose dollar is sought by competing goods and is spent in satisfying conflicting wants; whose needs are sometimes out of line with his preferences and his preferences often unheeded by the other urban decision-makers.

The Federal and State Governments - whose investment in, and responsibilities for, urban growth are so great that they are strong partners in the solution of community problems through enabling legislation and grants of credit and technical aid, and through building programs for new highways, airports, hospitals, and the like.

The Community - whose public officials and business and civic leaders have responsibility - and unparalleled opportunity - for joint action on ways to improve the city's physical plant and to provide bold and imaginative plans and designs for future development.

You may not be an investor or a producer in the terms I have just used. But you are a consumer, you are a person who is responsible to and for our government, and you are a member of a community. More important, you are in a position of leadership where your experience, your opinions, and your participation are essential to the task we all share equally. The task of turning urban loss into profit. The task of turning urban change into sound and healthy development. The task of turning urban blight and obsolescence into decent living for all families.

Never before has the opportunity been so real. Never before have we had so many effective tools to use. Wherever I go, I find that municipal officials are more and more accepting the techniques of city planning as a major source of specialized information on which to base municipal decisions. The market research departments of large businesses, universities, and government are all providing new analytic methods readily adaptable to a wide range of urban measurements. All levels of government are authorizing both the authority and the means for local improvement programs. But most important of all, perhaps, is a fast developing channel of communication among the persons who make the key decisions in urban areas. In ACTION this is the main activity of our Educational Program Committee chaired by board member Guy T. O. Hollyday and directed by Leo Molinaro, vice-president for educational programming.

I don't know another city where communication is as swift and effective as it is in Newark. That is one reason why we are holding our conference there.

Another reason is that Newark is mobilizing its private and public resources in a remarkably full-scaled attempt to reverse what a few years ago appeared to be a hopeless drift to economic and physical deterioration. The business and civic leaders in Newark who will be your

hosts at the ACTION conference will tell you frankly that the reason they invited us there is that they want to test their progress against that of other cities, and that they want a hand in developing the ACTION program which they expect to convert to their own requirements in the future.

One day when we were discussing some of the details of the conference I asked Paul Stillman, chairman of the board of Mutual Benefit Life Insurance Company, in whose new building most of the conference sessions will be held, why they decided not to build their new home office out in the suburbs as I knew they had originally intended. He answered quickly: "Partly out of conscience. We had to face the fact that the conditions in Newark that made us want to get outside the city were the responsibility of large business enterprises like ours as much as they were the city's. But mostly because we have been identified with Newark for more than a hundred years. We felt it would be a damaging reflection on us if we admitted by moving that we had had so little impact on the course of Newark's development that Newark was no longer a profitable and efficient location for our operations or a pleasant and satisfactory home town for our employees."

Stillman's blunt frankness is refreshing. It is the same kind of response I get whenever I talk about Chicago with Ferd Kramer, ACTION's vice-chairman for research, or about Baltimore with Jim Rouse, ACTION's president. Men like these know that the job of making the American city a truly good environment for living and work is well within the reach of our technology and our economy. They say its only limits are people and their opinions.

ACTION is not seeking your endorsement of a ready-made program for involving the one and influencing the other. We are asking your help in framing the goals toward which they can be effectively used. When we have done so, we believe the leadership group in every American city will be galvanized to produce the definitive answers that are required if creative policies are to work on the side of urban renewal, rebuilding, and revitalization.

My fellow directors on ACTION's board, the ACTION staff - headed by James E. Lash - and I all look forward to joining you and other business and civic leaders in Newark on May 4, 5, and 6.

Sincerely,

Andrew Heiskell

Andrew Heiskell

P.S. After receiving your acceptance to the formal invitation to the Conference, we shall be sending you later this month several specially prepared policy background papers for your Conference participation.

Memo from: James E. Lash
Executive Vice President

Your invitation is on its way. Attached is advance Conference program. Early replies indicate full registration of highly responsible participants.

Announcing

The Newark Conference On the ACTION Program For The American City

MAY 4-6, 1959 • NEWARK, NEW JERSEY

MONDAY, MAY FOURTH — 6:00 P.M. RECEPTION AND DINNER

Theme: The American City, The State, and The Nation

One of The American City's strongest partners is the State government, from which the City derives its legal authority and various forms of assistance. It is highly appropriate, therefore, that the Conference will hear from the governor of the nation's most highly urbanized state, **The Honorable Robert B. Meyner, Governor of New Jersey.**

The American City also is both component and product of the national economy. **Dr. Raymond J. Saulnier, Chairman of the Council of Economic Advisors,** will discuss aspects of national fiscal policy and their relationship to urban renewal and development.

Mayor Leo P. Carlin will welcome the Conference participants.

TUESDAY, MAY FIFTH — 10:00 A.M. GENERAL SESSION

Theme: An Agenda for the American City

ACTION's President, James W. Rouse, will present a set of goals for The American City to be attained by private and public actions.

National business leaders and urban specialists will comment on agenda items from their fields of specialized experience. **ACTION's Vice Chairman, Ferd Kramer, and Vice President for Research, Martin Meyerson,** will present policy issues for The American City derived from ACTION's three year investigations in housing and community development.

LUNCHEON SESSION

Theme: The Economy of the American City

Mr. Ralph Lazarus, President of Federated Department Stores and a Trustee of the Committee for Economic Development, will offer an appraisal of The American City in relation to the national economy and suggest the resulting obligations of businessmen in the conduct of their businesses and as civic leaders.

2:30 TO 4:30 P.M. WORK GROUPS

Theme: An Agenda for Policy: Housing and Community Development

These work groups, meeting concurrently, will deal with the principal decision makers affecting The American City — the investor, the producer, the consumer, the community, and the government. Conference participants will join panels of distinguished experts for the purpose of contributing to the formulation of urban policy objectives and content. A working document of policy recommendations will be the focus of analysis and discussion throughout the sessions.

6:00 P.M. RECEPTION AND DINNER

Theme: The American City: A Call for Statesmanship

The Conference will be addressed by **The Honorable Adlai E. Stevenson.**

WEDNESDAY, MAY SIXTH — 10:00 A.M. GENERAL SESSION

Theme: An Agenda for Local Action: The ACTION Program for the American City

A visual presentation of the elements of an effective local program will be presented. Conference participants will be invited to comment upon a working document of an "Agenda for a Good City." Civic and governmental leaders from cities across the country will give on-the-scene reports and comments by means of telephone interview. After Conference discussion and criticism have been incorporated, the "Agenda" will be published for general national distribution.

Luncheon Session: The Conference will end with luncheon for all participants

PROGRAM PERSONNEL

The following is a partial listing of distinguished leaders in business, government and urban affairs who will appear on the Conference program.

Edward C. Banfield, Associate Professor, University of Chicago

Alan K. Browne, Vice President, Bank of America NT&SA, San Francisco

W. O. Campbell, County Manager, Dade County, Miami

John Dunlop, Professor, Department of Economics, Harvard University

John M. Dyckman, Professor, Department of City Planning, University of Pennsylvania

Edith Brazewell Evans, Editor, *Living for Young Homemakers*, New York City

Ben Fischer, Intl. Representative, United Steelworkers of America, Pittsburgh

Dr. Nelson N. Foote, Research Consultant in Sociology, General Electric Company, New York City

Dr. George Graham, Director of Governmental Studies, Brookings Institution, District of Columbia

Frederick Gutheim, Staff Director, Joint Commission on Washington Metropolitan Problems, Congress of the United States, District of Columbia

Neal Hardy, Director, National Housing Center, District of Columbia

Guy T. O. Hollyday, Chairman, The Title Guarantee Company, Baltimore

Andrew Heiskell, Publisher, *Life Magazine*, New York City

Reginald R. Isaacs, Head of Department of Planning, Harvard University

Roy W. Johnson, Director, Advanced Research Projects Agency, Pentagon, District of Columbia

Burnham Kelly, Professor, Massachusetts Inst. of Technology, Cambridge

Philip M. Klutznick, Chairman of the Board, American Community Builders, Inc., Chicago

Carl Koch, Carl Koch Associates, Cambridge

Ferd Kramer, President, Draper & Kramer, Chicago

Ralph Lazarus, President, Federated Department Stores, Cincinnati

Julian H. Levi, Executive Director, South East Chicago Commission, Chicago

Joseph W. Lund, Executive Vice President, R. M. Bradley & Co., Inc., Boston

Harry K. Madway, Madway Engineers & Constructors, Wayne, Pa.

Stanley Marcus, President, Neiman-Marcus, Dallas.

Martin Meyerson, Director, Harvard-Massachusetts Institute of Technology, Joint Center for Urban Studies, Cambridge

The Hon. Robert B. Meyner, Governor, State of New Jersey

C. R. Mitchell, President, U. S. Savings & Loan League, Kansas City

John N. Mitchell, Caldwell, Marshall, Trimble & Mitchell, Municipal Bond Counsel, New York

William W. Nash, Dept. of City and Regional Planning, Harvard University, Cambridge

James R. Price, President, National Homes Corporation, Lafayette, Ind.

Leslie Reese, Director, Pennsylvania Economy League, Inc., Pittsburgh

Sidney Rolf, Economist, CIT Finance Corporation, New York City

James W. Rouse, President, Community Research and Development and James W. Rouse & Company, Inc., Baltimore

Stanley J. Ruttenberg, Director of Research, AFL-CIO, District of Columbia

Dr. Raymond J. Saulnier, Chairman, Council of Economic Advisors, District of Columbia

The Honorable Adlai Stevenson, Chicago

Oskar Stonorov, Architect, Philadelphia

William Wheaton, Professor, School of Fine Arts, University of Pennsylvania, Philadelphia

William H. Whyte, Jr., Assistant Managing Editor, *Fortune Magazine*, New York City

Louis Winnick, City Planning Dept., Economist, City of New York

The Conference Invitation Committee

Chairmen

Mr. Carrol M. Shanks, President
The Prudential Insurance Company of America

Mr. W. Paul Stillman, Chairman
Mutual Benefit Life Insurance Company

Mr. Robert G. Cowan, President
National Newark and Essex Banking Company

Joseph A. Grazier, President
American Radiator and Standard Sanitary Corporation

Andrew Heiskell, Publisher
LIFE Magazine

Charles H. Kellstadt, President
Sears, Roebuck and Company

H. Bruce Palmer, President
Mutual Benefit Life Insurance Company

Thomas F. Patton, President
Republic Steel Corporation

James W. Rouse, President
Community Research and Development, Inc.

Newark Sponsor: The Newark Economic Development Committee

Accommodations and Transportation

Hotel Accommodations: All participants will make individual reservations. The following hotels have been alerted to the probable need for rooms.

The Essex House
The Military Park
The Robert Treat
} Newark

The Plaza
The Roosevelt
} New York City

Private transportation will be provided by the Public Service Company of New Jersey between Newark and New York City for all Conference Sessions. New York Port Authority Terminal, Eighth Avenue at 41st Street, New York City, will be the central point for all buses. Conference bus schedules will be provided in advance of the Conference.

Address Inquiries to: ACTION Conference
2 West 46 Street
New York 36, N. Y.

The Conference Will Be Limited to Five Hundred Participants

Heiskell, Andrew

May 7, 1958

Dear Andrew:

Thanks very much for your note of May 5th.

It was an altogether pleasant association. I shall leave a note in my files saying that in my mature years I tried to sell magazines with only indefinite success.

Hope to see you soon.

As ever yours,

Mr. Andrew Heiskell

Heller, Rabbi Abr

February 5, 1959

Dear Rabbi Heller:

I have received your letter of February 3rd and the set of galley proofs of your book, ISRAEL'S ODYSSEY.

I am flattered that you should ask for my comments on your work, and I wish very much that it were possible for me to fulfill your request. However, the burdens of my own work are at present so heavy and so time consuming that there is absolutely no possibility of my being able to give your work the attention it undoubtedly merits. I am, therefore, returning the galley proofs to you.

I am sorry to be unable to do as you ask, but I am sure you will understand the situation.

Sincerely yours,

Rabbi Abraham Meyer Heller
300 Church Avenue
Brooklyn 18, New York

February 3, 1959

Mr. Edward R. Murrow,
C. B. S.
485 Madison Ave.
New York, N. Y.

Dear Mr. Murrow:

Farrar, Straus and Cudahy are to publish within about a month a book of mine - "Israel's Odyssey", a survey of Israel's renascence, achievement and problems. A summary of the contents, prepared by the publishers, is herewith enclosed.

I know how preoccupied you are with your manifold affairs and responsibilities of national and international importance. Yet, I dare hope that because of your deep interest in the Middle East and Arab-Israel relations, you will consent to look over my manuscript in galley proofs, in the hope that you will find the contents worthy of your comment.

While the book deals with every aspect of Israel's life, the following four chapters may prove to coincide with your special views: II, The Infant State, III. Growing Pains, IV. Israel Among the Nations and XII. Arab and Jew.

I have taken the liberty to forward to you, under separate cover, a set of the galley proofs of "Israel's Odyssey" without the benefit of an introduction from an influential person or persons, hopefully trusting that my humble efforts will recommend themselves to you.

With sincere apologies for adding to your burdens and with gratitude for your kindness, I am

Respectfully and cordially yours,

A. M. Heller

Radio TV ideas

Heller, Rita Thurswell

23 Argyll, New Rochelle, NY
April 30, 1958

Just file if sender TV Pgm Ideas then will answer.

Dear Mr. Murrow:

On CBS radio I heard today that they will repeat your program on juvenile delinquency re the Farmer case.

I think you are making people more aware of the horrors of juvenile delinquency; however, more important, I believe, is planning to do something to offset it.

To that end, I am hoping that you will be interested in a Plan I wrote years ago, also a radio-TV program, along these lines - if you will permit me to submit them to you.

Hoping to hear from you by return mail, I am

Yours sincerely,

Rheeta Thurswell Heller

Christ in Christmas Committee

November I4,I958

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Ave.
N.Y.C.

Dear Sir:

During the past few years, there has been an alarming trend towards the commercialization of Christmas. Therefore, I, a student of St. Xavier High School working under the auspices of the Christ-in-Christmas Committee of greater Cincinnati, am asking you and other prominent Americans to help the promotion of the campaign to put Christ back into Christmas.

I know that you must realize that a person with your ability as a speaker could do nothing but further this cause tremendously. Just the fact that you command the attention of the millions of people each week who watch your show "Person to Person" is reason enough for success. Simply by realizing the need for Christ-in-Christmas in your own mind you will undoubtly convey the idea to someoneelse. This is all we ask.

In previous years, there has veen a gratifying response from government officials, entertainment personalities, and eminent Christians in all walks of life who feel, as we do, that many people aremissing the true meaningof Christmas. This meaning is found in the idea of the word itself, which is the BIRTH OF CHRIST.

Christ in Christmas Committee

My request is a simple one. Could you in some way bring home to more Americans the fact that Christmas is Christ's Birthday? Aletter from you endorsing this campaign would certainly do a great deal of good; and if you could perform some other public act which would "Keep Christ in Christmas," this committee would be very grateful to you.

It is true that no one person alone could carry this Cause to the American people, but if everyone would make a small contribution, success could easily be achieved. I am asking you to make your contribution.

Sincerely yours,

Tom Helmick

Tom Helmick

Edward R. Murrow: Thursday December 22, 1955. 7.45 p.m.

There is a time and place reserved on radio, and in newspapers and magazines, for advertisements - that's their source of revenue. We face another day of the mild madness that precedes a week end where a little contemplation may be possible. And this reporter is going to read his first advertisement on the air. It appears on the back page of the current issue of The Reporter magazine. It was placed there by the Western Newspaper Union. Advertising copywriters please take note. It reads as follows: "There lives at this time in Judea a man of singular virtue. His name is Jesus Christ, whom the barbarians esteem as a prophet; but whose followers love and adore as the offspring of the immortal God. He calls back the dead from the grave, and heals all sorts of diseases with a word or touch.

"He is a tall man, well shaped, of an amiable and reverend aspect; and his hair is of a color that can hardly be matched, falling in graceful curls, waving about and very agreeably couching upon his shoulders, parted on the crown of his head, running as a stream to the front, fashioned after the Nazarites.

"His forehead high, large and imposing; his cheeks without spot or

wrinkle, and beautiful with a lovely red. His nose and mouth formed with exquisite symmetry. His beard of a color suitable to his hair, reaching below his chin and parted in the middle like a fork.

"His eyes, bright blue, clear and serene, look innocent and dignified, manly and mature. In proportion of body most perfect and captivating. His hands and arms most delectable to behold.

"He rebukes with majesty, counsels with mildness. His whole address, whether in word or deed, being eloquent and grave.

"No man has seen him laugh, yet his manners are exceedingly pleasant. But he has frequently wept in the presence of men. He is temperate, modest and wise. A man, for his extraordinary beauty and divine perfection, surpassing the children of men in every sense."

The small type says: "This is an apochryphal word portrait, first found in the writings of Saint Anselm, Archbishop of Canterbury, during the leventh century."

Having been subjected to much Christmas advertising; having read and stened to many words of exhortation, it seemed appropriate at this season, to read the Western Newspaper Union's advertisement about "A man of singular

virtue", with bright blue eyes, clear and serene, innocent, dignified, manly and mature. One who rebukes with majesty, counsels with mildness - eloquent and grave. A man who has "frequently wept in the presence of men."

Whether apochryphal or not, someone wrote some rather eloquent copy before the eleventh century.

This advertisement by the Western Newspaper Union, on the back page of The Reporter Magazine, doesn't say what the Western Newspaper Union is trying to sell. But it does say that copies of what I have just read, in two colors suitable for framing - minus the advertising signature - are ~~XXXXX~~ available to readers of The Reporter. Send twenty-five cents to cover cost of postage and handling to the Western Newspaper Union.

Having read an advertisement, we must adhere to tradition and repeat the name and address: Western Newspaper Union, 310 East 45th Street, New York 17, New York.

Since this is the first advertisement this reporter has read on the air, it may be permissible to say that I have neither knowledge of ~~or~~ or interest in the Western Newspaper Union - merely admired the eleventh century language, and the gesture of the organization which purchased space to cause the words to appear in print. They seemed to merit wider circulation -

Gaylord Avery

Hemingway, Tom

February 10, 1958

Dear Mr. Hemingway:

I have your letter of January 22nd.

I appreciate your suggestion for one of my television programs, and regret that it will be impossible for me to accede to your request, since the only program I could possibly do this would be on my SEE IT NOW show and these are all committed for in advance.

Again, I appreciate your interest, and I am sorry.

Sincerely yours,

Mr. Tom Hemingway

January 22, 1958

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York22, New York

Dear Mr. Murrow:

It has just occurred to me that you might like to throw the spotlight on an event in our San Mateo High School which will show the exact opposite of the widely publicized happenings at the Central High School in Little Rock.

On Tuesday, February 11, I'll turn over the gavel signifying the office of student body president to the second-semester president, Bill Pettis, who will be the first Negro to hold that honor in our high school of predominantly Caucasian students. Occasionally, students of Japanese-American or Chinese-American parents have held minor offices, but this is the first time a Negro has been elected to an office of prominence or minor importance in our student body government.

Bill was one of four candidates competing for the honor of leading the student body. He won handily, getting more than 200 votes over the nearest contender. He had to compete against a football star, a former class president, and our 1956 American Field Service exchange student.

I think the fact that he received a heavy majority of votes from the Senior Class is to the credit of my class. Bill will preside at many of our graduation ceremonies and social events.

San Mateo is one of the residential suburbs south of the city of San Francisco. Our student body is made up of graduates from intermediate schools in the north section of San Mateo as well as from Hillsborough, a community made up entirely of well-to-do residents.

All of this seems particularly significant to me because I came to San Matho from Montgomery County, Maryland, where, of course, there was a segregated school system. I have known Bill since I entered the intermediate school here, and I'm proud to count him as a friend.

We always seem to publicize our worst features. Couldn't you help us put America's BEST foot forward?

Sincerely,

Tom Hemingway

Henderson, Allen

June 5, 1959

Dear Mrs. Henderson:

Many thanks for your nice note of June 1st.

It is good to know that you have enjoyed my programs. We always like to hear the reactions of our viewers. In this way, we know whether or not we are presenting programs to please them.

Your kind wishes to me are appreciated. I hope that when I do return to CBS next year, it will be with a program worthy enough to warrant your continued attention.

Sincerely yours,

Mrs. Allen Henderson

New York

April 29, 1959

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York City, New York

Dear Mr. Murrow:

The uniform excellence of your television presentations over the years, together with the somber knowledge that you are taking a "sabbatical leave" for one year prompts this long over-due letter.

Although I am not a professional writer, I know I express the sentiments of millions of other Americans who have been equally negligent in communicating with you earlier. Your contribution towards greater understanding of problems we Americans face at home and abroad has been of overwhelming significance. You and your associates are to be strongly commended for the courage, insight, and above all, the articulate manner in which opposing points of view have been objectively presented. Moreover, whenever you have, on occasion, expressed an opinion on a controversial issue, it has always been based upon overwhelming evidence which you have managed to compress into a thirty-minute or one-hour program.

Your efforts on such subjects as school integration, the late Senator McCarthy hearings and their significance in controlling freedom of thought and expression, the Middle East crisis highlighted by the tension between Egypt and Israel, to mention just a few which preceded your interview with Field Marshal Montgomery last night, have all served to stimulate constructive thinking and education.

Although I am not technically proficient in the problems of television, it has nevertheless been obvious that your programs have also been outstanding in the use of photography, have always been well edited, and always provocative.

On behalf of myself and many others who have taken a keen interest in your efforts throughout the years, I wish to extend our best wishes for a fruitful and healthy sabbatical. I hope this is only a temporary leave because I am convinced the glaring gap your continued absence will create simply will go unfilled. This would be a loss all America will keenly feel.

Sincerely yours,

William Henick

Henry, Don

February 27, 1959

Dear Mr. Henry:

I have your letter of February 4th.

I am afraid it will be impossible to accede to your request for an interview. As you know, I am planning to take a year's leave of absence from CBS. At the moment, My schedule of radio and television is so overcrowded, that I have been forced to omit all interviews. I am sorry, but am sure you understand.

Thank you again for writing as you did.

Sincerely,

Mr. Don Henry

February 4. 1959

See ERM 2-6-4.

Mr. Edward R. Murrow
CBS
New York City

Mr. Murrow:

Two words in your afticle in the February Reader's Digest prompted the immediate writing of this letter: mortal danger. If anything worth while could come of the idea I have in mind, it should be done as soon as possible.

Mr. Murrow, my idea arose from a question:If America is fortunate enough to 'hold her own' today, what about tomorrow? Will today's apathetic rock and roller or delinquent snap out of it IN TIME to step into tomorrow's big shoes? Couple this question together with Victor Cohn's article in last week's Post "The Big Push in Soviet Science". It is futile to evade the fact that today's youth will shape tomorrow's America; today's youth IS tomorrow's America. I sincerely believe I have an idea that would be a big step in the right direction toward making today's youth truly aware of what is really needed from him. I think our kids can and will take it from there. I remember, and so do you, the long lines of kids outside the recruiting offices December 8, 1941. Pearl Harbor is now.

Without telling anyone what I had in mind, I spent many hours in juvenile courts. I talked to Judges, lawmen and many kids, good and bad. I have yet to hear the first word that would discourage my thinking on this idea. Now, I need help and advice on just how to bring this idea into effect. For quite sensible reasons I do not wish to talk to anyone local at first. Mr. Murrow, I know of no one whose opinion on today's problems I would place above yours.

I am not a crackpot or "letter writer". Despite a crush on Heddy Lamarr over twenty years ago, I have never even written a "fan" letter. I am no one important. I sell appliances in a local store. If things were different I would be thinking about hunting and fishing and this summer's golf game being better. I know I must talk with someone regarding this. I hope it is you. I know your time is not only valuable, but quite limited. This will take about 20 or 30 minutes to discuss. I doubt if your shcedule takes you near here, but if so I can be available anytime. Otherwise, I can make arrangements anytime to come to wherever you might be at any time. Even if you just can't squeeze in the time, will you please just drop a line acknowledging the fact you received this?

Yours sincerely,

Don Henry

Don Henry

Hanson, Francis

F

March 16, 1959

Dear Francis:

Belated but hearty thanks for your note of February 27.

The decision to take a year off wasn't easy, particularly when it involved considerable inconvenience to a number of old and cherished colleagues. Some of the stuff appearing in print rather reads like an obituary but, maybe a year from now, I can prove that that isn't true. At least, I shall try.

Do let me know when you are coming to New York again.

As ever yours,

Mr. Francis A. Hanson
Director of Education

Dear Ed:

I attach a copy of a letter my secretary sent to Louis Seltzer, while I was out of the city. I travel about 90% of the time in our 8-state area.

I simply wanted you to know that I wish you well in your year-Sabbatical; in fact, I envy you.

Also, I wanted you to know how many people across the country are admirers in case you don't know!

Best to the family.

Affectionately yours,

Francis A. Henson
Director of Education
Great Lakes Territory

Mr. Louis Seltzer
The Cleveland Press
E. 9th and Rockwell
Cleveland 14, Ohio

Dear Mr. Seltzer:

It seems to me that the books and authors selected for "the Book and Authors" series this year are not quite up to the standard set in other years. I don't know how much you have to do with these selections but I wanted to express my opinion.

Is this an attempt to be more popular or was it impossible to schedule more authors of the calibre of Herbert Block and Jerome Weidman?

Having been critial, I now want to commend you for the editorial on Ed Murrow in Wednesday's PRESS. I first met Ed in the 1927-29 period (worked closely with him) when he was with the National Student Federation of America, after graduating from college. I have kept in touch with him over the years. I agree with you that the "saga of Ed Murrow has only begun."

Sincerely yours,

Francis A. Henson
Director of Education

Herman, Mrs Sydney

February 13, 1959

Dear Sirs:

You have a reservation for Mrs. Sydney Herman on flight #205, leaving for Washington, D. C., Saturday, February 14th at 10:30 a.m.

Request was made for a round-trip ticket with open return.

Will you please give the ticket to the bearer of this letter. I enclose $35.20 in payment thereof.

Very truly yours,

KAY CAMPBELL,
EXECUTIVE ASSISTANT

American Airlines

February 3, 1958

Dear Judge Herrmann:

Many thanks for your very nice letter.

I am indeed flattered by the honor that you had planned to bestow upon me, and it is with the deepest regret that I must tell you that it is not possible for me to make a personal appearance to receive the Award.

Please do not regard this as any lack of appreciation on my part. The fact is, the pressure of my schedule has increased to the point where I have been forced to decide not to accept any engagements whatsoever.

Thank you again.

Sincerely yours,

Judge Daniel L. Herrmann

My dear Mr. Murrow:

It is my privilege to address you in the name of the Jewish community of the State of Delaware.

As President of the Jewish Federation of Delaware, I am pleased to inform you of our wish to present to you the Haym Salomon Award of the Federation for this year. The Award was presented last year to The Rev. Dr. Abba Hillel Silver of Cleveland.

We wish to honor you because of the vital role you have played as a seeker of truth, setting an example to all Americans for fairness, honesty and courage.

We wish to present this Award to you at a State-wide dinner to be held in Wilmington during the latter part of April or the early part of May, depending upon your convenience. It is anticipated that the dinner would be attended by more than six hundred leaders of the State.

We earnestly hope that you will be able to accept this invitation and this tribute of Delawareans.

January 13, 1958

We await your favorable response and your designation of two or three dates on which you could be with us.

Very sincerely,

Mr. Edward R. Murrow
New York

Edward R. Murrow
CBS Broadcasting Bldg.

New York City, N.Y.

Dear Sir:

The central problem facing man today is Communism. Any proposal to destroy Communism merits a hearing and some consideration. This proposal essentially has to do with the creation of a true Christian society in our own industrial world.

Please read the first five page enclosed pamphlet. It is entitled the "Collapse of Communism." It is a condensation of a method to destroy Communism in a very short period of time and needs evaluation by a man in our society who can grasp the simplicity and potential of this concept.

I am certainly not asking you to publicize this or to judge it solely on the merits of what is here; as it was written on a flight from New York to Dallas, is very simply written and highly condensed and is directed towards men in political life.

Due to my inability to reach a man in political life during the past month, I must ask you as a man with a grasp of many fields to evaluate this concept; and, if you feel it is of merit, to help me in bringing this to the attention of our men in political life.

I must ask you to keep this tax information secret as it is highly potent dynamite.

Thank you.

Sincerely yours,

George B. Herron

Dear Mr. Murrow:

I'm enclosing a copy of the results of the interview. Please pardon this unsightly carbon--I had a deadline to meet and didn't have time to get it typed.

If there are errors, I'd appreciate it if you let me know as soon as possible.

It was a great pleasure meeting you, and I thoroughly enjoyed our conversation. The piece will probably be slightly edited. I hope you like it.

Sincerely,

Art Herzog

A VISIT WITH EDWARD R. MURROW

When a critic bites television, it isn't news, but when a top television man bites television--the tube that feeds him, so to speak--it is. This slightly unwieldy thought was on my mind not long ago as I approached the blue-and-chrome castle of the Columbia Broadcasting System in New York, for a visit with Edward R. Murrow. In recent months, Murrow's familiar baritone has joined the chorus of those who believe that there's something wrong with television.

Murrow's position in the co-axial jungle is probably unique. He is not only a greatly respected journalist--he has been called "guardian of the public conscience"--but he is a "personality" as well, being one of TV's highest-rated entertainers. He regularly conducts, by means of a schedule that leaves him actually sweating for lack of sleep, his evening radio news, now more than eleven years old, Person to Person, a weekly, half-hour, split-cathode interview show, and Small World, a shot of high I.Q. Person to Person. See It Now, his program of social commentary and the darling of the intellectuals, still appears, but only sporadically. Murrow has held, and resigned, major executive posts at the network, and his salary, over $200,000, is said to be higher than that of William S. Paley, Chairman of the Board of CBS.

I was ushered into Murrow's 17th-story, corner office precisely at the appointed hour of three, as if I were scheduled

to take the air myself. As is sometimes the way of the televistically naive, I had expected Mr. Murrow to look somewhat different in three dimensions than he does on the picture tube, but the resemblance was striking. Murrow in person, however, is far more easy-mannered, smiling and relaxed than his sometimes somber image would suggest. He is a lean, obviously handsome man, a slender six-foot-one, the only signs of his 50 years being a tinge of grey at his temples and deep lines around his mouth. His shirt, inconspicuously monogrammed, was open at the neck. He is a snappy dresser but offsets this, I'd heard, by wearing an old trenchcoat or a battered hat.

In a speech a few months ago, and even more recently on television, Murrow charged television with "decadence, escapism and insulation from the realities of the world in which we live," and for having "the illusion of power without responsibility." "I'd no idea," he said to me, "that speech would get so much attention. After all, it was delivered to a group of professional television people. I said other things when I was interviewed on TV—I don't remember quite what. I probably misquoted myself in my own voice." He gave a basso chuckle.

I asked Mr. Murrow to expand his ideas on where the industry was falling down, and where it might do better. "Potentially," he said, "the commercial system of broadcasting practiced here is the best yet devised, but it's not living up to its responsibilities. This nation is in mortal danger yet you'll find few references to it on television. We are shielding ourselves from anything unpleasant, and I'm afraid that when the challenge comes we will be so soft that we won't want to be disturbed.

"We're ignoring our own traditions. A nation in crisis has to go back to its own heritage for sustenance. It wasn't just Churchill who fired the British during the war--it was a long history of Drakes, Nelsons, Frobishers. The Russians, having no long history under the Soviets, went back to feats of Czarist days. What about us? Where will we get our strength? Our history doesn't consist entirely of guys with six-guns. Nobody is reminding us of Washington and Jefferson."

Murrow's phrasing, diction and timing, I reflected as he spoke, are as good extempore as they are when he faces a mike. It has been said that he talks as though he lives on the edge of doom without quite saying what he sees there. He is eminently reflective, ~~pausing~~ pondering for long moments as he gazes out the window or stares deeply at the floor, high-domed brow wrinkled, puffing at a cigarette. By the time fifteen minutes had passed, he was already on his third. To judge by the butts in his ash tray, he only smokes ~~them~~ cigarettes half-way down.

"There is so much that could be done," he said. "I'm fascinated by the area of current events for youngsters, for instance. You can make contemporary history as exciting for a teen-ager as a Western. I'd like to see some old-fashioned debates, too. The present tendency is for the interviewer and interviewed to show off their dexterity. What's lacking is a single antagonist, with a rebuttal period. We could experiment more with visual devices, such as animated charts, to make information understandable to the eye. We could try using foreign television shows. And I'd

like to see the industry do more reporting on what this country is like. Most of his business is centered in Hollywood and New York, which are not exactly representative of the United States."

Was he in fact suggesting, I asked, educational television? "No, I certainly wouldn't want the networks to be just educational. I guess I don't believe much in 'messages.' The shows of my own that I've been most satisfied with have been those we put a hell of a lot of time on and which, when we were finished, people on both sides said it was a fair count, as they did after our show on the Norfolk school crisis. In this area of information the real objective is to avoid looking for things like ignorance, intolerance and bigotry but not to flinch when you find them at the end of the camera. We never know what we're going to get when we start shooting. Right now, we're doing a show on Canada, and I suspect we will discover considerable anti-American sentiment, but I won't know until the films are in. We mustn't insulate ourselves. We should hold up the mirror and do our best to keep it steady."

I inquired whether Murrow foresaw any immediate rise in the quality of television shows. "I don't think the shows will change in any substantial way unless there's a major effort by somebody or unless there's a shift in the climate of opinion. One reason for the popularity of Westerns, for instance, is that a lot of people want freedom from controls—governmental, social, whatever. They find it in the complete freedom of the Western hero.

"But you can't blame television entirely for this spirit

of escapism. No nation has ever been great unless greatness was demanded of it by its leaders. Nothing great is demanded of us. We're told we're in a grave spot, but we're asked only to pay our taxes. In such an atmosphere you get neither great national efforts or great television shows."

Edward Rescoe Murrow, over the years, has never taken a narrow view of his role as an extender of public opinion, and he seems happiest when firmly placed at a dangerous juncture. Christened Egbert, he was born into a poor farming family in Greensboro, N.C., later moving to Washington state where he worked his way through college, becoming student body president and graduating Phi Beta Kappa. He was in the employ of CBS in Europe when World War II broke out, and shortly thereafter his taut-threated "This Is London" broadcasts established him as a newscaster. He was habitually going off on bomber runs, taking a trip on a minesweeper or exposing himself to German bombs, over the ineffectual protests of his superiors. Since then, he has rushed off in pursuit of tornados, hurricanes and floods as well as making three trips to the Korean front, and he has not hesitated to turn his cameras on the major areas of controversy in the United States. Among them, seemingly, would be the role of television sponsers and broadcasters, if Murrow had his way.

"The responsibility for what goes on TV doesn't rest with the advertisers," he said, "although I'm not at all sure that the British system, where a sponsor buys X minutes of time but doesn't control the time around his commercial, isn't better. But we'll never see it here. And perhaps some good might be effected if the FCC enforced the obligation of stations to carry the prescribed

amount of public service time. Many stations welsh on this promise.

"But the more one talks about this the more one is lead to the conclusion that the ultimate responsibility for what appears on the end of that tube has to be put at the door of the top executives in TV and the sponsors who pay the freight. The moral and legal responsibility is theirs.

"My own view is that the audience is more mature than is commonly supposed. I have a little evidence to support this. For one thing, the ratings mislead us. We worry too much about the size of the audience and not enough about its composition. And then, our own shows have preempted time occupied by shows with mass appeal and we haven't lost our inherited audience, not even when we have done Marian Anderson's trip through Asia or covered Africa, subjects not generally suspected to be of commanding popular interest."

Murrow rose, lit his seventh cigarette, and walked to the bookcase lining a wall of his surprisingly small, TV-less office. "Let's have some competition, not just in selling soap but in informing the public. An hour's documentary, say on the Middle East, costs about $100,000 to produce. The networks, I'm sure, would bear this cost. Let a sponsor buy the time for it, so that the stations would be forced to carry it. Let him say, at the beginning of the show, "Look, we're in the so-and-so business but we have a stake in our society too. With no further mention of our product, we are going to give you an hour's show on America's role in the Middle East"--or health, education, whatever it is. There's talent to burn on television, waiting for the chance to do such shows. If one or two corporations would donate just a fraction of their advertising budget for this, the financial

burden would be bearable. Once the practice started, it might spread by contagion."

Murrow looked a bit rueful as he walked me to the door. While he hadn't been attacked for his views, the industry had shown no particularenthusiasm, either. But he intends to go on trying. "I wouldn't want to be cast in the role of sitting here sniping at television for reasons of personal frustrations and disappointments," he said. "I've had more freedom and support than anybody in the business. But I get increasingly concerned with the totality of the instrument and its failure to illuminate and inspire. This is a grave time, and television could be a useful weapon. It isn't meeting the challenge."

Mr Edward R.Murrow
Columbia Broadcasting
System
New York.N.Y.

Dear Mr Murrow,

As the enclosed deals,to some extent with Edward R.Murrow, the writer,as a matter of courtesy,hereby places a copy in your hands.

The piece was written for the ILLINOIS STATE FEDERATION OF LABOR AFL-CIO,and as we understand it,will be used to 'pepper-up' speeches to be made by the Executive Vice President, Stanley L.Johnson, throughout the state.

It is doubtful that it could be published in its present form - because it seems to have a 'stag' flavor - which astonished me when it was finished, not being a double entendre sort of gent.

My regret that this isn't the cleanest copy and hope it is legible. Because of your going to Europe,didn't want to miss putting it in your hands and had to use a carbon,

The last letter you received from me was during WW2, and was just a fan's appreciation for your English broadcasts. Happen to be a Londoner.

Best of luck,
sincere regards,

Jack Hess

THE NAM DILEMMA.

Caught Between The SHERMAN Act, The CLAYTON Act, And The SEX Act - Big Business Points To LABOR And Yells: "They Went That - A - Way!"

...

by Jack Ness.

Describing Edward R. Murrow as 'one of the most intelligent and useful of the broadcasters,' the Chicago American inadvertently answered a malignant editorial it re-published from the NAM News. This piece declared Murrow to be a 'past master of innuendo,smear,snide implication and unsupported accusation.' The revising of this description of the famous commentator's character can be called a 'nine weeks wonder' because it occured between Jan. 28 and March 22. This tidies up a situation which can be likened to an explosion in a sewer, for it grew out of Murrow's documentary exposure on CBS, of 'The Business Of Sex.'According to the NAM, Murrow stated that " American business and industry,habitually and as a matter of policy employ prostitutes to put across big deals.' In high dudgeon,the NAM cast uncouth* remarks at Murrow.

Then,like an old lecher,with emotions responding to the memory of a bell on the door of a favorite house of assignation - the NAM reacted instinctively by trying to put the blame on labor. "The chief beneficiary,of course,of Mr Murrow's excursion in sex will be the labor unions," the article stated. It went on to add that this "was probably Murrow's intention in doing the show."

By a curious accident of make-up,the re-printed editorial in the American appeared only two columns to the left of an imposing half-page advertisement announcing a new $50,000,000 bond issue,offered by the Inland Steel Company.Cynics will be

---

* There is never a 'low dudgeon' - nor a 'couth' - only'uncouth'.

... Dictionary Of Early English, Shipley.

able to identify the happy sound of a cash register. The juxtaposition was unfortunate,even if not deliberate.

The NAM seemed disturbed that dignified relations and negotiations between 'nice' high-priced prostitutes,and respectable Vice-Presidents in charge of Public Relations could not (to use an advertising agency phrase) be 'finalized' without such comment. The entertainment of buyers,the diversion of executives at conventions,was threatened by adverse publicity. One advertising agency executive with no love for labor,and who refers to union members (and the public) as the 'little people' was so shocked by Murrow that his hair turned charcoal-grey overnight. He anticipated that in future bargaining the ladies might ask for portal to portal pay, and other 'fringe' benefits. The NAM stated the broadcast was 'a blow below the belt'. This is an unhappy choice of words for those accused of being sex-brokers - although it locates the issue - in a physical sort of way.

Actually,Murrow's information on how the rising blood, and sex pressures,of middle-aged tycoons can be utilized to help the collapsing sales lines on graphs,will neither shock nor surprise those who have had to deal with the chairmen of 'entertainment committees,' who arrive well in advance of the excited and expectant conventioneers.

The Anatomy Of Blame-Placing.

When Murrow fixed 'pay as you go' sex as being a big,fat asset of big,fat business, and did so before millions of citizens it was obvious this could change the opinions of the 'little people'. They might identify industry as being a 'very private enterprise,' Something had to be done. Without doubt,Madison Ave, the source of many naive stratagems,decided that this garbage could be dumped on labor's doorstep in the dead of night. Some of the stink could thus be dissipated.

Always concerned with 'package deals' the agencies, the top advisers of industry, knew that at this time (March 1st to April 1st) industry is faced with a record and staggering number of anti-trust suits. The 'package deal' was that by turning the 'heat' on labor and creating a diversion, it would turn the

'business of sex' towards union labor;let industry know Murrow shows symptoms of being fair to labor (although no aspect of labor appeared in the broadcast) In this way the press and public would be turned away from the considerably more than 100 anti-trust suits against almost every noteworthy big corporation in the nation. All of these, comprising a 'Who's Who?' of the NAM membership are charged with violations of the Sherman,Clayton and Patman anti-trust laws.

Some excellent public relations counseller then compounded the obfuscation of press and public,by speculating on 'the motivation' for the broadcast - which he decided was to help labor take the minds of the public off the hearings of the McClellan Committee. This completed the circle - with the NAM diverting attention from the anti-trust suits - by accusing labor of diverting attention from the McClellan Committee. All in all,quite a neat agency 'package.'

The suits are without exception against NAM members,for the excellent reason that a piece of 'private interest' not big enough to be in the NAM, isn't rich enough to engineer a nice little bit of monopoly. So 'The Business Of Sex' was transformed into another sinister labor scheme to nullify the commission hearings - while protecting NAM members caught with their hands in the anti-trust cash-register.Thus, finding a clot of its members caught between the Sherman,the Clayton and the Sex Act - violating all at the same time,the sachems of the NAM pointed to union labor and yelled: "they want that-a-way!"

<u>The Big Parade - Trusts,Monopolies,Cartels,and Experimental Industrial Dictatorships.</u>

Few people know - or care, how 'BIG BROTHER' INDUSTRIALIST NO. 1,persuades 'BIG BROTHER' INDUSTRIALIST NO. 2, to 'gang-up' with him so as to put 'LITTLE BROTHER' INDUSTRIALIST out of business and politely 'take over his obligations.' Perhaps in these situations he also employs a squad of well-paid,happy harlots - so 'nice' they are indistinguishable (outside of the boudoir) from the daughters of 'big business' - members of the Junior League, which was once described as 'being something the virgins worked at."

The frightening statistics of attempted monopoly, as shown in the listings of the Anti-Trust Division of the United States Department of Justice (received Mar. 30th '50) indicate a wholesale contempt for the anti-trust laws. Small factories,workshops, independent retail stores could well become scared at the hold the 'big name' corporations were obtaining on the nation's economy.The public knows all about trusts and what can happen if they multiply and thrive. The 'high cost of living' - inflation - is well before an apprehensive public. Labor has been blamed for inflation by the scene-shifters of the NAM - with bated breath many wait to hear why labor is responsible for trustification.

Here is a partial list of suits. The roster of the accused concerns reads like dividend-time at the NAM.

E.I. du Pont de Nemoirs and Company,et al.
General Motors Corporation.
Radio Corporation Of America.
Standard Oil Company (Calif.)
Standard Oil Company (N.J.)
Northern Pacific Railway.
Kansas City Star.
The Borden Company (Ill.)
United Fruit Company
Proctor & Gamble Company.
Pan-American World Airways.
Socony Mobil Oil.
Pacific Lumber Company
Union Carbide & Coal Company.
McKesson & Robbins,Inc.
Schenley Industries,Inc.
Safe-way Stores.
J.P.Seeburg Corp

B.F.Goodrich Corporation.
Greyhound Corp.
General Baking Company
and 61 others.

Among the concerns listed which will always smell sweet,are: Lanvin Perfumes ... Parfums Corday ... Guerlain,Inc - and, Oh,Yes! J,Myer Schine and the Schine Chain Theatres ... this is the partnership of the Schine father and son ... the latter is the famous military 'rise and Schine' of the McCarthy hearings.

The NAM, The AMA - And Cornering The 'Wonder Drugs.'

The biggest shock to two aspiring (or existing) monopolies was the filing of a suit against the 'Drug Trust' - blood brother to the AMA."U.S.FIGHTS CORNER ON DRUGS," and "SUIT LAID TO SIX FIRMS," said the wire story from Washington (copies in appendix).The U.S. Department of Justice suit was filed August 1958. Said the press:

> "The suit named six leading drug firms of attempts to monopolize the $330,000,000 a year 'wonder drug' industry.The Commission charged the firms maintained 'arbitrary,artificial,non-competitive,and rigid prices;for the so-called'wonder drugs' One firm was accused of making "false and misleading statements to the U.S. Patent Office, so it could get a patent on her antibiotics."

Almost coincident with the filing of this suit another wire story told the nation that an "AMA LABOR BATTLE LOOMS (April 5th).In this syndicated story, over Pat Munroe's by-line,it was announced the AMA 'had lined up strong support' including the National Association of Manufacturers.

This suit frightened monopoly because it involves two,out of the three Axis members - the AMA and the NAM,with the third under indictment - the 'drug trust.'It is obvious that any attempt to corner 'life-saving' drugs - is an attempt to corner life itself.The trio of what Theodore Roosevelt used to call 'malefactors of great wealth,acting in harmony and 'lined up' seem to have come up with a fine sense of balance in the morality involved in saving lives.There is certainly no profound respect for the sanctity of the lives of 'little people.' Following the deepest anti-social aspects of private enterprise;this is reminiscent of the story of the elephant who danced clumsily among the chickens,shouting; "Every-one for himself!"

With a sort of fine reasoning the issues before big business seem to have been resolved in this manner: 'it may be second-hand murder to make 'life-saving wonder drugs' inaccessible to those with small incomes"- so the NAM 'supports the AMA and the Drug Trust." It is better to do so and create a diversion than to expose NAM members to accusations of pandering for corporate profit. Opposition to lower medical bills by the AMA, with the AMA 'lining up'with the NAM against some - plus the unveiling of the drug trust is an alarming coincidence. Here is a 'trust triplet' ... a cartel in life and death ... monopoly in triplicate ...

H

holding a loaded hypodermic to the heads of the poor,and saying - 'your money or your life ... pay our price or let your child die!'

These dealers in the charms of American girlhood,secure in the belief there is an unfounded idea that 'miracle drugs' really perform miracles - prepare to bleed the public for having such idiotic notions. The passing parade of 'wonder drugs'- which even the Department of Justice dubs 'so-called' is a dismal procession of failure.As one wit put it " if miracles come so easy,why doesn't the drug trust come up with a 'wonder' to bring universal happiness - an aphrodisiac which is also a contraceptive."This is needed - lots of people have no faith in a generation which receives electric blankets as wedding gifts - and writes 'thank you' notes.

Girls With Swansdown Seats,And Other Indistrial Assets.

With apologies to Cyril Pearl*, originator of the term 'swansdown' seats,to describe wheres,we can proceed with other aspects of sex and industry.The cognoscente,with facts on production,and reproduction in modern industry, know that girls without funds,without morals - but with charm - have long been the busy little helpers of the Vice-President in charge of Sales,or Public Relations.These saleesladies have,it seems, not only aided private enterprise - but have learned good business techniques while doing so. The homeliest lass in a 'house' which is not a home (it is said) outdid all her beauteous rivals,showing a 'net' which could well have been announced at the Annual get-together of the NAM. Asked her secret,she confessed,"I give green stamps."

It is hardly fair to blame big business for all the normal activities of sex in their establishments. Such illicit acts,without a price tag are part of the scene. American civilization has become so pre-occupied with sex,that it oozes from every pore of our life.But offices, factories and other places of barter have become too complaisant about uncommercial (or near-commercial) acts of love. Although it is true that in the battle of the sexes,many of our more portly and mature executives are'conscientious objectors' they have nevertheless established in places of business,a sort of 'sex priority' among employees,which verges on the mores of the chicken ranch.The 'rot' which starts with 'sales promotion' is hard to control within organisms which permit it.

---

* The Girl With The Swansdown Seat, by Cyril Pearl, current best seller. ... about Mid-Victorian prostitution in England... Bobbs Merrill.

The cliche that 'behind every successful man there's a woman' takes on a new connotation in the relations between the upper echelons of office help - and the ladies of the typewriters, adding machines and reception chairs. Many of them do stand behind the executives. Others, not so good on punctuation, nevertheless know how to place the masculine apostrophe.

Conventions are quite often excuses for doing the unconventional. For information on organizational orgies one must go to the 'Convention City of America'- Chicago. Most conventioneers expect a happy hiatus - away from home and 'mother.' There is an apocryphal story about one conventioneer who received his badge and reservation card in advance - with a note they were being mailed 'under separate covers' - which in happy expectancy, he believed meant 'twin-beds.'

There is much 'bureaucracy' in the 'Convention City.' From Russia's 'Classic Tales,' by Schedrin, comes the story of the Three Happy Bureaucrats. One headed the 'Knot-Tying Bureau'-another the Bureau For Un-tying Knots - the third headed the Bureau of Statistics On Tying And Untying Knots. In Chicago, a multiplicity of bureaux await the incoming conventions. Corporations belonging to the NAM (and smaller ones) can obtain pulchritude on the hoof, in quantity and quality. A certain lady, and a very pleasant and honest one, has just about monopolized the business of whispered negotiations with the 'Vice President in charge of - ' She knows exactly what the leaders of 'big business' want ... she is expert in prescribing for that 'far away from home and forgotten feeling' as felt by visiting tycoons.

There are Escort, Get Acquainted, Matrimonial, Social, Dance Together and other Bureaux for youth-seeking executives with synthetic suntans and girdles plainly marked 'athletic belt.' There are model agencies - and the agencies are 'model' - even if the girls aren't. For the time-savers and efficiency experts, there are the stark, and to the point 'call girls." All of these specialize in ministering to the corporate body.

The New Industrial Aristocracy.

Having disposed of royalty early in its history, with its Ferdinand's the XIIII, and Alphonse XVI, this country has now begun to become aware of princely, industrial blue-bloods with ancestral names. John Jeremiah Paster III, or Wellington James Oddfeller VII, are fictitious examples. Many of these are brilliant, having started in business with nothing, except a father who owned it. They do not usually please father, and one

of these is reported as having told his son: "Why!, by the time I was your age I'd already inherited my first million." Most of these young men enter a gift-wrapped culture with their orbits fixed,and with no affection for labor. But in the matter of recognizing the place of sex in big industry,at least one scion showed appreciation and initiative. He noted that when a ledger with red ink was held under the red-light of a bagnio - the figures in red - the losses - became invisible. His name, Minot 'Mickey' Jelke III, inheritor of a margarine fortune.

<u>From Bread-spreads To Bed-steads,In One Generation.</u>

'Mickey' Jelke III evidently dreamed great dreams. There is no evidence he took notice of the heavy expenditures for girls with swansdown seats, made by fellow industrualists, nor how this helped commercial intercourse. It has never been established that his social contacts with other 2nd,3rd and 4th generation industrial aristocrats inspired his high ideals. But he knew they had stranglo-holds on most of the vital needs of modern life - and belonged to the NAM.Yet,they too had a 'vital need' - prostitutes to close deals, so important to the operation of their inheritances. He noted this 'vital need' was in the hands of ordinary,common people. So he tried to create a novelty- the first prostitute-trust - a pander monopoly.

With all the pioneering ability of those whose efforts founded fine old families of industrialists, Mickey tried to found a family of flesoic monopolists. He saw the modern selling methods of his industrial counter-parts and desired to control the end-product involved. Instead of'calling his broker' - Mickey was calling his call-girls. He essayed to form a 'blond-trust, a monopoly in brunettes,and to cartelize the carrot-tops.' From the evidence at his unfortunate trial, it could be deduced he had brought industry the first reliable service of its kind.When the pinch came - those who remember Murder,Inc, forgot it in the presence of Pander,Inc.

When the big brassiere he had blown up finally burst,and he was arraigned,convicted and jailed, none of his customers came to his aid. We don't think 'big business' sent any cigarettes while he was serving his time. The NAM could not have been involved, if they had they would have testified as to the propriety of his profession,at his trial.His 'agency' broke up into its component and glamorous parts - some married, in fact one married a prominent stock-broker.

Sex For Sport Alone, Or Livening The 'Coffee Break.'

Removing sex from its more venal industrial aspects,separating it from its rational and 'deal-closing' purlieus,there remains the sporting angle. With no profit motive,the activities mainly concern the top executives and the Vice President In Charge of Personnel - who is a sort of a Brooks Bros Madam. They depend upon him, in this inter-departmental rivalry, for plentiful and comely game in season.

There is an unwritten law about the preserves,and game to be hunted. Those interested in odd pieces of Americana may note that the ethics of this sport are the same as those used on the hunting field of the executive. These usually belong to a 'sporting club'of a few acres. The club guarantees the member a certain number of birds each season. If he doesn't shoot them,they are given to him from a capacious freezer. Thus honor is satisfied. The docile ducks and geese - or quail, are raised like chickens,in coops,during the summer and learn to love those who feed them. Then on some chilly a.m, they are fed with doped mash, and after this has taken effect,are released and 'beaten' towards the stalwart hunters. Having been confined,and drugged, their altimeters don't work and they fly right into a solid line of musketeers,advertising and other executives - shoulder to shoulder,like an 18th Century Guards Regiment. They blaze away and the victims fall.

Now the sex rules of the office... closely related to what happened at the 'hunting' club, are based on the method of presenting these dead delicacies to the office help. These same rules apply to the disposition of the more comely and complaisant girls. The best game doesn't get allocated by seniority - but by the quality and condition of the bird,or lady. The top echelons,usually on Monday morning,present the birds with a few shot in them, or who died of fright,to their fellow executives. The same procedure applies to the best looking girls. They are the 'untouchables' of the upstairs offices,keep their noses in the air, and defy ordinary mortals.

But the bird which has been shot to bloody tatters while trying to hide behind a bush,and carries a half-pound of lead shot - is routed to the lowly mailing room.So does the little girl who has been (so to speak)'shot-up' while trying to hide behind the files. Creatures with shapely drumsticks and breasts,wearing gay and glistening plumage are routed upstairs to'B.F.'

Not all girls who inhabit offices submit to the higher echelons of corporation executives - but there has been an increasing incidence of unwritten laws by which these ladies have to abide. Most of the laxity has come to industry through the example of their alter egos - the advertising agencies.

Hucksters and Houris

Almost every advertising agency of note has a stunningly beautiful houri* at the reception desk - many of whom have definite functions in meeting clients with big advertising appropriations. In all too many cases the use of charm and diplomacy, applied during the day's work becomes physical when the sun sets. When such a one is given a single ticket to a theatre - the important client is given another. This aids the agency illusion of complete innocence in this sort of barter. If her seat happens (and it always does) to be next to the tycoon, all the preliminaries have been arranged.

Many of these ladies know what is expected. "This is a team," says B.F, "and the old team spirit must be kept." The tenor of these business mores, the 'team spirit' as far as the more agreeable receptionists are concerned, are unwritten, but B.F might put it this way: " Everybody must work hard and quietly, even if they are in the dark on why this is necessary. This IS a team, everybody must score a touchdown for good old Media, Speedier and Scab."

This lady, found much too often in the hucksters reception room, must, in all her contacts, be bound to a selectivity based on a 'class' society. To advocate, in any way, a classless society, and that the elevator operator might prove more interesting than the son of Vincent P. Heredity IIIII, would be subversive action. It could lead to increased Social Security for the aged, lower medical fees for the poor and decrepit, and perhaps joining a union. Girls who cannot follow the Ivy League aura of advertising agencies and maintain a clear, sharp illusion of morality are not (to use agency jargon) 'top drawer.' The skill of writers, layout men, artists and production men, which goes into a full page color ad, is too often preceded by the artistry of the lass who tippy-toes to the door of Suite 75A, and knocks gently.

* Houri. A nymph of the Mahommedan paradise ... Oxford Dictionary.

The NAM pleas of innocence of Murrow's charges, in the face of the evidence is as convincing as the girl, who having been called a 'two-bit floozy' by her boy-friend, first protested - then felled him with a big bag of quarters.

Guided Missiles And Guided Morals.

The cold war with Russia is the most important factor in our life - and it affects every part of our existence. Perhaps it is not only guided missiles but guided morals we need the most. There is an economic war being waged. Industry in our country is entering a decisive economic battle. Acts of flesh are an unsteady foundation upon which to build an economic edifice. Ed Murrow's talk, far from being a "prize package for the propaganda machine of international Communism," as stated in the editorial - is a clear effort to aid American business by exposing practices which may handicap it economically, thereby giving Russia an edge.

Bringing the corpse of the late Senator Joseph R. McCarthy into the matter because (per the NAM News) "Murrow pilloried him unmercifully and unfairly," is a Freudian slip - with the editorial writers mind dwelling fondly on what a fine show could be put up with Murrow being badgered by the most reliable supporter the NAM has possessed in the past decade. Dragging in McCarthy's cadaver by the heels was in the worst possible taste - but what can be expected from an organization which has a 'subsidiary corporation' dealing with 'the oldest profession in the world.'

Persons still in their prime can remember when the NAM was crying disaster because 'radicals' wanted to abolish child labor. This was the period in our history when children from 7 to 12 years of age were working from eight to 14 hours in mills and factories. Small wonder that big business also fought to prevent compulsory education in every state of the union. Fourth generation magnates should remember it was daddy who sweated wealth out of half-starved children. It is therefore no great surprise their sons should similarly exploit human flesh for the greater glory of corporations. As an old English proverb has it: "Here's to the poor, let 'em suffer, they're used to it!"

Labor resents the transfer of guilt by implication - it resents the suggestion of some sort of conspiracy with Ed Murrow,

and it doesn't believe Murrow had any ulterior motive. Labor is well aware of NAM genius in dissembling and deceiving. It is used to certain mechanisms of defense, and attack peculiar to the NAM. Its views on such are expressed in a story about President Eisenhower.

He visited an Indian concentration camp during an election campaign to be made a 'Chief.' The redskins were enthusiastic and appreciative although the camp was dilapidated and dirty. They shouted 'ungar! ungar! as the entourage departed. Ike asked what they meant. 'Don't step in the ungar!' said the interpreter.

That's what labor asks the NAM ... don't step in the 'ungar' and then try to throw the blame on us.

It is time big business lowered its sights from profits to the level of human beings. Father, and grandfather exploited men, women and little children and passed on fortunes to some worthy, and many unworthy men. Such exploitation is no longer easy. Corporations are still the scenes of a struggle between the stockholders who do not labor - against laborers who do not own stock. But the type of downright abysmal exploitation of the working class which belonged to father's day - is gone, thanks to labor and continual organization. That is why 'flesh peddling' in the lowest sense, prostitution for profit - becomes so shocking. This is the lowest form of exploitation. Nor can labor allow protection for those who employed such methods - by permitting the guilt to be fobbed off in a brazen manner. Perhaps the famous jurist, Judge Coke, best expressed why big business can get away with so many outrageous performances. Ruling in the classic case of 'Sutton's Hospital, he said:

> "Corporations cannot commit treason, nor be outlawed, nor be excommunicated - <u>for they have no souls</u>."

Is this the reason they can pimp with impunity?

U.S. Fights 'Corner' on Drugs

Plot Laid to 6 Firms

WASHINGTON, Aug. 2 (UPI)—The Federal Trade Commission today accused six leading drug firms of attempt to monopolize the $330,000,000-a-year "wonder drug" industry.

The commission, which policies fair trade practices, charges the firms maintained "arbitrary, artificial, non-competitive and rigid" prices for the so-called life-saving drugs.

It also accused one of the frims, Charles Pfizer & Co., of Brooklyn, of making false and misleading statements to the U. S. Patent Office so it could get a patent on tecracyline, key drug among the antibiotics which include auromycin and terramycin.

$100 MILLION SALES

The commission said sales of this drug brought $100,000,000 last year. It added that all the business went to Pfizer and five other companies which it licensed to sell tetracycline.

In addition to Pfizer, the complaint named American Cyanamid Co., Bristol-Myers Co. and Olin Mathieson Chemical Corp., all of New York City; Bristol Laboratories Inc., Syracuse, N. Y., and the Upjohn Co., Kalamazoo, Mich.

The companies were given 30 days in which to reply to the complaint. A hearing was scheduled for Oct. 1 in New York City before an FTC examiner.

John E. McKen, president of Pfizer, denied the 'legations. He said:

"Pfizer had never engaged in a conspiracy, never fixed prices and wields no monopolistic powers."

WILL FIGHT CHARGES

He labeled as "utterly baseless" the charge that the company misled the patent office.

A general denial also was issued by W. G. Malcolm, president of Cyanamid.

Frederic N. Schwartz, president of Bristol-Myers, labeled the charges "baseless." He also denied the FTC allegations and promised to fight them "with all the resources at our command."

Chairman Magnuson (D-Wash.) of the Senate Commerce Committee said he hoped the FTC action would result in lower drug prices. Magnuson asked the commission to undertake the investigation which led to the monopoly charges.

Chicago American April 5, 1958

HIGH MEDIC BILLS FOR AGED BIG ISSUE

AMA-Labor Battle Looms

BY PAT MUNROE
Washington Correspondent, The Chicago American

WASHINGTON, Apr. 5—Congress is slowly but reluctantly setting up the ring for one of the session's biggest fights—what to do about high medical bills for the aged. Hearings are expected to begin in a few weeks.

The two principals in the scrap are the AFL-CIO, with a membership of some 14,000,000, and the 170,000-member American Medical Assn. The AMA is a toughened veteran of many a Capitol Hill skirmish, and is expected to make the odds in this battle come out about even despite being on the short end numerically.

The AFL-CIO has been pushing for months for House hearings on a proposal to have the federal government pay the medical-nursing-hospital bills of all persons older than 65. This would be done by increasing the present 2¼ per cent Social Security tax and by broadening the tax base from a ceiling of $4,200 to $6,000.

The AFL-CIO further would change the present Social Security Law so that benefits would rise on the average of about 10 per cent.

Another Raise in 1960

A spokesman here for AMA points out that the Social Security tax already is scheduled to rise to 2¾ per cent in 1960, and that "an additional one-half of 1 per cent" would have to be added to cover the health features. He said:

"If this legislation is enacted, by 1975 a self-employed person would have to pay out up to $427.50 annually just in Social Security taxes. A comparable limit now is $141.75."

AMA's alternative to the plan is a drive to increase the number of holders of health insurance policies among people over 65. It contends that the number of persons in this bracket who've taken hospitalization insurance since 1950 has jumped from 25 to 50 per cent.

There still are 3,500,000 people over 65 who can't afford the insurance payments. Their health bills are paid with various forms of public assistance. Medical care alone totals $100,000,000.

From all appearances, the White House will oppose the bill, which was introduced by Rep. Aime Forand (D-R. I.).

Charge 'Socialized Medicine'

The AMA has lined up strong support, including the American Association of Nursing Homes, the American Hospital Assn., the American Dental Society, the Farm Bureau and the National Association of Manufacturers. The rallying cry: "Socialized medicine!"

The AFL-CIO has won the backing of "liberal" groups but really has enough strength to go it alone.

A battle is under way for the affections of the 180,000-member American Nurses Assn., which has ducked any firm stand on the subject. The nearest the nurses have come to taking a stand is to express "resentment" over "suggestions" from the other segments of the medical profession (particularly the doctors) that they go along with them.

Hester, Neil

March 20, 1958

Dear Neil:

Thank you for your letter of March 17th and brochure on North Carolina's vacationland attractions.

Your suggestion of a subject for treatment on a television program is a very interesting one. We are fully committed on SEE IT NOW for the remainder of the year, but will be glad to consider your idea for some future time.

Sincerely yours,

Mr. Neil Hester

The News and Observer – THE RALEIGH TIMES

Morning and Sunday *Afternoon*

RALEIGH, NORTH CAROLINA

March 17, 1958.

My dear Ed:

Just want to thank you again for referring me to Mr. Irving Gitlin, your Director of Public Affairs. Last Tuesday I had the privilege and pleasure of unveiling my Puzzlewords creation before Mr. Gitlin, Mr. John Jefferson and Mr. Oscar Katz and felt most fortunate indeed in having such a distinguished, courteous and friendly audience for the occasion. And I am deeply grateful to you for making such an approach and appointment possible.

Also, I had the pleasure of meeting your most courteous and charming secretary while in the CBS building. She got me so flustered that I forgot to ask her name. I offered her a cigar, but had to settle with just putting the cigar band on her finger. It was a real pleasure, too, to meet her.

I told my gentlemanly audience about the ordeal Friday night a week ago in my family. When the first edition of The Old Reliable comes off around 10 o'clock, I get in the car and go home to supper just in time for your program. Well, last year's national basketball champions, the University of North Carolina, and the famed State College team were fighting for first place in the ACC tournament that Maryland finally won, it being the first time in years that State or one of the Tar Heel Big Four teams failed to win the title. And while the nip-and-tuck basketball game was going on via radio we wanted to see you, Charles Van Doren and Ginger Rogers, too. It was a problem. So, we turned on both the radio and the TV in our living room combo and watched the picture while listening to the exciting game. But every time there was a time out in the game, we turned up the TV sound - and kept that up until your program - which is a "must" in our household - came to an end.

While I was talking with Mr. John Jefferson, I told him I had a topic in mind for your "See It Now" series that I thought I would have the effrontery to relay to you. To me it is both fascinating and somewhat frightening and I would call it "Where Are the Giants?" or something to that effect. In my 40 years of newspapering I don't think there ever was a time in the world news arena when there were so many complex problems and so few giant personalities to deal with them. And it is both mystifying and disturbing for this age of mass production and interplanetary science to fail to produce great personalities to whom to look for leadership, inspiration and and solution of our problems. And especially do we lack towering men in the United States, Britain and France to symbolize the way of life of the free world and defend it adequately in the grim universal ideological struggle. Maybe we are getting out of the pioneer age that produced such personalities and going into one of comparative mediocrity in leadership. There seems to be a tendency to submerge sparkling individuality in high-speed, colorless and gigantic organization that converts human beings into cogwheels and statistics; and a lack of leisure time in our helter-skelter everyday routine to develop and express outstanding individualism. All of this may be an inevitable product of the times, but to me it is sad just the same.

We have an election coming up without either political party having a personality giant around whom to rally or to whom to look for sorely needed leadership. We have an administration that to me personally, a Josephus Daniels Democrat, probably is the most inefficient since the Harding regime. With Sir Winston retired, there is no giant in England; and France is in the throes of the worst siege of mediocrity and indecision in its political history. West Germany has the only giant we can count on on our side - and they say the Germans stay awake at night wondering what is going to happen when Papa Adenauer passes on.

The News and Observer – THE RALEIGH TIMES
Morning and Sunday *Afternoon*
RALEIGH, NORTH CAROLINA

The situation brings up some interesting and pressing questions. One, of course, is speculation as to why we are failing to develop the great leaders that we need so badly. Is it a product of a new, high-speed era of civilization? Is it due to the terrific sacrifice of time and money necessary to spotlight and popularize personality? Is it because giant business prefers to operate through automatons in high places? Is it because the giants of industry are unable or unwilling to become giants in government and world affairs? Or is it a general tendency to subordinate colorful individuality to organizational perfection? Is it because practicality is taking precedence over principle and the urge to fight for convictions regardless of consequences is on the wane?

At my age of 60, all this most likely could have the ring of approaching senility or that stage of life called "second childhood" in which one is prone to look back on the "good old days" and find them most thrilling and pleasant as compared to present day routine. But the more I think of it, the more I am convinced that there were things behind us that we enjoyed and that inspired us that we do not have now. Take The News and Observer, for instance. For years, as we worked with the Old Man, we had a family-knit organization that revolved around his personality and principles; we used his name with pride, pleasure and telling effect wherever we went; we pointed with pride to what the Old Man and his newspaper symbolized; and we learned to fight for what is right and to hell with the consequences. It was that kind of giant who enabled The News and Observer to hold the distinction of being the only daily and Sunday publication in the world with a circulation ratio of two-to-one over Raleigh's population. And the other big papers in the State in those days also symbolized personalities. But what are they now? All of them are colorless, adding machine business enterprises, including us. And that observation entails no personal criticism of the boys running the paper now.

Whether this could be rigged up into an impressive program, I don't know. But I do think it is a timely and fascinating topic. It might be done with flashbacks on the lives of giant leaders of 20 to 25 years ago sandwiched between brief quiz interviews with selected current individuals; with comments from old-timers on the "good old days" and comparative comments from individuals of the present era. Or it could be found to be entirely impractical for production. Anyhow, all of this effrontery is "on the house" and if you find anything useful in it, you are entirely welcome.

Charlie Parker, our State advertising director, and a former city editor of The News and Observer, just has turned out his 1958 edition of variety vacationland attractions done in color. I thought you might like to see one, so I am letting this letter ride along in its envelope.

Thanks again and you may rest assured that the Hester family will be watching you without fail, as we have done for many months.

Yours sincerely,

Neil Hester

THE NEWS AND OBSERVER
NEWS DEPARTMENT
RALEIGH, N. C.

February 27, 1958.

My dear Ed:

Many thanks for your kind reply to my letter of February 4 and for referring me to your Mr. Irving Gitlin.

I have written to Mr. Gitlin, requesting an appointment for demonstration of my program on Tuesday, March 11. I merely told him I had been referred to him as a proper person to whom to write about my show and did not use your name as an introduction.

The great County of Guilford continues to grow and prosper. I was through Greensboro, going and coming, when I rode the train to the Frisco Lions International convention last summer. It's a nice place in which to live.

Yours gratefully,

Neil Hester

Hester, Neil

February 24, 1958

Dear Neil:

Thank you for your letter of February 4th.

Your idea for a television program may, perhaps, have merit, but I am sorry to have to tell you that I have no authority or control over any programs other than my own. If you care to pursue this any further, I suggest you write to Mr. Irving Gitlin, Director of Public Affairs' Programs.

Thank you again for taking the time and trouble to bring your ideas to my attention.

Sincerely yours,

Mr. Neil Hester

Morning and Sunday *Afternoon*

RALEIGH, NORTH CAROLINA

February 21, 1958.

ignore

our letter sent out.

Dear Friend:

A few weeks ago I addressed a letter to the personal attention of Mr.Murrow seeking information as to whom I might contact in the CBS Television program department to make an appointment for submission and demonstration of a comprehensive television entertainment creation of my own. At this writing I have not received a reply as respectfully requested. Whether or not Mr. Murrow cares to reply, or just has not gotten around to it, of course, I don't know. And it is entirely possible and understandable that he might not relish the idea of giving me the opportunity to use his name and reputation to gain entrance to CBS, even if I am an old newspaperman - age 60 this past Wednesday - in a location with which he is entirely familiar. And I would not have to be told that men of his outstanding position and reputation are bombarded constantly by crackpots and other well-intentioned souls for personal favors. In such a situation, it would be difficult to tell whether the writer deserves a hearing or should be ignored as an impositional nuisance. I realized all this, of course, when I wrote the letter.

But I still desire the information I sought and I can't conceive of an organization of the reputation of CBS refusing a correspondence courtesy to a person who is deserving of such courtesy. So, I will endeavor as earnestly as I can to satisfy you personally that I deserve and would appreciate some kind of reply to this letter; and I respectfully am asking you in your position of access to put this communication in the hands of the proper person to consider it thoroughly and make a reply. I am ready to make the trip to New York with my program, but I would like to know where I am going before I start. And if you kindly will lend me your aid in putting me on the right track to an appointment, I will be most grateful.

Now, as to this program of mine - it is not just an idea to be fathomed and equipped with practical details by someone else. It is a perfected and finished product in miniature paraphernalia ready for demonstration. I come from a show family and have been in the show business since childhood. I would like to say as modestly as possible that I have the happy faculty of being able to make folks look, listen and laugh; and I think I am a fairly good judge after years of experience as to what will make folks look, listen and laugh. So, this product of mine is not a puerile or amateurish brain spasm, but is the composite result of almost 18 years of thought and experimentation on my part. I have not endeavored to demonstrate it locally and most of my friends know nothing about it. Frankly, I am egotistic enough to regard it as big league stuff - or else. Consequently, I think it should be shown first in a big league setting. That's why I am asking you for help.

In laying my cards on the table face up, I will say further that my creation was designed originally for newspaper syndication. And it has been lying idle in my desk for the past several years waiting for the newspaper syndicate market to improve. But instead of improving, the newspaper feature market has gotten worse; and at the present time it is in the worst shape I ever have seen in my 40 years of experience. The newspapers, including mine, are having more economic trials and tribulations than ever before. Instead of buying features, they are cutting out as many as possible to fit the diminished space due to severe advertising losses. So, I regard the newspaper syndicate prospect for my creation as well-nigh hopeless right now.

The News and Observer – THE RALEIGH TIMES

Morning and Sunday *Afternoon*

RALEIGH, NORTH CAROLINA

Well, a few weeks ago, at one of our family conferences, we discussed again what to do with my brainchild. We are inveterate TV viewers, with a big combo in our living room and another in our kitchen-breakfast room so we won't miss anything even at meal times. The suggestion was made that I adapt my program to television, as the TV material in our amusement pages in our two newspapers has had the crying need for new and popular TV programs as a more or less constant theme.

So, I went to work on the adaptation. And after viewing the finished product, I am frank to say that I was right proud of my handiwork. It looked even better than I had anticipated. As I wrote to Mr. Murrow, this thing is something new under the sun; it is unlike anything you have seen on TV, heard on radio, or have seen in print. It has a fundamental popular appeal basis and is rigged up both for audience participation and direct mail viewer participation as a popularity gauge. I do not believe it would be wise or serve a useful purpose to tell you exactly what it is, as it would have to be shown and demonstrated simultaneously to be presented effectively for evaluation. I most sincerely am ready to show and demonstrate it and all I desire is an appointment with someone to whom to show and demonstrate it. A new York trip takes time and I would like a definite time appointment of around two hours. And I feel satisfied and honest in saying that this appointment time would not be regarded as a waste of time on your part.

In the event you would like any further evidence of my ability, my personal reputation, my position of responsibility and esteem in this community and my reputation as an experienced showman, you are entirely at liberty to contact these references for corroboration:

Mr. Lester Rose, Executive Secretary, Raleigh Chamber of Commerce.

Mr. M. R. Gibson Jr., President, Lions Club of Raleigh, P. O. Box No. 63.

Mr. Edward L. Rankin Jr., Secretary to the Governor, State Capitol, Raleigh, N. C. (Ed is secretary to Governor Luther H. Hodges).

And if CBS is not interested in taking a look at my program, I would be grateful for a reply to that effect so that I may make appointment contact efforts elsewhere.

Yours most sincerely,

Neil Hester

1426 Mordecai Drive,
Raleigh, North Carolina.

GOINGS ON by Raymond Lowery

Truman-Murrow Chat On TV

DISTILLIZATION (atrocious word!) of four days of wide-ranging conversations — on a host of significant subjects —between former President Harry S. Truman and Edward R. Murrow will be the "See It Now" presentation on some of the CBS television stations at 5 o'clock this afternoon.

The program, titled "From Precinct to President: Some Reflections by Harry S. Truman," was originally filmed by Murrow and co-producer Fred W. Friendly in February, 1957 to provide posterity with a visual document on a President of the United States. However, during the past 12 months, much of Mr. Truman's pungent commentary is said to have become so pertinent and timely that the producers decided to release portions of the nearly 50,000 feet of film in the form of the Feb. 2 program.

During the days of relaxed conversation at Mr. Truman's vacation retreat on Islamorada, one of the semi-tropical islands in the Florida Keys, he and Murrow discussed almost every topic that had made news during the seven-year Truman occupancy of the White House, as well as intimate details of Mr. Truman's childhood, his young manhood, his early entry into politics, and his historically significant career since then.

"RUMPELSTILTSKIN," second presentation in the "Shirley Temple's Storybook" series, will be telecast "live" on NBC-TV stations this evening at 6:30 o'clock.

Shirley Temple, the hostess and narrator, will introduce John Raitt as the handsome young king, Phyllis Love as

HARRY S. TRUMAN and EDWARD R. MURROW. At Islamorado in the Florida Keys.

ahad who befriends runaway millionairess. Jack Lemmon, June Allyson. UNTAMED—Action-filled and beautifully-photographed film tells the love story of an Irish heiress and a Boer leader, but the plot is as confusing as all get-out. Tyrone Power, Susan Hayward. (WAKE)

MISCELLANY

BRUBECK COMING—The Dave Brubeck Quartet, top modern jazz combo, will give a concert at East Carolina College in Greenville on Wednesday night at 8 o'clock in Wright auditorium on the college campus. The group includes Brubeck at the piano, Paul Desmond, alto saxophone, Joe Morello, drums and Norman Bates, bass.

OPENER SELECTED — "Here Today," a farce by George Oppenheimer, has been selected by the producers, Fred and Patricia Carmichael, to open the current season of the Caravan Theater, a summer stock company at Pinehurst. The play will be seen one night only, Feb. 21.

ORGAN DEDICATION — The new Reuter organ console in Hill Music Hall on the University of North Carolina campus at Chapel Hill will be dedicated at a special recital Tuesday night at 8 o'clock. Robert Baker, noted organist, will be the guest artist for the program.

DUKE RECITAL — The Duke

N. C. Delegates Oppose Pay-TV

WASHINGTON, Feb. 2 (AP) — North Carolina's House delegation is turning thumbs down on pay television in the wake of overwhelming Tar Heel mail against it.

The state's only Republican congressman, Charles R. Jonas, said a television appeal "to let your congressman know" on the issue deluged him with 25,000 letters and telegrams in the last three days.

Inquiries of 11 of the state's 12 House members of their offices showed the members opposing pay TV. Rep. Bonner was the member who could not be reached, but an informed source in the delegation said he believed all were opposed.

BETTY GRABLE and DESI ARNAZ Introduce "The Bayamo" on TV.

HARRY JAMES and Betty Grable will guest star on CBS television's fourth "Lucille Ball-Desi Arnaz Show" at 8 o'clock tonight, with Vivian Vance, William Frawley and little Richard Keith in supporting roles.

Making one of their infrequent appearances together, the husband and wife team of Miss Grable and James will portray themselves in the madcap comedy hour, which finds Lucy in possession of a love-starved trotting horse won in a breakfast cereal contest. Lucy's and Betty's determination to keep the horse despite Ricky's (Desi Arnaz) objections is climaxed by the inevitable "big race."

Highlighting the show is a musical number, "Bayamo," danced by Arnaz and Miss Grable to the trumpet music of band leader James.

ED MURROW's hour-long conversation with former President Harry S. Truman was about as entertaining and enlightening as any personality program ever seen on television. Mr. Truman was interviewed a year ago on the Florida keys, and part of the filmed session was presented yesterday on the always-excellent "See It Now" series.

Among the former President's pithy comments:

"The Missouri Waltz"—"It's a ragtime song and if you let me say what I think—I don't give a damn about it, but I can't say it out loud because it's the song of Missouri . . ."

Gen. Douglas MacArthur —"I never had anything personal against the general. He's a great military man . . . but he brought it on himself—fired as Far East commander — and it had to be done."

Sir Winston Churchill—"One of the most agreeable men I ever met . . . A hard bargainer."

India's Jawaharlal Nehru—"An honest man, but he doesn't think down our line very well."

Former Soviet Foreign Minister V. Molotov: "One of the pigheadest men that I've ever come in contact with."

The late Soviet Premier Stalin: "He made a very agreeable impression on me at Potsdam. Of course, I didn't know at the time he had no intention of keeping it—the agreement."

Mr. Truman recalled working as a handyman in an Independence, Mo., drug store—and prominent men in the town would stop by there in the mornings for "an eye-opener."

He said he did not know who originated the phrase, "Give 'em hell, Harry."

"I always told them," he said, "when they would say that to me in a crowd, that I never did give anybody hell. I just told the truth on 'em and they thought it was hell."

While Mr. Truman's strong convictions have been stated before (in other context), these off-the-cuff remarks beamed to a TV audience of millions undoubtedly did more to reveal Truman the man to Americans than any previous interview with the former Chief Executive. Murrow says he has far more controversial matter on film, but it won't be aired before—if I recall correctly—1990.

MOVIES

The News and Observer – THE RALEIGH TIMES

Morning and Sunday *Afternoon*

RALEIGH, NORTH CAROLINA

February 4, 1958.

My dear Ed:

You may or may not have heard of me personally, but no doubt you are well acquainted with The News and Observer, still commonly known as "The Old Reliable" of Josephus Daniels fame. I am the perennial front page editor and next May round out my 38th year. I joined up with the Old Man when he got out of the Navy secretaryship in 1920. It was a great privilege to have worked with him for approximately 30 years.

In addition to my newspaper career, I have been in the show business for nearly 25 years as toastmaster, emcee, after-dinner entertainer and civic club inspirational speaker. When the paper went into the radio business with WNAO-AM-FM back in 1949-50, the Daniels boys drafted me as so-called manager for a year and a half. During that time we got the Hooper up to 30 across the board against WPTF and WRAL, got the station in a salable condition - and they sold it.

For some years I have been working on an original entertainment idea of my own; and it gobbled up many, many hours of time and thought as it developed. I now believe I have simplified and perfected it to the point where it is presentable as a novel and salable television program production. And it is unlike anything on the air - TV or radio - or in newspapers and magazines. As I am about ready to show it in its present form for the first time - it still is a local secret - I was wondering if your organization would be interested in taking a look at it. If so, I would be glad to make the trip to New York for that purpose at any time it would suit the convenience of CBS. And I would appreciate the name of whatever CBS official I should contact for such an appointment. It would take a couple of hours or more to demonstrate my program creation. And if CBS would not be interested, I would be grateful for the referential name or names of some other groups or individuals who might be interested in new TV program ideas. Any reply you might wish to make to this letter would be deeply appreciated. I enclose a reply envelope for you convenience.

In conclusion, I would like to say that your Truman program last Sunday afternoon was one of the greatest and most constructive expositions of the philosophy of government that I ever had the privilege of viewing or hearing. I hope history will agree with my long-held opinion in due time that Mr. Truman was one of the most human, honest and efficient Presidents we ever had. Our TV boy gave you a good spread in our Monday paper and wished he had room for more. I told Jonathan Daniels what he missed while he was away from home Sunday afternoon. He said he sure was sorry that he didn't see it. I understand you have some more Truman interview material. If so, I hope you will find it usable before long.

Your "Person to Person" is a must with my TV-minded family and I get to see it myself when I go home to supper after putting the first edition to bed. And we take the liberty to point with pride to your North Carolina background.

Yours sincerely,

Neil Herndon

[illegible] etc.

YEAR 'ROUND MID SOUTH

MORE VACATIONISTS TRAVEL this road than any other in the National Park System. It is the Blue Ridge Parkway, which enters from Virginia and skims the crest of the Southern Appalachians in North Carolina to meet the Great Smoky Mountains on the North Carolina-Tennessee border. It is a highway so safe that it is difficult to believe you are driving in the mountains—until you stop at the many overlooks and revel in the spectacular vistas. The Parkway is ever-changing, even within the four seasons. Here you see it in Spring.

This booklet is a Sampler. It is impossible within the scope of a single publication to show even a major fraction of the attractions within the State known as Variety Vacationland, but on the inside back cover you will find suggestions for obtaining more information about them.

The Cover—There are very few natural rhododendron gardens to compare with those atop Roan Mountain. The flat, moss-bedded crest of The Roan, rising 6,286 feet, commands a view of three states and the highest mountains in Eastern America. It is easily accessible from the Blue Ridge Parkway. Turn north on N. C. 26. The Rhododendron Festival is held in the last week of June.

THIS IS THE BLUE RIDGE PARKWAY in Autumn. It is so well-graded and devoid of sharp curves, characteristic of most mountain roads, that it is possible to drive its entire length in a day. The famed travel writer, Wyatt Blassingame, says however that you ought to have your head examined if you do. The Parkway is for leisurely driving; for stopping and enjoying.

Peaks, Pageants and Porpoises

Gilbert Love, writing in the Pittsburgh Press, titled the account of his vacation journey from North Carolina's Great Smokies and Blue Ridge Mountains to the beach at Cape Hatteras, taking in the three outdoor dramas en route, "Peaks, Pageants and Porpoises." North Carolinians—who always pronounce the "o" and roll the "i" softly when referring to person rather than domain—find this a pleasing description of their Variety Vacationland State.

Visitors to North Carolina are likely to run into Governor Luther H. Hodges anywhere. He's the State's No. 1 tourist, logging over 44,000 miles in his first year in office. A more approachable fellow you'll never meet—so don't hesitate to introduce yourself when your paths cross in Variety Vacationland. In the Capital City of Raleigh, be sure to visit the Capitol. It is an architectural gem, and there's an information desk in the rotunda.

ORTON IS A SYMBOL, one of several ante-bellum plantations on the Southeastern Coast, where spring begins in North Carolina and is heralded by the Azalea Festival at Wilmington, usually in the first week of April. The blooming season sweeps westward, and is marked by Garden Tours and Festivals until late June, when the incomparable Catawba Rhododendron tints the highest mountains. On the Carolina coast are beaches and famous salt water fishing centers from Southport to Cape Hatteras and Oregon Inlet, on the Outer Banks Islands, and at Kitty Hawk, Kill Devil Hills, Nags Head and Roanoke Island—Land of Beginnings about which there is more further along in this booklet.

Orton House is illustrated in azalea season. This plantation dates from 1725. It and other famous plantations of the Lower Cape Fear Country are easily accessible from U. S. 17 (The Ocean Highway) which passes through the Port City of Wilmington. These Plantations are open to visitors the year around and include Airlie, near Wrightsville Beach, and Clarendon and Pleasant Oaks.

THE FORMAL GARDENS at Orton on the coast, Duke University Gardens at Durham, in the central part of the State, and Biltmore House at Asheville stand out in a tour of many gardens across North Carolina.

GREENFIELD LAKE is a place of a million azaleas in spring and a fairyland of moss-draped live oaks and lagoons the year 'round. It is in a public park in Wilmington on U. S. 421, en route to Carolina and Kure Beaches and historic Fort Fisher at the Mouth of the Cape Fear.

DOGWOOD IS NORTH CAROLINA'S STATE FLOWER. It abounds from coast to mountains, and its blooming season extends from early April on the coast into May in the mountains. It blooms in dazzling array in the Mid-South resorts of Pinehurst and Southern Pines.

THE CARNIVOROUS VENUS FLYTRAP (lower right) is found in Southeastern North Carolina, and is one of a number of rare wild plants found in the State. There are 26 species of wild orchids in the Great Smokies, and Shortia Galacifolia, lost for a century, was rediscovered near Cashiers and Whiteside Mountain in the waterfall country.

CAMELLIAS USHER spring into the gardens of Southeastern North Carolina. The Wilmington Camellia Show, around March 1, is famous.

BEACHES ARE DIFFERENT along the Variety Vacationland coast. They are uncongested gateways to places of great historic interest. There are many small beaches with modest accommodations. Those with larger hotels include Nags Head, Atlantic, Wrightsville, and Carolina. All beaches are bases for year 'round fishing, from surf, pier and charter boats that range out to the Gulf Stream.

BOATING IS POPULAR in sheltered waters along North Carolina's coast. Here are sailboats testing the famed Pasquotank River race course at Elizabeth City.

CHARTER BOATS are ready to go after big ones in the Gulf Stream and smaller game inshore. Morehead City, illustrated, is North Carolina's largest salt water sports fishing port.

WATERFOWL HUNTING along the North Carolina coast is fabulous. Currituck for ducks, Mattamuskeet for wild geese. The geese darkening the sky in this picture, however, are for shooting with camera only. They are at Gaddy's Pond, a popular tourist attraction well inland on U. S. 52 at Ansonville.

CAPE HATTERAS is called Gamefish Junction. The young ladies didn't catch this blue marlin, though. They are part of the coastal scenery that greets the rough and ready anglers who match their skill with the big ones of this fishing coast where more than 30 varieties of salt water fish are caught.

WORLD RECORD CHANNEL bass are caught here, and surfcasting is in season from March to December along the North Carolina coast.

FISHING'S FOR EVERYBODY in North Carolina. They'll bite on hundreds of streams and ponds for youngsters and folks with elemental gear as well as the complete angler.

FONTANA LAKE, in the Great Smokies, is fabulous for largemouth bass. Trout streams border it.

TROUT CHALLENGE the skillful fly-rodder in mountain streams of Western North Carolina. Some of the best streams are in the Great Smoky Mountains National Park and Pisgah and Nantahala National Forests.

The booklet "Fishing and Hunting in North Carolina" contains a map of 100 favorite fresh water fishing spots in North Carolina's mountain vacationlands. This booklet also has information about salt water fishing—when they are in season and where to go for them.

Hunting, all the way from wild boar and bear and deer to small game, is covered in this book, too. Current fishing and hunting regulations, and information about hunting in national parks and forests is also included.

A copy of "Fishing and Hunting" will come to you free on request to the State Advertising Division, Dept. of Conversation & Development, Raleigh.

THE HISTORICAL DRAMA, as presented today, is a major tourist attraction. It is a North Carolina original. "The Lost Colony," on the actual site of the first English Colony on Roanoke Island, pioneered this type of entertainment and education in 1937. It has continued with growing popularity. This elaborately costumed scene shows Indians from the New World being presented to Queen Elizabeth by Sir Walter Raleigh.

The outdoor historical drama season is late June to September, nightly except Monday.

DANIEL BOONE is the popular character in "Horn In The West" at Boone, near the Blue Ridge Parkway, and Blowing Rock, both popular resorts. The drama is about pioneer life in the Southern Appalachians during the Revolutionary period and constitutes a stirring story of the Colonists' struggle for independence.

INDIANS ARE FEATURED in all the outdoor dramas, but Indians actually act in "Unto These Hills" in the Great Smokies. Nearly three-quarters of a million people have seen this stirring drama since its premiere in 1950. Oconaluftee Indian Village is adjacent to the theatre, recreating Indian life of 200 years ago. It's open May to November, and allow an hour for the guided tour and more for other sightseeing in Cherokee, at the junction of U. S. Highways 19 and 441.

HIGHEST SAND DUNES along the Atlantic Coast are those near Nags Head, Kitty Hawk and Kill Devil Hills on the Outer Banks of North Carolina. These are restless mountains of sand, shifting with the coastal winds. The most famous dune is no longer restless, however. It is Kill Devil Hill, where the Wright Brothers made the first heavier-than-air flight. This site of a famous first is firmly anchored with grass. It overlooks Roanoke Sound, across which is Fort Raleigh, site of the "Lost Colony" on Roanoke Island. Surf bathing is enjoyed from May until October along North Carolina's coast, dotted with resorts, but still containing long and uninhabited stretches.

PIRATES JAMBOREE is the colorful title of the April festival along the Outer Banks, which in earlier days were infested with pirates, of whom Blackbeard, the most infamous, met his fate at Ocracoke.

CAPE HATTERAS LIGHTHOUSE is the symbol of the new and only National Seashore in America. Cape Hatteras National Seashore preserves in its natural state over 70 miles of the Outer Banks from north of Oregon Inlet to Ocracoke. Hatteras Island itself, reached by free ferry, has a hard-surfaced road the length of the island and to the famous lighthouse. Hundreds of ships were wrecked off Hatteras before the advent of modern navigational aids, giving it in former days the dread title "Graveyard of the Atlantic." Some wrecks still lie bleaching and rusting on Outer Banks beaches.

MAN FIRST FLEW here in heavier-than-air craft. The first flight by the Wright Brothers near the base of Kill Devil Hill lasted only 12 seconds and covered less than a third the length of a football field — but it made history that is celebrated each December 17. The village of Kitty Hawk, where the Wrights stayed during their experiments, is not greatly changed from 1903 when the first flights were made, but across the Dunes on the then lonely beach are now the booming resorts of Nags Head and Kill Devil Hills, open the year 'round.

ON TOP OF OLD SMOKY vacationers view the most visited of all National Parks, lying along the North Carolina-Tennessee Border. This is Clingman's Dome, elevation 6,642, third highest peak in North Carolina and highest in the Great Smokies. It is reached by an easily graded, hard-surfaced highway from Newfound Gap on U. S. 441. In the Great Smokies Park are 16 peaks topping 6,000 feet elevation. The Smokies get their name from the mist constantly hovering at this height, for here these mountains range above 5,000 feet for 36 consecutive miles and form the highest land mass east of the Black Hills of South Dakota.

BEARS ARE FAVORITES with vacationers in the Great Smoky Mountains Park, where they are protected. They are also found in the National Forests of North Carolina, where in season they are highly prized game. The 1,107,000 acres of National Forests in the Variety Vacationland State contain 28 recreational areas, miles of trout streams, and beautiful stands of timber.

LOOKING GLASS FALLS in Pisgah National Forest is one of many waterfalls in the mountains of North Carolina.

BILTMORE HOUSE near Asheville, containing priceless art treasures, is open to the public the year 'round.

CAMERA IS INDISPENSABLE on North Carolina vacations, mountains to coast.

WHITESIDE MOUNTAIN on U. S. 64 is a sheer cliff, but you can drive to the top.

CHIMNEY ROCK has an elevator to its summit, overlooking Lake Lure.

LINVILLE CAVERNS, beneath the Blue Ridge, is a fascinating study in miniatures.

YOU CAN TAKE the high roads with safety in North Carolina's mountains. The Blue Ridge Parkway is graded like a low country highway. Here it is seen near Doughton Park, one of the oldest sections constructed nearly 20 years ago, east of Asheville.

NEW SKY ROAD is called Wagon Road-Beech Gap section of Blue Ridge Parkway. This is west of Asheville.

PEAKS ARE SERVED up tall in North Carolina. Here, at the crest of Mt. Mitchell, is the Rooftop of Eastern America—6684 feet above sea level. The grave of Dr. Elisha Mitchell, who first determined its height, is here beneath the observation tower. Mitchell is reached by hard-surfaced road from the Blue Ridge Parkway. On the page opposite it is seen from 30 miles away on the new highway to The Roan.

"But Westward now he caught a glimpse of the western range. It was more spacious there. The hills climbed sunward to the sun. There was width to the eye, a smoking sun-hazed ampliture, the world convoluting and opening into the world, hill and plain, into the west." Thus Thomas Wolfe saw his native North Carolina mountains as vacationers now see them from the top of Grandfather Mountain, and on the page opposite as they view Grandfather, in the Blue Ridge, in autumn.

CONE MEMORIAL is the craft center on the Blue Ridge Parkway.

MUSEUM OF ART in Raleigh is the only State institution of its kind, housing a $3,000,000 collection of over 200 Old Masters.

MINERALS MUSEUM on the Blue Ridge Parkway near Spruce Pine is a sample case of over 300 minerals found in North Carolina.

RIDING IS A MAIN ingredient of the Mid-South vacationlands of North Carolina—in Summer Camps, at Dude Ranches and Guest Farms, and in the famous Mid-South resorts of Pinehurst, Southern Pines, Tryon and Sedgefield. The riders at top are setting out on a trail ride into the Great Smokies. At bottom, jumpers are going over brush in the Stoneybrook Steeplechase at Southern Pines. The U. S. Olympic Equestrian team trained at Tryon.

Golf is tops at Pinehurst and other Mid-South resorts. A famous hole on the Pinehurst Country Club is shown on the back cover.

TOBACCO is North Carolina's No. 1 crop, and the State leads the nation in its production. Auction sales, from July to December and from the Coastal Plains to Mountains, are open to visitors.

VISITORS ARE WELCOME at tobacco factories at Winston-Salem, Durham, Reidsville and Greensboro.

BIG DOME, some say the world's largest, tops the Coliseum in Charlotte, North Carolina's largest city. The Arena in Raleigh is another example of advanced architecture.

OLD SALEM, recapturing the atmosphere of the 17th Century, is being restored in the industrial city of Winston-Salem. At New Bern, a Colonial Capital near the coast, the palace of the Royal Governor Tryon has been recreated in its original splendor.

DUKE UNIVERSITY Chapel at Durham towers above a famous campus. Nearby at Chapel Hill is the University of North Carolina, first State University to open its doors. Wake Forest College occupies a splendid new campus in Winston-Salem. In Raleigh is North Carolina State College, with its famous textile, architectural, engineering and agricultural schools, and in Greensboro the Woman's College of the University of North Carolina is the largest institution of its kind in the world.

The State Library is in Raleigh, as are the Hall of History, Museum of Art and Museum of Natural History.

State and National Parks and Forests dot the State—20 of them including the Great Smokies National Park, the Blue Ridge Parkway, Cape Hatteras National Seashore and Mt. Mitchell and Fort Macon State Parks, which are most visited.

Guilford Courthouse, a famous Revolutionary War battlefield, is preserved as a National Monument near Greensboro, a great textile and insurance center.

PHOTO CREDITS—Color Photos in this book are all from the State Advertising Division—by Hugh Morton, John Hemmer, Bill Gulley, Gus Martin, Sebastian Sommer and Miles Hughey.

PLACES TO STAY range from modest to luxurious in North Carolina. Many good motor courts and commercial hotels serve the transient, and a great variety of resort hotels and inns offer full resort American plan service. These are both year 'round and seasonal, and are described in detail in the North Carolina Travelbook, free from the North Carolina Advertising Division.

INFORMATION in detail is available from Chambers of Commerce throughout the State and from principal Regional Promotional organizations, which include Asheville, Blowing Rock and Hendersonville Chambers of Commerce and the Western North Carolina Highlanders, Waynesville, for mountain information; Dare County Tourist Ass'n., Manteo, for Outer Banks; Wilmington Chamber of Commerce and South Eastern Beach Ass'n., Wilmington, for Southeastern Beaches, Morehead City Chamber of Commerce, for central coastal vacationlands.

For the North Carolina Travelbook, which contains a comprehensive listing of accommodations, a main highways map, and nutshell descriptions of many cities and towns, and for the latest issue of Travel Notes, listing festivals and other current attractions, write direct to the

St. Patrick's Day
Great Day for the Irish

On Top of the World

By HUGH A. MULLIGAN.

What's it like to be in Ireland on St. Patrick's Day?

It's not like Christmas or New Year's or Easter Sunday morning, when relatives inhabit the parlor and wee Brendan gets a bright new shilling from Uncle Tim.

It's not like the fourth of July in America or Bastille Day in France or any of those other national holidays that the seafaring men talk about.

It's not even remotely like St. Patrick's Day in New York or Boston or Chicago or wherever it is that Ireland's wandering sons and daughters get together to laugh a little and cry a little and do grievious battle with anyone foolish enough to suggest that their homeland is not a misplaced corner of heaven.

The Irish in Ireland have a sneaking suspicion that they already are Irish, through and through, and hence find no need to advertise it.

A Very Different Day.

Their St. Patrick's Day is nothing like what you imagined it, if indeed you imagined it at all.

Oh, there's a parade all right, up O'Connell St. in Dublin with banners flying and pipes skerling, but it goes by so fast you'd miss it entirely if a pretty wisp of a colleen happened by at the same time.

And there are shamrocks, real shamrocks, home grown and fresh picked, peeking out of every lapel and tucked smartly into the band of every hat.

There's dancing too, at most every crossroads hall and schoolhouse, far into the night, with the fiddlers frantically screeching out wild jigs and reels and hornpipes, and throngs of quick-footed boys and girls kicking up the dust in time to the ancient airs.

But you won't find a shillelagh anywhere except in the tourist shops, and nobody will be sporting a green cardboard hat or weeping his eyes out over a throaty tenor's rendition of "When Irish Eyes Are Smiling."

No Gold Harps.

The shop windows won't be decked out with gold harps or clay pipes or any of the other vaudeville trappings usually associated with the race.

Why, you might even go through the whole day without once getting into a fight or even seeing one.

And, most startling of all, you'll have enormous difficulty getting a drink in Ireland on St. Patrick's Day. It's a religious holiday, first and foremost. All pubs and bars and shabeens —as they call after hours drinking spots-are closed.

To the Irish, it is their day of days and spring, at last, is definitely in the air, with the drizzle gone from the gray limestone mountains and a bright sun smiling on the yellow rose blossoms in the emerald-jewel fields.

The day begins early with church bells calling the faithful to 6 a.m. mass, during which the priest will deliver a special sermon in the Gaelic tongue. Those who have been "wetting the shamrock," indulging in a few pints the night before, will probably go to the later masses, which run all the way until noon. There will be special services also at the Protestant churches and at the numerous St. Patrick shrines throughout the land.

Day of Adventure.

For schoolboys, this is their day of adventure. With a blackened tea kettle, a paper satchel crammed with eggs and cheese and meat, and a little extra pin money for buying sweets along the way, they cycle off to the mountains for a cook-out over a sweet smoking cedarwood fire.

Older brothers and sisters, up to 30 and beyond, likewise catch the wanderlust and head for a seaside resort like Greystones or Bray or Warren Point for a bracing walk along the strand and a good meal at an inn.

At home, whether in a whitewashed thatch cottage in some remote county or a stately Georgian mansion in the heart of Dublin, custom rigidly dictates that the main meal — a chicken or a roast—be held at noon. St. Patrick's Day provides the only exception to lenten fasting regulations and Irish appetites are usually whetted for the challenge.

In the Afternoon.

The afternoon is given over to sporting events: Horse and dog racing, soccer, rugby, Gaelic football, golf, plowing contests, track meets. Fans by the thousands queue up for stadium buses in towns and cities, and by the cut of their clothes and the hue of their cheeks you can tell whether they're headed for rubgy, soccer or gaelic football.

Rugby, introduced by the British, is mainly an upper class affair. Soccer, Ireland's only professional sport, has its main appeal to the middle classes in the big cities. Gaelic football, the rowdiest and roughest of all, is played everywhere and comes the closest to being a national pastime.

But each has its own avid following and an air of excitement and freedom hangs in the air as the fans push their way to the top of the double-deck buses, where smoking is allowed, and noisily argue the merits of this or that goalie or center-forward. Feelings run high, even without stimulus of a jar, as they call a drink. A few, however, make amends for the shuttered pubs by strapping a brace of stout bottles about their middle "like bandoliers of bullets," as a native observer put it.

And Then to Dance.

When night falls on what Dr. Johnson called "the quiet habitation of sanctity and literature," St. Patrick's Day celebrants all over Ireland, from Ballycastle in Antrim to Ballydehob in Cork, break out their dancing brogans and head for a cailide—a dance.

In big cities, the toffs and swells — otherwise known as the sophisticated set — converge on a hotel ballroom to dance modern style to name bands like David Curry, the Hibernian equivalent of Guy Lombardo.

Rabid Irish traditionalists prefer the big annual dance in the rotunda room of the Lord Mayor's house in Dublin, where boys and girls in kilts and tams dance intricate jigs and 16-handed reels to genuine Irish music.

This is the one night in the year when the musical halls and movie houses make concessions to a tourists's idea of St. Patrick's Day by engaging a special Irish act, usually a singer or dance team.

But to catch the real contagion of Ireland on St. Patrick's Day, you have to drop into a crossroads dance in some remote country district and feel the floorboards tremble under your feet as laughing couples whirl by in time to "The Rakes of Mallow" or "Shoe the Donkey."

St. Patrick's Day in Ireland is a happy day, a genuinely warm and friendly day, almost entirely devoid of the flag waving, chest pounding, thirst quenching, ballad bellowing activities usually associated with it in America.

"Maybe," explained a homeward bound ex-patriot, "it's because, when you get right down to it, every day is St. Patrick's Day in Ireland."

RESEARCH TRIANGLE

By CHARLES CLAY.

Plans for North Carolina's Research Triangle are beginning to jell much quicker than most imagined.

The first building in a projected "research campus" already is in the planning stage and may be a reality within 18 months.

It will house the heart of the Research Triangle idea — an institute for "pure" or basic research.

The institute will be the hub around which a wheel of industrial laboratories is expected to turn.

Several industries now are seriously considering establishing research labs in the Triangle area embraced by State College in Raleigh, the University of North Carolina at Chapel Hill and Duke University at Durham.

Choice Spot for Research.

The State's Research Triangle Committee was named in 1956 to promote the area as a choice spot for industrial research because of the heavy concentration of research facilities and people at the three institutions.

Tentative plans call for locating the "research campus" in the center of the so-called Research Park, a 4,000-acre slice of the Triange area near here which is being developed by a group of businessmen headed by Karl Robbins of New York.

Robbins and his associates formed the Pinelands Company, a commercial enterprise distinct from the Governor's Research Triangle Committee, to purchase the park and develop it.

Pinelands has purchased 2,161 acres and plan to exercise options it has on 1,900 more in the Triangle.

At a meeting in Chapel Hill on March 20, Pinelands directors will take up a proposal to give between 150 and 200 acres in the center of the park to the Triangle Committee as the site for the research institute building.

T-Shape for Planners.

The committee would take over from there and put up the $300,000 building with the aid of private funds. An architectural firm has drawn up plans for a T-shaped building with 15,000 square feet of floor space.

In addition to the research institute, the building will house the Triangle Committee's staff, offices of the Pineland Company, and temporary quarters for industries with pending plans for purchasing land and constructing research labs in the park.

Long-range plans envision five or six buildings comprising the "research campus" in the park.

While plans for the research institute are strictly tentative at this stage, it would be supervised and operated on a non-profit basis by the three cooperating institutions of higher learning which define the Triangle area.

With the recent employment of City Planner Pearson Stewart, the Triangle Committee took a vital step looking toward the orderly growth of the entire, Triangle area.

A Regional Planning Authority.

It's likely that the 1959 Legislature will be asked to establish a regional planning authority composed of municipalities and the three counties in the area.

"The Research Triangle will bring growth to rural areas as well as urban growth," Stewart said. "It can be good or bad, depending upon how it's directed. For this reason, the Triangle Committee is promoting the power planning of the entire area."

Stewart will work with city planners A. C. Hall of Raleigh, Paul Brooks of Durham and Stuart Chapin of Chapel Hill as well as city and county governing bodies in the Triangle in an effort to guide the growth a concentration of research labs would bring.

A regional planning authority would give the counties and cities joint control over zoning. Durham is the only county in the State with county-wide zoning authority. Raleigh and Chapel Hill zoning powers extend only a short distance outside their city limits.

"We've got to plan the area so that the cities and counties will continue to provide the good living conditions we've got and must have in order to get the kind of people we want," Stewart said.

Living conditions in the Triangle area and its "cultural atmosphere" have been strong points in the committee's efforts to sell the area to research-minded industry.

Durham County, eager to cooperate in the ventune, already has a policy against making zoning changes in the area before consulting the Triangle Committee.

Also, Home Security Life Insurance Company of Durham has offered temporary office space in its new building to the Research Triangle Committee pending completion of the building in the Research Park. No action has been taken on the offer so far.

'A Marvelous Thing.'

The news last September that Robbins and his associates would develop the Research Park was hailed by Governor Hodges as "a marvelous thing" not only for the evolution of the Research Triangle but the entire State.

Robbins bought the initial $500,000 worth of stock in the park venture and since that time, North Carolina business interests have invested $108,000 more in it.

Pending the sale of additional stock, Pinelands Company has made a temporary loan of $200,000 from Durham Bank and Trust Company, the Bank of Chapel Hill and Wachovia Bank and Trust Company here.

The total investment is expected to reach $1.5 million.

Pinelands plans to develop a small portion of the park which would serve as a model for industrial prospects. Streets and utilities will be included in the model layout.

Plot Planning.

Overall plot planning of the park proper is being done by the architectural engineering firm of Voorhees, Walker, Smith and Smith of New York City. It has been at work eight months.

Pinelands has arranged to buy 5,000,000 gallons of "potable" or filtered water a day from the City of Durham. The developers will hook an 18-inch water main onto the Durham system at a cost estimated at between $250,000 and $300,000.

In the long haul, both Durham and Raleigh may have to increase their water supplies to meet the needs of the Research Triangle. The possibility that Raleigh may have to turn to the Falls of the Neuse for an abundant supply and Durham to Eno River has been suggested.

By highway, the center of the Research Park is about 12 miles from Raleigh and less than half that from Durham. Most of the park lies in Durham County, with the southern end extending over into Wake.

Strict Restrictions.

Pinelands plans strict control over what comes into the park. It will supervise site selections, architecture and planning on the land it sells. If an industry so desires, the investment company will construct facilities for it in the park under a lease arrangement.

The Research Triangle Committee has been going strong since the appointment about a year and a half ago of Dr. George L. Simpson of the Universtiy of North Carolina as director. Stewart was brought in as associate director.

A graduate of Amherst College and Massachusetts Institute of Technology, Stewart came to Raleigh from Warwick, R. I., where he was city planner. He also has worked in Fayetteville, Hickory and Raleigh and was on the faculty of the Department of Regoinal Planning at UNC.

Hurricane Planner.

Stewart worked up North Carolina's hurricane rehabilitation campaign back in the fall of 1955.

Until Stewart was brought into the picture, efforts to develop the Triangle area as an industrial research center were confined to a selling job.

Simpson and others connected with the effort call it a "natural development." While it would be unique in the South, the same development has taken place in other parts of the country where the research potential is much less than that of the three institutions of the Triangle.

About $7,000,000 in basic and applied research is budgeted annually at the institutions. It keeps more than 850 research people at work in the area.

Thus the task of the Triangle Committee is to hold this potential out as a lure to industry, which has come to put a premium on research people because they are in critically short supply in many areas.

State College's nuclear reactor, the Institute of Statistics at the University of North Carolina and Duke University's first-rate Physics Department are examples of the facilities the Triangle area has to offer.

While the Triangle Committee's immediate goal is to attract industrial research labs to the area, it envisions a much larger development. Once the research park is a fact, it would serve to draw plants to this vicinity.

A Defendant Could Do Right Well In Jury Box

BAKERSFIELD, Calif., Feb. 21 (AP)—One of three defendants in a jury trial before Municipal Judge J. Kelly Steele was missing when the case was called Wednesday.

The judge demanded that defense attorney Richard Hosking produce the defendant.

Hosking pointed to the jury box and said, "There he is."

There sat Junior Lee Beeson, the third defendant. He was removed to the defense table and another juror seated.

The three defendants were acquitted on charges of being drunk and disturbing the peace. Beeson then demanded his $3 jury fee, plus mileage.

Court officials said Beeson's name had been picked from 2,500 veniremen to sit in judgment at his own trial. They said he would get his jury fee.

Faulkner Asks Virginia To Lead

Would Teach Negroes 'First Class' Living

CHARLOTTESVILLE, Va., Feb. 21 (AP)—Nobel Prize winning author William Faulkner last night called on Virginia to take the lead in the South in teaching Negroes the responsibilities of "first class citizenship."

Faulkner said Negroes throughout the South must be taught "that in order to be free and equal he must first be worthy of it, and then forever afterward work to hold and keep and defend it."

"He must learn to cease forever more thinking like a Negro and acting like a Negro. This will not be easy," Faulkner told three honor societies at the University of Virginia.

"His burden will be that, because of his race and color, it will not suffice for him to think and act like the best among White men. Because where the White man, because of his race and color, can practice morality and rectitude just on Sunday and let the rest of the week go hang, the Negro can never let up nor deviate," he said.

The Oxford, Miss. author said White Southerners must teach the Negro responsibilities, "either by taking him into our White schools, or giving him White teachers in his own schools until we have taught the teachers of his own race to teach and train him in these hard and unpleasant habits."

PICKS VIRGINIA

Faulkner, a writer-in-residence at the university, said the place to begin is in Virginia, "the mother of all the rest of the South."

"A hundred years ago, the hotheads of Mississippi and Georgia and North Carolina would not listen when the mother of us all tried to check our reckless and headlong course; we ignored you then, to all our grief, yours more than any since you bore most of the battles. But this time we will heed you," he said.

Faulkner said it did not matter if the Negro failed to learn "his ABC's or what to do with common fractions."

"What he must learn are the hard things — self restraint, honesty, dependability, purity, to act not even as well as just any White man but to act as well as the best White man.

"If we don't . . . we will look forward each year to another Clinton or Little Rock not only further and further to wreck what we have so far created of peaceful relations between the two races, but to be international monuments and milestones to our ridicule and shame," he said.

The author said it was "easy for the North to blame" the South that the problem is unsolved.

"Nor will it help us any to remind the North that, by ratio of Negro to White in population, there is probably more of inequality and injustice there than with us," he said.

IT'S OUR PROBLEM

"Instead, we should accept that gambit. Let us say to the North: all right it is our problem, we will solve it.

"For the sake of argument let us agree that as yet the Negro is incapable of equality for the reason that he could not hold and keep it even if it were forced on him with bayonets; that once the bayonets were removed, the first smart and ruthless man, black or White, who came along would take it away from him because he, the Negro, is not yet capable, or refused to accept, the responsibilities of equality."

Common Pleas Jurors Drawn

PICKENS, Feb. 21—The Court of Common Pleas for Pickens will convene on Monday at 10 a.m. with Honorable James M. Brailsford Jr. of Orangeburg, presiding.

The following men have been drawn to serve as jurors:

Dewey T. Fortune, Easley; W. H. Farr, Easley; Edgar O. Holder, Pickens; R. E. Benjamin, Easley Mill No. 2; Samuel A. Snead, Glenwood; Ralph W. Finley, Liberty; S. C. Whitlock, Easley Mill No. 2; Broadus A. Duncan, Easley Mill No. 2; Landon Dobson, Norris; Norman H. Wood, Praters; Isaac Donald Hopper, Liberty; Ray King, Arall Mill; Sidney L. Britton, Easley; Jay Meece, Pickens; J. B. Couch, Easley; Claude Satterfield, Glenwood; F. W. Garrison, Easley Mill No. 2; William J. Oates, Easley; Furman Norris, Central Mill and Roy R. Ferguson, Alice Mill.

Also, Bobby Atkinson, Easley Mill No. 2; W. C. Baldwin, Liberty; Frank R. Hunt, Croswell; Robert A. Waters, Norris; J. E. Stokes, Pickens Mill; William T. Phillips, Central; Tom M. Owens, Norris; W. A. Perry, Central; W. L. Hitt, Easley Mill No. 2; J. Lake Williams, Easley; J. L. Stewart, Easley Mill No. 3; Raymond A. Lynch, Alice Mill; Floyd E. Ellison, Easley; Homer C. Ellison, Easley; J. B. McCall, Croswell; Lloyd Fant, Central Mill; J. B. Owens, Glenwood; W. C. Grant, Pickens; Earl Murphree, Pickens and J. P. Holder, Glenwood.

EYE DEFECTS

NEW YORK — About 20 per cent of American eight-year-olds and 95 per cent of the 70-year-olds have marked eye defects.

Legislature Can't Ignore Scholarship Request

Starting next July 1 Cornell's tuition will advance to $1,250 a year, $150 above current rates for students enrolling in any of the university's endowed divisions.

A student in engineering or medicine, consequently, who lives with another student taking agriculture, will pay several times his roommate's tuition costs. For state and federal funds finance the College of Agriculture at Cornell ($6,137,703 being in the new state budget).

For years, the state has supported a narrow bridge of equity by offering scholarships to five per cent of its high school graduates. The Board of Regents wants to double the offer. Let 10 per cent be eligible. The cost? $2.6 million now. Eventually, around $17 million each year.

The recommendation was skipped by Governor Harriman in his new budget. While school aid for communities is getting a more sympathetic hearing in the Legislature, the scholarship boost was greeted with silence. Republican leaders during a December policy making session did promise to double the 500 special science and engineering scholarships given by the state.

This is more like the attitude we prefer to see.

The state may not go all the way with the regents' plan.

The plan shouldn't be kissed off.

A scholarship increase should be authorized, fitted into the state's whole educational aid financing and what may come from Uncle Sam.

Local school districts are being asked to meet their share of new educational costs. The state has an obligation, too.

The reason is easily identified. The two students at Cornell cited above are living it.

Big Road Job For State's Delegation

We're still firmly convinced the Empire State's congressional delegation should join voices and pressures to maintain New York's share of federal road money.

Testimony recently before the Senate Public Roads Subcommittee shows why:

For the first three years of financing, planning and constructing the interstate highway system, New York is receiving 7.1 per cent of the $4.7 billion allocated each year. The money is divided among the states for (1957, '58, '59) on a complicated population-area-mileage formula.

Beginning with the 1960 fiscal year, New York will receive 4.95 per cent of whatever funds are available. Then, the switch will be made to a new cost-based formula.

New York's share drops partly because of the Thruway mapped into the million-dollar-a-mile interstate system.

New York should get credit, and, considering the contributions of its motorists to the Highway Trust Fund, a continuing share of the fund at the 7 per cent level.

This is a task for the delegation in Congress.

* * *

Posterity is a most limited assembly. Those gentlemen who reach posterity are not much more numerous than the planets.—Benjamin Disraeli.

An Unpleasant Subject

BY ALEXANDER F. JONES
Executive Editor, Herald-Journal

The school picture in New York City is fast becoming the worst advertisement racial integration presents.

Negro and Puerto Rican gangs are running wild — to the point that George Goldfarb, principal of John Marshall Junior High School of Brooklyn, where crimes have repeatedly occurred, committed suicide by jumping from his apartment after asking a grand jury for police help at the school.

That same grand jury has now suggested, through its foreman, that parents boycott schools where crime is prevalent, such as John Marshall Junior High.

At that school, and this was evidently preying on Principal Goldfarb's mind, a Negro boy was reported to have raped a 13-year-old white girl in the basement of the school.

A few days before five drunken Negro boys from this school had stabbed two white girl students when they were refused money.

On top of this a patrolman stationed in the school yard was beaten up and the school recreation director savagely attacked.

John Marshall School is 45 per cent Negro and 10 per cent Puerto Rican.

The superintendent of schools, Dr. William Jansen, and the Board of Education have been opposing the request of the grand jury and Principal Goldfarb for a policeman in every New York school.

There is little doubt that Principal Goldfarb was not only overwrought by the wild surge of crime in his school, but that pressure was being put on him from school management sources because of his grand jury testimony.

So now parents are being advised to keep their children home to avoid the gangs from the back country of the Carolinas and Puerto Rico.

▼ ▼

It is no answer that gangs of white boys in New York City are as vicious and as undisciplined as the Negro and the Puerto Rican mobs.

There are many such white gangs, it is true, but the bulk of the major crimes are being committed, so far as schools are concerned, by the other elements, according to every survey.

That is true, also, in Washington where Negro students and teachers outnumber the whites and the standards of education have dropped by nearly three years. A new school there, occupied by Negroes, was a shambles in three years.

JUST WHAT THIS CONDITION IS DOING TO THE FEELING FOR INTEGRATION OF SCHOOLS IN THE SOUTH IS DISTRESSING TO CONTEMPLATE.

THE VERY THINGS THE WHITE COUNCIL OF LITTLE ROCK WARNED AGAINST ARE HAPPENING — WHITE GIRLS ARE BEING RAPED IN SCHOOLS AND NEGROES ARE ATTACKING POLICE AND TEACHERS.

Negro leaders have successfully pleaded with newspaper publishers not to break down crime figures into racial brackets.

The idea is to protect Negroes and show that color is not a factor among Americans.

This is fine so long as the Negro leaders do everything possible to insist upon an equal sense of responsibility from their own people.

It is my belief that the leaders of the National Association for Advancement of Colored People are not devoting the attention they should to instilling a sense of responsibility to people coming from Georgia cotton fields.

There is more to being an American citizen and enjoying its rights and freedoms than the accident of birth.

▼ ▼

Nothing could be more profitable than a well planned campaign by the NAACP, and by the Negro clergy and educators making indoctrination of newcomers from the South a top priority objective.

An immense amount of good could be accomplished.

And they owe it to the thousands of fine Negro boys and girls who are a credit to any community or any race.

New York City educators have leaned so far backwards in an effort to be scrupulously fair and to ignore race and color that Negroes and Puerto Ricans, too many of whom are without background in discipline, are taking over.

This failure to meet the situation in its true dimensions is resulting in an increasingly frightening state of affairs.

It requires action by Negro leaders, discipline by school authorities and strong support from the police — with night sticks at the ready.

New Parking Policy Apply East of Salina?

The city administration has swung directly behind the thesis: Syracuse should underwrite cheap parking downtown.

So far, at least, the policy applies to expected demolition of the old welfare building at W. Willow and N. Clinton Sts.

All right.

What's cooking to supply parking east of Salina St.?

With this policy enunciated, a decision should be forthcoming soon.

Give Utica Help For a Cleanup

Neighbors of ours in Utica have been entertained by a story of who leaked what from a district attorney's letter for state police help. Turns out the district attorney didn't exactly ask for a wiretap on a local man's phone (who had turned up at the recent Apalachin convention of hoods) but anyway, the local fellow knew the contents of the letter, the district attorney asserts.

This is a matter that calls for clearing up despite the comedy of assertions, denials, and refashioning of claims.

Behind it is Utica's concern over crime and vice in its community which has led a grand jury to ask for state police help. The jury members aren't particularly entertained nor are they getting much information. Thus, the request for two investigators from the state police Bureau of Criminal Investigation.

The jury, apparently, is supported by Oneida County's district attorney in its request. The mayor of Utica is quoted as backing such an investigation.

By all means, the help should be given.

Meanwhile, citizens of Utica could well ponder the import of the request. The grand jury doesn't trust local law enforcement agencies. Or the jury has decided they can't perform their jobs.

From this short distance, the request presents a sorry state of Utica and Oneida County police affairs. And an unspoken demand for more than just a brothel and gambling house cleanup.

While the grand jury is seeking outside police help, citizens of Utica and Oneida County could well be seeking a cleanup and refashioning of their own enforcement agencies.

Commission Studying Constitution Stays Alive

As anticipated, the Legislature has approved extension of the Rockefeller commission which, since 1956, has been looking into the possibilities of altering the mish-mash which is now our State Constitution.

It is unfortunate that politics had to be a factor in this matter although, because of the personalities involved, perhaps it was inevitable.

Nelson Rockefeller, who heads the commission, is fast developing into the No. 1 Republican threat to another term for Governor Harriman. The governor wanted to replace the 15-man GOP-dominated group with a five-member unit with a Democratic edge. In other words, politics undisguised. As a matter of fact, it is a bit surprising that Republican legislative gubernatorial hopefuls so readily backed the old commission, considering Rockefeller's growing stature.

As far as the public is affected, however, it is well that some form of constitutional investigative group will continue to be operative. Changes in the document will become more necessary and it is a relief that the whole idea of a commission didn't dissolve in political smoke.

Not So Cozy In Moscow Either

Interested in what Ivan Communivitch is worried about? Shoes. Pravda reports crowds of young students keep watch at tourist hotels in the hope of buying a visitor's shoes.

Then, on Spartakovsky St., long lines of new cars are parked. Their owners are nearby. Why? Trying to make a deal.

So, all isn't always well within the monolithic domain of the Soviet. Their small troubles pile up, too.

More Unpleasantness

BY ALEXANDER F. JONES
Executive Editor, Herald-Journal

A number of complaints were registered protesting the frankness of yesterday's leader captioned "An Unpleasant Subject."

The naming of Negro and Puerto Rican gangs in New York public schools as being a major factor in crimes and disturbances in the metropolis was ascribed to bias.

Nothing could be further from the truth and I would like to explain why I respectfully decline hypocritically to cover my head, as so many seemingly do, and say if I don't look a threatening situation will disappear.

When the Little Rock, Ark., school crisis broke and President Eisenhower had to call out federal troops to maintain order every newspaper above the Mason-Dixon line pointed out that the trouble was caused by the efforts of nine young Negroes to go to high school.

These young Negroes were named and pictured going to class under troop protection in the effort to implement the Supreme Court decision.

No effort was made by any newspaper I saw to hide the fact that these nine boys and girls were Negroes.

That was the crux of the trouble—that these students were Negroes.

And most of us were highly sympathetic with their difficulties in trying to get an education while threatened by white mobs.

I said it was tragic and un-American that sons and daughters of citizens had to be protected by soldiers to get an education.

▼ ▼

The scene shifts to New York City.

There integration of schools has been in effect for many years.

And over the last two decades the influx of Negroes from the south and Puerto Ricans has increased to the point where, in many schools, they constitute the major school population.

And in these schools, as was so tragically demonstrated this week with the suicide of a school principal in Brooklyn because of a crime wave in his school, including rape of a white girl by a Negro boy, discipline has disappeared to the point where delinquents have threatened to take over.

School authorities in New York City, and elsewhere in the north, have leaned backwards so far to be fair that the undigested Negroes and Puerto Ricans are about to take them over.

At Little Rock it is a soldier at the school door, because Negroes want to go to school.

At New York it is a policeman at the door because, in many cases, there are so many Negroes and Puerto Ricans in the schools.

But on this point there is a conspiracy of silence.

Rapists become "youths" and the same newspapers that emphasize color so strongly in the Little Rock stories never mention it in reporting the New York City outbreaks.

▼ ▼

I respectfully decline to join this short-sighted conspiracy.

I will battle for any boy or girl who wants an education, or for any citizen who is seeking equal rights and privileges, just so long as they accept equal responsibilities and abide by the rules of civic and school discipline.

When they fail in this respect they deserve every penalty they may incur.

Negro leaders, and particularly the National Association for the Advancement of Colored People, are so busy fighting legal battles in the south that they have little time for indoctrination courses, for newly arrived families – night courses for parents and special citizenship courses for school age new arrivals in the north.

Why should teachers in our schools be forbidden to defend themselves when attacked by young hoodlums, whatever their color?

The spectacle of that Brooklyn recreation teacher having to stand there and submit to a vicious beating because he could not hit back is revolting.

How can discipline be maintained if teachers' hands are tied and these mobsters cannot be expelled from school?

A thorough examination of all school and work laws for minors in the state of New York is needed.

The problems which the New York City school situation presents can be solved if there is a frank meeting of facts as they are and strong bolstering of the control of school authorities, backed by every agency of law and order.

They cannot be solved by hypocritical denial that present conditions exist.

With Everybody, It's Just Plain 'Campy'

It was a half-hour before anyone discovered the auto accident that critically injured ball player Roy Campanella. Then, as the inevitable crowd gathered—even at 3:30 in the morning—someone said:

"Hey, it's Campy."

There are celebrities and celebrities. In the news stories, it was "Roy Campanella, veteran catcher of the Los Angeles Dodgers." To everyone else, it was just "Campy."

Campanella is a notable with that unaffected common touch. Sincerely, everybody from the President to the lowliest sandlotter, cares what happens to this particular baseball star. This can't be said for all headliners, and certainly not all ball players. But people recognize qualities of genuineness—so people everywhere are pulling for Campy to come out of it.

Hetzel, Dorn

April 14, 1959

Dear Dorn Hetzel:

Casey Murrow asked me to send you this 16 mm. print of our SMALL WORLD with Carl Sandburg.

We will send a messenger to collect it when you have finished with it.

Sincerely yours,

Dorn Hetzel

December 10, 1958

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York, New York

Dear Mr. Murrow:

Again, my thanks for the generous amount of time you gave me yesterday and, even more important, for your promise to lend a hand. To find a man in your position so tremendously concerned with our future survival is reassuring. To say that I feel the same way is true, but I have always taken refuge in the thought, that through my lack of experience, my conclusion could easily be wrong.

After leaving you, Nate White and I paid a visit to John Howe who is apparently a big cog in Bill Benton's Encyclopedia Britannica. According to White, Howe is one of the top idea men in the country where education is concerned and is responsible for the creation of the "Chicago Round Table" and "Great Books". He, too, has promised to help.

The present setup, then, leads to our first step: the shaping of a one-page specific plan that a half dozen of us can work on and be responsible for. The group to date includes yourself, John Howe, Nate White and Saville Davis of the Christian Science Monitor, Dr. Arnold Soloway, Professor at Harvard and a good business-idea man in his own right, Frank Christian who is a real power in New England business, and myself. I have one other man that I will call on to help in January - William H. Whyte of Fortune, who is now in Europe.

After putting all ideas together, our local group here will refashion the plan to fit and send you back what we hope will be a tighter, sounder program.

I can't tell you how glad I am to have you on our side.

Cordially yours,

Edward V. Hickey
Director of Advertising
And Public Relations

EVH:cc

TO Mr. Murrow

November 14, 1958

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York, New York

Dear Mr. Murrow:

I have just read the full text of your Chicago address this morning in The Reporter. Your prose is as excellent as your delivery. And the content - exciting and exhilarating.

I am enclosing a write-up of my idea referred to in my previous note which you have acknowledged. Maybe it was childish of me to select this particular approach to you, but some months back, when I mentioned to your Lou Hausman and an old friend of mine that I had an idea I wanted to put before you, he told me not to waste my time: You wouldn't even read it much less give it any consideration. (He was mistaken in saying it and I was wrong to believe it.)

This set me back a bit because, in a way, you were instrumental in giving me my initial lead: A broadcast you made about two years ago in which you related how Henry Ford II addressed his company's national sales convention - not on Ford and its problems but on foreign policy. Remember? It struck you as it struck me - an important event.

One final word. I've written a lot of copy in the past, but I can't say that I would like this idea of mine to be judged on its quality of expression. So - read it for the meat in it, will you?

To say 'thanks' for your help is perhaps not necessary. When our goal is to survive, you're scared and I'm scared. This should place our relationship in pretty good perspective.

Cordially yours,

Edward V. Hickey

and Public Relations

FOUNDATION FOR THE FUTURE

I

The midwestern housewife, standing in her doorway, smiled uncertainly at the young man who was conducting a public affairs survey. "John Foster Dulles," she repeated slowly. "I'm not sure, but isn't he a TV announcer?"

In placing in perspective our housewife's ignorance of Mr. Dulles, we can all agree that degrees and species of ignorance hide--or are openly displayed--in all of us. The kind illustrated here, however, seems clearly to be one we as a nation can no longer afford. The implications are too frightening.

In this satellite age, much attention is being concentrated on the education of our children. This coffee-break consensus (there has been little follow-through to date), reveals an optimism I cannot share in its casual assumption that there will be a future. For it assumes the good old U.S.A. will still be doing business at the same old tailfinned stand ten and twenty years from now. It may. But I'd want longer odds than the going ones on that proposition.

I'm as unlikely as the next man to recoil at people's ignorance of a best-selling novel, Hollywood's latest epic or the relative merits of Ted Williams and Mickey Mantle. It is my conviction, however, that there are specific areas of what might be called critical ignorance among adults about national problems that collectively

place in jeopardy the future we so casually count on...problems that should have us running scared until that happy time when all our kids will be inventing anti-anti-anti-missiles with one hand and holding Leaves of Grass in the other.

The question, then: How can we better educate our adult population which--beyond the reach of any school--is handing down the verdicts today which will certainly restrict the freedom of action of our children when they take over, no matter how brilliantly they may have been trained? Having assumed the leadership of the free world, voluntarily or no, can we afford the luxury of awaiting another generation to prove we were worthy of this leadership?

In any definition of critical ignorance, the element of time cannot be ignored. For us, as adults, critical ignorance must be overcome, now or never. It is now that we are being called upon to render vital judgments in our daily lives and in the voting booth. As Theodore Roosevelt said, "The fate of the twentieth century will in no small degree depend upon the type of citizenship developed on this continent." If we apply ourselves to deserving--instead of merely accepting--this moral leadership, the chances are that we may eventually succeed in our awesome role. Otherwise, we may find ourselves forced to relinquish this leadership to another nation which may be much more a leader while much less of a moral force.

While it may be fair to say that the majority of American adults are content to work out, day by day, their own personal destinies, we all know that there are groups of individuals whose personal concerns embrace our national problems for which solutions must be found if we are to survive, let alone lead.

An excellent example currently is found in the intensive efforts of the Foreign Policy Association to make us all more aware of what it terms "Great Decisions...1958." Commercial radio and newspapers, League of Women Voters' groups and civic organizations of all kinds in many sections of the country are supporting this effort.

As a case in point, let's review the eight critical problems under scrutiny in this ambitious program:

Can We Deal With Russia?

What Security in the Rocket Age?

United Europe--Partner or Rival?

Middle East--New U. S. Responsibility?

Awakening Africa--Promise or Threat?

What U. S. Economic Policy for Survival?

Should U. S. Trade with Red China?

Whose U. N. Is It?

What are your conclusions on what the average American adult could say--knowledgably--about these issues when called upon for his views in the voting booth--or at a cocktail party, for that matter? I can hear him now and it makes me wince.

Anyway, we must face one fact. No matter how intelligent and industrious these efforts are, on the part of groups such as the Foreign Policy Association, to combat critical ignorance, their impact is tiny in terms of what needs to be done.

If we do recognize that we must shed our indifference to our present state of general adult ignorance, how are we to get going? How can we do it in such a way that it will answer the observation of Sir William Haley, editor of the London Times: "Somewhere in the future lies the catalyst that will precipitate a new American foreign policy with a more constructive character...but until that moment comes, America is, in international affairs, likely to stagger from crisis to crisis." Joseph C. Harsch commenting on the above (Christian Science Monitor, 1/9/57) says: "This is not the carping criticism of a congenital Americanophobe. It is the careful conclusion of one of the staunchest and most sympathetic friends the United States has in Great Britain. It was written, not in anger, but from thoughtful, professional, journalistic reflection."

As far as the next ten years are concerned, it is my conviction that the catalyst Sir William Haley is hopefully looking for can only come from a concerted drive to build adult education in areas critical to our national future. We just can't shrug and look the other way, saying: "There's nothing I can do about it--let Ike handle it." As Roscoe Drummond has pointed out: "No president of the United States has ever laid upon the shoulders of the American people and the American government such vast responsibility in world affairs."

Thus it would seem that at this moment, we have the responsibility without the awareness or the knowledge--based on education--to permit us to fulfill this responsibility.

The broad question, then, is one which we can't duck. What means can logically be used to awaken the American adult--and keep him awake--to his responsibility which could readily lead to intelligent analysis, and action on a national basis?

II

I suggest that there is an ideal vehicle for this effort: American Business. The brains, vision and guts contributed by American Business to make and keep our nation strong and free in the past represent just the force needed to achieve this ambitious but urgently needed educational objective in the future.

The only alternative is to pass the buck to the Federal Government who, American Business itself has told us repeatedly, is already doing too much in too many fields where it should not be active at all.

American Business, then, already a monument to materialism, could cover itself with glory by balancing material success with intellectual attainment, as their over-all contribution to our national welfare.

In one way, such a balance would be poetic justice for, in one important sense, American Business is responsible for the present

unhappy state of affairs. To the extent that this all-encompassing force has captured these creative assets of brains, vision and guts for itself--to solve the problems of American Business on a full twenty-four-hours-a-day basis, to the same extent, it has created a vacuum in the available supply of talent needed to cope with our national problems.

At this point it should be clearly recognized that there are many businesses and many more businessmen who are on record as aware of the dangers we face in being too much of a business-oriented economy, and who would agree with what Woodrow Wilson's vision led him in 1911 to note as an impelling need of our country: "A kind of liberal education which connects a man's feeling and his comprehension with the general run of mankind, which disconnects him with the special interests and marries his thought to the common interests of great communities and of great cities and of great states and of great nations and, if possible, with that brotherhood of man that transcends the boundaries of nations themselves."

While American Business today might be gently described as being on a wave-length different from Woodrow Wilson's, there is much to make us hopeful in the business scene today. There are important voices which are doing much to refashion the climate of business opinion concerning its overriding obligation to the national community...whether individuals such as Clarence Randell and Henry Ford or businesses such as International Latex or Container Corporation.

As you can see - This was written some time ago!

We can be hopeful, I am certain, because many businesses basking in the sunshine of what they feel is a somewhat warmer governmental climate, may now be able to pause, take stock and decide that in the times in which we now live, something new must be added... in the nature of something greater and of more lasting value to our country than the mere monetary dividends dictated by traditional concepts which (beep...beep) appear to be less than adequate today.

There can be hope too about the contribution that American Business may desire to make toward our objective of cutting down our critical areas of ignorance, because the value of the public relations aspect is one that American Business cannot afford to pass up without serious consideration. Time magazine said recently: "Six years ago, Elmo Roper conducted a survey to find out which groups were thought to be doing the most good for the nation--religious, business, governmental, congressional, or labor. Business garnered 20% of the votes, second only to the religious category--34%. But when Roper ran the same survey two years ago, business slumped from 20% to 10%, while the religious groups rose to 40% and government jumped from 11% to 18%. On the question of who was doing the least for the country, business which got only 6% of the votes in 1948, got 9% in 1953.

Time goes on to quote one of the deans of public relations, Public Relations Earl Newsom, whose clients include Ford, Jersey Standard and American Locomotive: "Businessmen are so preoccupied with the notion of making and selling things, they often fail to recognize developing public relations problems until it is too late."

This observation, fortunately, seems progressively less true, for an increasing number of businesses are coming to the conclusion that public opinion is as important as any problem they have to deal with. For not only is public opinion decisive in the matter of providing money for investment, but also in the matter of the amount and kind of government regulation and control that it is possible to apply. There are numerous instances where public-opinion pressures have forced government into certain industries to do what the public thought needed to be done.

Therefore, assuming that American Business would realize the unique opportunity offered to it in the nature of a chance to support the cause of adult education in matters we can no longer muddle through, the first question that might well come from businesslike American Business could be, "Is there a market for this product? Who wants it?" In other words, does the average adult want education along the lines we are here concerned with? The answer seems definite. The evidence is not difficult to find.

Standard Oil of New Jersey has, for some years, been very active in educational affairs. So it seems worth while to recall some remarks made in 1954 by its Board Chairman, Frank W. Abrams:

"The findings of a recent Roper Poll are at once sobering and heartening. They show uncertainty and puzzlement about our gravest international problems--a kind of hopeful skepticism about the future. In my opinion, at least three significant and related meanings come through the statistics.

"First, the American people are achieving a higher order of political maturity.... There is no question that most Americans recognize their world role today.

"A second significant point is the sharpening sympathy for the plight of less fortunate peoples and the growing toleration and understanding of their problems displayed by Americans...whose response is not to withdraw, but to become more concerned.

"Third, Americans appear as willing to accept social evolution on an international scale as they have accepted it in this country...."

Mr. Abrams was certainly on the right track if we are to accept the conclusion of another Roper Poll during the 1956 election campaign: "Despite people's expectations that the campaign will focus on domestic questions, their deepest concern is with international problems."

In the last few months, there seems to have been a measurable upsurge in people's interest and concern with matters beyond the three-mile limit. At the same time, this current of thought appears largely leaderless...in terms of adult education. Certainly the government and various private groups have taken tentative steps toward increasing the educational opportunities for our youth. As early as 1955, 72 business concerns gave $22,500,000 to colleges according to a survey by the Council for Financial Aid to Education.

As this was written, the Wall Street Journal (February 19, 1958) carried a front page story from which are drawn the following excerpts:

"...Deluged with appeals for funds from colleges and universities, many corporations say their aid to education programs are being impeded by some very practical considerations: Fear of being outshone by a competitor's give-away scheme; concern over stockholder reactions; worry that rejected bids for aid may be 'bad public relations.' Philanthropy, they've concluded, bears its own special risks.

"Spurt of Giving

"...Nontheless, in the months since Russia's educational gains first achieved wide publicity there's been a renewed spurt of corporate gifts to education. And instead of confining themselves to the usual scholarships and older aid programs, many companies are pioneering some unusual gift-giving schemes: Refresher courses for science teachers, accelerated programs for 'gifted children,' to cite two examples.

"...Says one Midwestern college president: 'At least six big companies in our area recently have asked how they can help us expand facilities--especially in the sciences.' This is a far cry, he notes, from former times when college officials returned from many a 'begging expedition' with empty pockets....

"...Originally, of course, it was not 'traditional' for any corporation to contribute money for educational purposes. But more and more concerns have been getting into the field--particularly in higher education. Last year nearly 30% of the $520 million dispensed by corporations for philanthropic purposes went to education. In 1952 only 20% of all gifts went into this area. Even in the confines of higher education, however, there's been much uncertainty about the best means of channeling funds.

"...Some companies have discovered that possible stockholder opposition is more imagined than real. 'We've found to our surprise that stockholders expect management to come up with a better aid program than any offered by our competitors,' says another official of General Foods. 'Besides,' he adds, 'the Russian challenge will forestall stockholder opposition if any should arise....

"...Even after going through all this, many companies readily admit that their gifts are only token efforts in the overall higher education picture. 'Take our two bits worth,' says Standard Oil's Mr. Holman. 'It isn't going to solve the problem. But it may help a bit--we hope even stimulate others...."

All this urgency is wonderful. It can't help but be worth while--ten and twenty years from now. That's our trouble. That's always been our trouble. We never have been in the position before of having to worry about survival now. There was always time for our industrial might in the past and, now, it seems, our intellectual might in the future, to assert itself. And we just can't get used to the idea that the circumstances are any different this time. Thus the American adult who wants help, who wants leadership in his quest for knowledge, finds no concerted effort to answer a need he can't even articulate.

III

How can this answer be formed? I propose that a foundation be started--"The Foundation For The Future"--to tackle the job. It would be the Foundation's job to make it as easy as possible for the American adult to get at the facts of our critical national problems in order that he might form his independent informed judgment in each instance.

How would the Foundation make it "as easy as possible" for the American adult to get at the facts? By intercepting him, as he goes about his customary day, through all the mass communication media--in positions that command high audience ratings--in Television...Radio... Newspapers...Magazines...Books...Pamphlets...Billboards.

James Young of advertising fame puts it bluntly: "Philanthropic foundations spend an undue proportion of dollars in the increase of knowledge, but not nearly enough on its distribution. And when they occasionally do distribute it, they use old-fashioned methods: platform speakers, stiff-covered books. One fine day, one of them will learn that if he took a piece of knowledge and put some money into advertising it, he'd see the difference in spreading vital information to the people."

And as the raw facts were made available, so also would be the varying interpretations, projections, and shadings of these facts as they might seem worthy of note.

Worthy of note? To whom? And there would be a trap to be avoided. For the men appointed to operate the Foundation would naturally have as their job the selection and commissioning of the material which would make up the Foundation's output. Therefore, these men would have to be chosen precisely because they were best fitted for the job of seeing the facts were presented without fear or favor. Men, in short, who commanded public confidence. If these men happened to be high-salaried business executives, governmental or university personnel, the Foundation should have at its disposal the means to attract them on a financially competitive basis.

The question then arises, who, on behalf of this currently nonexistent Foundation, would hire these men...the top echelon men who would be responsible for the operating management of the Foundation?

E.M. I see you as Executive Director

E.V.N.

I suggest a Board of Directors--which would include men whose prestige and reputation would be the Foundation's most important asset. It might well be comprised of two leading industrialists and two top labor leaders, a ranking senator from each major political party, three nationally prominent educators and three topflight newspaper editors.

All this sounds like a major undertaking. And that, as any businessman can tell you, takes money. And so it would in the case of The Foundation For The Future. But since the product the Foundation would be concerned with would need no tremendous physical plant, the principal item of expense other than the material itself and its distribution would be the same kind of brains, vision and guts that American Business prizes so highly. That means that the Foundation should be able to compete with business in the market place for enough men with these qualities to guarantee success.

And here is where American Business would come into the picture. For my proposal is that The Foundation For The Future be financed, though not controlled as to output, by American Business, company by company right across the country, regardless of size, product or location. And since this program is one of vital adult education and would embrace thereby all company employees, each company would be asked to contribute the sum of fifty cents a year for each employee on its payroll...an opportunity, for fifty cents a year, to make their employees--from the president on down--better citizens of our nation.

From General Motors
to the cobbler on
the corner

The advantages to the country of such an all-out attack on our areas of critical ignorance are self-evident. The advantages to an individual company--perhaps for the first time able to contribute to an effort of such sweep and scope--would include the knowledge that it was supporting a most worth-while project and the proud admission of a larger responsibility to our national community than could ever be expressed in any other terms. (a FF seal could be used in all of a co's own sales promotions)

An assist for businessmen: Three years ago, the New Jersey Superior and Supreme Courts both rejected, and the U. S. Supreme Court refused to review a stockholder's suit against the A. P. Smith Manufacturing Company. The stockholder claimed that a $1,500 gift to Princeton University for general education purposes was illegal because there was no direct benefit to the Corporation. The court ruled that "what promotes the general good inescapably advances the corporate weal."

I see a "Foundation For The Future" which could move quickly to buy--not beg-- all the television time--Class A and otherwise--that is necessary to blanket the country--with urgent UN proceedings such as the debates on Hungary and Suez...or with a dual presentation on the state of our defense by Mr. McElroy and Congresman Vinson on the feasability of arms inspection by Drs. Teller and Pauling.

I see a "Foundation For The Future" which would commission an A-B-C story on these and other national problems--and then distribute copies, free of charge, to railroad stations, factories, barber shops, churches, libraries and other spots where the American adult is likely to be found.

I see a "Foundation For The Future" which would provide, under one cover, the expert pro and con on any one of a number of issues that concern our nation today, whether it be segregation, reciprocal trade or the reunification of Germany...and would then provide for its saturation-distribution as well.

I see...well, I see a magnificent effort by American Business and the American people to fit themselves for the job to be done...the catalyst to intelligent, informed action--in our homes, in our voting booths, in our lives.

Should American Business undertake this program? The pro's and con's could be argued forever. I say American Business ought to try.

I can think of no more appropriate close than to turn to the editorial column of the London Times which perhaps may see us in a clearer light than we see ourselves.

> "Can a nation--whose power and prosperity demand that more and more of its people shall have a scientific, technological or vocational education--at the same time produce the amount of wisdom needed for the successful leadership of the free world?
> ... "Of all nations, United States history has a higher proportion of greatness than of baseness... of all peoples, its motives are the least suspect. Its errors have been, and are, many. Its instincts have been, and are, magnificently right. We see the

small debits from day to day. Let us look rather at the huge credit through the years. Amidst all the dangers that beset us, we can be thankful that it is to this dynamic, humorous, impatient, impulsive, generous people, there has passed the leadership of the world."

Tell him I'll listen +

November 7, 1958

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York, New York

Dear Mr. Murrow:

I just hope it wasn't cause and effect that saw you taking out after the brass hats in your Chicago speech only to find yourself back in the trenches on Election Night.

This note is something in the nature of an experiment. I sit here drafting it and asking myself: How the hell do I phrase my thoughts in such a way as to avoid merely a tactful if impersonal note of thanks from your secretary?

For I have a planthat makes a stab at the heart of the problem you outlined in Chicago. And if you are as deadly serious as I am and you sound about the mortal danger our country is in, I think you'll want to hear more about this - this - well right now I guess you could call it a vision rather than a plan.

It's a big plan, even in its present rough state. If you threw in your lot - to help shape it and make it work - it would probably break your back - and maybe even your heart. But my God, somebody's got to do more than talk. Somebody's got to lead!

I've tried to. But I'm a zero. You might just pull it off. All I'm asking from you right now is your promise that you will read or listen to what I have to tell you with the care I hope it deserves.

My only reference, my only tangible evidence that I am responsible and not hare-brained, I am enclosing here (together with a fan letter of the kind that makes me keep trying). It is not inappropriate.

Don't let me down. There aren't enough of us around to go chasing off on our own individual tangents.

Cordially yours,

Edward V. Hickey

OFFICE OF THE VICE PRESIDENT

Mr. Edward V. Hickey
Director of Advertising and Public Relations
The Merchants National Bank of Boston
28 State Street
Boston, Massachusetts

Dear Mr. Hickey:

This is simple, straightforward, fan mail both to compliment and encourage you, if I may, for the magnificent letter reproduced in the WEEI advertisement in the September 8th issue of ADVERTISING AGE on page 33.

You and The Merchants National Bank should get national recognition for publicly espousing a philosophy that would advance the cause of world peace and understanding a hundred years if more of us in positions of responsibility would actively support it in the manner you have.

There must be thousands who, like myself, are taking off our hats to you and the Bank. We salute you.

Sincerely,

A. F. Monroe

A. F. Monroe
Director of Public Relations

The Case of the Bank That Refused to Take Money

—not out of charity, but out of esteem. Recently, The Merchants National Bank in Boston told WEEI Radio to disregard the credit due them for pre-empting two programs they sponsor. WEEI had felt the U. N. proceedings on the Mideast warranted unconditional radio coverage. CBS News was at the Security Council meetings, its microphones relaying some of the world's most historic moments. Holding the conviction that business should "take a larger part in larger matters than its own personal ones," The Merchants National Bank elected not to accept their credit.

Now this may appear as a simple gesture of appreciation, but to us it meant a great deal more. It was a sponsor's vote of confidence in what WEEI stands for. WEEI has always had an earnest belief in its role of public service: Each week we schedule at least 32 hours of news, representing over 269 different programs. 165 of these shows originate at WEEI. The station maintains the largest radio news staff in Boston. Each of its announcers is, in addition, a well-known, respected personality. CBS News, of course, is world renowned. There is probably no finer, more enterprising news agency in the world. Working together, these local and network journalists have brought to WEEI the finest reputation a station can enjoy.

THE MERCHANTS NATIONAL BANK
OF BOSTON
28 STATE STREET
BOSTON, MASSACHUSETTS

August 14, 1958

Mr. Thomas O. Gorman
Station Manager
WEEI
182 Tremont Street
Boston, Massachusetts

Dear Tom:

The Agency has just notified me that, because of your United Nations broadcasts, we are in line for a credit for two of our daily broadcasts in July to the tune of $190.00.

For a long time now I have had the conviction that business must take a larger part in larger matters than its own personal ones, and in line with this, I have instructed our Agency not to accept the credit due us.

When you drop commercial broadcasts to devote your radio time to the United Nations, you are really doing a job which is ours as much as yours. I can only applaud wholeheartedly your company's willingness to assume a responsibility which all too many of us are quick to duck.

While, of course, I would always like the option of accepting the credit for radio time of ours which you have used for other purposes, I am most happy, in this instance, to contribute our "widow's mite" to the cause of greater public awareness of the deep and unsettling problems which lie beyond the three mile-limit thinking of too many of us.

Please do everything you can to keep up this tremendously vital work, and thanks for your station's many contributions along this line in the past.

Cordially yours,

Edward V. Hickey
Director of Advertising
And Public Relations

EVH:cmc

From letters, personal thanks, surveys and ratings, we know what our listeners think of us. Just recently, for example, they told a leading research organization that of all the media in Boston, they thought radio was the most indispensable. In particular, they felt that WEEI was the most trustworthy, authoritative station. In a time of national crisis, they said, this is the station they would turn to for information and instruction.

It takes a long time and a lot of effort for a station to achieve this kind of distinction. And though WEEI operates chiefly in the "public interest, necessity and convenience"—we are proud, too, to acknowledge the unqualified support of our sponsors.

To The Merchants National Bank, our sincerest thanks.

Mrs. Robert Mateen
2906 Turnagain Blvd. West
Anchorage, Alaska

Dear Mrs. Mateen:

Many thanks for your letter of November 17th, which expressed your pleasure at two of our new programs, SMALL WORLD and PERSON TO PERSON.

We are especially happy to hear that you enjoy these two programs due to the fact that Mr. Ed Murrow personally made quite a concession to allow them to come to Alaska on a filmed delayed basis.

Until recently, this was impossible, until he worked out these arrangements with the CBS Television Network.

We are most gratified to know that our viewers enjoy these two programs.

I'm taking the liberty to send a copy of your very nice letter to Mr. Ed Murrow, and I know he will be as happy to receive it as I was.

Cordially yours,

AGH

Mr. Edward R. Murrow
CBS Television Network
485 Madison Avenue
New York 22, New York

Dear Ed:

I'm sure you will be pleased to know that your program, PERSON TO PERSON has been commercially ordered by the P. Lorillard Company for KTVA, Anchorage and KTVF, Fairbanks.

Before the commercial order had been instituted, we had made attempts through Roy Smith to get this program on a sustaining basis, due to the fact that we wanted very much to program it on our two stations in Alaska.

Meanwhile the commercial order came through, and we not only have the pleasure of having you on our facilities on a weekly basis, but also have an alternate week sponsor in addition.

All of this adds up to the fact that we deeply appreciate your willingness to release your program on a delayed basis, Ed, and I know you will have a host of very loyal and ardent supporters in Alaska as a result.

I sincerely hope that Alaska will have enough interest to you in the near future so that you may consider making a trip to see this great country. I know you would find it most fascinating and so dynamic you would find the trip most enjoyable.

The time involved to make a round trip to Alaska is very small, just five hours more than going to Seattle, as a matter of fact, and I think the main problem is just to make up your mind to come up and see us some time.

Again, many thanks for your various courtesies in the past.

By the way, Alaska looks on you as one of the people responsible for influencing Congress to grant us Statehood. I know very well you would be greeted with open arms by everyone in Alaska who saw your special Alaskan Statehood program on SEE IT NOW.

Cordially yours,

Angie

Mr. Edward R. Murrow
CBS Television
485 Madison Avenue
New York 22, New York

Dear Ed:

It certainly was a pleasure meeting you in New York recently and to find you sympathetic to our Alaskan programming problems.

I heard in Seattle that you had released your programs for delayed broadcasting in Alaska, and of course, this is wonderful news for our Anchorage station (KTVA), and our Fairbanks station (KTVF).

We are ordering these shows on an Extended Program Service basis if they will be released by their sponsors, for sustaining scheduling on both stations. At the same time, with the programs established and drawing an audience, we are going to make an all out effort to convince their respective advertisers to buy our facilities on a commercial basis.

I feel justifiably proud of the fact that through television, we have brought Alaska another step closer to the continental United States through your programs. Among the items people seem to miss in Alaska are cultural things or, specifically, television programming which deals with world affairs. Your programs list among those which people most frequently write about when they ask us "Why don't you have more television programming of various types in Alaska"?

Again, many thanks for your courtesy and cooperation.

Cordially yours,

Angie

Dear Mr. Murrow:

I am enclosing herewith the results of some studies I have made regarding solution of growth problems in our urban areas.

Two facets of any plan for a new type metropolitan government should be given extremely close scrutiny: (a) effect upon sources of tax revenue, and the impact upon residents; (b) possible concentration of political power, thereby taking government further from the people.

Much luck to you in having a successful broadcast on this very timely topic, one of great importance to large urbanized areas throughout the United States.

Sincerely,

James W. High

Dear Mr. Murrow:

Because we all have a mutual interest in the health and happiness of children, we are writing you concerning a cookbook of recipes of famous people we are compiling, the proceeds of which will go to organizations doing research on incurable diseases of children.

We would surely like to include your favorite recipe in our book, and would greatly appreciate it if you could take the time from your busy schedule to jot it down for us. Enclosed is a self-addressed envelope and questionnaire which may be helpful to you. We would appreciate your signing your recipe in order that we may have your signature reproduced on the cover of our cookbook.

We feel this may be a very good way to help those little ones who are in need of care. Your recipe will be used solely for this purpose.

Thank you for your kind cooperation, and we will look forward to hearing from you.

Sincerely,

A Reader's Digest
REPRINT

This insidious and once-fatal infant disease can frequently be controlled—while a crash program to find a cure for it goes forward

C/F—Mystery Killer of Children

Condensed from New York World-Telegram & Sun
Saturday Feature Magazine

James C. G. Conniff

EARLY one morning during last June's heat wave my wife and I woke to find that our youngest child, Robert, was ashen, apparently suffocated. While I worked to restore breath to his yet warm body, my wife telephoned our doctor and the police. They came immediately, and fought hard to save him with oxygen. The battle was in vain.

Afterward our doctor said to me, painfully, "All I can tell you is that if it had to be, then better at seven weeks than at seven months or seven years."

Dazed with shock, I could only nod. But since that bitter morning I have come to disagree profoundly with the idea that "it had to be."

Bobby's killer was a relatively little-known disease which bears half a dozen names. The best known is cystic fibrosis of the pancreas—C/F, for short. Unmasked only 20 years ago, C/F is estimated to threaten the lives of some 6000 babies a year in the United States—about one in every 600 infants born to white parents. (Negroes rarely have C/F, Orientals never. Why, nobody knows.) It sets in at birth or soon after, and until about 1950 it meant almost certain death before age five. It is completely non-contagious.

Bobby, I have learned since his death, had a number of symptoms characteristic of C/F. In spite of repeated increases in his formula, he continued to have a voracious appetite while showing little weight gain.

New York World-Telegram & Sun (March 29, '58) © 1958 by New York World-Telegram & Sun Corp., 125 Barclay St., New York, N. Y.

He had loose, frequent, bulky bowel movements—sure sign that his food wasn't getting a chance to nourish him. He had a dry, hacking cough, and frequent, excessive sweats.

But it is not to rebuke our doctor that I am writing this article; even doctors well acquainted with C/F sometimes have trouble identifying it. I write because much progress can be reported in dealing with this disease. Because recently developed laboratory tests are helping practitioners to distinguish C/F from other deceptively similar childhood ailments. Because experts believe that 50 to 60 percent of C/F sufferers can, if diagnosed early enough, count on survival while the crash program to find a lasting cure goes forward.

What, then, was going on in Bobby's tiny body?

Those who know most about cystic fibrosis say it is an insidious raid on an infant's whole exocrine (mucus, tear, salivary and sweat) gland system. As early as 1650 anatomists began to suspect that some mysterious entity now and then invaded the pancreas, the vital gland which empties into the small intestine a clear, watery fluid containing enzymes that break up food for digestion. These early doctors observed that the pancreatic juice sometimes thickened and kept the enzymes from doing their job. But the term cystic fibrosis did not enter medical lexicons as a formally recognized disease until 1936, when Dr. Guido Fanconi, of Zurich, Switzerland, described three cases and gave what is still their commonest name to the linked symptoms afflicting both digestive system and lungs.

The Fanconi find made no headlines, unfortunately, and it was not until 1938 that Dr. Dorothy H. Andersen, now chief pathologist at New York's Columbia-Presbyterian Babies Hospital, performed parallel studies and alerted the profession. In autopsies of infants who had died of "pulmonary disease," Dr. Andersen was disturbed by the frequency with which she found plugged-up pancreatic ducts. The pancreas had produced not its usual thin, clear fluid, but a thick, gelatin-like substance.

With the pancreas blocked, Dr. Andersen reasoned, no baby can manufacture the enzymes to digest his food. Undernourished, he becomes a pushover for infection. This pancreatic blockage, if unchecked, extends also to the lungs; the same kind of sticky mucus gradually plugs them, too. With less and less air ventilating their honeycomb passages, the lungs become the focus of infection which in a weakened child is almost always fatal.

Dr. Andersen's first thought was: forestall this fatal lung involvement by making up for the pancreatic insufficiency; give extra nourishment to youngsters who show signs of C/F. This she did with a high-protein diet, massive doses of vitamins, rivers of "percomorph oil" (oleum percomorphum)—a C/F regimen still very much in use. To fight infections that already had a lung foothold, Dr. Andersen at first used sulfathiazole. She is still partial to the sulfa drugs, because children seem to take longer than adults in building up resistance to them. But it is to penicillin and the ensuing antibiotics that she credits the phenomenal rise in C/F survival rates.

Where 20 years ago more than 75 percent of C/F victims died before their first birthday (and were diagnosed only at autopsy), today better than 50 percent of nearly 500 fibrocystics diagnosed at Columbia-Presbyterian Babies Hospital early enough to benefit by these treatments are still alive. Fifty-five of them are over ten years old; the oldest is 22. Most are a bit smaller than average, and tend to be non-athletic. But, by and large, they have been able to keep up with normal interests of childhood and youth.

Since Dr. Andersen's first work, medical researchers have learned, step by step, how to make more consistently accurate diagnoses on each of C/F's several frontiers. They have painstakingly mapped the widely differing courses of treatment that C/F calls for when attacking lungs or digestive system, sweat mechanism or even liver. These treatments, taken together, are essentially a delaying action until a cure is found, but they give solid hope to thousands everywhere.

For all-important early detection, conventional X-raying of chest trouble by experts can help. One of the core discoveries, however—which too few doctors and almost no par-

ents know about—is a fast, 99-per-cent-foolproof diagnostic procedure pioneered by Dr. Paul A. di Sant-'Agnese, Assistant Professor of Pediatrics at Columbia-Presbyterian Medical Center.

Known as the "sweat test," this key to C/F owes its discovery to a heat wave in New York City in August 1948, when heat prostration brought ten children to Columbia-Presbyterian Babies Hospital. Five were known from previous visits to be suffering from C/F. Di Sant-'Agnese reasoned that since in these patients other exocrine glands were functioning abnormally, perhaps the sweat glands, too, were shirking their job of cooling. So he ran comparative sweat analyses on four "control" subjects (non-C/F children) and on four known fibrocystics. The laboratory findings: the C/F children's sweat yielded a salt content so much higher as to indicate strongly that 1) here was a superior diagnostic tool to identify C/F, and 2) by giving extra salt to C/F sufferers it might be possible to save them from heat prostration.

Since 1949 all C/F children at Babies Hospital Cystic Fibrosis Clinic have been given extra salt (up to two grams a day) in hot weather. There have been no troublesome cases of heat prostration since.

Anxious to make the di Sant'Agnese sweat test so quick and simple that anybody could use it, Dr. Harry Schwachman, of the Children's Medical Center, Boston, and a group

of co-workers devised a scheme for testing *hand* sweat. They dissolved silver nitrate and potassium chromate in boiling agar (seaweed gelatin), then cooled the combination to a firm red jelly in a shallow glass dish. Onto its surface they gently pressed the palm of a child suspected, for other reasons, of having C/F. A sharply defined yellowish-white handprint appeared at once. The hand sweat of non-fibrocystics left almost no trace at all. This test was repeated and repeated, with identical findings. Now, with subsequent refinements, it can be used to screen large numbers of children for cystic fibrosis.

Meanwhile, via laboratory and bedside studies, researchers are moving rapidly toward isolating the key mechanism which triggers the whole C/F syndrome.

It is now known, for instance, that a defective gene in both parents plays a crucial role in the risk that their children may be born fibrocystic. Something like one in 50 persons is believed to have this lurking gene, and its presence cannot be predetected. But even if both parties to a marriage have it, their offspring will not be fibrocystic unless the impaired genes combine in a certain manner—about which relatively little is yet known.

Inroads on the advanced-stage suffocation danger of C/F have been made in recent years by means of improved techniques of inhalation therapy. Almost all C/F authorities now use medicinal detergents in nebulizers (fine-mist atomizers) to loosen and liquefy the deposits of lung mucus; then, by postural drainage—kneeling, with forehead to the floor—the patients cough it up.

As a clearinghouse for information and as a spur to research, the non-profit National Cystic Fibrosis Research Foundation* was established in 1955 by an attractive young doctor, Wynne Sharples, who has a C/F son and daughter of her own. The Foundation, to which Dr. Sharples today gives most of her time, already has 47 chapters across the country, and it has raised more than $200,000 for research into every conceivable aspect of C/F. It cannot, unfortunately, undertake to provide financial help for stricken families. Realizing, however, that the cost of drugs, vitamins and protein foods for a C/F child may run as high as $150 a month (average: $700-$900 a year), it has organized committees to get expensive medicines at rock-bottom cost from coöperative drug houses for families least able to stand the financial strain.

But the big essential for a C/F victim is early detection. And Dr. Sharples has found that the one who often prompts the correct diagnosis is the mother. "Let her be sure to tell her baby doctor of symptoms that worry her," says Dr. Sharples. "Together they may know the satisfaction of saving a child's life."

Hill, Chuck

August 24, 1959

Dear Chuck:

This is dictated practically on the run for the boat. The main purpose is to say two things:-

(1) Whatever arrangements are agreeable to you about my small participation in your theatrical venture will be entirely agreeable to me, and

(2) if there is anything you want me to do via the overseas telephone route in connection with Saul Haas, you have only to let me know. Let me repeat one thing I said to you the other day - namely, that, if you do go out there, you should make quite sure in advance that your authority is sufficiently broad to permit you to make the operation work.

I will not embarrass you by saying fulsome thanks for your contribution to PERSON TO PERSON, because you are a pro and know full well how much you contributed to the program.

As ever yours,

ERM:skh

I am terribly sorry to hear about your stage manager's death.

I am afraid I shall not be able to go to the performance on June 30, after all. The Canaveral shoot was postponed and now we have to be down there for a week starting June 28. I shall hope to be abée to get to a performance in the second week of July.

Meanwhile, good luck!

How many tickets would you like for June 30th, TUNNEL OF LOVE Also, are there any people you would like to invite to the after theatre party. We are progressing etc. Would very much like to meet with Haas again when he is in town.

One unfortunate incident. Our Stage Manager and his wife and child were killed while driving from California. Hit by a train last Tuesday morning. Puts us in a mood to make it a better theatre for their sake.

May 6, 1959

Dear Agnes:

This is just a note to let you know that one of my associates, Charles N. Hill, will present a summer season of plays at the Mount Kisco Playhouse, beginning on June 30. I have always found him a fine workman and I feel this new endeavour will be a great success.

The season will open with Jack Sterling in TUNNEL OF LOVE. Other plays so far selected are BLUE DENIM, SAY DARLING, ORPHEUS DESCENDING, OH! GENEVIEVE, CARRER, WALTZ OF THE TOREADORS, DARK OF THE MOON, THE INNOCENTS, and a new play to be announced later. The theatre will play through Labor Day, with an 8:40 p.m. curtain, no performance on Mondays, but two shows on Saturdays, one at 6:30 and one at 9:30.p.m.

Subscription tickets for ten plays in the first orchestra cost $29.70. If you wish to join me as a patron of the theatre and have your name listed on the program, the sum of $60 (or more if you wish) would entitle you to receive a season ticket and program listing as patron. Checks should be drawn in favor of the Mount Kisco Playhouse and sent to the County Trust, Hartsdale, N.Y.

I wonder whether it would be imposing on you too much to ask if you could offer drinks to thirty or forty people after the opening night performance. I shall just have been liberated and would be delighted to be invited to join you. However, if this is inconvenient in any way at all, I count on you not to hesitate to say so.

As ever yours,

ERM:skh

Write this memo!

Just to let you know the facts. We are moving along. We are into liability insurance now. It is very difficult to get for summer theatre. However here are the facts for a letter to patrons or a subscription letter we discussed.

Jack Sterling will open June 30th with "Tunnel Of Love" We will play thru Labor day, with an 8:40 curtain. Dark on Mondays. Saturday we play two shows. One at 6:30 and one at 9:30. Plays selected for the season so far:

Career	Look Back In Anger
Blue Denim	Three Men On A Horse
Mousetrap	Dark At The Top Of The Stairs
Visit To A Small Planet	(new play to be selected)

*Look Back In Anger and Dark At The Top Of The Stairs not cleared as yet.

Price list.

First Orchestra	3.00 plus tax	3.30
2nd Orchestra	2.50 plus tax	2.75
Balcony	1.50 plus tax	1.80

SUBSCRIPTION: Based on one free play

10 plays for: 29.70 (Only 1st orchestra prices)

PATRONS: This allows season tickets plus a donation, with their names listed on the program as patrons. This can be 60.00 per person and up. However I would like your ideas on the matter.

May 4, 1959

Dear Red:

This is just a note to let you know that one of my associates, Charles N. Hill, will present a summer season of plays at the Mount Kisco Playhouse, Mount Kisco, New York, beginning June 30 of this year.

Mr. Hill's previous undertakings of this kind include seasons as director of the Pasadena Playhouse and the Ogunquit Playhouse.

The season will open with Jack Sterling in TUNNEL OF LOVE. Other plays so far selected are - BLUE DENIM, SAY, DARLING, ORPHEUS DESCENDING, OH! GENEVIEVE, CARRER, WALTZ OF THE TORREADORS, DARK OF THE MOON, THE INNOCENTS, and a new play to be announced at a later date. The theatre will play through Labor Day, with an 8:40 p.m. curtain, no performance on Mondays, but two shows on Saturdays, one at 6:30 and one at 9:30.

Subscription tickets for ten plays in the first orchestra cost $29.70. If you care to join me as a patron of this theatre, and have your name listed on the program, the sum of $60.00 (or more if you wish) will entitle you to receive a season ticket and program listing as a patron. Checks should be drawn in favor of the Mount Kisco Playhouse and sent to the County Trust, Hartsdale, New York. Official receipts for all sums received will be sent in due course.

Mr. Hill has been associated with me for a number of years, and I have always found him to be a fine workman. I feel that this new endeavor will bring him further success.

Sincerely yours,

Mr. Red Barber
Ridge Crest Road
Scarborough Village
New York

The theatre will play through Labor Day, with an 8:40 p.m. curtain, no performance on Mondays, but two shows on Saturdays, one at 6:30 and one at 9:30.

Subscription tickets for ten plays in the first orchestra cost $29.70. If you care to join me as a patron of this theatre, and have your name listed on the program, the sum of $60.00 (or more if you wish) will entitle you to receive a season ticket and program listing as a patron. Checks should be drawn in favor of the Mount Kisco Playhouse and sent to the County Trust, Hartsdale, New York. Official receipts for all sums received will be sent in due course.

Mr. Hill has been associated with me for a number of years, and I have always found him to be a fine workman. I feel that this new endeavor will bring him further success.

Sincerely yours,

Mr. Ed Sullivan
Del Monico Hotel

Mrs. Helen H. Hill
1735 West 100 Street
Seattle 77, Washington.

Dear Mrs. Hill:

I am answering your letter of August 18, in Mr. Murrow's absence from New York. He is at present on vacation and will be away until September.

I regret that, upon his return, his schedule will be extremely full with his various radio and television commitments, and he has regretfully had to decide not to undertake anything additional. I am therefore returning your summary to you enclosed.

Very truly yours,

Sheila Hogg
Secretary to Mr. Murrow

enc. 1.

1735 West 100 St.
Seattle 77, Washington
August 18, 1958

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York City

Dear Mr. Murrow:

This summer Dr. Theodore Andersson of the University of Texas has been a visiting professor at the University of Washington. A project which I started in his class in methodology has resulted in the topic for my M.A. thesis. The motivation of young people following two years or more of a foreign language is, I believe, of prime importance to the secondary-school, the college or university, and eventually to the nation itself.

I am making a detailed study of the U.S. foreign scholarships which now exist. Most of them are geared to those seventeen years or older, with emphasis on the college and graduate levels. This, in foreign language study, is regrettable when one considers that the younger student learns more quickly and with a much better accent. Also, there are too few scholarships to make an impact on the foreign language deficiency. In many cases there is no particular stress placed on language at all.

Enclosed is a one-page resume of my project. What I would wish for is a pilot project, on a small scale, to determine what actually would result with such a young group, as compared with an older, less pliable age. I am of the firm conviction that we do not give enough to or expect enough from our very young citizens.

Any comments you may have will be deeply appreciated.

Sincerely yours,

Helen Hill

Mrs. Helen H. Hill

DOMESTIC RELATIONS COURT
CITY OF NEW YORK

JOHN WARREN HILL
PRESIDING JUSTICE

May 9, 1958

Mr. Edward R. Murrow
Columbia Broadcasting System, Inc.
485 Madison Avenue
New York 22, New York

Dear Mr. Murrow:

Do not give it a thought. The Executive Department at Albany has been a little sensitive about criticism which we have had to level in that direction. Promises of help in the matter of additional facilities have come down recently from Albany. Expressions of our appreciation have gone forth from here. My only purpose in writing Secretary Bingham was to make doubly sure that there was no misunderstanding in that quarter that the Governor did not think that we were continuing to complain. Personally, I do not worry about the matter.

~~Sincerely yours,~~

John Warren Hill
Presiding Justice

JWH:af

Hill, Judge

May 5, 1958

Dear Judge Hill:

I write to thank you for your courtesy in sending me a copy of your letter to Jonathan Bingham.

If your recorded remarks were in any way misleading, the fault is, of course, entirely mine.

I had thought that the context of the report had made it clear that the recordings were made immediately after the death of the Farmer boy and were not broadcast until this late date pending the verdict of the jury. If our failure to make this point explicit has caused you embarrassment in any way, I am deeply sorry. Our very considerable volume of mail does not indicate that listeners were under the wrong impression.

Nevertheless I am deeply sorry if our failure to be more explicit has caused you any degree of embarrassment.

Sincerely,

The Honorable John Warren Hill
Presiding Justice
Domestic Relations Court
City of New York
135 East 22nd Street
New York 10, New York

At9-8954
New York..New York..

Dear Mr. Morrow;

Several days ago I submitted to Mr. Bliss some research I have done in relation to the story "STRO90-in Nevada & Utah". I explained to your associate that Mr. Norman Cousins was interested in getting a grant for this group of scientists involved in doing followup studies apprapos the fallout in that area since the 1957 tests.Dr. Pfeiffer of the University of North Dakota(Anatomy Proffesor) along with Dr. Norman Bauer--University of Utah and Dr. Kelly--Medical school staff in Winnipeg all maintain that the level of STRO90 is so high in this still highly radioactive area-- it should not be drunk at all-- there have been many local news stories protesting to the Public Health Service Stations--we feel of course, it is a story that should be told- the thought ocurred as I listened to the delightful broadcast of Ustinoff Hurok etc last week-- how interesting it might be if perhaps you could see it fitting into your schedule to use Dr. Pfieffer at the U. of North Dakota- medical School--- perhaps Dr. Jim Nixon-- famous Radiologist at Memorial Hospital and one of the members of the United Nations Report on Radiation and per haps Norman Cousins(mind you I'm not at all sure that he'd be available)to discuss both pro and con the incredible story of STRO90 and is it here to stay.

I should appreciate an appointment with respect to the above material- in any event I hope the idea suggestion is not presumptous-- it's a devilish story and should be told in whatever way and watever form and as many times as possible-particularly since I learned in a telephone conversation with Dr. Lapp yesterday we are now picking up more fallout since the last recent Russian tests---enough for the serious outside it's a beautiful day. I should welcome discussing this with you.

Cordially yours,

Ruth K. Hill

Ruth K. Hill

She sounds a little whacky?

Ed - This is the what I left on your desk. E.B.

You may recall that a Miss Hill was coming in to see me about a Norman Cousins project. She came in today (Tues) and the project concerns an independent study made of radio-active fallout in Utah and Nevada by two scientists, Bauer and Pfeiffer of the Univ. of North Dakota. The material Miss Hill brought in is attached.

What Cousins wants, she said, is a grant so that this study can be continued. In short, she wants the study publicized and she thought of you because of the See It Now examination of the subject last season.

I told her I would give you the information.

eb

She sounds like a whacky?

EFFECTS OF FALLOUT IN THE U.S.

"STRO-90 - In new ADAT UTAH" — (milk Dangerous - should not be drunk at all) new + Utah STRO-33 units in N.Y. - 4+5 STRO-units

During the 1957 series of nuclear weapons tests in Nevada (Operation Plumbob), the Utah State Health Dept. periodically released certain data on levels of radioactivity, always accompanied by the statement that the different levels were "safe". As residents of Utah, and as scientists Dr. N. Bauer, physical chemist, and Dr. E. Pfeiffer, vertebrate zoologist, decided to find out how much radiation from weapons tests was reaching the people of Southern Utah, and upon what basis the Health Department was issuing its reassuring statements. As a result of written requests to the Utah State Dept. of Health, the AEC, and the U.S. Public Health Service, it was determined that there are no direct data on the Sr-90 content of human bone, soil, or food derived from the most heavily contaminated areas of Southern Utah. On the basis of indirect data, Dr. Bauer concluded that the people of Southern Utah had been exposed to thirty times more radiation from fallout than people in other areas of the U.S. Dr. Bauer presented his findings and conclusions at the June 1958 meeting of the Western Division of the American Association for the Advancement of Science and has published them in the weekly journal SCIENCE, official organ of the AAAS. In this paper Dr. Bauer states : "I wish to point out the urgent need for public information on such radioactive fallout burdens being carried by populations in the vicinity of the Nevada Test site. The problem of local fallout from atomic weapons tests seems to be a neglected subject, and obviously important data are not available to the interested citizen."

As a zoologist, Dr. Pfeiffer attempted to learn the results of studies conducted by the AEC in collaboration with the University of California at Los Angeles. These studies included observations on radioactivity in such animals as the jack rabbit and kangaroo rat. However, the AEC did not release much of the information, stating: "The published data pertaining to the accumulative radiation doses on the fringes of the test site.....are in reports which...are still classified...not because kangaroo rats or jack rabbits are classified, but again because of the form in which the data are reported." Very recently, however, the AEC has supplied Dr. Pfeiffer with data

showing that the Sr-90 in jack rabbits increased up to 130 miles away from ground zero, so that at a point near St. George, Utah, rabbits had a bone burden of 55 strontium units while at the test site the rabbits only had 12 s. u.

Because of widespread concern about the effects of the weapons tests upon local livestock (there have been several law suits by ranchers against the AEC), because some livestock had suffered beta burns, and because the AEC had never informed the local populace about the levels of Sr-90 in livestock and game animals around the test site, Dr. Pfeiffer decided to have some Sr-90 determinations made on Nevada livestock bones. A resident of Tonopah, Nev., Robert Crandall agreed to obtain specimens from the area adjacent to the test site. Nine analyses have been made so far on fish, deer, and beef cattle. The bones are sent to an independent private laboratory in Westwood, N. J., Isotopes, Inc. The fish had less than one strontium unit, the deer ranged from 3-9 s.u., and the cattle from 7 s.u. to 24 s.u. Thes data indicate the very wide variation in bone Sr-90 in animals from the same area and clearly indicate the need for further study, including human bone samples. It has been established that no human bones have been examined from Nevada or Utah by official agencies (with the exception of one still-born foetus, which, of course, was never directly exposed to fallout). It is interesting that the steer with the highest level of Sr-90 came from the ranch of the Bordoli family, whose young boy recently died of leukemia.

Since 1958, Dr. Pfeiffer has lived in North Dakota which also has a fallout problem as Dr. Kulp of Columbia University revealed at a meeting in Grand Forks in May 1958. He revealed that the Sr-90 in milk processed at Mandan, N.D. had reached over 32 s.u. which was five times higher than milk from other areas. As a result of this situation, Dr. Kulp was obtaining human bone samples for the AEC in order to determine the Sr-90 levels which the milk might produce in humans. The U.S. Dept. of Health, Education, and Welfare refused to tell Dr. Pfeiffer at what level of Sr-90 it would urge the public not to drink milk. As a result of publicity about this study the N. D. State Health Dept. revealed that air, water, soil, animal bone, and milk had been tested since 1956. The state department of Health, however, had

N.Y. Times Release

never informed the public of these tests, and has never yet released any information to the people of North Dakota. Dr. Pfeiffer has learned from the AEC and the U.S. Public Health Service, however, the radioactivities of soil, milk, bone, river water, and is now trying to evaluate these data. The animal bone Sr-90 is higher than that in animals near the Nevada test site, and the rivers tested have been as much as ten times above maximum permissible levels for drinking water. Recently, the report of Sr-90 determination in a very young child from Grand Forks has shown a level (member of AEC) of Sr-90 more than twice the highest figure reported for humans by Kulp. The AEC has not yet released their figures on human bone from North Dakota.

The investigations of Dr. Bauer and Dr. Pfeiffer have just touched the surface of this problem and only point up the need for a thorough study of fallout effects by an organization which will inform the public instead of trying to conceal the data as many official agencies have tried to do.

(Report by Dr. Pfeiffer, Oct. 15, 1958)

(Re: Study of stallion-Beta Burns from fallout).
"In Kawich Valley, north of Nevada, test patches of hair, scars on skin. Grazing area about 20-30 miles from center of nuclear firing area in Yucca flats".
'57 tests, Nevada - Utah area

NOTES RE PHONE CONVERSATION WITH PROF. PFEIFFER, UNIVERSITY OF NORTH DAKOTA

Dr. Pfeiffer is continuing his independent study of bones, animal and human - the accumulation of ST-90 in Nevada test site, since 1957 tests. Informs me that the AEC has made no independent study of ST-90 in Utah-Nevada site. This is what inspired the scientists' independent investigation.

Dr. Norman Bauer of the University of Utah, Logan, Utah - is doing the interpretation and summaries available, fallout data in Utah - result of 1957 tests. It is considered still highly radioactive area, Nevada-Utah, borderline Winnipeg, Canada which touches North Dakota. (Professor of Chemistry)

Professor W.O. Kaster, University of Minnesota (Minneapolis) Physiological Chemist, member of the State Radiation Study, is doing a "Culmulative study of fallout"since 1957 tests; finds still considerable radioactive area near tests site. Interesting note - AEC has made no bone ST-90 study in that area.

Dr. Kulp, Lamont Geological Observatory, has made independent studies along with people on soil and calcium accumulation in test site area. Says,"ST-90 is twice the average of low calcium soil in western part of the state."

Mr. Robert Crandall, former Editor-Publisher of Tonopah, Nevada newspaper -- assisting in gathering bone information. Las Vegas "Sun" carried the story of horse burns - beta burns turning skin of horse white...

Professor Kelly, Dept. of Physics, University of Manitoba, Winnipeg - across North Dakota borderline doing studies of effects of fall-out in Canadian area.

Dr. Ralph Lapp --worked with Prof. Pfeiffer of Univ. of North Dakota -- ascertaining high level of ST-90 in test site area.

FACTS REGARDING INDEPENDENT STUDY OF CUMULATIVE EFFECTS OF ST90 ON HUMAN & ANIMAL FAUN

Level of ST-90 in milk is higher than any place in the world to date. AEC admits to high level in milk. Prof. Kaster of Univ. of Minnesota thinks milk is dangerous, should not be drunk at all - last year's level was 33 ST units, this year is down to 20 ST units; in New York areas - 6 or 7.

Question of approach - some farms contained over 33 ST-90, others - percentages less; some scientists maintain 40 is the "all right level" for human consumption, others feel too ST-90 is hazardous. This group of scientists feel milk should not be drunk at all. They feel the average is perilously high.

"IS THERE ANY COINCIDENCE IN THE RISE OF LEUKEMIA AND WORLD FALLOUT"

Notes from conversation with Dr. Jim Nixon - Radiologist in charge at Memorial Hospital (referred by Dr. Appelyard, UN Report on Radiation at UN)

DR. NIXON: "Don't think we know. In the ability to diagnose, we must assume that all other variables are consonant. For example, in a test survey scientists discovered a considerable increase of leukemia in San Francisco as compared to a relatively lesser amount in Denver, Colorado - where natural cosmic radiation is known to be excessive. The point here is simply that in San Francisco more cases of leukemia were diagnosed - there is no proof in this being an important variable factor. It is too soon to tell. Missed diagnoses - an so on, play various roles."

HAS SAFE THRESHOLD LEVEL BEEN DETERMINED?

DR. NIXON: "The concept of thresholds throughout physic and a lot of pathology is that there is no detectable response until you exceed a certain dose. After you exceed a certain does, then you begin to see the effect. The amount of response you see may increase sharply even though the excess above the threshold level is small. Thresholds do exist - but you can haveno detectable amount until you exceed a certain dosage." SUPPOSING YOU HAD AN INCREASE IN TEN YEARS - "The answer could be yes or no - a probability. On the other hand one could ask- Does this mean there is an increase in the number of cases, or in the number of cases properly diagnosed? Does this mean exposure to a carcogen? Does this mean a difference in the number of cases registered? In the number of cases never diagnosed? In the number of cases called Leukemia and are not? In ten years time, there will certainly be a change in the number of cases missed - and the number of erroneous diagnoses. If the number is changes, then we must ask why it is changes and also what are the agents that cause leukemia - one can indict the following -
(a) radiation is one (b) chemicals certainly -- some we know about - some we don't. The advent of chemical additives in food(flavors and spoilage retardents - what is the impact of this on cancerOnly this past year, the burden of proof wasplaced on the producer rather than the government.

Therefore one can ask, "How do changes in environment influence the number of deaths in leukemia?" Before you indict radiation completely as the sole factor, you must introduce other things which enter into the discussion.

1. Diagnosis and reportage
2. Causation
3. Environment

The pitch on environment casts an eye on other things - before you can say with finality "this is it". Now, if you think of radiation (from fallout) as a possible cause, you must know -

1. Increase in dosage to the population
2. Other ways of receiving carcogens - medical XRays
3. Industrial use of radiation - steel,
   canning processes, XRay in making of paper
   a. more exposure through industrial uses.

All these variables apply to the environment and its somatic effects. It would be correct to say that it is too early in time to know. After a ten year period - how the dose is changed, how much, and from what causes.

There is no argument that radiation can cause leukemia. We want to know how much radiation causes how much leukemia. The argument is not the magnitude, but is there a threshhold level?

Conclusion

Before you indict radiation, you must introduce other things which enter the discussion.

1. Diagnosis and reportage
2. Causation
3. Environment (as I said before)

Could you make any comparison apropos the Indian tribe who have been discovered living for years on high thorium content- "thorium sands"? Could any conclusion be drawn from this appropos radiation and it's relation to leukkemia? No, for example, take two apples - one in India. Ideally, the other apple is the population not living "on the thorium sands". Around this are too many uncertainties to pluck a factor out of "mishmash". An unwise thing to do - the reference is a false one which cannot be compared.

Going back to the effects of radiation from fallout, the medical use of XRay, Cosmic Rays, industrial useof XRay -

What is the percentage due to each of these factors?

lets say - 10% due to fallout
80% medical uses
10% industrial uses

Is ten percent a statistical fact on the fallout approximation.
Conversationally, I would say so - yes.
First, we must assume or adduce what determines the increase - is it medical, industrial or fallout? If we make this assumption, then again we must inquire - what has caused the increase? (10 arbitrary units as a dose to population in 1948, 15 units as dose in 1958, where does the 5 unit dose come from? The differential, medical, Industrial, fallout? Which is the candidate?

Conclusions: the background stays the same, we must again ask, "How would you rate the proportion of contribution to the increase"? (This a tough question.)

On the basis of dosage to the population I would say the majority of cases would come from medical use of XRay, industrial use of XRay - this would snuff out the importance of fallout.
Bear in mind these are opinions and not conclusions.

Whether you get 100% of radiation or 1% due to fallout, both are harmful. Under emphasis of the problem is not good, neither is overemphasis.

The Question is - is there a discernable threshhold level? Where is the threshhold level? Neither thing do we know. (Quote Dr. Nixon)

Dr. James Nixon, Radiologist, in charge Memorial Hospital, New York, N.Y.

Dear Sir:

2

I am enclosing an open letter to our Government representatives which covers a subject that I believe all Americans should be most interested in. This can be used at your discretion, and I would appreciate sincere consideration by you or your staff.

G. W. Hilton

Hilton, G.W.

G. W. Hilton
1695 Dale Avenue
San Jose, California

March 5, 1959

OPEN LETTER TO OUR GOVERNMENT REPRESENTATIVES

Sir:

As is the case with many thousands of people in this great country of ours, product manufacturing is my particular livelihood and contribution to our society. It follows that, along with others, I am very interested in what happens concerning products that are the prime source of our continuing in business and also allow us the privilege of continuing as contributing citizens to this great American way of life.

It has come to my attention that our Government's purchasing policy permitted an order for our Nation's biggest steam turbine generator to be placed with an English company which means that more than a million man hours of work have been taken from the American public. This order was for a 500,000 kilowatt steam turbine generator, and it was let by the Tennessee Valley Authority to the C.A. Parsons and Company, Limited of England. This appears to be the first time to my knowledge that a steam turbine generator has been ordered from a foreign manufacturer, and it represents a precedent setting decision that many of us feel is shortsighted from the standpoint of employment of American workmen and can be considered dangerous from the standpoint of our National security.

Even though the Buy America Act provides a small amount of price protection for American firms, I understand that in this instance it was not nearly enough to enable American firms to meet the Parsons' bid. It is pretty well known that we in America just cannot compete on a price basis with foreign firms, because we, the skilled employees who build our equipment, receive wages which are two and one-half times those paid to British workmen.

If one of our American firms had been successful in obtaining this order, it would have meant over a million man hours of work for employees in the firm as well as over 300,000 man hours of work for supporting materials from other firms. Saying it another way, it would have meant the equivalent of approximately seven hundred jobs for one full year or three hundred and fifty jobs for the two years that would have been required to build this

big apparatus. It also, by calculation, would have meant some $3,600,000 in tax revenues to our Federal and State Governments. These taxes would have been paid by the American firm's employees and by their suppliers and their employees.

Aside from the question of employment, another important consideration is that the purchasing policies which permit such vital equipment to be bought abroad are clearly not in the best interests of our Nation's security. Because of these policies, foreign manufacturers have been selling more and more heavy electrical equipment in this country strictly as a result of prices based on low wages. This latest government purchase, however, represents by far the biggest step that has been taken toward making this Nation's vital electric power system dependent on a foreign country for maintenance and repair. Such large turbines and generators as these are not easily maintained or repaired without ready access to the original manufacturing plant and the advantage of quick consultation service. Even in peace time, our Government will be at a definite disadvantage as far as parts and maintenance are concerned, because the builders of the equipment will be at ocean's distance; and to put a more drastic tone, in the event of war time, it is not realistic to depend on ocean transportation at all.

The Central Electric Authority of Great Britain does not buy any power generation and transmission equipment from suppliers outside their country. A report by this British power generation agency to the Parliamentary Committee of Inquiry before the House Ways and Means Committee said that this policy was followed, because it would be unwise for the electicity supply industry of England and Wales to be dependent upon foreign manufacturers for spares and maintenance.

You might well think at this time, that this is just one incident which may never reoccur; however, it has also come to my attention that at the present time the Board of Commissioners of the Los Angeles Department of Water and Power are considering the possibility of letting a job for two large steam turbine generator units to a Swiss manufacturing firm.

I believe sincerely that we should take the same realistic purchasing policy as was expressed by Great Britain in order to set adequate safeguards for national security and insure prosperous employment for our people at home.

This open letter is being forwarded to you as one of many Government representatives, and it is my intention that you be made aware of this situation. I strongly urge that you give serious consideration to supporting any action toward an improved policy on this subject.

Very truly yours,

G. W. Hilton

Dear Mr. Murrow,

Mr. Maurice Ernst whom I met several times while in London suggested that you might be interested in an enquiry which I have just carried out and that you might care to discuss some of it implications.

I do not of course know how you are fixed for time. I shall be in New York from ~~Jan~~ Feb. 12th for about a week and shall then be visiting professor of psychology at Berkeley. I would of course be very happy to have an opportunity of talking with you.

My address in New York will be c/o A. Fried 25 East, 86th Street N.Y. City, N.Y.

With kind regards,
yours sincerely,

Hilde Himmelweit

Dear Miss Hogg:

In April you wrote me that Mr. Murrow was in Europe and that you would see if he had anything to suggest in regard to Jane Addams on television when he returned.

I note that he starts a year's sabbatical leave from C.B.S. in July, but July of 1960 or any month following until the end of that year would be very acceptable to us. Jane Addams' birthday was September 6th.

Sincerely yours,

Carmelita Hinton

LIBERAL AT LARGE

Jane Addams Still Blazes Peace Path

BY HARRY BARNARD

NEXT YEAR will mark the 100th anniversary of the birth of America's greatest woman—Jane Addams of Chicago's Hull House.

Plans now are being made by a too small, yet wonderfully dedicated, group of women to have this anniversary properly observed.

I shake the hands of these women. Though they number but thousands, when they should be counted in the millions, I hope they will achieve such a celebration as will make it seem that Miss Addams is making her influence felt again in our land and in the world.

BARNARD

* * *

I REFER to the ladies of the Women's International League for Peace and Freedom.

This organization was founded in 1915, with Miss Addams' help. Often despised, sometimes cruelly and irresponsibly called "subversive" (as was Miss Addams herself), the WILPF has been carrying on valiantly and steadfastly her aim that war should be rejected finally as a method for settling disagreements among nations.

Miss Addams was president of the league 14 years. In 1931, she was awarded the Nobel Peace Prize because of her work through it.

She was its honorary president when she died that sad spring day of May, 1935.

At her request the little headstone on her grave at Cedarville, Ill., where she was born Sept. 6, 1860, carries just these words:

"Jane Addams of Hull House and the Women's International League for Peace and Freedom."

GREAT, human, and needful as was her pioneering social work at Hull House, where the desperately lonely, bewildered and poor immigrants of the late 19th century found her and her associates their only true friends, Jane Addams' greater significance lay in her devotion to the cause of peace.

I am convinced of this by a re-reading of the fine biography that James Weber ("Teddy") Linn, her nephew, and my beloved teacher at the University of Chicago, published soon after she died.

It adds up that Miss Addams, born to gentility, yet who served as garbage inspector in Chicago's then dirty Halsted-Maxwell street district, should in the end understand that attaining world peace was her real work. Her great aim in life was to help as much as one person could, to create a world of harmony and beauty. Not just for the well-born like herself, but for everyone.

To Miss Addams' logical mind, it was a natural thing to see that the disorder of war is but the ugliness and disorder of slums and of poverty magnified.

* * *

THIS MESSAGE of Jane Addams is needed now.

It should pervade and nourish the deliberations for a settlement of the crisis over Germany, which, in turn, can become the bridge toward ending the cold war altogether. This would be her proper memorial.

Hinton, R F.

February 10, 1959

Dear Mr. Hinton:

Many thanks for your nice letter of January 20th.

Your kind comments about my programs are greatly appreciated.

Thanks also for enclosing your book. Your thought is appreciated.

Sincerely,

Mr. R. F. Hinton

JAN 23 1959

Dear Mr. Murrow:

1/19 News?

I have seen many of your television programmes, of course with the same interest enjoyed by most of your viewers. However, I happened to hear you being interviewed on the radio last night while driving home and I was tremendously impressed by your simple and straightforward evaluation of where the North American continent is today in relation to world conditions. It seems to me you put your finger on the simple truth that America (and Canada) would win acceptance in other parts of the world were we to live out the faith and philosophy of those who founded our democracy.

I am sure you will find the enclosed book relevant to the thoughts you expressed.

With kindest regards and warmest wishes,

Yours sincerely,

Enc:

33 Neathem Road
Yeovil
Nov: 29th 1959. Somerset
To. Ed. Murrow England.

Dear Mr. Murrow.

I have thought so much about your recent BBC broadcast, that I simply had to write & say a very simple thankyou.

In many ways, & altho' I realy enyoyed the programme, I couldnt help thinking that you must have gone to an endless amount of trouble to get an Idear of the true state, & standard of living of the average man & woman in England today 15yrs after the war, & yet in so many ways you failed to do just this, through no fault of your own, for I feel you to be a most

sincere man & a true friend of the British people.

May I please, as an ordinary housewife & mother tell you my views as I see them & how the peace has affected a very large majority of the working masses.

The local ~~[illegible]~~ council's have provided excellent homes for thousands of working class people, at a rediculous low rent, say on an average of 30/- wk inclusive of all rates.

Factory work' cars, engineering of all class, has realy been booming, pay so good, & bearing in mind the small rent that you can hardly find a council house tenant that doesnt run a car & it is a true saying that never did

~~did~~ we have it so good.
Our children are cared for long befor they even enter the world, through the National health service, schools are excellent, I know, for I was a supervisor for five years at a local Infants school.
Now it has been obvious to me, that the ordinary man in the street is better off than ever he has been, & why not!
It's the fixed income groups that suffer most, & it is almost pathetic to see them come into my small tobacconists where I work, fading old gentlemen, ex civil servants & military types, still trying to look respectable in their faded garments, definatly they have been use to a better standard

I only wish I were able to pen my thoughts for I feel sure they would be of interest to the American folk, but alas! my own education is such that I am quite unable to compose a letter.

Perhaps some time in the future I may be able to afford to buy a tape recorder this is a dream of the future, when my 13 yr old son has completed his education which of course we have to pay for, this I can manage out of my weekly earnings.

May you enjoy many long years of success, & I for one look forward to all your BBC programms.

Yours Sincerely

V.C. Hodge MRS.

Hodges, Luther H.

June 26, 1958

Dear Governor Hodges:

Many thanks for your kind letter of June 19th.

It is mos. thoughtful of you to offer suggestions for possible PERSON TO PERSON interviews, and I shall discuss them with my co-producers when next we are making future plans.

Mr. Edward R. Murrow
Columbia Broadcasting Company
485 Madison Avenue
New York, New York

Dear Mr. Murrow:

I enjoy your program frequently and I am always proud to know you have had, in the past, some North Carolina connections.

May I offer some suggestions for whatever they are worth for any or some possible "Person to Person" interview at your convenience. I am thinking of Mr. and Mrs. John Kellenberger of Greensboro, North Carolina. Mrs. Kellenberger's mother, Mrs. Latham, left a substantial sum of money for the restoration of the Lord Tryon Palace at New Bern, North Carolina, destroyed in the late 1700's. Mr. and Mrs. Kellenberger have given almost their full time in the last five or six years in getting this restored. It is going to be one of the most authentic and most beautiful restorations in America.

Sincerely yours,

Luther Hodges

Mr. Edward R. Murrow
C.B.S. News
485 Madison Avenue
Columbia Broadcasting System
New York 22, New York

Dear Mr. Murrow:

I have admired your direct, open-minded and analytical reporting of the news since World War II. You seem to spark C.B.S.'s advance into new fields of endeavor in radio and Television with your "Person to Person" and "See It Now" series.

For the above reasons I would like to ask for a few minutes of your time to call on you at your convenience. I would like to discuss with you an idea from which, I feel, that you, C.B.S., and the nation could benefit.

This idea entails a method whereby C.B.S. could have its fingers more directly on the pulse of the nation. It would enable it to read the national feeling on various controversial subjects within moments. In turbulent times such as these and especially in election years, this would be an invaluable asset. Moreover, being able to read an audience reaction to various programs, it would provide a sounder basis for C.B.S. programing than the present "Trendex" and "Nielson" ratings. This, I believe, has possibilities of opening up a new field in which Television and Radio might provide a useful service to the listening public.

This idea lies well within the realmof practicability and the cost of implementing it within a network would be nominal in proportion to its value.

I am a young man, 27 years old, employed by The St. Regis Paper Company. My work frequently takes me to New York City. I could arrange to call at your convenience on whatever date you would be kind enough to appoint.

Thank you.

Sincerely,

Dan Hoffman

Hoffman, Paul G.

Statement

Hoffman.—

Speech by Mr. Paul G. Hoffman, Managing Director of the United Nations Special Fund, at the opening meeting of the Governing Council, 26 January 1959

I deeply appreciate the honour that has been shown me in my appointment as Managing Director of the Special Fund. The Fund has been in existence less than a month. We of the staff and you of the Governing Council are meeting for the first time today. We are embarked together upon an enterprise, a magnificent enterprise, for our aim is to contribute as best we can to bringing to many hundreds of millions of people in the less-developed nations the opportunity both to make a better living and to live fuller and happier lives. This is an objective inspiring beyond measure but it imposes responsibilities on us that are staggering.

In assuming my share of the responsibility it is with a sense of thankfulness that I report to you that Mr. W. Arthur Lewis accepted my invitation to serve as my Deputy. I was closely associated with him earlier last year in a Conference on Economic Aid. The report of that Conference contains the following passage which reflects both Mr. Lewis's views and mine:

"... All countries have a mutual interest in accelerating the economic and social progress of people throughout the world. Cooperation in this task has become imperative: it remains, however, to devise means consistent with the psychological, social and technical requirements of both contributors and recipients. This cooperation is a matter of political vision and wisdom linked to the basic desire for peace; its economic

and financial implications are accessory if we consider that one-tenth of the defense budget of the world would constitute a more than adequate contribution and that if world tensions are not relieved defense budgets may be increased several times this amount."

It is in this spirit, Ladies and Gentlemen, that Mr. Lewis and I will work toward the success of the Special Fund.

The particular type of assistance on behalf of the developing nations in which the Special Fund is to engage is well-known to the Governing Council, perhaps particularly to those delegations which participated with such signal success in the detailed and excellent preparatory work which lies behind its establishment. I should at this point pay a tribute to all those who have done so much to establish the Special Fund. I have in mind particularly Ambassador Mir Khan, the Chairman of the Preparatory Committee, Mr. Gopala Menon, the Chairman of earlier *ad hoc* committees, and Mr. Johan Kaufmann, who consistently served as Rapporteur of those bodies.

The Secretary-General himself described the functions of the Special Fund clearly when at the United Nations Pledging Conference last October he said:

"... The new instrument of international cooperation has been well-fashioned to do a specific job, and one closely related to the work of existing agencies and their well-proven programmes. I have particularly in mind the work of the Expanded Programme of

Technical Assistance. Over the last nine years, this Programme has achieved a considerable measure of success, and like all successful pioneering operations, has brought out certain needs of a different kind which require a somewhat different approach and a different distribution of resources. The essence of these needs lies in the assistance which will in specific cases create the conditions in which new capital investment of high development value will be accelerated. It is in this setting, that the Special Fund may find an important, if initially modest, role."

My confidence that the Fund can make a worthwhile contribution to the developing nations rests largely upon the eagerness and determination of the people of these nations to improve their own lot. Success would be impossible without this. But my confidence is heightened by my knowledge of the magnificent work already accomplished by the United Nations Department of Economic and Social Affairs as well as the technical assistance programme, the International Bank, the specialized agencies and by the unstinted cooperation given us by their secretariats.

I am also sustained by the knowledge that, in addition to the Secretary-General himself, we will have closely associated with us Mr. Eugene Black, Mr. Philippe de Seynes, and Mr. David Owen, whose counsel will be invaluable.

In the few days Mr. Lewis and I have been on the job, we have not reached any rigid conclusions on the general policy of the Fund, or on the first year's programme. We have, however, arrived at certain tentative general conclusions about this all-important initial programme, which we wish to present to you.

The programme should in our opinion put major emphasis on projects which would demonstrate the wealth-producing potential of unsurveyed natural resources in the less-developed countries, on training and research institutes and on surveys of limited cost which would lead to early investment. It should be well-balanced as between these types of projects and also geographically. From the standpoint of costs these projects divide themselves into three categories:

In the first category we would place large undertakings which might take several years to complete, involving expenditure of as much as five million dollars, and which might well be regional in character. We have already had submitted to us several proposals for surveys of great rivers whose waters, if properly utilised for irrigation, power and other purposes, might substantially add to the wealth of the nations in the region.

In the second category we have in mind placing projects of two types; first, general and comprehensive resource surveys costing as much as a million dollars; second, training and research centres for which there seems to be a great need. We have already received a great number of applications to support training institutes of various kinds, and we have no doubt that the Fund can make a major contribution in this area. We are also very conscious of the need to strengthen research institutions, in all spheres of knowledge, and in particular in agricultural and livestock research. Here also there is scope for activity on a regional basis, though of course national institutes may be fully justifiable. Pilot plants fall within this same category of research activity. In many cases industrial processing will use the same techniques in developed as in under-developed countries, and activity on the pilot scale would

be required only in special circumstances. Nevertheless, new techniques need to be developed and exploited which suit the resources of under-developed countries, and we see this as a sphere in which the Fund may make an imaginative contribution. Several of the specialized agencies have shown their interest in research and training institutes. We shall, of course, solicit the assistance of the appropriate specialized agencies in both evaluating our projects and in working out all plans for establishing them.

In the third category we would place surveys, somewhat limited in nature involving costs say between $100,000 and $500,000, which give promise of uncovering projects of immediate interest to investing agencies. These pre-investment surveys might often take the form of a preliminary engineering or feasibility report. By "feasibility" I mean the stage which comes between the general survey recommending the establishment of a given industry and the full engineering report in which a project is spelled out in final form in terms of blueprints, specifications, construction contracts, etc. The feasibility report involves economic, technical and commercial evaluation of raw materials, production capacity, capital requirements, cost and profit possibilities, selection of the site in relation to the raw material and market for the finished product, power, water and transport facilities. We have too few projects of this character at the present time but we hope that the emphasis which has been placed on large undertakings will not discourage Governments from filing such requests.

Having outlined the type of projects in which we feel the Fund should be interested, perhaps we should make clear the type of expenditures in which we think the Fund should <u>not</u> be interested. We do not believe that the Fund should

be called upon to defray expenditures which are a normal part of a Government's budget. In order to prevent this diversion of our resources we might in the formative period of our work be guided by the following general rules:

(a) we would prefer to limit the Fund to financing projects for which there is a definite terminal point to the Fund's commitments, an agreed point at which either Governments or other agencies would take over. In other words, the Fund would not embark on projects which would commit its resources for an indefinite period;

(b) we would make subventions to ~~annual~~ operating expenditures only in respect of new or experimental programmes. Any project which merely extends to other parts of the country a programme which already exists in other parts or for other categories, should be met from the Government's budget;

(c) our annual subventions to operating expenditures would therefore not be large and should not normally be carried beyond a maximum period of, say, five years.

We expect to submit our recommendations as to the first year's programme in two parts - the first part at a meeting for which we are suggesting a date in ~~May~~ June, the second at a meeting to take place later in the year. Merely for illustrative purposes and to show the trend of our thinking, we hope to have ready for the ~~May~~ June meeting recommendations calling for the immediate initiation of one large project; several projects of medium size, which might include one general resource survey, one research institute and one training institute; and a number of smaller projects all selected with the idea of bringing about ~~quick~~ early investment.

It is difficult to set a precise time for ~~the second~~ a further meeting but we are hopeful that by early fall we will have ~~a~~ recommendations ready for the second part of the first year's programme. Our problem in shaping up the programme will be one of selectivity, for we anticipate that we will be able to meet only a small proportion of the total number of requests, all of which may well merit financing from the Fund.

I have dealt at length, Ladies and Gentlemen, with the part the Fund might play in assisting developing nations. But we must not forget that we are a service organization. We can help only those countries and peoples who want to help themselves. While we, and ~~all the~~ other organs of the United Nations, will be glad to take the initiative in helping countries to prepare their projects, our terms of reference place squarely upon the countries themselves the responsibility for proposing projects, for contributing substantially to their costs, and for obligations which will continue when the project is completed and handed over. We shall be having to seek much detailed information from Governments who put forward proposals, and though this process will be as burdensome to them as it is to us, I know that we shall all agree that nothing must be left undone to ensure that the projects adopted by the Fund are soundly conceived and based on the fullest possible information. Even then, some of our projects will in the event, prove not to be as useful as was expected, but we must all have the certainty at the time of decision, that the prospect of success is good, and that success will pave the way to a substantial increase in the country's resources.

Our success depends equally upon the cooperation of the more advanced

nations. Apart from the sums they contribute to the Fund, we shall need from them men and materials with which to execute our projects. We rejoice already in their moral backing; for ours is a hard task in which we need the comfort of knowing that all the Members of the United Nations are giving their fullest support to the enterprise to which we are setting our hand.

Finally, may I say that we must not be content with old concepts of how the interests of the people of the world can best be advanced or the rate at which they can be advanced. In this day of startling scientific achievements and rapidly advancing technology old standards are not good enough. We dare not be pedestrian either in our thinking or in our actions. Practical, yes. But only bold and imaginative plans and actions are practical when measured against the pressing needs of the developing nations.

OFFICE OF THE Oregon
BRANCH MANAGER
N.Y. office Ins. Portland,

May 23, 1958

Mr. Edward R. Murrow
485 Madison Avenue
New York, N. Y.

Dear Ed:

It seems that time goes by so quickly that it is impossible to keep up with it. I certainly want to apologize for not having written to you earlier to thank you for being such a wonderful host while I was in your fair city.

I saw Tom Stoddard the other day and he advised me that you were coming out and taking a trip down the Rogue which is surely a wonderful trip. I can't think of anything you would enjoy more. However, I definitely want you to spend a few days at my fishing lodge on the Deschutes River. You will find excellent fishing and a very relaxing atmosphere. This invitation also applies to your family if they accompany you. I am sure you would all enjoy every minute of it.

We have been enjoying excellent weather and business in general seems to be picking up on the West Coast. I sincerely hope, Ed, that things are going well with you and am looking forward to your visit out here. This is to thank you again, Ed, for

being so nice to me while I was in New York.

Kindest personal regards.

Sincerely,

Leo

New York, New York

Tuttle

Dear Mr. Murrow:

The enclosed editorial ad presents the best possible arguments for our stopping nuclear tests. Yet I have heard none of these facts on TV. Since many Americans depend on TV for much of their information on world and national affairs, it seems vital that CBS hold a public forum on nuclear testing. An impressive array of scientists and politicians could argue for and against continued testing.

Only in this way can public ignorance - hence apathy - to this crucial question be reduced. Only when people become aware of the medical and scientific facts will they appreciate the desperate urgency of the question.

Sincerely,

Wilma Holden

(Mrs) Wilma Holden

Enc.

NUCLEAR BOMBS CAN DESTROY ALL LIFE IN WAR

NUCLEAR TESTS ARE ENDANGERING OUR HEALTH RIGHT NOW

WE MUST POSTPONE OUR COMING TESTS

1. The Soviet Union states it is calling off further nuclear tests. The easiest way for us to convert this announcement into a moral disaster for the United States is to stand pat on this issue. The least we can do today—if we hope to restore America's moral standing in the world—is to postpone our tests. Presidoent Eisenhower's April 7 letter to Khrushchev regains some of the ground lost by our first response to the Soviet announcement. The President's recommendation for technical studies preliminary to a broad disarmament agreement deserves the widest possible support. But much more has to be done!

2. It is true that the Soviet Union waited until it completed its Spring tests which sharply increased poisonous radioactive strontium in the atmosphere. But it makes no sense for the United States to complain about radioactivity from the Russian tests and then plan to add to it with our own tests. Estimated nuclear box score to date: United States100-odd tests; Soviet Union—50-odd tests.

3. The U. S. Atomic Energy Commission now admits that radioactive fallout is a matter for genuine concern and that the United States is the hottest radioactive place in the world. Scientists warn that thousands of babies will be born malformed because of tests to date. Many thousands more people will prematurely die of diseases of blood and bone.

WE MUST CALL FOR A UNITED NATIONS INSPECTED BAN ON TESTS

1. We must challenge Moscow's bid by proposing a permanent end to tests under effective inspection, Khrushchev said on April 4: 'Russia is willing to accept supervision." Let's call his hand.

2. Dr. Libby of the Atomic Energy Commission concedes that detection of nuclear explosions is feasible, contrary to the much publicized doubts of Dr. Edward Teller. The AEC has said that last year's underground test in Nevada was detected only 250 miles away. Now it is revealed that the test was detected in Alaska, 2300 miles away. A hydrogen bomb is many thousands of times more powerful than the "tiny" bomb used in the underground test.

3. Tests deemed necessary for peaceful purposes can be conducted by an international agency. Nuclear weapons tests must be stopped.

WE MUST NOT SUPPLY BOMB MATERIALS TO OTHER COUNTRIES

Bills now before Congress would authorize transfer of bomb materials, parts and weapons design blueprints to other countries.

This would mean more nuclear powers and so extend the "suicide club": Korea is pressing for nuclear arms. NATO powers are seeking them. Turkey will certainly want them. Then Pakistan. Moscow will make Communist China a nuclear power. Fuses could be set all over the world.

We would increase the chance of accidental atomic war, launched by some minor military commander. Witness the anonymous French colonel who ordered the attack on a Tunisian village, using American-made planes.

AMERICAN SECURITY AND WORLD SECURITY ARE NOW ONE

America must give leadership for world disarmament and conditions that make for a just and workable peace. We must stop the contamination of the air, the milk children drink, the food we eat.

While there is yet time, let us come to life on this issue and take the moral initiative.

ACT NOW—FOR MAN'S SAKE

Write President Eisenhower, The White House, Washington, D. C., and Vice-President Nixon, The Capitol, Washington, D. C.

Write your U. S. Senator and Representative in Washington opposing the bills to transfer bomb materials to other countries and favoring an end to nuclear tests as a first step toward a broader disarmament. Send a copy to Senator John O. Pastore of the Joint Committee on Atomic Energy.

Write your newspaper editor, or news comentator.

Organize a group, or work with existing ones in your community.

Write the National Committee for permission to reprint this advertisement in your home paper. We'll tell you how to do it.

Send a contribution to this Committee to keep it going and expand its influence. Your moral support is heartening. Your financial support is *imperative*. Use the coupon below.

NATIONAL COMMITTEE FOR A SANE NUCLEAR POLICY, 202 East 44th Street, New York 17, N. Y. OXFORD 7-2265

Co-Chairmen: Norman Cousins, Clarence Pickett. *Treasurer:* Clarence H. Low. *Comptroller:* Lawrence S. Mayers, Jr. *Staff:* Trevor Thomas, Alfred Williams

Dear Mr. Murrow:

Appreciate very much receiving your letter of March 5. I will be available to talk with you almost any day, if I can be given a couple of days advance notice. My only firm out of town appointment is March 20.

Please telephone my secretary and she will arrange the appointment.

Sincerely yours,

Chet

Chet Holifield

Dear Congressman Holifield:

Thanks for sending me your speech in Ohio State University. You were dealing with a subject of enormous importance, and I want to come and talk with you about it, if you are willing, when I come down to Washington at the end of this month. I will telephone your secretary.

Sincerely yours,

The Honorable Chet Holifield
House of Representatives
Washington, D. C.

Dear Mr. Murrow:

I know that you are a very busy man but I am taking the liberty of sending you a copy of a speech that I am going to make at Ohio State University on March 3, 1958.

I believe that the Administration-sponsored amendments to the Atomic Energy Act of 1954, if passed, will usher in a new phase of international peril. I feel that this bill should be given wide publicity and should be seriously debated in the Congress and in public forums.

Sincerely yours,

Chet

Chet Holifield, M. C.

Suite 1034 New House Office Building

PR 1-58

FOR RELEASE AFTER 3:00 PM, Monday, March 3, 1958

Congressman Chet Holifield (D. Calif.), a member of the Joint Congressional Committee on Atomic Energy, said today that an Administration-sponsored amendment to the Atomic Energy Act now before the Congress would open the door to a "fourth, fifth, or sixth" atomic power in the world.

Warning that such an amendment would usher in a "new phase of international peril", Mr. Holifield urged that the bill be given the widest publicity and be seriously debated in the Congress and in public forums.

The "simple but stark" issue, Mr. Holifield said at a seminar in national security policy at Ohio State University, Columbus, Ohio, is whether the Congress should relinquish control over the distribution of atomic-hydrogen weapons by placing that power solely in the President. Mr. Holifield put the question this way:

> "Should the power of distribution of atomic weapons to other nations be placed in the hands of one man, even though he be a good man, the President of a great nation, a great democratic nation?
>
> Or, should the problem of distributing nuclear weapons be decided through Congressional consideration and debate under the treaty process?"

"A strong argument can be made that such an important matter should be considered under the more deliberative process of a treaty", Mr. Holifield declared. "Such an argument would be based", he said, "on the revolutionary character of nuclear weapons and the effect on international relations which would be caused by the United States creating the 'fourth atomic weapon nation'."

"Three nations now possess atomic-hydrogen weapons", he said, "the United States, the Union of Soviet Socialist Republics, and Great Britain. Unitl now we have hoped that a safe arrangement to prevent a nuclear war could be arranged between these three nations. We have thought an agreement would be more likely between three nations than four or five or more.

"Until now, we have failed to establish that safe agreement to prevent the outbreak of a nuclear war. This legislation allows the United States, through presidential decision, to open the door to creating a fourth atomic weapon nation, a fifth, a sixth and many more".

"The question of deciding who the 'fourth nation' should be", Mr. Holifield continued, "immediately faces us when we remove the present legislative restrictions. The first nation that comes to mind is France, and then possibly West Germany. France is making a desperate effort to attain atomic weapon capability and, under the scope of the legislation, she would undoubtedly request aid from us in developing her atomic weapon stockpile. This indeed would pose a serious problem. France has an inherent political instability due to her multi-party parliamentary situation. This unstable factor makes her actions unpredictable".

"When this important 'fourth nation' threshold is crossed, we can expect immediate reaction from the Soviet leaders in the Kremlin. We can be sure that Mr. Khrushchev will make the most of this event". Calling attention to the 200 conferences which have been held between the United States and the Soviet Union since 1946 without achieving a constructive formula to prevent atomic-hydrogen warfare, Mr. Holifield said that "vision and leadership were needed as never before in mankind's turbulent history". He said that "the greatest minds of our time.....drawn from every nation and every profession requiring mental and moral competence .....should meet in continuous session with but one objective, to save humanity from nuclear destruction".

Address of Congressman Chet Holifield
on March 3, 1958

SP 58-2

SHALL WE CREATE THE "FOURTH ATOMIC WEAPON NATION"?

ATOMIC WAR AND AMERICAN SOCIETY

THE MOST FUNDAMENTAL AND FAR-REACHING EVENT OF THE TWENTIETH CENTURY IS THE DISCOVERY AND DEVELOPMENT OF ATOMIC-HYDROGEN WEAPONS. THEIR EFFECT ON THE AMERICAN SOCIETY, IN FACT ALL SOCIETIES, HAS NOT BEEN EVOLUTIONARY -- IT HAS BEEN REVOLUTIONARY. WE ARE IN THE MIDST OF THAT REVOLUTION. IN ORDER TO UNDERSTAND ITS MEANING WE MUST CONSIDER THREE PHASES IN POINT OF TIME.

(a) The limited type of atomic war which occurred in the past.

(b) The carryover effects of atomic war and its development in the present.

(c) The catastrophic effect of atomic war on all societies, if and when it occurs in the future.

ATOMIC WAR EXISTED IN A VERY LIMITED WAY ON AUGUST 6, 1945. WHEN THE FIRST WARTIME MUSHROOM CLOUD FLOATED AWAY TOWARD THE SNOW-CAPPED MOUTAIN OF FUJIAMA, THE CITY OF HIROSHIMA WAS A DESOLATE EXPANSE OF BURNED, BLACKENED RUINS, AND 90,000 HUMAN BEINGS EXISTED NO MORE. BEFORE A STUNNED AND SHOCKED WORLD COULD COMPREHEND WHAT HAD HAPPENED, THE SECOND EVENT IN ATOMIC WAR OCCURRED THREE DAYS LATER. ON AUGUST 9, 1945, THE CITY OF NAGASAKI FELT THE BLINDING FLASH AND THE SEARING ATOMIC HEAT. AGAIN THE FEARSOME MUSHROOM CLOUD BOILED SKYWARD AND THEN FLOATED

SILENTLY AWAY. THE SMOKING, BURNING RUINS OF THE SECOND JAPANESE CITY LAY AS A MUTE WITNESS TO MAN'S GENIUS FOR DESTRUCTION. THE LIVES OF 65,000 MEN, WOMEN, AND CHILDREN WERE SACRIFICED TO THE GOD OF WAR.

THE COMBINED CASUALTIES OF THESE TWO CITIES DID NOT BEGIN TO COMPETE IN NUMBERS WITH THOSE THAT HAVE OCCURRED IN OTHER CITIES AND OTHER WARS. NO-- CITIES HAVE BEEN DESTROYED BEFORE AND RAZED TO THE GROUND. GREATER POPULATIONS HAVE BEEN PUT TO THE SWORD BEFORE. MEN, WOMEN AND CHILDREN DIED BECAUSE THEIR WARRIORS LOST THEIR PARTICULAR WAR.

BUT NEVER BEFORE HAS MAN RELEASED THE POWER OF DESTRUCTION SO INSTANTANEOUSLY AND WITH SUCH COMPLETE AND DECISIVE RESULTS.

TWELVE YEARS AND 206 DAYS HAVE PASSED SINCE AUGUST 9, 1945. AMERICAN ATOMIC WAR CAPABILITY WILL BECOME A TEEN-AGER ON AUGUST 9, 1958. RUSSIAN ATOMIC WAR CAPABILITY IS ONLY NINE YEARS OLD. GREAT BRITAIN, THE LATEST NATION, IS HARDLY OUT OF ITS NUCLEAR DIAPERS, A MERE CHILD OF FOUR. HOWEVER, LET US BEWARE OF ANY FEELING OF SATISFACTION OR COMPLACENCY AS WE CONTEMPLATE THEIR TENDER YEARS. LET US ACT MORE WISELY AND CONTEMPLATE THEIR INCALCULABLE STRENGTH, AND THE IMPACT OF THIS POTENTIAL WAR ON OUR SOCIETY AT THE PRESENT TIME.

THE CARRYOVER EFFECTS OF THE LIMITED USE OF TWO ATOMIC WEAPONS, IN AUGUST OF 1945, HAS BEEN REVOLUTIONARY ON OUR PRESENT SOCIETIES. FOR THE PURPOSE OF TIME PERIODS, I SHALL DEFINE THE PRESENT AS THE TIME BETWEEN AUGUST 9, 1945 AND TODAY.

THE REVOLUTION HAS OCCURED IN TWO IMPORTANT AREAS, MILITARY AND POLITICAL. THE DISCOVERY OF THIS NEW AND ALMOST UNLIMITED SOURCE OF ENERGY FOR WEAPON USE HAS DRASTICALLY CHANGED THE MILITARY CONCEPTS OF OFFENSE AND DEFENSE CONSIDERED FUNDAMENTAL FOR CENTURIES.

ENERGY RELEASED FROM SINGLE WEAPONS HAS BEEN INADEQUATE IN THE PAST TO DESTROY MILITARY TARGETS SUCH AS FORTIFICATIONS, TRANSPORTATION CENTERS, INDUSTRIAL CENTERS PRODUCING WAR ESSENTIALS, CONVOYS OF SHIPPING AND MASSED NUMBERS OF WARRIORS. IT HAS BEEN NECESSARY TO BRING TO BEAR UPON THOSE TARGETS THE POWER OF GREAT NUMBERS OF PUNY WEAPONS. THIS RESULTED IN CAUSING MILLIONS OF WARRIORS TO ADD THE POWER OF EACH PUNY WEAPON TO OTHER PUNY WEAPONS, IN ORDER TO BRING TO BEAR UPON EACH TARGET THE NECESSARY POWER TO DESTROY ITS MILITARY CAPABILITY. THIS GIGANTIC EFFORT ON ONE SIDE OF COURSE WAS DUPLICATED ON THE OTHER. THE DESTRUCTION OF A TARGET WAS FURTHER DELAYED BY THE ABILITY OF THE DEFENDER TO REPAIR THE DAMAGES TO THE TARGET, AND MAINTAIN FOR MONTHS AND EVEN YEARS ITS CAPACITY TO DEFEND. THE DESTRUCTIVE POWER OF THE <u>OFFENSE</u> WAS PARTIAL AND REQUIRED LONG TERM APPLICATION. THE RESISTING POWER OF THE <u>DEFENSE</u> COULD BE PARTIAL AND EXERTED OVER LONG PERIODS OF TIME. THE GREAT PRODUCTIVE POWERS OF INDUSTRY COULD CONTINUE TO PRODUCE, IN FACT UNDER WARTIME STIMULUS THEY COULD MULTIPLY AND EXPAND FOR SEVERAL YEARS. FINALLY, THROUGH ACCUMULATIVE DESTRUCTION AND ATTRITION OF VITAL SOURCES OF SUPPLY AND PRODUCTION THE WAR WOULD GRIND TO A CLOSE, AND ONE SIDE OR THE OTHER WOULD CONSIDER ITSELF THE VICTOR.

THE SITUATION I HAVE DESCRIBED DOES NOT EXIST TODAY. THE RELEASE OF TWENTY MILLION TONS OF T.N.T. ENERGY EQUIVALENT FROM ONE WEAPON WILL DESTROY IN ONE BLINDING, SEARING MOMENT ANY MILITARY TARGET IN THE WORLD. MANY SINGLE ATOMIC-HYDROGEN WEAPONS OF THIS POWER EXIST TODAY. THEY CAN BE DELIVERED AGAINST ANY TARGET IN THE WORLD BY EXISTING LONG RANGE BOMBERS. TOMORROW THEY WILL BE DELIVERED BY ICBM MISSILES. THERE IS AT THIS TIME NO DEPENDABLE GUARANTEE OF DEFENSE, THEREFORE --

OFFENSIVE CAPABILITY AGAINST ONE TARGET WITH ONE WEAPON IS ADEQUATE.

CONTRARIWISE DEFENSIVE CAPABILITY AGAINST DELIVERY OF ONE WEAPON ON ANY TARGET IS INADEQUATE.

BECAUSE OF THESE UNDENIABLE FACTS - - WE NO LONGER NEED TO WAGE WAR WITH PARTIAL AND ACCUMULATIVE POWERS OF OFFENSE. WE NO LONGER CAN RELY ON PARTIAL DEFENSE AND LONG TIME REPAIR OR RECUPERATIVE RESOURCES.

CERTAIN NEW ATOMIC AGE CONCEPTS NOW EMERGE:

- - - MASSED ARMIES OF MAN-POWER ARE VULNERABLE TO ONE WEAPON,

- - - MASSED AMPHIBIOUS LANDINGS ARE VULNERABLE TO ONE WEAPON,

- - - MASSED CONVOYS OF SHIPS ARE VULNERABLE TO ONE WEAPON,

- - - MASSED SUPPLY CENTERS ARE VULNERABLE TO ONE WEAPON,

- - - MASSED POPULATIONS IN ANY CITY ARE VULNERABLE TO ONE WEAPON, AND

- - - MASSED INDUSTRIAL AND TRANSPORTATION CENTERS ARE VULNERABLE TO ONE WEAPON.

WE FURTHER CONCLUDE THAT THEIR VULNERABILITY IS TOTAL. THE TARGETS ARE NOT SUBJECT TO REPAIR AND RESTORATION FOR CONTINUED WAR EFFORT.

NOW LET US TURN FROM THE CHANGED CONCEPTS OF MILITARY OFFENSE AND DEFENSE TO THEIR RELATED ECONOMIC EFFECTS ON OUR SOCIETY.

WE ARE IN A REVOLUTIONARY PERIOD OF CHANGING CONCEPTS. WE CARRY THREE BURDENS WHICH ARE RESULTING IN AN ECONOMIC COST OF MORE THAN FORTY BILLION DOLLARS PER YEAR.

THE FIRST BURDEN IS THE BURDEN OF SUPPORT FOR THE MILITARY TRADITIONS OF THE PAST:

THE MAINTAINENCE OF MASSES OF MILITARY MANPOWER;

THE CONTINUED PRODUCTION OF OBSOLETE CONVENTIONAL MILITARY EQUIPMENT SUCH AS LARGE SURFACE SHIPS, EXPENSIVE MASSED SUPPLY DEPOTS AND OBSOLETE FORTIFICATIONS - ARMORED TANKS, ARTILLERY, ETC.;

IN THE PRESENCE OF THESE UNDENIABLE FACTS IT IS IRONICAL AND TRAGIC THAT WE CONTINUE OUR WARTIME RELIANCE ON THE CONVENTIONAL TYPE OF TRANSPORTATION, RAILROAD TERMINALS, HARBORS, SURFACE SHIPPING, ETC.;

WE RELY UPON THE MYTH OF CONTINUED WARTIME PRODUCTION AND SUPPLY;

WE RELY UPON MILITARY ALLIES WHO ARE EQUIPPED WITH THE OBSOLETE, CONVENTIONAL, NON-NUCLEAR WEAPONS OF THE PAST.

THE SECOND BURDEN WE CARRY IS THE UNBELIEVABLE COST OF TODAY'S NUCLEAR WEAPONS AND THEIR NECESSARY DELIVERY SYSTEMS. THE BOMBER OF WORLD WAR II COST A FEW HUNDRED THOUSAND DOLLARS. TODAY'S B 52 OR B 58 COSTS MORE THAN EIGHT MILLION DOLLARS. THE BEST AIRCRAFT CARRIER OF WORLD WAR II COST ONE HUNDRED MILLION DOLLARS BUT THE NEW NUCLEAR AIRCRAFT CARRIER WITH ITS ACCOMPANYING PLANES WILL COST MORE THAN A BILLION DOLLARS. IT WILL COST MORE THAN FIVE BILLION DOLLARS TO DEVELOP THE FIRST SUCCESSFUL ICBM MISSILE, AND EACH ONE OF ITS SUCCESSORS WILL PROBABLY COST MORE THAN A MILLION DOLLARS.

THESE ARE REASONS OR EXCUSES, IF YOU WISH, FOR OUR GREAT ECONOMIC BURDEN, AND ARE THE GREATEST FACTORS IN OUR TAX BURDEN (AN ESTIMATED 65%). IT IS THE GREAT CONSUMING CANCER ON OUR PRODUCTION CAPABILITY FOR CONSUMER GOODS, HOUSES, SCHOOLS, HOSPITALS, ETC., WHICH AN ADVANCING, GROWING CIVILIZED SOCIETY NEEDS FOR ITS INCREASED ENJOYMENT AND WELFARE. OUR SOCIETY IS NOT ALONE IN CARRYING THE ECONOMIC BURDEN OF ATOMIC WAR PREPARATION. THE U.S.S.R. AND GREAT BRITAIN HAVE THEIR ATOMIC WAR BURDENS. THE NON-NUCLEAR WEAPON NATIONS CONTINUE THEIR BURDEN OF CONVENTIONAL MILITARY OBSOLESCENSE.

THE THIRD BURDEN WOULD BE THE CATASTROPHIC EFFECT OF ATOMIC WARFARE. AT THIS TIME THE POLITICAL AND LEGISLATIVE ASPECTS OF THIS PROGRAM ARE BASED ON THE POLICIES SET BY OUR INTERNATIONAL STATESMEN.

CARL VON CLAUSEWITZ WROTE IN HIS BOOK "ON WAR" THAT "WAR IS A MERE CONTINUATION OF POLICY BY OTHER MEANS."

THE POLICIES WE ADOPT TODAY WILL DETERMINE WHETHER WAR WILL BE NEEDED FOR THEIR CONTINUANCE.

THE MILITARY CONCEPTS OF THE PAST ARE SUBJECT TO QUESTION AND SO ARE THE CONCEPTS ON WHICH OUR INTERNATIONAL POLICIES ARE BASED. IN THE BACKGROUND OF EACH DIPLOMATIC AGREEMENT BETWEEN RIVAL NATIONS IN THE PAST WAS THE HIDDEN BUT REAL EVALUATION OF MILITARY STRENGTH AND THE FEAR THAT IT WOULD BE USED AS A LAST RESORT. THE FINAL AGREEMENT WAS USUALLY BASED ON AN OVERBALANCE OF CONCESSIONS BY THE WEAKER AND MORE FEARFUL NATION.

TODAY THE FEAR OF ATOMIC-HYDROGEN WAR IS A MUTUAL FEAR. THERE IS A BALANCE OF TERROR. IN THIS SITUATION DIPLOMACY LOSES ITS COMPULSIVE FACTOR. WITHOUT THIS COMPULSION, WE FIND IT DIFFICULT TO ACHIEVE AN INTERNATIONAL POLICY OR AGREEMENT FOR PEACE. EACH SIDE SEEKS ADVANTAGE WITHOUT POSSESSING THE OVERBALANCE OF POWER WHICH IS NECESSARY TO COERCE THE OTHER. OUR DIPLOMACY BECOMES A MATTER OF MANEUVER, DEBATE AND NAME CALLING, MOSTLY FOR ITS EFFECT UPON OUR UNCOMMITTED NEIGHBORS. BUT LET US TURN FROM THE CONSIDERATION OF AN ENEMIC DIPLOMACY WHICH HAS FAILED TO DEVELOP INTERNATIONAL POLICIES OF PEACE TO THE MORE SOBER CONTEMPLATION OF THE EFFECTS OF A NUCLEAR WAR ON THE SOCIETY OF MAN.

IT IS SAD BUT TRUE THAT TODAY IT IS IMPOSSIBLE FOR MAN TO CALCULATE THE POWER OF DESTRUCTION RESIDING IN THE STOCKPILES OF ATOMIC AND HYDROGEN BOMBS POSSESSED BY THE UNITED STATES, U.S.S.R. AND GREAT BRITAIN.

IF WE ARE TO UNDERSTAND THE EFFECTS OF AN UNLIMITED NUCLEAR WAR IN THE FUTURE UPON ALL SOCIETIES INCLUDING OUR OWN, WE MUST TRY TO COMPREHEND THE FUNDAMENTAL FORCES WITH WHICH WE MUST RECKON.

WE DID NOT KNOW THE DESTRUCTIVE POWER OF THE TWO ATOMIC BOMBS THAT WE EXPLODED IN AUGUST 1945, BEFORE WE EXPLODED THEM. SCIENTISTS AND MATHEMATICIANS CAN ESTIMATE AND CALCULATE, BUT DESTRUCTIVE POWER CANNOT BE ACCURATELY PREDICTED FOR A FUTURE NUCLEAR WAR UNTIL THE LAST BOMB HAS BEEN DETONATED AND THE LAST DEADLY RESIDUE OF STRONTIUM 90 HAS USED UP ITS QUOTA OF CENTURIES FOR DECAY.

I CAN GIVE YOU FIGURES TODAY BASED ON ACTUAL TESTS. THEY SOON BECOME MEANINGLESS BECAUSE THEY TRANSCEND HUMAN COMPREHENSION.

HERE IS ONE ILLUSTRATION.

WORLD WAR II LASTED, AT LEAST FOR OUR "ALLIES," SIX YEARS. THE FREE NATIONS DROPPED FROM 40,000 BOMBERS A TOTAL EXPLOSIVE FORCE EQUIVALENT TO 2,600,000 TONS OF T.N.T. AND INCURRED 300,000 AIR FORCE CASUALTIES.

THE ONE GREAT ATOMIC-HYDROGEN TEST BOMB OF 1954 RELEASED MORE THAN FOUR TIMES THE POWER OF ALL THE WORLD WAR II BOMBS.

OUR MINDS CANNOT TRANSLATE THESE FIGURES INTO RUINED CITIES AND MILLIONS OF DEAD PEOPLE. MULTIPLY ONE WEAPON BY HUNDREDS OR THOUSANDS AND THE HUMAN MIND REELS AT THE MATHEMATICAL STRING OF ZEROES. ONLY UNIVAC CAN SOLVE THE PROBLEM AND THEN THE ANSWER BECOMES GIBBERISH. WHEN WE CONSIDER FURTHER THE DEADLY EFFECT OF RADIATION FROM GAMMA RAYS AND THE CENTURIES-LASTING POISON TO AIR, WATER AND LAND FROM STRONTIUM 90, THEN INDEED MUST REASON LEAVE ITS THRONE IN THE MIND OF MAN.

SO WE TURN FROM MATHEMATICS OF THE MIND, OR OF UNIVAC, TO A SIMPLE STATEMENT OF FACTS, A STATEMENT NO REPUTABLE SCIENTIST WILL DENY OR ATTEMPT TO REFUTE.

CIVILIZATION CANNOT SURVIVE A FULL-SCALE NUCLEAR WAR IN WHICH WEAPONS NOW IN STOCKPILE ARE USED. THE CITIES AND WORKS OF MAN WILL BE DESTROYED AS WERE THE CITIES OF HIROSHIMA AND NAGASAKI. HUNDREDS OF MILLIONS OF HUMAN BEINGS WILL DIE SUDDENLY AND SUBSEQUENTLY. ANIMALS AND OTHER LIVING THINGS WILL DIE. THE FOODS STOCKED OR GROWING WILL BE CONTAMINATED AND THE SOILS WILL BE POISONED WITH ENDURING RADIOACTIVE DEBRIS.

THAT IS ALL. IT IS TRUE. I CANNOT SAY MORE - NOR LESS. THIS WILL BE THE IMPACT OF ATOMIC WARFARE ON AMERICAN SOCIETY. WE ARE THE PEOPLE WHO WILL DIE, IF WE ALLOW IT TO OCCUR. NOT ONLY THE AMERICAN SOCIETY, BUT EVERY SOCIETY ON THE FACE OF THE EARTH FACES THIS FATE OF NUCLEAR DESTRUCTION. ONCE UNLEASHED, A FULL SCALE NUCLEAR WAR CANNOT BE RESTRICTED TO A NATION, AN AREA, OR A SOCIETY. TODAY THE NUCLEAR WEAPON POWERS ARE THREE. THESE THREE POSSESS THE ATOMIC POWER I HAVE DESCRIBED.

THEY HAVE NOT UNLEASHED THIS POWER, BECAUSE EACH OF THE THREE IS AWARE OF THE DIRE FATE WHICH WILL BE VISITED ON ALL. WE LIVE AS MR. CHURCHILL SO APTLY SAID IN A "STATE OF MUTUAL TERROR". WE ARE THREE SCORPIONS IMPRISONED IN A BOTTLE, EACH WAITING THE STING OF ONE OF THE OTHERS, ALL KNOWING THAT RETALIATORY STINGS WILL BRING DEATH TO ALL.

SINCE 1946 WE HAVE HAD ALMOST TWO HUNDRED CONFERENCES WITH THE SOVIETS, TRYING TO CONSTRUCT A FORMULA WHICH WOULD GUARANTEE TO THE WORLD THAT ATOMIC WEAPONS WILL NEVER BE USED IN WAR. WE HAVE FAILED TO DATE AND THE PERIL GROWS WITH EACH PASSING DAY. THE STOCKPILES OF THE THREE NATIONS KEEP ON INCREASING IN NUMBER AND "EFFICIENCY". OTHER NATIONS FEEL THEIR MILITARY INFERIORITY. THEY WANT ATOMIC-HYDROGEN WEAPONS TOO.

ON JANUARY 27, 1958, THE CHAIRMAN OF THE ATOMIC ENERGY COMMISSION DELIVERED TO CONGRESS A LEGISLATIVE DRAFT OF A BILL TO AMEND THE ATOMIC ENERGY ACT OF 1954. THE LETTER OF TRANSMITTAL STATED THE DRAFT HAD BEEN APPROVED BY THE BUREAU OF THE BUDGET, THE LEGISLATIVE CLEARING HOUSE FOR THE PRESIDENT AND HIS ADMINISTRATION. THE DRAFT WAS INTRODUCED BY TWO MEMBERS OF THE JOINT COMMITTEE ON ATOMIC ENERGY ON A "BY REQUEST" BASIS. OUR COMMITTEE HAS BEEN HOLDING HEARINGS ON THE TWO BILLS, S. 3165 AND H. R. 10348, IN EXECUTIVE SESSION. WITNESSES REPRESENTING THE DEPARTMENT OF DEFENSE, THE STATE DEPARTMENT, AND OTHER EXECUTIVE AGENCIES HAVE TESTIFIED IN FAVOR OF THE LEGISLATION.

AMONG OTHER THINGS THE LEGISLATION PROVIDES FOR,

1. The transfer of atomic weapon information to other nations. (Weapon design blueprints)

2. The transfer of "special nuclear material" to other nations for military purposes, (the basic bomb material, plutonium and U 235).

3. The transfer of non-nuclear weapon components to other nations (the electronic-mechanical hardware of an atomic bomb).

4. The transfer of weapon delivery systems (this could mean atomic cannons, bombing planes, missiles and submarines).

THE LEGISLATIVE DRAFT PLACES RESPONSIBILITY FOR INTERNATIONAL TRANSFER OF ATOMIC WEAPON INFORMATION, PARTS AND BOMB MATERIALS IN THE PRESIDENT OF THE UNITED STATES.

IF THIS LEGISLATION BECOMES LAW WE ENTER A NEW PHASE OF INTERNATIONAL PERIL. WE CROSS THE THRESHOLD ON A JOURNEY FROM WHICH THERE MAY BE NO RETURN. THE PROPONENTS OF THIS STEP CLAIM IT IS NECESSARY TO SAVE THE CRUMBLING NATO. IT IS A MOST IMPORTANT STEP. IT SHOULD RECEIVE WIDE PUBLICITY AND SERIOUS DEBATE IN THE CONGRESS AND IN EVERY FORUM OF PUBLIC OPINION. THE AMERICAN PEOPLE ARE ENTITLED TO KNOW THAT THE CONGRESS WOULD BE RELINQUISHING THEIR RESTRICTIVE POWER OVER THE DISTRIBUTION OF OUR ATOMIC-HYDROGEN WEAPONS. IN THE LAST ANALYSIS, WE WOULD BE PLACING THAT POWER IN THE HANDS OF ONE MAN, THE PRESIDENT OF THE UNITED STATES. THE ISSUE REALLY IS SIMPLE, BUT STARK IN ITS SIMPLICITY.

SHOULD THE POWER OF DISTRIBUTION OF ATOMIC WEAPONS TO OTHER NATIONS BE PLACED IN THE HANDS OF ONE MAN - EVEN THOUGH HE BE A GOOD MAN - THE PRESIDENT OF A GREAT NATION - A GREAT DEMOCRATIC NATION?

OR, SHOULD THE PROBLEM OF DISTRIBUTING NUCLEAR WEAPONS BE DECIDED THRU CONGRESSIONAL CONSIDERATION AND DEBATE UNDER THE TREATY PROCESS?

A STRONG ARGUMENT CAN BE MADE THAT SUCH AN IMPORTANT MATTER SHOULD BE CONSIDERED UNDER THE MORE DELIBERATIVE PROCESS OF A TREATY. SUCH AN ARGUMENT WOULD BE BASED ON (a) THE REVOLUTIONARY CHARACTER OF NUCLEAR WEAPONS, AND (b) THE EFFECT ON INTERNATIONAL RELATIONS WHICH WOULD BE CAUSED BY THE UNITED STATES CREATING THE " FOURTH ATOMIC WEAPON NATION".

LET US EXPLORE THE MEANING, OF IF YOU PREFER, THE "IMPACT"OF THIS PROPOSED LEGISLATION.

THREE NATIONS NOW POSSESS ATOMIC-HYDROGEN WEAPONS, THE UNITED STATES, THE UNION OF SOVIET SOCIALIST REPUBLICS, AND GREAT BRITAIN. UNTIL NOW WE HAVE HOPED THAT A SAFE AGREEMENT TO PREVENT A NUCLEAR WAR COULD BE ARRANGED BETWEEN THESE THREE NATIONS. WE HAVE THOUGHT AN AGREEMENT WOULD BE MORE LIKELY BETWEEN THREE NATIONS THAN FOUR OR FIVE OR MORE.

UNTIL NOW, WE HAVE FAILED TO ESTABLISH THAT SAFE AGREEMENT TO PREVENT THE OUTBREAK OF A NUCLEAR WAR. THIS LEGISLATION ALLOWS THE UNITED STATES (THROUGH PRESIDENTIAL DECISION) TO OPEN THE DOOR TO CREATING A "FOURTH ATOMIC WEAPON NATION, A FIFTH, A SIXTH, AND MANY MORE.

DOES THIS MEAN WE HAVE GIVEN UP OUR HOPES FOR A PEACEFUL AGREEMENT AMONG THE PRESENT THREE NATIONS? DOES IT MEAN WE HAVE DESERTED AND ABANDONED THE LOGIC OF LIMITING THE NUMBER OF NATIONS POSSESSING ATOMIC-HYDROGEN WEAPONS, WHILE WE NEGOTIATE FOR A SAFE AGREEMENT AGAINST NUCLEAR WAR?

I AM DEEPLY TROUBLED WITH THIS ADMINISTRATION PROPOSAL. I FEAR IT HAS NOT BEEN PROPERLY ANALYZED BY ITS PROPONENTS.

AS A SUPPORTER OF THE NATO CHARTER FOR COLLECTIVE SECURITY, I AM AWARE OF THE PRESSURE NOW BEING EXERTED TO OBTAIN NUCLEAR WEAPONS FROM OUR ALLIES WHO DO NOT HAVE SUCH WEAPONS. I BELIEVE THE UPGRADING OF COLLECTIVE MILITARY STRENGTH IS NECESSARY IF NATO IS TO BE PRESERVED. BUT, THERE ARE MANY WAYS TO STRENGTHEN NATO WITHOUT A RESORT, AT THIS TIME, TO AUTHORIZING THE CREATON OF THE "FOURTH", "FIFTH", OR "SIXTH" ATOMIC WEAPON NATION.

THE SUBCOMMITTEE ON MILITARY OPERATIONS, OF WHICH I AM CHAIRMAN, STUDIED THE NATO DEFICIENCIES DURING OUR SEPTEMBER 1957 VISIT TO EUROPE. ON FEBRUARY 19, 1958, OUR PARENT COMMITTEE ON GOVERNMENT

OPERATIONS ADOPTED A NUMBER OF THE RECOMMENDATIONS WE MADE. VERY FRANKLY, WE DID NOT RECOMMEND THE CREATION OF THE "FOURTH ATOMIC-WEAPONS NATION".

THE TASKS OF NATO ARE MANY. THOSE TASKS CAN BE DIVIDED ACCORDING TO AN OVERALL COORDINATED STRATEGY. THE BRITISH AND AMERICAN ATOMIC WEAPON CAPABILITY CAN BE FITTED INTO THE OVERALL CONCEPT OF NATO STRATEGY WITHOUT OPENING A PANDORA'S BOX OF UNKNOWN AND UNPREDICTABLE WOES.

I BELIEVE IN THE WIDE EXCHANGE OF SCIENTIFIC INFORMATION AND REALIZE THE SECRETS OF SCIENCE CANNOT BE HIDDEN FROM THE PEOPLES OF OTHER NATIONS. BUT WE DO NOT DISTRIBUTE HAND GRENADES TO OUR CHILDREN AND HOPE THEY WILL NOT BE TEMPTED TO EXPERIMENT.

THERE IS A FEARFUL RESPONSIBILITY RESTING UPON EACH OF THE NUCLEAR NATIONS. THAT RESPONSIBILITY IS TOO GRAVE, IN TERMS OF HUMANITY'S DESTINY, FOR THEM TO GAMBLE BY INTRODUCING MORE PLAYERS INTO THE NUCLEAR CARD GAME.

WE HAVE A TREMENDOUS MORAL RESPONSIBILITY TO DISCHARGE TO A FEARFUL AND UNCOMMITTED WORLD. IF WE ONCE LOSE THE PRESTIGE OF A MORAL NATION, WE WILL NOT - - WE CANNOT - - EXERT LEADERSHIP FOR PEACE.

THE QUESTION OF DECIDING WHO THE "FOURTH NATION" SHOULD BE IMMEDIATELY FACES US WHEN WE REMOVE THE PRESENT LEGISLATIVE RESTRICTIONS. THE FIRST NATION THAT COMES TO MIND IS FRANCE, AND THEN POSSIBLY, WEST GERMANY. FRANCE IS MAKING A DESPERATE EFFORT TO ATTAIN ATOMIC WEAPON CAPABILITY AND, UNDER THE SCOPE OF THE LEGISLATION, SHE WOULD UNDOUBTEDLY REQUEST AID FROM US IN DEVELOPING HER ATOMIC WEAPON STOCKPILE. THIS INDEED WOULD POSE A SERIOUS PROBLEM. FRANCE, UNFORTUNATELY, IS UNSTABLE POLITICALLY AND BESET WITH MANY INTERNAL PROBLEMS.

FRANCE HAS AN INHERENT POLITICAL INSTABILITY DUE TO HER MULTI-PARTY PARLIAMENTARY SITUATION. THIS UNSTABLE FACTOR MAKES HER ACTIONS UNPREDICTABLE.

WE REMEMBER THE EGYPTIAN EPISODE IN WHICH ANOTHER, USUALLY STABLE ALLY, GREAT BRITAIN WAS INVOLVED. THE EFFECTS OF THAT ADVENTURE IN INTERNATIONAL IRRESPONSIBILITY REMAINS TO PLAGUE US TO THIS DAY.

BUT NEW EVENTS ERASE THE SHARP MEMORIES OF OLD EVENTS AND THE VOLATILE LA BELLE FRANCE HAS AGAIN PROVED HER UNPREDICTABILITY, IN TUNISIA. SHE USED AMERICAN PLANES, FURNISHED FOR NATO PURPOSES, TO BOMB ANOTHER UNITED NATIONS' ALLY.

NOTWITHSTANDING THESE IRRESPONSIBLE INTERNATIONAL ESCAPADES, FRANCE, BECAUSE OF HER ATOMIC ENERGY TECHNOLOGY, IS AN OUTSTANDING CANDIDATE FOR "FOURTH NATION". IF THE LEGISLATION NOW PENDING BECOMES LAW SHE WILL BE IN THE FOREFRONT OF OUR ALLIES DEMANDING ATOMIC WEAPONS.

WE HAVE OTHER FRIENDS AMONG THE FOREIGN NATIONS, BOTH INSIDE AND OUTSIDE NATO. WHEN WE REMOVE THE PRESENT LEGAL RESTRICTIONS AGAINST DISTRIBUTION OF ATOMIC WEAPONS AND ATOMIC WEAPONS DESIGN INFORMATION, AND CREATE THE "FOURTH NATION", WE KNOW THERE WILL BE CONSTANT PRESSURE TO CREATE THE "FIFTH", THE "SIXTH", THE "SEVENTH NATION", AND SO ON. NATO, SEATO AND OTHER NATIONS WOULD BE ELIGIBLE.

WHEN THIS FIRST IMPORTANT "FOURTH NATION" THRESHOLD IS CROSSED, WE CAN EXPECT IMMEDIATE REACTION FROM THE SOVIET LEADERS IN THE KREMLIN. WE CAN BE SURE THAT MR. KHRUSHCHEV WILL MAKE THE MOST OF THIS EVENT.

HE CAUSED US A LOT OF TROUBLE OVER ATOMIC BOMB TESTING. HE SOLD HIS "PEACE" ADVOCACY TO A GREAT MANY GULLIBLE PEOPLE THROUGHOUT THE WORLD. HE USED THE TWO SPUTNIKS TO ESTABLISH THE MYTH OF THE OVERALL SCIENTIFIC SUPREMACY OF THE SOVIETS, TO A GREAT MANY NATIONS AND PEOPLE.

WHAT WOULD HE DO WITH A PROPAGANDA MOTIF SO FRAUGHT WITH CONCERN AS THE DISTRIBUTION OF ATOMIC WEAPONS BY THE UNITED STATES TO "FOURTH", "FIFTH" AND OTHER NATIONS?

THE SIMPLE BUT EFFECTIVE SOVIET PROPAGANDA LINES ARE PREDICTABLE. IN FANCY, I CAN HEAR MR. KHRUSHCHEV NOW:

> "The great Soviet Union stands for Peace. We have made great efforts over the years to outlaw atomic weapons for the benefit of humanity. We have demanded that the testing of atomic bombs be stopped so that unborn generations will not be damaged by the accumulation of deadly radiation in the earth's environment. We have zealously guarded the custody of our own defensive atomic weapons. Today, the United States Congress and their President enacted a law permitting the distribution of atomic hydrogen weapons to all their allies. The imperialistic war mongers, the capitalist nations, now threaten the Socialist Republics with atomic encirclement. One careless and irresponsible nation, one madman, can now launch the third great war, a nuclear war, which will destroy civilization. I charge the United States with the blame for such a war when it occurs. The U.S.S.R. will not sit idly by. We will take such steps as we deem necessary to preserve the life of the great Socialist Republic and its Allies."

WHAT WOULD THE IMPACT OF SUCH A SPEECH BE ON OUR ALLIES WHO ARE NOT SCHEDULED FOR EARLY ENTRANCE INTO OUR EXCLUSIVE ATOMIC WEAPONS CLUB?

WHAT WOULD BE THE IMPACT OF SUCH A SPEECH ON INDIA, JAPAN, AND THE OTHER UNCOMMITTED NATIONS OF THE WORLD?

WOULD IT ENHANCE THE INTERNATIONAL PRESTIGE OF THE UNITED STATES, OR

WOULD IT PLACE US ON THE DEFENSIVE IN WORLD OPINION?

WOULD IT INCREASE OR DECREASE THE LIKELIHOOD OF NUCLEAR WAR?

THESE ARE THE QUESTIONS I BRING YOU. I DO NOT COME BEFORE YOU WITH A NEAT PACKAGE CONTAINING THE FORMULA FOR SOLVING THE WORLD'S GREATEST PROBLEM.

YOU HAVE ASKED ME WHAT I BELIEVE WOULD BE THE IMPACT OF ATOMIC WARFARE ON THE AMERICAN SOCIETY AND I HAVE POINTED OUT TO YOU SOME OF THE COMPLEXITIES IN THE SUBJECT. BEFORE A PROBLEM CAN BE SOLVED, IT MUST BE DEFINED - - ITS TERMS MUST BE EXPLORED. IF IT IS A DIFFICULT COMPLEX PROBLEM, IT MAY TAKE THE EFFORTS OF MANY MINDS TO FIND THE SOLUTION.

I KNOW OF NO PROBLEM MORE IMPORTANT THAN THE PROBLEM OF MANKIND'S SURVIVAL IN AN AGE WHICH HAS PRODUCED WEAPONS OF A NEW AND REVOLUTIONARY POWER, THE POWER TO DESTROY CIVILIZATION.

OUR REAL PROBLEM, OF COURSE, MUST BE SOLVED IN THE RECESSES OF THE HUMAN INTELLECT AND IN THE CONTROL OF HUMAN BEHAVIOR. THE MIND WHICH HAS DEVELOPED THE ATOMIC-HYDROGEN BOMB CAN, IF IT WILLS, CONTROL ITS FORCE FOR MANKIND'S BENEFIT INSTEAD OF MAN'S DESTRUCTION.

THE PROBLEM WILL NOT BE SOLVED BY INDIFFERENCE, INEPTITUDE OR INCOMPETENCE. A CONCERT OF THE GREATEST SCIENTIFIC MINDS DEVELOPED

THIS NEW SOURCE OF ENERGY. IT WILL TAKE A GREATER CONCERT OF MINDS TO CONTROL IT FOR MAN'S BENEFIT. I SPEAK OF A CONCERT OF THE GREATEST MINDS OF OUR TIME. THEY SHOULD BE DRAWN FROM EVERY NATION AND EVERY PROFESSION REQUIRING MENTAL AND MORAL COMPETENCE. THIS GREAT CONCERT OF COMPETENT AND REPRESENTATIVE MINDS SHOULD MEET IN CONTINUOUS SESSION WITH BUT ONE OBJECTIVE - TO SAVE HUMANITY FROM NUCLEAR DESTRUCTION. NO PHYSICAL FACILITY NOR FINANCIAL RESTRICTION SHOULD BE PERMITTED TO INTERFERE WITH THE ATTAINMENT OF THEIR OBJECTIVE.

TODAY, AS NEVER BEFORE IN MANKIND'S TURBULENT HISTORY, WE NEED VISION AND LEADERSHIP. SOMEWHERE IN THIS TROUBLED WORLD THERE MUST ARISE A FOCAL POINT FOR MANKIND'S GREATEST EFFORT. A CLARION CALL FOR GREATNESS AND DEDICATION MUST BE SOUNDED THROUGH OUT THE MOST DISTANT PARTS OF THE EARTH. A BANNER MUST BE RAISED AROUND WHICH MEN OF GOOD WILL CAN RALLY REGARDLESS OF THEIR RACE, COLOR, CREED OR ECONOMIC CONDITION.

I BELIEVE THAT LEADERSHIP WILL ARISE - I BELIEVE THAT CLARION CALL WILL GO FORTH - I BELIEVE THAT BANNER WILL BE RAISED BEFORE THE SANDS IN HUMANITY'S HOUR GLASS RUNS OUT, BECAUSE I BELIEVE THAT MAN WAS NOT CREATED TO TROD THE THORNY PATH OF DEVELOPMENT THROUGHOUT THE CENTURIES, FOR A DESTINY OF NUCLEAR OBLIVION. I BELIEVE THAT LEADERSHIP MUST AND WILL ARISE BECAUSE I BELIEVE THAT THERE IS A SUPREME BEING AND THAT MAN HAS NOT BEEN SUBJECTED TO THE STRUGGLE OF LIFE FOR THE UNTHINKABLE FATE OF NUCLEAR SUICIDE.

Holifield, CHET

April 11, 1958

Dear Miss Morrison:

Many thanks for your cordial letter of April 1 and for sending me a copy of Mr. Holifield's testimony presented to the Pastore Subcommittee of the Joint Committee on Atomic Energy.

I was most interested to see it and greatly appreciate your thoughtfulness in sending it to me.

Sincerely yours,

Miss Dorothy D. Morrison

April 1, 1958

Dear Mr. Murrow:

Representative Holifield will be in Los Angeles, California during the coming Easter Recess - April 3 through April 13. He will be back in Washington on April 14, according to his present plans.

I know you must receive at least as much reading material as a member of the House or Senate, and your time, too, must limit the amount you can read each day. Nevertheless, I do hope you will be able to study the enclosed copy of Mr. Holifield's testimony presented to the Pastore Subcommittee of the Joint Committee on Atomic Energy relative to H. R. 11426 and S. 3474, as well as the Congressman's Analysis of that legislation.

Mr. Holifield is so deeply concerned over these bills he took the unusual step of appearing before the Pastore Subcommittee as a witness against them.

With deep appreciation for the fine work you are doing in radio and television, I am

Sincerely yours,

Dorothy Morrison

ANALYSIS OF PENDING LEGISLATION TO AMEND THE ATOMIC ENERGY ACT OF 1954

H.R. 11426 (Durham) and S. 3474 (Pastore)

SECTION 91

Deletes from the present Atomic Energy Act of 1954 provisions against transferring to foreign nations

(a) radioactive by-product materials for military use;

(b) special nuclear materials (bomb material, plutonium, and U 235) for military uses;

(c) actual transfer of manufactured non-nuclear component parts of weapons (electronic hardware, etc.)

(d) the transfer of non-nuclear component parts of the weapons would make possible duplication by reproduction, and would reveal the external characteristics of the missing nuclear parts. With such information any nation have industrial-engineering ability could acquire or produce on its own, the limited amount of plutonium or U 235 to make the missing nuclear part which would be needed to complete the atomic weapon;

(e) utilization facilities for military applications (any equipment or device, other than weapons, which could use atomic material for military uses) examples: submarines, airplanes or electric package power plants;

(f) atomic materials (uranium ore, radioactive by-products, plutonium, U 235, etc.) for

(1) research on atomic weapons

(2) research on utilization facilities for military application (see above)

(3) development of utilization facilities for military application

(4) development of atomic weapons

(5) use in atomic weapons

(6) use in utilization facilities for military application,

(7) production of atomic weapons

(8) production of utilization facilities for military purposes

(9) to effect the above the nation does not need to possess substantial atomic weapon capability.

The President is prohibited by the 1954 Atomic Energy Act from doing any of the actions listed above. The Congress, however, could authorize the President to do any of these acts, providing it was done by one of two methods as provided in Section 121 of the present Act.

(a) Concurrent resolution of the House of Representatives and the Senate which requires the usual legislative majority approval of both Houses.

(b) By treaty which requires two-thirds majority vote of the Senate.

The proposed legislation, H.R. 11426 and S. 3474, calls for the abdication of the authority now vested in the Congress and the delegation of that authority to the President.

SECTION 92.

Compliments the implementation of the new provisions of Section 91 (adjusts present law).

SECTION 123.

Explained later.

SECTION 142.

Provides for the declassification of Restricted Data (design, manufacture, or utilization of atomic weapons - production of U-235 or plutonium, etc.) by the joint action of the Atomic Energy Commission and the Department of Defense. This declassification can apply to all types of military application of atomic energy. If the two departments named above disagree, the President decides the point of disagreement.

Section 142 (c) and (d). Under present law, the Atomic Energy Commission can declassify Restricted Data in the field of military reactors. The proposed legislation extends to the Department of Defense additional power to oppose sole declassification of military reactor information by the Atomic Energy Commission. Such information may then be transmitted by order of the President to a single nation or all nations participating with us in a regional organization (such as NATO, SEATO, ANZUS, or the Rio Treaty group) as provided in Section 144, as amended.

SECTION 144.

Sec. 144 (b) International Cooperation. This section of the 1954 Atomic Energy Act is amended to permit the communication to foreign nations of more "design" information. The definition of "design" is found in the 1954 Atomic Energy Act. It means "(1) the specifications, plans, drawings, blueprints, and other items of like nature; (2) the information contained therein; (3) the research and development data pertinent to the information contained there".

In addition to present provisions of existing law, communication of "design" information is allowed in several areas;

(a) training of personnel in the military application of atomic energy;

(b) evaluation of capabilities of potential enemies in the military application of atomic energy;

(c) the development of compatible delivery systems for atomic weapons (submarines, planes, missiles and atomic cannons);

(d) other military applications of atomic energy with certain exceptions which would be provided for in Section 144 (c).

The balance of this section (144 (b)) strikes out existing prohibitory language and provides that such communication shall be undertaken pursuant to the provisions of Section 123 (International Agreement for Cooperation).

Sec. 144 (c) This section provides for the exchange of Restricted Data concerning atomic weapons with a foreign nation if the information is deemed necessary to,

(1) improve its atomic weapon design capability;

(2) develop atomic weapons development capability;

(3) improve its atomic weapons production capability.

to communicate to a foreign nation Restricted Data concerning:

(1) research on military reactors

(2) development of military reactors

(3) design of military reactors

Section 144 (c) authorizes the President to take the actions heretofore noted providing,

(1) the action will promote the common defense and security,

(2) the action will not constitute an unreasonable risk to the common defense and security,

(3) the foreign nation is participating with the United States in an international agreement or treaty and is making substantial (?) and material (?) contributions to the mutual defense and security, As noted hereafter on page seven of this analysis,, forty-seven nations are participating with the United States in international agreements or treaties for common defense and security. All of these nations can therefore qualify on this point under this section for "agreements of cooperation" as outlined in section 123. As a matter of fact, this section bypasses procedure under section 121.

For the purposes of this section, a nation wishing to participate in a cooperation agreement under section 123, must qualify first by being a participant in an international agreement or treaty as provided in section 121.

SECTION 123.

This section of the present Atomic Energy Act of 1954 provides for a special type of international agreement which is different from those authorized under Section 121 of the Act. Section 121 provides for two types of international agreements. First, an international agreement which is submitted to both the House and the Senate for majority vote approval; and second, a treaty approved by two-thirds vote of the Senate.

Section 123 provides for a third form of international agreement designated as "agreements for cooperation". The President enters into such an "agreement for cooperation" with a foreign nation and the document must lie before the Joint Committee on Atomic Energy for thirty days before it goes into effect.

What does this "lie before" period of thirty days mean?

It means that the terms and conditions of the "cooperation agreement" is brought to the notice of the proper committee of Congress - officially - for a period of thirty days, during which period the terms and conditions can be studied and evaluated. If the Joint Committee approves of the terms and conditions, the agreement automatically goes into effect at the end of the thirty day period. This arrangement serves to publicize the terms and conditions of the agreement before its effective date.

What if the Joint Committee comes to the conclusion that such an agreement is unwise or dangerous?

The Joint Committee on Atomic Energy can take two steps.

(a) It can try to persuade the Executive Branch of the government to change or withdraw the objectionable agreement. (Persuasion only).

(b) Both Houses can introduce disapproving resolutions and try to get them passed before the thirty day period expires. From a practical point of view, this would be difficult - though possible.

If, however, such a disapproving resolution were passed in time by both Houses, it would be sent to the President for signature. If the

President vetoed the legislation, then it would take two-thirds vote of both Houses to override the veto. Such an override would be highly improbable.

We must conclude that Congress would be taking a very important and potentially dangerous step if it abdicates its present control of the distribution to foreign nations of atomic and hydrogen weapons. This it would do if it substituted the process of consideration now provided in Section 121 for the more casual process of Section 123 of the Atomic Energy Act of 1954.

Exchange of Restricted Data, pertaining to important design information of atomic-hydrogen weapons, and Communication thereof to foreign nations must now be processed through congressionally approved international treaties or agreements (as provided for in Section 121). The proposed legislation makes such action possible under Section 123 (heretofore explained).

The pertinent difference is (a) Section 121 requires positive congressional action, by the Senate - in the event the treaty route is used - and by both the Senate and the House if an international agreement is used; (b) Section 123 does not require positive congressional action for implementation.

The only new requirement is that there be <u>in existence</u> a mutual defense treaty or agreement for common defense and security. This type of international arrangement exists now with forty-seven (47) foreign nations through either bilateral agreements with a single nation or regional agreements such as obtain with the Western Hemisphere (Rio Treaty Group, or NATO, SEATO, and ANZUS).

Section 144(d) widens the President's power of delegation for implementation to "any agency" or "person". (See definition of these terms in Atomic Energy Act of 1954.)

Testimony of HONORABLE CHET HOLIFIELD (California)
Before the
SUBCOMMITTEE ON AGREEMENTS FOR COOPERATION
of the
JOINT COMMITTEE ON ATOMIC ENERGY, Thursday, March 27, 1958

MR CHAIRMAN:

I have made the unusual request to appear before your Subcommittee to testify on pending legislation, H. R. 11426 and S. 3474. Although a member of the full Committee, I am not a member of the Subcommittee on Agreements for Cooperation. I want to thank you, at this time, for the courtesies extended to me by permitting me to attend the executive hearings on this legislation and also for allowing me to present public testimony as a witness.

I have studied these two bills thoroughly and believe that I understand their provisions and the broad and important scope of the subject matter they cover.

I am deeply concerned at the impact of this legislation if it should be passed. In all good conscience, I must oppose the bills as written. I must oppose some of the objectives and I must oppose the methods of achieving some of the other objectives, which may, in themselves, be desirable.

The importance of this legislation cannot be over emphasized. It is not a minor amendment to the Atomic Energy Act of 1954. It is a major amendment in that it authorizes a basic change in responsibility for the distribution of atomic-hydrogen weapons, delivery systems for such weapons, and design information for the production and utilization of such weapons. The responsibility belongs, by statute of 1954, in the Congress of the United States. This amendment transfers that responsibility to the President of the United States.

Twice before, in the original Atomic Energy Act of 1946 (the McMahon Act), and in the revised Atomic Energy Act of 1954 (the Cole-Hickenlooper Act), the Congress after due and serious consideration decided that control of these new, terrible, and revolutionary atomic-hydrogen weapons should remain the responsibility of the Congress. It provided, I believe very prudently, that if the time should come when it seemed wise to transfer atomic weapons

or atomic weapon information to an ally or allies, that such a decision would be made by international agreement, approved by the Senate and the House of Representatives - or by an international treaty approved by the Senate. This method is provided for in Section 121 of the Atomic Energy Act of 1954.

If that time has arrived, then I say let us use the safer, more deliberative way provided for in the present law.

As elected Representatives of the people, let us scrutinize carefully each proposal. Let us require specific justification for each transfer of this type of information - or these types of weapons - to a foreign ally, whoever she may be. Let us exercise the checks and balances of our constitutional type of government in important matters, such as this legislation, which authorizes the creation of additional atomic-hydrogen weapon owning nations.

In my opinion, this matter is of a great deal more importance than many of the routine matters which are effected by international agreements or treaties, and which, as a matter of course, are referred to the Legislative Branch of the Government for approval.

If passed, this legislation will be a complete delegation of Congressional authority and responsibility to the Executive Branch of the Government. It provides, furthermore, for the delegation by the President - to appointed administrators of the Atomic Energy Commission and the Department of Defense - the power to recommend decisions - which now must be made by the Congress under Section 121 of the 1954 Act.

The claim has been made by the Administration sponsors of this legislation that:

(a) it is desirable to have administrative flexibility to distribute atomic-hydrogen weapons, weapon parts, or weapon information, to a certain ally or allies.

Of course, it is simpler and quicker for the Executive to act than for the Congress to use the deliberative process. No one can argue this point. But, this is but to argue that a monarch or a dictator is better equipped to make quicker, quieter and more efficient moves than can be made under the democratic process.

There are other factors to be considered however. And we, who believe that in the long run the freedoms and liberties of a Democracy are safer and surer than those liberties can be under a totalitarian system of any type, must accept the responsibility and - yes - even the slower process of democratic checks and balances.

Our failure to exercise Congressional responsibility might start a series of ill advised moves which could culminate in a nuclear war.

(b) The claim has been made that a wide permission to distribute atomic-hydrogen weapons to foreign nations would strengthen our collective defense against the Soviet threat.

(Under this legislation, 47 nations within NATO SEATO, ANZUS, the Rio Treaty Group, and outside nations having bi-lateral mutual defense treaties or agreements could be considered eligible.)

This claim is debatable on several points. Unfortunately, many of our allies have unstable governments. The balance of political power can shift very quickly. With such shifts, there would inevitably shift the control of the atomic-hydrogen weapons or information which we had furnished.

Who can say, today, where the internal control of France, Italy, or even West Germany will be one year or two years from now? We live in perilous times. Old institutions are crumbling. New forces are rising to control in many nations.

Another point to be considered is the rise of neutralism and its effect on existing political parties in foreign nations. We have seen the failure of almost every NATO nation to fulfill its military commitments. We have seen the internal strife in England and West Germany over the location of missile bases and Strategic Air Command bases for planes carrying nuclear weapons.

Who among you can forecast today the effect on existing political parties within allied governments if the gate is opened for the transfer of nuclear weapons from the United States?

Will such legislation unite or divide our alliances?

Will such legislation cause suspicion and resentment against the United States - by those allies who are denied access to nuclear

Insert between second and third lines on page 4.

The claim has been made that a changed world situation -- a more tense situation exists today than in 1954 when the present law was passed. This claim can be questioned. We had gone through the Berlin Airlift, had just finished the Korean War, Chou-en-Lai was threatening Formosa and the Communist war effort had shifted to French Indo-China. There had been no relaxation by Stalin and Molotov of their stern and unyielding position. Certainly the economy of Europe was in worse shape then, than today four years later.

While NATO has not fulfilled her commitments as planned - - Is there anyone who can claim that her nations are not in better economic and industrial position to fulfill those commitments, if the will to do so existed.

weapons, as provided for under the wide, permissive phraseology of the proposed amendment?

I have supported the North Atlantic Treaty Organization concept of collective military strength. The concept has not materialized, due to factors beyond our control.

The case has not been made for the distribution of atomic-hydrogen weapons to allies in NATO. The case has not been made to support the thesis that our allies are demanding such weapons.

Each day's newspapers record the concern of great segments of the population in England and in West Germany over the more modest plan of placing nuclear weapons bases in their countries.

The open authorization of power to assign nuclear weapons to other nations would, in my opinion, become an issue of violent controversy between political parties now in charge of government policy and those out-of-power political parties seeking political advantage. Administrations in allied countries, who are now working closely with the United States in foreign policy implementation, could fall over this issue alone.

NATO nations have separate duties and obligations as befit the purpose and capabilities of members of a military alliance. Each nation should be required to furnish their particular strength to the task before us.

The United States and Great Britain are nuclear-weapon-possessing nations in NATO. By arrangement, in the over all military strategy, these two nations could furnish the factor of nuclear strength where needed. Such an arrangement would be clearly within the concept of specific national contribution of particular capability. Such an arrangement would not introduce the new and highly controversial precedent of creating "fourth", "fifth", or additional nuclear weapon nations into the volatile field of international relations. It would not furnish the Kremlin leaders with a new , and I believe, powerful propaganda motif.

If there be need for a closer and more effective exchange of scientific information or of materials in the atomic weapon field between the United States and Great Britain, such arrangements can be made under existing provisions of law. (Sec. 121 of Atomic Energy Act of 1954).

If there be need for assistance to our allies in the field of military type reactors for the production of steam or electric energy, this could be arranged under section 121 or possibly by a careful and limited change in existing law.

If there be need for the exchange of external characteristics information regarding atomic weapons, for the purpose of military training or transportation, this could also be done by limited changes in existing law.

Mr. Chairman, I have appended to my testimony a careful analysis of the provisions of the present pending legislation. I will not cover the provisions point by point. I wish to enumerate the main points however, and comment on the grave dangers which I believe are inherent in the pending legislation.

Among other things the legislation provides for,

1. The transfer of atomic weapon information to other nations. (Weapon design blueprints)

2. The transfer of "special nuclear material" to other nations for military purposes, (the basic bomb material, plutonium and U 235).

3. The transfer of non-nuclear weapon components to other nations (the electronic-mechanical hardware of an atomic bomb).

4. The transfer of weapon delivery systems (this could mean atomic cannons, bombing planes, missiles and submarines).

The most important point however is that the legislative draft places responsibility for international transfer of atomic weapon information, parts and bomb materials in the President of the United States. Congress abdicates its statutory control in this field.

If this legislation becomes law we enter a new phase of international peril. We cross the threshold on a journey from which there may be no return. The proponents of this step claim it is necessary to save the crumbling NATO. It is a most important step. It should receive wide publicity and serious debate in the Congress

and in every forum of public opinion. The American people are entitled to know that the Congress would be relinquishing their restrictive power over the distribution of our atomic-hydrogen weapons. In the last analysis, we would be placing that power in the hands of one man, the President of the United States. The issue really is simple, but stark in its simplicity.

Should the power of distribution of atomic weapons to other nations be placed in the hands of one man - even though he be a good man - the President of a Great Nation - a great Democratic Nation?

Or, should the problem of distributing nuclear weapons be decided thru congressional consideration and debate under the treaty process, or under a specific international agreement?

A strong argument can be made that such an important matter should be considered under the more deliberative process of a treaty. Such an argument would be based on (a) the revolutionary character of nuclear weapons, and (b) the effect on international relations which would be caused by the United States creating the "fourth atomic weapon nation".

Let us explore the meaning, or if you prefer, the "impact" of this proposed legislation.

Three nations now possess atomic-hydrogen weapons, the United States, the Union of Soviet Socialist Republics, and Great Britain. Until now we have hoped that a safe agreement to prevent a nuclear war could be arranged between these three nations. We have thought an agreement would be more likely between three nations than four or five or more.

Until now, we have failed to establish that safe agreement to prevent the outbreak of a nuclear war. This legislation allows the United States (through Presidential decision) to open the door to creating a "fourth atomic weapon nation, a fifth, a sixth, and many more."

Does this mean we have given up our hopes for a peaceful agreement among the present three nations? Does it mean we have deserted and abandoned the logic of limiting the number of nations possessing atomic-hydrogen weapons, while we negotiate for a safe agreement against nuclear war?

I am deeply troubled with this Administration proposal. I fear it has not been properly analyzed by its proponents.

As a supporter of the NATO charter for collective security, I am aware that pressure may be exerted to obtain nuclear weapons for our allies who do not have such weapons. I believe the upgrading of collective military strength is necessary if NATO is to be preserved. But, as I have already stated there are other ways to strengthen NATO without a resort, at this time, to authorizing the creation of the "Fourth", "Fifth", or "Sixth" atomic weapon nation.

The Subcommittee on Military Operations, of which I am Chairman, studied the NATO deficiencies during our September 1957 visit to Europe. On February 19, 1958, our parent Committee on Government Operations adopted a number of the recommendations we made. Very frankly, we did not recommend the creation of the "fourth atomic-weapons nation".

The tasks of NATO are many. Those tasks can be divided according to an overall coordinated strategy. The British and American atomic weapon capability can be fitted into the overall concept of NATO strategy without opening a pandora's box of unknown and unpredictable woes.

I believe in the wide exchange of scientific information and realize the secrets of science cannot be hidden from the peoples of other nations. But we do not distribute hand grenades to our children and hope they will not be tempted to experiment.

There is a fearful responsibility resting upon each of the nuclear nations. That responsibility is too grave, in terms of humanity's destiny, for them to gamble by introducing more players into the nuclear card game.

We have a tremendous moral responsibility to discharge to a fearful and uncommitted world. If we once lose the prestige of a moral nation, we will not - - we cannot - - exert leadership for peace.

The question of deciding who the "fourth nation" should be immediately faces us when we remove the present legislative restrictions. The first nation that comes to mind is France, and then possibly, West Germany. France is making a desperate effort to attain atomic weapon capability and, under the scope of the legislation, she would undoubtedly request aid from us in developing her atomic weapon stockpile. This indeed would pose a serious problem. France unfortunately, is unstable politically and beset with many internal problems.

France has an inherent political instability due to her multi-party parliamentary situation. This unstable factor makes her actions unpredictable.

We remember the Egyptian episode in which another, usually stable ally, Great Britain was involved. The effects of that adventure in international irresponsibility remains to plague us to this day.

But new events erase the sharp memories of old events and the volatile La Belle France has again proved her unpredictability, in Tunisia. She used American planes, furnished for NATO purposes, to bomb another United Nations' ally.

Notwithstanding these irresponsible international escapades, France, because of her atomic energy technology, is an outstanding candidate for "fourth nation". If the legislation now pending becomes law she will be in the forefront of our allies demanding atomic weapons.

We have other friends among the foreign nations, both inside and outside NATO. When we remove the present legal restrictions against distribution of atomic weapons and atomic weapons design information, and create the "fourth nation", we know there will be constant pressure to create the "fifth", the "sixth", and the "seventh nation", and so on. NATO, SEATO and other nations would be eligible.

When this first important "fourth nation" threshold is crossed, we can expect immediate reaction from the Soviet leaders in the Kremlin. We can be sure that Mr. Khrushchev will make the most of this event.

He caused us alot of trouble over atomic bomb testing. He sold his "peace" advocacy to a great many gullible people throughout the world. He used the two Sputniks to establish the myth of the overall scientific supremacy of the Soviets, to a great many nations and people.

What would he do with a propaganda motif so fraught with concern as the distribution of atomic weapons by the United States to "fourth", "fifth" and other nations?

The simple but effective Soviet propaganda lines are predictable. In fancy, I can hear Mr. Khrushchev now:

> "The great Soviet Unions stands for Peace. We have made great efforts over the years to outlaw atomic weapons for the benefit of humanity. We have demanded that the testing of atomic bombs be stopped so that unborn generations will not be damaged by the accumulation of deadly radiation in the earth's environment. We have zealously guarded the custody of our own defensive atomic weapons. Today, the United States Congress and their President enacted a law permitting the distribution of atomic hydrogen weapons to all their allies. The imperialistic war mongers, the capitalist nations, now threaten the Socialist Republics with atomic encirclement. One careless and irresponsible nation, one madman, can now launch the third great war, a nuclear war, which will destroy civilization. I charge the United States with the blame for such a war when it occurs. The U.S.S.R. will not sit idly by. We will take such steps as we deem necessary to preserve the life of the great Socialist Republic and its Allies."

What would the impact of such a speech be on our allies who are not scheduled for early entrance into our exclusive atomic weapons club?

What would be the impact of such a speech on India, Japan, and the other uncommitted nations of the world?

Would it enhance the international prestige of the United States, or

Would it place us on the defensive in world opinion?

Would it increase or decrease the likelihood of nuclear war?

The legislation before us creates important questions - - questions which each member of the Committee will have to answer.

They are important questions and the answers we give may increase or decrease the possibility of nuclear war or international peace.

Halland, Dudley

October 29, 1958

Mr. Dudley Holland
330 West 95th Street
New York 25, N.Y.

Dear Mr. Holland:

Mr. Murrow has asked me to give you his reply to your recent letter, as he is involved with preparations for the coming elections.

He is unfortunately not in any control of what CBS does in the way of programming. This being so, it would really be a waste of both your time and his if you were to come in and see him.

Yours very truly,

Sheila Hogg
Secretary to Mr. Murrow

DUDLEY HOLLAND
330 WEST 95TH STREET - NEW YORK 25. N.Y.
home messages at UNIVERSITY 6-1420

October 27. 1956

Mr. Edward R. Murrow.
CBS
New York

Dear Mr. Murrow:

If you are interested in actively helping to really DO something about improving the quality of TV programming. I may very well have the APPROACH to the successful solution of the problem.

So far. I have only been able to line up two men in TV on my side - they are

GIL RALSTON - CBS - Gil has always been most encouraging but he repeatedly warns me: "I am too far down the ladder here to be of any practical assistance to you.

"PAT" WEAVER I wrote him outlining my project when he left NBC. and promptly received a handwritten note:

"I hear you all the way on yours of Sept 13 (1956) but I am going away ..... see me after the first of the year..... I agree with your thinking completely.

So far I have been unable to see him in person. His secretary insists that he cannot undertake any new project until he gets his small TV network

(cont'd)

and programming service "off the ground" so far he doesn't seem to have enjoyed any success.

30 MINUTES OF YOUR TIME.

all I need is thirty minutes of your time - or if you want me to see Fred Friendly first. I shall be glad to do so. I saw him four or five years ago, at which time he simply could not understand what I was attempting to do.

DIFFICULT OBSTACLES.

My project is not going to be simple or easy to get under way. The biggest simple objection is the fact that it will require a couple of million dollars to get under way. Fortunately, SAM PARK, Jock Whitney's personal assistant, has been encouraging.

C.B.S. OFFICIALS. OPPOSED.

Jack Van Volkenburg was always courteous, but naturally had me see his assistants. SIG MIKELSON violently differs with me - HUBBELL ROBINSON has been coldly incredulous.

ALL I ASK:

Is this - Have your secretary write me setting up an appointment. I'll telephone back to confirm - I'll be there, and I'll make my pitch as brief and as sensible as I can.

Cordially

Dudley Holland

Hallberg, Olga

2294 Commonwealth Ave.
St. Paul 8 Minnesota
February 21, 1959

My dear Mr. Murrow,

There are some of you T.V. personalities whose thoughts I've shared for so long that I feel I know you better than "live" acquaintences of many years. I write to you then as to an old friend.

As a teacher myself, I've so long been amused at the dither the profession gets into over the shortage of teachers. Personally, I feel we might be faced with an over abundance of them. For certainly you, or someone, will sell the "powers that be" on T.V. How can we continue to be so blind and unimaginative! We don't need more teachers. We only need to extend our good teachers(like yourself) to more students. (I've wanted to shout this from the rooftops for a long time but pressing daily duties keeps teachers from being vocal and so only the layman is heard. How wise you are to take off this year. More should imitate you.)

Certainly we will continue to need physical contact --pupil with teacher- in the beginning and as follow-up to T.V. teaching but the teacher could handle large groups effectively ~~but~~ she would be relieved of the preparation and could concentrate her energies on drill, correction of student work, conferences with pupils etc.

The hit and miss successes have been stimulating to note. Think of what Walt Disney has done to awaken interest in children's classics and Nature; the numbers taking the 6:30 A.M. science coursesspeak eloquently of its success; you documentaries, Omnibus, The Bell Telephone Movies and some others--think what they have brought to people. But we haven't scratched the surface.

We need some imaginative people, with authority, to overhaul our educational system and put this new teaching tool into practice--not as an adjunct to teaching but the main core of it. (Think what China is doing with radio and loudspeakers among a people who cannot read and don't own radios or T.V.) Ponder a while on what strides we could make were we to venture a national T.V. educational program.

Our Minnesota Educational T.V. is but two years old and struggling along with little and uncertain support yet I have taken Frnch, Astronomy, Educational Psychology, Art Appreciation, Techniques of Teaching Reading, Spanish, Philosophy, Area Studies of Russia and one of the Near East, Geology, U.N. News Report, Schetching, Modern European Literature, Music Literature, plus Panel Discussions on Education

this is only limited evening & week-end listening time.

by the nation's greatest educators, Heritage Series from the University of Pittsburgh, you and others being interviewed on the Communication Series---and there are many more of a local nature informing us as to the issues before our state legislature, our highway department, instruction on making out income returns etc.

Some could have been better taught but the teachers communicated in every case. Yet these teachers were unskilled in T.V. techniques and were operating on no expense account. They simply brought their limited classrooms aids and hoped they'd "take" O.K. They came only with their knowledge and their enthusiasm.

Just imagine if we had had the very best teacher in the entire nation! Just imagine if these courses were scheduled long in advance. Some teacher in Podunk could handle 50 or more in her class. Between classes she could spend her time re-explaining, drilling, corecting and giving tests to discover what hadn't been communicated to the students. Many teachers are forced to handle large classes now but, of course, no one teacher can do that and spend sufficient time on preparation of subject matter as well. I believe it could be effective in areas we never believed possible. (I am now taking a couse in Show Card Printing and learning a lot. Ican see his demonstr ation much better than if I were in the back of a large class. He anticipates our difficulties and repeats and offers aids.)

Well, I've spoken my piece! I've jotted down thoughts similiar to these before and relegated them to the waste basket but your comments of late lead me to think you are also deeply disturbed about waste of this very miraculous tool.

Sincerely Yours,

Olga M. Hallberg.

As a project in our social science class we were asked to write famous men in politics today in our government. I was fortunate enough to recieve your.

I would like to ask you one question. What in your opinion is the United ~~States~~ most pressing problem today?

Thank - you!

Sincerely,
Larry Hopper

Hooser, G.A.

January 15, 1958

Dear Mr. Hooser:

Please forgive the delay in answering your letter of November 29th.

Your particular need poses quite a problem, and I have had to ask a number of technicians about it before coming up with any kind of an answer.

There are portable tape recorders operated solely on batteries, but these are very expensive --somewhere in the neighborhood of $300. The acceptable alternative would seem to be a recorder which will operate on house current, but for this you would need storage batteries such as are found in a car or boat, and you would, of course, have to have some means of getting these batteries to be charged from time to time. The cost of the recorder itself would be somewhere around $120 to $150.

If this interests you and you are unable to dig one up locally, I can, of course, make inquiries as to where such a machine may be purchased. Good luck to you!

Sincerely yours,

Mr. G. A. Hooser
Quatsino
British Columbia

mac

Quatsino, B.C.
November 29th, 1957

Dear Mr. Murrow:-

I had the good fortune to meet you in London during the unpleasantness there and had hoped to see you sometime after it was all over. However that does not appear to be and can only hope that one day it will happen.

I have enclosed this letter with one to your Mother with whom I am corresponding on and off. She has been requested to forward this to you.

What I want is some advice if possible information if possible and help if possible. You may take your choice and I know that you are somewhat occuppied(spelt wrong methinks) and busy so do not feel that you are hurting etc if you cannot do anything.

We have been on the west coast of Vancouver Island for over 10 years now and have finally wound up on the top outside end of Vancouver Island. I have just had a session in the Hospital and have finished a letter to your Mother bewailing the fact she was not available to nurse me back to health which will please her I hope. I have been informed that I have to take it easy for some time and my wife is quite mean enough to enforce this stricture by the Doctor. Which all boils down to time on my hands.

The stories told by the old timers here concerning this area I have found to be quite fascinating and interesting and I have in mind trying to get these stories and put them together. I have my doubts that I shall succeed but I am going to try anyhow.

I have found with the people here that the minute you bring out a note book they lose the thread of their conversation and that is no good. So I thought of a tape recorder. But the ones advertised are all for power hook ups and also much too rich for my blood being a civil servant and also owing Doctor etc. I have found however with a borrowed tape recorder in the house the person was quite interested to talk particularly when I played it back to them. So that is fine. What I wanted to know is if you have any ideas of whether or not there are tape recorders that work without power(110 volts) and if so how I could go about getting one without too much expense on the old exchequer. Also have you by any chance some suggestion as to how to go about getting data such as old times going. Do you start with now and work back or do you recommend starting then and working up to now. Both ways seem to work but I think there must be a knack to it that would be better and I have a feeling that to start then and work up to now would be better.

Must away now. Hope that all is well with you and yours.

Yours sincerely,

G.A. Hooser

December 31, 1958

Here is what you need to know about the appearance of the YEARS OF CRISIS team at the Philadelphia Academy of Music on January 6.

Sponsoring organization is the Philadelphia World Affairs Counsil, with the cooperation of the Foreign Policy Association. Working closely with the Counsil are our Philadelphia stations, WCAU and WCAU-TV. The attendance will be well over 2,000.

The event, billed as "The Outlook for 1959," coincides with the start of the Foreign Policy Association's annual "Great Decisions" program, which is implemented by cooperating organizations in more than 300 cities. I am attaching a "Great Decisions" kit which I hope you can leaf through for orientation.

Ed Murrow will open the panel discussion and introduce each correspondent for three minutes of talk. Following this, questions gathered and screened in advance by the Council will be put to the correspondents. I will have a list of 14 such questions by Monday morning, January 5. Others will be collected from the floor during the evening. Preceding the panel discussion will be brief talks by Dr. Robert Johnson, president of the Council and president of Temple University; John W. Mason, president of the Foreign Policy Association and Sig Michelson, on behalf of CBS News.

The program will run from 8:30 p.m. to 10:30 p.m., with a brief intermission. Prior to the event, there will be cocktails and a buffet dinner for 30 backstage of the Academy.

CBS NEWS

Office Communication

to:

from:

beginning at 6:30 p.m., with Don Thornburgh, president of the WCAU stations, as host. Attending, beside correspondents and CBS News executives from New York and Philadelphia, will be some twenty Philadelphia civic and educational leaders.

Arrangements have been made for the correspondents and CBS News executives to travel in a group on the 4:00 p.m. train from Pennsylvania station. Two drawing rooms and a block of parlor car seats have been reserved in cars 219 and 220. The train arrives in Philadelphia at 5:40 p.m. WCAU will have limousines on hand to take the group to the Academy.

I have invited a representative of the Foreign Policy Association, Phil Van Slyck, to accompany the group to Philadelphia. He will be available to answer any questions you might have regarding the Foreign Policy Association in general, and the "Great Decisions" program in particular.

Tickets can be picked up beginning Monday from my secretary; or from myself aboard the train. Return reservations have been left open.

Please call my office if you cannot make this train.

March 29, 1959

Mr. Edward R. Murrow
Columbia Broadcasting System
New York City, New York

Dear Mr. Murrow;

For quite some time now I have had a idea for a new type of T. V. show, which I feel could be very successful. I've never known where to start in presenting this idea to someone connected with the industry, that is, who to go to, etc.

My wife has said a number of times that I should write to you, and if you can't help me, perhapes you can after hearing my idea direct me to the proper people. I've always felt contacting you would be presumptious but after hearing that you are taking a leave of absence, I felt complelled to write to you to see if you could help me.

Your probably wondering why my wife suggested writing to you in the first place. It happens that like you I also am a graduate of Washington State College, and like any idea which is non-patentable I wanted to make sure that I presented this idea to someone I could trust and someone who could give me honest counsel.

I have no way of knowing how many letters you get asking for such help as I'm asking. I quess from one letter or another you can't tell which is written by crack-pot or which one isn't. I'm a school teacher of Industrial Arts and don't expect to make a million with this idea but I sincerely believe it warrents the time of someone in a position who can do something with it.

May I say in closing that I did at one time think writing you would be presumptious but I feel my idea is good and in keeping with your ideas of giving better T. V. to the American public, so thats why I finally am writing to you. I can be available to see you or anyone you may choose to direct me to, at any time, as long as I know one day in advance.

Thank you very much,
Very truly yours,
Louis Horvath

Dear Mr. Murrow:

On behalf of AMVETS throughout the nation, may I congratulate you most sincerely for the many honors accorded you -- so deservedly -- by the recent All American Awards Poll.

Through your many programs, you not only bring the important facts to the attention of the American public; you also help the citizen understand what they mean. Perhaps, however, your greatest contribution to the future of the country is making the men and women of today THINK. This ability, unfortunately, has been dormant in many for a woefully long time, but AMVETS are convinced that it exists and bears the seeds of the future virility of the nation.

If at any time AMVETS can assist you in any way, we would welcome the opportunity.

Sincerely yours,

P. E. Howard

Mr. Edwin Palmer Hoyt
211 East 18th Street
New York 3, N.Y.

Dear Ed:

This is a belated answer to yours of July 28. If you decide to go ahead, I will try my hand at a chapter, but cannot undertake to meet a definite deadline. In addition to your list, I would like to see something by the non-atomic Bill Lawrence of the Times, and by Martha Gellhorn. Maybe Dick Rovere would have something to contribute.

I am just off on what is laughingly called a sabbatical year, but will be reachable through this office at any time.

As ever yours,

ERM:skh

New York, 3, N.Y.

Dear Ed:

You may recall that in our conversation in your office last December I mentioned the idea of a book of CBS correspondents ?

Well, the idea kicked around Doubleday for some time, and they have tampered with it. We, Doubleday and I, have now been talking about a book built around the most important stories of a dozen of the best reporters in the business. By most important I do not necessarily mean transcendental, but the most important to the reporter.

This would be an integrated book, not just a slap and dash of stories with people's names on them. My function is to edit here and there, and also to describe the attributes of our modest contributors and set a scene here and there. The correspondents would all share in royalties on the usual niggardly publishing basis.

I would like to get you and Eric and David Schoenbrun involved in this. Others I am writing include Mark Childs, Keyes Beech, Ed Morgan, Bob Sherrod, James Reston. There will be others.

I'd like to ask you to do two things:

1. Do a chapter, if and when we go ahead.
2. Suggest anyone you think is a must for the book.

If you found that the timing, or something else would keep you from doing a chapter, how about an introduction ?

Sincerely,

Ed

Edwin Palmer Hoyt.

Dear Mr. Murrow:

You will recall that nearly a year ago the International News Service was merged with United Press. When that happened, quite abruptly and over the weekend, virtually all of the International News Service people were left stranded without jobs. Perhaps you have wondered what happened to them since them.

The day that INS stopped operation this company began operation. We signed up most of the correspondents of INS and have provided work for a larger number of people than the total number of regular employees of INS on the day when it closed down. A data sheet is attached for your reference.

Among other things we have specialized in business news and information, and in reporting services for major corporations, getting vital information quickly and accurately through the superb facilities we have developed with our newspaper correspondents covering all markets in the U. S. and Canada and 94 other countries. Most of our Bureau Chiefs abroad are former INS Bureau Chiefs.

World Wide Information Services will be one year old on June 9. We paid our own way from the first day. We had to, as we had no outside backing. Today our client list is approximately 100 companies - about one third are major advertising agencies, one third are manufacturing companies like RCA, General Electric, International Nickel, etcetera, and the remaining third are magazines, broadcasters, and public relations companies.

I thought this might be of some interest to you, perhaps doubly so since I was the first Head of the CBS Television News Department. I remember once, during the War, we were very flattered when you came down to see how we operated with our Programs, and I had the pleasure of meeting you after I finished my Newscast.

If we can be of service to you some time, we would consider it a privilege.

Sincerely yours,

Richard W. Hubbell

New York 22, N. Y.

Mr. Murrow,

I have just finished reading the November 13th issue of The Reporter which contains a reprint of the speech you delivered before the Radio and Television News Directors' Association. It was refreshing and enlightening to find at least one who realizes that the programming of the networks is to a large extent escapist-oriented and not representative of a mature and stable medium, which can and should be used to educate and inform.

Whether or not the average Yale student agrees with your point of view, I am sure that he would be interested in hearing what you had to say. For this reason, I should like to air a tape-recording of your speech if one is available for broadcast purposes. Please let me know if arrangements can be made accordingly.

Hoping for a favorable reply, I am

October 8, 1958

Mr. Edward R. Murrow
C.B.S. TV
485 Madison Avenue
New York, N. Y.

Dear Mr. Murrow:

On November 20 the Parent-Teachers' Association of Edison Grade School is presenting a program on fathers' responsibilities. Selected representative fathers are presenting their points of view on four phases of father's relationship to his family. One of the questions we hope to answer is, "What part should the father play in the education of his children?"

We thought it would add greatly to the stimulation of the program if, after the presentation by one of our fathers, we could read a statement on the same subject by a famous father. We could not listen to your programs without realizing that you are tremendously interested in the educative process, and your thoughts on the male parent's responsibilities in this field would be most interesting to us. Would you honor us by writing a short informal statement of your point of view on this question?

It is my personal opinion that we are suffering from man's relinquishing too much of the direction of education to women's hands. I feel that men are best suited to direct and check on their own children's educational preparation for entering into a world of science, business and industry with which they are more intimately acquainted than are the mothers.

You may not agree. If you do not, of such disagreements are good discussions made.

We shall greatly appreciate any contribution you can make to our program. Thank you.

Cordially yours,

Helen M. Hudson

Dear Mr Murrow,

We met once in a Taegu schoolhouse when the Naktong River line was bulging.

I came to the U.S. two years ago and studied at Harvard for a year as the Australian Nieman Fellow. Keyes Beech was the group ahead of me. Since then I've been mostly in our New York office.

However, television is due to show in Australia next year, as you know, and it looks as if I might have the job of organising the news side of one of the stations.

I was wondering whether you could arrange for me to have a thorough look at your set up. I'm starting close to scratch.

I don't doubt that before long I'll be wishing I was back on that schoolhouse floor, but what the hell.

With best wishes,

Yours sincerely,

yes

TIME & LIFE BUILDING · ROCKEFELLER CENTER · NEW YORK

June 15, 1959

Dear Ed:

I would be happy if you could be persuaded to read this before weighing it. Truly, it is less than a 300-page book, despite the menace of the massive format.

Seriously, I would be most grateful if time, heat and general pressures upon you do allow you to look at this some time in the next weeks -- and to tell me any thoughts, especially critical, that may strike you. I think I am open to questioning on almost any point, and receptive to criticism, except for any stern suggestion to mute it all. It is obviously polemical, and rather angry, and just has to stay that way, since that is how I feel. Other than that -- welcome to all criticisms.

Incidentally, the text is almost wholly unedited -- 99% as it came out of the typewriter. And I am aware of a certain amount of both repitition and over-writing to be treated.

But there may be much more substantial laments to be offered. If so, will you please?

Publication, by the way, comes in September, but I have only a few weeks left to make extensive revision -- publishing being the primitive process that it is.

I suspect, a bit brashly, that you may find yourself in agreement with a great deal of all this. But your appraisal, and not my intuition, is what really interests.

Have a fine summer, hope to see you at some juncture in the coming weeks, and -- do let me hear from you.

Warm regards,

Emmet

Emmet John Hughes

Hughes.
Cmdr. W. H.

June 23, 1959

Dear Commander Hughes:

Very many thanks for your kind letter of June 7th. I was amused by the irony of your little story about the church.

Thank you also for your nice comments about my broadcasts. I am about to take a year's leave from radio and television in order to spend time receiving rather than transmitting. One of the most pleasant things about the year's leave is that I shall once more be able to spend some time in England.

With best regards.

Sincerely yours,

Commander W. H. Hughes

Dear Mr. Murrow ,

It is probably nothing new for you to receive letters from Britain as I know you have many important contacts here.

Several years ago, whils in the USA I read abook by you which I believe was called "This I Believe". In this book somewhere you mentioned that whilst in Britain during the War you read on a Wayside Pulpit the words.

" If your knees knock, get down on them."

I thought you might be interested in a recent Wayside Pulpit notice in Stretford.L ancashire, which read as follows.

"The straight and narrow road would be wider if more people used it".

How ever here is the rub. This church is now to be pulled down for road widening purposes.

I only returned to Britain last year from the USA. I was sent there by my company, who have large holdings in the USA to build three new factories in 1946.

I have of course like many of my compatriots listened with great pleasure to your frequent broadcasts and daily newscasts.

Kindest regards.

W. H. Hughes

W.H.Hughes.

Hult,
Eugene

February 3, 1959

Dear Gene:

I think you will agree that I am not responsible for what the newspapers print. I think the program had a serious intent, although I would be the first to agree with you that it was not exactly earth-shaking.

No chair is "easy" in this business and, for my own part, I would not have it otherwise.

Sorry if the program caused you any embarrassment in relation with your children. My own thirteen year-old was inclined to agree with those critics who said I was dealing with an old story.

As ever yours,

EM:skh

January 22, 1959

Mr. Edward R. Murrow
CBS
485 Madison Avenue
New York 22, N. Y.

Dear Ed:

Having spent a few social hours with you at Dutchess Valley when I was a guest of Brad Clark and Dan Higgins on several occasions, I felt I knew you well enough to preclude the possibility that you would ever get involved in such absolute tripe as "The Business of Sex". Certainly, with all the fine work you have done for the public press and with your various television shows and documentaries, you don't need much publicity and if your programming people or your public relations staff thought you did - well, Ed, they really threw you a curve.

With four teen-age children of my own who seldom listen to evening radio, I was spared the trials and tribulations of the questions that were bound to come from this distasteful program. But to have to suppress the newspapers which seem to gloat and pounce on anything of a sexy or lurid nature, so that the children couldn't read any of the "verbatim" quoted - it was too much. I don't know what the percentage of objectors was, but I don't think people in your line of work can afford to have many - if any.

I hope your people at CBS will have sense enough to drop this matter as soon as possible - at least to try to suppress the headline and feature writing which is actually more harmful than the radio program - which undoubtedly had a sound purpose.

Leave the sex business to the pulp magazines, Ed, and get back in the easy chair of "See it Now". I'm sure the seat is much cooler and a lot more comfortable.

Sincerely,

Gene Hult

Dear Mr. Murrow:

Someone remarked about smoking that Edward R. Murrow has such an addiction that he can't sit for half an hour without a smoke.

Is it true that 1 gram of tobacco can control you, a strong, robust man weighing 70,000 grams more or less? It seems incredible but if the story is only half true, we have a gadget that will be a life saver for you. By collecting the tars (insoluble in water) and preventing them from entering your body, you will soon revert to your pristine estate where any desire for caffeine drinks, nicotine or alcohol will be a thing of the past.

If you would be interested in trying the Pan Condenser Cigarette Holder, we will be pleased to send you one with our compliments.

With kind regards,

Faithfully yours,

Howard B. Bishop H.E.

Howard B. Bishop, H.E.

HBB:dmf

SEEIN' IS BELIEVIN'

New Cigarette Holder Assures Safer Smoking

The most effective aid to safer smoking ever conceived, the "Pan Condenser" Cigarette Holder has recently been introduced by Human Engineers. This new holder, through a unique process of condensation, traps much of the dangerous tars and harmful residues without affecting the smoker's enjoyment of the true flavor of plain or filter tip cigarettes.

In light of recent medical statements, many books and pamphlets with articles showing the extremely harmful effects to health risked by cigarette smokers, the Pan Condenser Cigarette Holder is indeed a boon. The same vicious tars and other dangerous residues that scientific laboratories extract with costly equipment are largely removed in the Pan Cigarette Holder without filters or chemicals. The smoker can actually watch the process for the holder is made in three parts, which are screwed together; first the small nipple that holds the cigarette and in which the smoke is homogenized, second the transparent plastic barrel in which the tars accumulate and third, the genuine hard rubber bit.

This new patented process is the product of nine years of research and development. As the smoke is drawn through the patented element, it is homogenized, broken down and then rapidly expanded. This automatically condenses and distills the smoke, extracts over 300% more harmful chemicals and tars and leaves them deposited in the transparent plastic barrel.

There is no extra expense involved because no refills of any kind are required.

Made of high quality materials, the new Pan Cigarette Holder is durable, attractive and fully guaranteed.

A smoker recently tried one and was so delighted with the cool, easy draw and freedom from bite that he ordered 10 more to give to his friends and associates.

Smokers can please their doctors and dentists by keeping a large portion of the black tars out of their mouths, throats, and lungs. The tars that do enter the body present a real problem in their oxidation and elimination since they are insoluble in water.

Holders are available in two sizes 2½ inches long for men and three inches for ladies at $1.50 each. To order write to Human Engineers, Box 118, Summit, N. J.

Enc

Person to Person

The Man from Pole Cat Creek

By A Staff Reporter

IN London last week, Ed Murrow, one of the most important figures yet produced by radio and television, a tall, dark man with a high-domed forehead and the worried, lopsided face of a handsome bloodhound, spoke to his "shop" (the Columbia Broadcasting System) in New York and asked them whether they felt he ought to move on to cover the latest crises in Algeria and the Lebanon.

C.B.S. decided they wanted Murrow back home first, and he left for New York by air not dissatisfied with the results of his five-day visit to London: foremost among these, a half-hour filmed interview with Mr. Macmillan, due to appear on television in America on May 23, and later to be shown here and in the Commonwealth.

It is impressive that an American journalist can get a British Prime Minister to give him generous and undivided attention just before an important Cabinet meeting and at a critical period in the Prime Minister's career. But with Ed Murrow, O.B.E., this sort of thing is not unusual. He is, someone has said, "The V.I.P.s' V.I.P."

* * *

AMERICANS, more than Englishmen, like to feel they're being talked to about important things. Murrow has been satisfying this wish for twenty years. As one of his colleagues put it, "They feel Ed's good for them."

Egbert Roscoe Murrow was born on April 25, 1908, the third son of a small tenant farmer at Pole Cat Creek, North Carolina. He is of English, Irish and Scots descent. Father Murrow later changed to driving a train in a logging camp, and after high school, Egbert, aged fifteen, started earning his first money in the same camp (it was here Egbert was dropped, with relief, for Ed).

It was war-time Britain that really made him; and the influence of Murrow's "This [pause] is London" upon American opinion before the United States entered the war was incalculable.

Until the war, the serious Murrow had doubts about England's fibre. Was the greatness gone, he wondered? He found what he'd hoped to find in the blitz. This was probably the greatest time of Murrow's life: England's cause was his; he took many risks. Perhaps his most memorable broadcast was one night outside St. Martin-in-the-Fields. "We took air just as the sirens started. Unhurried footsteps sounded as people walked to the shelters. A man stopped another and asked for a light. The broadcast lasted, oh, two, three minutes. It illustrated the silence. They flew into a great calm."

* * *

HIS two most impressive recollections of this time are not of battle. The first is of a debate in the House of Commons in August, 1940, when the R.A.F. had committed everything but two reserve squadrons: the debate was on conditions of internment camps for aliens on the Isle of Man. The second is of the successful appeal two days after Italy entered the war of an Italian who had been found guilty by a lower court of murdering a British seaman with a knife.

These memories were with Murrow in March, 1954, when he indicted McCarthy and his methods on "See It Now" with a succession of filmed excerpts of the Senator in action—one of the most explosive television programmes ever, with plenty of editorialising and "as much cutting edge as could be on it." Murrow admits freely that he didn't attack McCarthy particularly early in the Senator's campaign, and that others had done it before him. But it was a brave action that brought virulent abuse as well as cheers. At one time, four McCarthy investigators were at work on Murrow.

The McCarthy poison in American life upset him a great deal. Other painful moments during his career were Korea ("a miserable war, a miserable country, and the realisation what the intervening years had done to the glands and nerves") and the Suez Crisis, when he was in Israel: he greatly admires Israel (particularly the prowess of her Army: he always worships the heroic qualities) and hated to see her "threatened with physical extinction by Bulganin and with economic strangulation by Eisenhower."

* * *

SUEZ upset him, too, because of what it meant to Britain and his conception of her. Murrow's love for England is warming; at times the admiration seems almost too uncritical (he admits he has to a certain extent lost touch with the British scene). His restrained clothes are often Savile Row; his fine black shoes glitter proudly; anglicisms like "Don't forget to make a signal" come easily to him. Even his ability to deprecate his own country, modestly, seems at times a bit English ("I love this old hotel—even the Americans haven't succeeded in spoiling it").

Murrow disclaims any political affiliations. He says he lacks conviction. On foreign affairs he tends to be Democrat, on home affairs Republican. He believes there has been nothing in history comparable with what America has done in foreign affairs in the past ten years. ("When Churchill said the Marshall Plan was the 'most unsordid act in history' I think he was right.") But despite this, he is by no means sure that American policy will succeed.

* * *

HE looks at American politics mainly from a professional standpoint and quotes the words of Senator Alben Barkley: "To be a good political reporter you ought to be agin everybody—some."

Murrow's eminence in radio and television is based on his air of authority ("the voice of an unfrocked bishop") and his sense of honesty and integrity. Few people have his painstaking ability to make important and difficult subjects seem dramatic. "See It Now" has included such touches as a United States marine hacking a foxhole from the frozen earth in Korea; a Buchenwald tattoo on the arm of an Israeli jet pilot; a "rehabilitated" member of Mau Mau singing "Onward, Christian Soldiers"; the clink of a bullet taken from a G.I.'s spine as it was tossed by the surgeon to a nurse and dropped into a cup.

He has many able men and several field teams working under him, aided by a lavish budget; but his stamp is always visible. Other commentators may be more pungent, less pontifical or pompous, better researchers, even more knowledgeable; but no one quite adds up to Murrow. And it is unlikely that any is so well paid (over $300,000 a year, more even than the board chairman of C.B.S.).

Murrow believes in his job (or much of it), but is not exactly at ease in it. He smokes heavily and buries himself obsessionally in overwork and dangerously long hours. He seldom relaxes except on his dairy farm outside New York.

He is still distrustful and a little ashamed of television, sees it can't compete with radio on "hard" news (indeed, doesn't try to make it do so); nor, to him, is it so satisfactory. He feels it tends to be a shiny, top-heavy gimmick, and that, in America, at least, with one eye on the sponsor, it lacks courage. His twelve-year-old son is allowed to watch television for only half an hour a day. Yet it is sometimes invaluable, he feels, for unmasking a phoney.—*Copyright.*

Humphrey, Sen H.

January 15, 1958

Dear Hubert:

Many thanks for your cordial letter of January 8.

I am delighted to hear that you liked our Marian Anderson show. We feel that in many ways it is the best thing we have ever done, and we found the overwhelmingly enthusiastic response by mail and in print most gratifying.

The State Department has already ordered well over a hundred prints, and it seems likely that the program will be presented again, although no date has, as yet been set.

With kindest regards.

Sincerely yours,

Senator Hubert H. Humphrey
United States Senate
Committee on Foreign Relations
Washington, D. C.

Mr. Edward R. Murrow
Columbia Broadcasting System
New York, New York

Dear Ed:

The Marion Anderson show was magnificent -- a moving, deeply impressive document. You and CBS deserve the highest compliments for producing the show, and of course Miss Anderson has the nation's gratitude.

Really, this show was the best of the See It Now series, in terms of impact. And this is saying a very great deal indeed, for the series has been uniformly excellent.

I do hope that you are going to make the films available to the State Department and USIA. They ought to have them, and I am going to urge that the Department get in touch with you about this. Also, how about a re-play of the telecast?

Would you be good enough to pass on to Miss Anderson my warm congratulations and my sincere admiration. She is a very great artist and a wonderful American. I was never prouder of being co-author of the Humphrey-Thompson Act in 1956 which set up the program under which Miss Anderson's trip was sponsored.

Kindest personal regards.

Sincerely yours,

Hubert H.

Washington, D.C.

Dear Mr. Allen:

I call to your attention the recent telecast by the Columbia Broadcasting Company See it Now featuring Marion Anderson.

It seems to me that this program, which was an extraordinarily moving and effective broadcast, would be invaluable to the cause of better understanding of our nation among the peoples of Asia and Africa, and I strongly urge that every effort be made to secure from CBS sufficient copies of this film to permit very wide distribution throughout these areas.

I would appreciate a report on what plans USIA may have to utilize this film.

Sincerely yours,

Hubert H. Humphrey

UNITED STATES FOREIGN POLICY AND DISARMAMENT

SPEECH BY SENATOR HUBERT H. HUMPHREY

Mr. President:

In recent weeks the American people, members of Congress, and indeed our allies have given prolonged thought to the military and foreign policy implications of the launching of the two Soviet earth satellites.

Significance of the Soviet Sputniks

The Sputniks have caused us to realize that the Soviet Union is exerting tremendous effort to accomplish impressive feats in science and technology. These accomplishments have alerted us to reexamine and reevaluate our defense policies, our defense organization, and the state of our military preparedness. Sputniks I and II have made us realize that if we hope to maintain our defense capabilities and if we do not want to be out-distanced in the vital area of outer space, vastly increased effort and expenditures of funds will be required.

The areas in which decisive action must be taken to strengthen our defense capabilities have been pointed out in the unanimous interim report of the Senate Preparedness Subcommittee, under the able and dedicated chairmanship of the Majority Leader, the senior Senator from Texas. A program of action has been outlined and the nation anxiously awaits the fulfillment of the specific proposals.

We have the resources to match -- yes even to surpass -- the U.S.S.R. in military might. We are prepared to speed up production of missiles, and to equip our army, navy, and air force with weapons which can, if necessary meet any type of attack. We are able to devote whatever is required to defend our shores, our fields, our industries and our cities against the new weapons of mass destruction. But even when all this is done, Mr. President, the world will still be dangerously divided into two highly armed camps.

We who have the responsibility for appropriating funds for the new weapons of defense must keep reminding ourselves it is essential that we search perseveringly for ways and means of securing a just and enduring peace so that the terrible reality of the use of these weapons will never happen. We need the same courage and patriotism in our search for peace that would be required of us in the defense of our nation from hostile attack.

As the distinguished former Senator and Assistant Secretary of State, William Benton, declared in a recent statement:

> Nearly everybody realizes now that the United States has fallen behind the Russians in key elements of military power. Further, they have awakened to the fact that we are falling behind in science and education -- as I have been reporting to Congressional committees and the country these past two years since I saw developments in the USSR at first hand.
>
> But it is not yet fully understood that, because of complacency in high places, the Soviet propaganda has stolen the role of peacemaker throughout much of the world and has seriously undercut the world prestige of the United States.
>
> It will take courage, vision, enormous energy and all our experience to restore the balance and thus lessen the danger of devastating war.

Mr. Benton's pertinent remarks were underscored here on the Senate floor by our Majority Leader when he said:

> But the same forces, the same knowledge and the same technology which are producing ballistic missiles can also produce instruments of peace and universal cooperation.
>
> We are engaged in a race for survival and we intend to win that race. But the truly worthwhile goal is a world of peace -- the only world in which there will also be security.
>
> . . . Somehow, somewhere, the great minds which have done so much to bring us modern implements, great adventures in science, and great discoveries, must be able to find a solution whereby men can live in the world together. If not, the road ahead will not be a very happy one.

Modern science and technology forewarn us of the appalling destruction that threatens us in the nuclear age -- that same science and technology beckons us to beat our "swords into plowshares and our spears into pruning hooks" and that "man shall study war no more". The nuclear age can be an inferno of death and destruction or a garden of peace and plenty. This decision is the difference between good and evil -- man and beast.

In our endeavor to regain our strength in missiles, rockets, and other weapons it is imperative that we not fool ourselves into thinking such effort is sufficient in the long run. In a recent New York Times

article I referred to it as "a Pyrrhic victory whose very process of achievement may squelch our search for positive approaches to peace, may weaken our endeavors to curb the weapons of war and may cause us to lose our sense of perspective. We must not let our fixation on security through more and bigger armaments lead to a stage where arms alone would control our policy, for this would invite our ultimate destruction."

It is within this frame of reference that I venture to discuss the difficult and perplexing problem of the control and reduction of armaments. The discussion of disarmament policies and proposals must be undertaken within the context of our entire foreign and military policies. Nor should we be restrained by inhibitions and preconceptions which so often bind us to the policies and attitudes of the past. This generation has witnessed two amazing and sensational scientific developments, the harnessing of nuclear energy and the breakthrough into outer space. The diplomatic and political formulae of yesterday are not adequate for this era of power.

Dilemma of Speaking Frankly

Before going into the substance of my remarks I wish to say that in these days a member of Congress who speaks at all critically about foreign policy is confronted by a real dilemma. Criticism of the Executive branch can be and undoubtedly is misused by the Kremlin. Radio Moscow is quick to pick up our statements as evidence that the policies being pursued by the United States are wrong and that those of the Soviet Union are right. We have observed on occasions that excerpts from speeches delivered before this body have been reprinted and broadcast by the Soviets in an effort to discredit our country.

This illustrates one of the difficulties of a free people in the struggle with a totalitarian dictatorship and society. Nevertheless, since freedom of speech and expression is one of our dearest and most cherished freedoms, we must be willing to exercise it when the situation demands it.

If we do not speak with candor, voice our concerns, and offer constructive criticisms and suggestions, we may well be doing our country a disservice. Our responsibilities, as representatives of the people of the United States, require that we present to the President and his officers, yes the public, our views with respect to foreign policy. We must use discretion and judgement. But when we differ and have genuine doubts, these differences must be expressed openly.

Special Responsibility for Arms Control

In the area of arms control I feel a special responsibility. I have been privileged to serve these past two and a half years as chairman of a special committee to study the control and reduction of armaments. This committee has issued a unanimous report with conclusions and recommendations. What I am about to say in no way contradicts this report. Much of what I say is foreshadowed by it.

Disarmament bears on so many aspects of foreign policy and defense strategy that one cannot possibly touch in one speech on every question related to it. Consequently, and regretably, I must omit several matters which deserve our attention. I would like, however, to discuss some of these related aspects. The first is our attitude toward the Soviet Union.

Assumptions About the Soviet Union

There is reason to believe that those who conduct and design foreign policy make two false assumptions regarding the Soviet Union.

The first is that the United States has such political, military, and economic superiority that it can force the U.S.S.R. to accept our terms in any series of negotiations.

The other assumption is that the internal domestic difficulties of the Soviet regime are so great, that all we need to do is continue to apply pressure and the collapse of the system will follow. Both of these assumptions have been stated or implied many times.

Recent developments have shattered the validity of these assumptions. The Soviet Sputniks indicate that the U.S.S.R. is, or will be in the near future, capable of launching intercontinental and intermediate range ballistic missiles. Reports from Sweden seem to indicate that the Sovietshave, or are in the process of building, atomic powered submarines among their gigantic fleet of some 500 under water vessels. May Day parades and public celebrations of the October Revolution reveal highly mechanized and mobile tank units and artillery. We now have disturbing evidence of the sizeable expansion of Soviet economic aid, political infiltration, propaganda and cultural offensives.

There is evidence that the Soviet system has many weaknesses. Soviet industry is suffering from manpower shortages. Efforts to open up and cultivate new land have not been too successful to date. Soviet citizens are still relegated to a standard of living considerably below the countries of Western Europe and some of Eastern Europe as well. But there is little sign that these problems are about to force any sudden fundamental changes in the regime.

Too often, United States proposals regarding the settlement of political problems and arms control appear to stem from the assumption that Western military and economic pressure will produce unwilling compliance on the part of Soviet leaders.

In point of fact, the United States did weaken its own strength during the course of disarmament negotiations in London last year with the Soviet Union.

While the U.S.S.R. was making naval sallies into Middle East waters, funneling arms into that area, hurling threats of nuclear annihilation at our allies, and announcing boastfully its achievement of an intercontinental ballistic missile, we were lowering the ceiling on our defense expenditures, cutting back or pulling back our armed forces, and curtailing or slowing down our military aircraft and missiles programs.

It is difficult to see how we could have presented a strong negotiating front to the Soviet Union when we were so busily engaged in unilateral disarmament.

Negotiating From Strength

A foreign policy designed to meet the realities of international life requires that we face up to the true power and political relationships between the U.S.S.R. and the United States. On the one hand we cannot act as though we have the strength to force the Soviet Union to accept our terms without offering reasonable compromises and concessions. On the other hand, our capacity to defend ourselves and our allies must be sufficient to discourage the Soviet Union or any of the Sovietized states from embarking on misguided and miscalculated military aggressions. While we have allowed ourselves to fall behind in three crucial areas -- missiles, outer space, and capacity to deal with limited armed conflicts -- it would be wrong to assume that we are so weak that we are inviting Soviet aggression or that the Soviets could force us to accept their terms in any series of negotiations. We need not tremble at the thought of sitting face to face with Soviets at the conference table. Negotiating from strength means not only the appearance of strength, but the fact and reality of strength. By strength we must include military preparedness with modern weapons, alliances that are strong and secure both militarily and politically, and a vigorous and expanding economy.

The Soviet Union too must come to accept the reality of the balance of power existing between it and the free world. It may be under an illusion that its achievements in missiles and rockets have so elevated its power position that negotiations with the United States can only be on Soviet terms. Perhaps this is why the Soviets abruptly broke off the London disarmament talks of last summer and why it is

boycotting the newly expanded United Nations Disarmament Commission. Soviet leaders must be persuaded both through our increased defensive strength and through a broad program to pursue works of peace and a willingness to conduct negotiations at any time, that neither side can force terms on the other. Any agreement reached must serve the national interests of both countries as well as the many countries allied and associated with us in our search for peace.

Improving the International Climate

To reach lasting agreements with the Soviet Union on such fundamental issues as arms control and political settlements, the international climate must be conducive to the development of mutual confidence. It is somewhat pointless to expect immediate success to result from discussions on disarmament when the Western nations and the Soviet Union are simultaneously exchanging verbal threats of how each can retaliate against and destroy the other.

There are many ways to help build an environment of confidence. It can be improved through an acceleration of private and public contacts on all levels.

The recently announced agreement to liberalize and broaden the exchange programs in order to encourage a greater measure of contact between the people of the United States and those of the Soviet Union is a big step in the right direction. Such an exchange can do much to calm the fears, and help to create a degree of understanding between our people and those of the Soviet Union. I wish to commend and compliment the Administration on the recent agreement between the United States and the Soviet Union. It deserves our continuing attention and support.

I would go even further. I would like to see us encourage anyone -- and particularly those from behind the Iron Curtain -- to come to the United States on a visitor's visa for a certain limited period of time. By a single stroke of this nature, we could restore much of our damaged image abroad. By the same token, I think we should encourage American tourists to go behind the Iron Curtain, encourage them to do so as part of official policy.

Soviet education is producing a new intelligentsia in fields of science, literature, music, agriculture and industry. I am told that the young scientists, engineers, musicians and even publicists are increasingly non-political or apolitical in their outlook. This

offers opportunity for association in those broad areas of non-political activities. We must encourage Soviet citizens, yes and others, to come to this country, to visit, to travel, and to study. More of our citizens should be meeting with Soviet experts in all fields and in as many places as they can be found. International fairs, international scientific conferences, and international educational conferences are some of the places United States and Soviet citizens should be meeting and exchanging views and ideas. Let us accept the challenge of competitive co-existence -- but let us be sure to compete.

The time is ripe to devise and execute extensive programs designed to improve the international atmosphere. We cannot expect progress on arms control and the settlement of major political problems over night. Many moons and many earth satellites are likely to pass over our heads before we see significant agreements on fundamental issues. If we can expand our efforts in these many peripheral areas then the possibilities for reduced international tension and a break in the arms race may be realized. The world atmosphere needs to be "disarmed" by better human relations. Political problems, just like bacteria, have less chance of becoming dangerous or fatal if the surrounding environment is not conducive to their multiplication and contagion.

We should be the exponents of political settlements, negotiations and peaceful progress.

The challenge the Soviet Union presents is a total challenge. It is military, political, social, economic, cultural and ideological. We must meet this challenge on all fronts.

The first challenge, the immediate one, is to recover from our delays and mismanagement in the field of military rocketry and missiles. There is no doubt that Congress will respond with increased appropriations for these programs, probably more than the President has asked.

The second challenge is to provide the basic defense in depth which these defense programs need with a new and lively rediscovery of the importance of education, trained minds, basic research, not only in the sciences but in the humanities too. There are signs that people are belatedly awakening to the full dimensions of this challenge, too.

The third challenge is the major one for the long haul. At the moment we have only a sobering and disturbing awareness that our current struggle to regain military parity ultimately will lead nowhere but to increased world problems. We are only vaguely aware that the long-term challenge lies in the competition for men's minds, hearts, and enthusiasms.

We cannot afford to relax on any front, for we can be sure that the Soviet Union's determination to envelop the world with its political and economic system will never let up.

We must rid ourselves of the fallacy that there is a kind of priority of programs and negotiations. Negotiations and programs on the most difficult as well as the least complex need to be pursued simultaneously.

I now wish to turn, Mr. President, specifically to the problem of the control and reduction of armaments.

Administration's Disarmament Proposals As a First Step

In discussing United States disarmament policies it is necessary to evaluate them in light of the changing definition of disarmament. Today, "disarmament" has meaning only if it is defined in terms of five key words: strength, understanding, limitation, inspection, and control.

Strength is the continuing prerequisite for effective bargaining, the one persuasive catalytic agent without which negotiations are futile. Understanding signifies broader and better public conception of the difficulties and complexities involved in disarmament in a nuclear age. Limitation, inspection and control are the essential features of an effective system, without which disarmament is a mirage.

In the context of this definition of disarmament it is essential to look at and examine our past policies as we prepare to deal with the disarmament discussions of the future.

There will be those who say all this is well and good but then ask when and how do you negotiate with the Soviets in light of recent developments? The Soviet Union has offered two possibilities. The first, the so-called summit conference; the second, within the General Assembly of the United Nations.

While neither of these alternatives lend themselves to truly responsible, effective and methodical negotiation, they do suggest other possibilities within the framework of the United Nations or within the channels of traditional diplomacy. For example the Secretary General has mentioned three approaches in addition to the General Assembly -- the Disarmament Commission, the Security Council, and the Secretary-General

Outside of the United Nations there are these possibilities: negotiations at the ambassadorial level, the foreign minister level, negotiations at the summit with a limited agenda and with agreed upon items for discussion. It is our responsibility as a nation in our search for peace to explore every reasonable possibility and alternative. The door is not closed to negotiations. It is a question of how the door shall be opened and in what environment and at what political level disarmament talks may be resumed.

There are several aspects of United States policy on arms control which are sound and constructive.

I endorse wholeheartedly the President's statement that the one indispensable condition of any disarmament proposal is "reliable means to ensure compliance by all". I also applauded his appointment of a Special Assistant on Disarmament and the initiative he took at the 1955 Summit Conference in proposing aerial surveys, the "open skies" plan, to guard against surprise attack. These were imaginative and constructive acts.

There are two recent developments that deserve special attention and commendation. a) Careful negotiation last summer among all the NATO countries that resulted in agreement which produced the so-called western disarmament proposals.

b) At the recent session of the United Nations, Ambassador Lodge skillfully handled the difficult question of the expansion of the disarmament commission. The disarmament machinery of the UN has been strengthened and improved as a result.

Our present disarmament proposals consist of the following points: 1) prevention of surprise attack through aerial and ground inspection, 2) suspension of nuclear weapons tests, 3) prohibition of fissionable material production for weapons purposes, 4) a beginning on the transfer of fissionable material from weapons to peaceful purposes, 5) modest reduction of armed forces, 6) the transfer of selected armaments to international depots, 7) the prohibition of the transfer of nuclear weapons to other countries, 8) the establishment of a committee to study ways to insure that objects sent into outer space will be used exclusively for peaceful and scientific purposes, and 9) the grant of authority to an international agency to study the control of the export and importation of armaments.

The United States refers to these nine points as constituting a first-step disarmament treaty. I submit that these points amount to much more than a first step. What would be left for a second, third, or fourth step agreement would be rather insignificant compared to the disarming that would have been undertaken in this so-called first step. To call these nine points a "start" on world disarmament is inaccurate and unrealistic. No nation least of all the suspicious, tightly controlled Soviet Union would agree to such sweeping provisions all at one time. The most important points in the United States disarmament package require the installation of elaborate inspection systems. Do we really expect the Soviet Union to open up its country to the extent of foreign inspectors in all atomic energy plants, all test sites, all major communication centers, all ports, all airfields, all depots to mention only the most important inspection points in our proposal? And would we be ready to reciprocate if the Soviet Union were to surprise us by accepting the proposal?

A policy which is predicated on the willingness of the Soviet Union to turn overnight from a totalitarian dictatorship out to conquer the world, to a peace-loving, cooperating, submissive nation willing to acquiese in our demands, is doomed to defeat and ridicule.

There is one note of optimism that I can add, however, in this respect. The recent letter of the President to Premier Bulganin appears to have a more moderate tone. The letter indicates that its creator, reportedly the Secretary of State, may have had some second thoughts about the scope and substance of our disarmament policies and procedures.

What seems necessary at this point if we are ever to reach a real and genuine first step agreement with the Soviet Union is to be willing to break up the disarmament package. We should be prepared to negotiate on some of these nine points separately. I will elaborate on this point later but I must emphasize here that it is utopian to expect to reach comprehensive agreements with the Soviet Union on any matter. To think we can obtain them on the most sensitive aspects of their and our national security is deceiving to the American people as well as the entire world.

However, no matter what the dimension or scope of the negotiations there are certain ground rules in the field of disarmament which must be followed if negotiations are to be successful.

Need for Positive Attitude

One of the ground rules is that all the participating governments approach the conference table with a positive attitude. It is imperative that the United States reflect and adopt such an attitude. Unless such an attitude exists on the part of all participants the negotiations will deteriorate to mere propaganda battles in the cold war.

No government, least of all the government of the United States, should ever be casual and negative about limiting the arms race. We must never devise proposals that obviously have no chance of being accepted. Every proposal of ours, and every rejection of proposals from the Soviet, should be given only after the most thoughtful and scrutinizing study.

There has all too often been a tendency for spokesmen in the State Department to brush aside the latest Bulganin letter at the first news flash. Such actions may demonstrate alertness to news but they also reveal an automatic reflex of prejudice and skepticism which weakens our stature and posture of leadership. If we find it necessary to say "no" to Soviet proposals let us do so after careful examination despite the obvious record of propaganda and cold war political maneuvers that have been so evident in past U.S.S.R. proposals. We do no honor to our own character or image by aping the Kremlin.

Case of Soviet Proposal for a Test Ban

For example, we have handled very badly the proposal of the Soviet Union to ban nuclear weapons tests. The Soviet offer, on its face, includes the installation of an inspection system within the borders of each testing state and near each testing site. The purpose of such an inspection system would be to verify the observance of a test suspension.

We rejected the Soviet proposal out of hand. We did not follow an elementary principle in dealing with the Soviet Union. We did not challenge them. By rejecting the Soviet proposal, and not giving cogent reasons for the rejection, we let them score another of their many important propaganda victories.

We should seek to determine what kind of inspection system the Soviet leaders envisage. Is it the type we agreed to in the Korean armistice? If it is, then we and the world should realize that the Soviets are trying to pull the wool over our eyes. The Korean inspection system, as we have since learned to our sorrow, was inadequate. Perhaps the Communists never intended it to work. However, if the Soviets have in mind another type of inspection system and are prepared to consider an inspection system which we believe is adequate, then we should know that too. Above all, when the Soviet indicates a willingness to accept inspection as a component part of a proposal for the cessation of nuclear testing then let us pursue the proposal to its most intimate and minute detail. If the Soviet is prepared to accept genuine, effective inspection within its borders, this could well be the break through the Iron Curtain that is more significant than the launching of the Sputniks.

During the course of the debate on disarmament in the United Nations General Assembly, I wrote to the President suggesting that the United States propose a suspension of weapons tests with appropriate inspection apart from the proposal to stop production of fissionable material for weapons purposes and the other features of our disarmament package.

The President's response was not wholly negative. The Administration is still studying this possibility, he said. The President's letter to me seemed to indicate that the Administration still had an open mind on the matter.

However, five weeks later the President wrote to Prime Minister Nehru and said something quite different. He told Mr. Nehru the United States could not consider separating the test ban issue from a cut-off of fissionable material for weapons purposes.

Could it possibly be that in the intervening five weeks the Administration's so-called study had been completed and the President felt compelled to report on it first to Mr. Nehru, one of the statesmen of the world least likely to be pleased?

Mr. President, I ask unanimous consent to insert into the record at this point the exchange of letters between the President and myself and the President's cablegram to the Prime Minister of India.

November 4, 1957

The President
The White House
Washington 25, D. C.

My dear Mr. President:

I have become increasingly concerned with the recent developments regarding the efforts of the major powers to reach a first step agreement on the control and reduction of armaments. I feel that we are fast approaching a stalemate which will be difficult to break. By this I mean that the United States and the Soviet Union have taken positions which seem to leave little room for compromise.

There is no question in my mind that the major responsibility for the present stalemate rests with the Soviet Union. If the Russians had not insisted on abruptly terminating the London negotiations we would at least be in the position of exploring various possibilities for a limited and safe agreement. However, I also believe that the United States has taken an unnecessarily rigid position in its insistence on combining a two-year ban on nuclear waapons tests with a cut-off in the production of fissionable materials for weapons purposes and also with aerial and ground inspection zones to guard against surprise attack. While I understand the basis of the various parts of the present United States proposals I do not think that their inseparableness should represent an ultimate position.

Throughout the summer months I participated, as chairman of the Senate Foreign Relations Subcommittee on Disarmament, in weekly meetings with the Secretary of State or his deputies regarding the progress of the disarmament talks. These meetings were constructive and gave those of us on the Subcommittee an opportunity to explore the position of your Administration on the disarmament issue. As a result of these meetings as well as the independent research and hearings conducted by the Subcommittee it appears that there is no military reason why a two-year ban on nuclear weapons tests must be accompanied by agreement to cease the manufacture of fissionable materials for weapons purposes. In fact, the present disarmament package of the United States has its disadvantages. One of these is stated as a conclusion of the unanimous recent report of the Senate Disarmament Subcommittee:

> "The subcommittee has concluded that a disarmament agreement must include measures to test the observance of its provisions. Measures for inspection, adequate to safeguard each separate disarmament proposal in the package may, however, when added together, be so extensive as to be impractical or unacceptable. . ."

I would like to suggest, Mr. President, that the United States, after consulting with its allies, declare its willingness to negotiate separately on a ban on nuclear weapons tests for a two-year period with the only condition being agreement on an effective inspection system with United Nations supervision to insure that the ban is being scrupulously observed.

It is my belief that such a proposal would be a safe and reasonable one. It would be a concrete step toward ending the arms race. It would also enable the people of this and other countries to learn more clearly whether the Soviet Union is truly ready to accept effective inspection. We cannot challenge the intentions of the Soviet Union on inspection unless we are in a position to negotiate on a test ban irrespective of the other measures in the Four Power disarmament proposal.

I have discussed this matter with Governor Stassen. These discussions have convinced me that this course of action would be in the best interests of the United States and should be proposed by the earliest possible date to the United Nations General Assembly.

Respectfully,

Hubert H. Humphrey

CC: Secretary Dulles
Governor Stassen
Ambassador Lodge

THE WHITE HOUSE

WASHINGTON

November 8, 1957

Dear Senator Humphrey:

Thank you for your letter of November fourth. I appreciate your comments based upon your observations and review in your Subcommittee.

The entire subject of nuclear tests and its relationship to disarmament agreement is under continuing study and review. I am referring copies of your letter to the Secretary of State, the Secretary of Defense, and the Chairman of the Atomic Energy Commission for their consideration in connection with their own recommendations to me. Your own views will be helpful to us.

With best wishes,

Sincerely,

/s/ Dwight D. Eisenhower

The Honorable Hubert H. Humphrey
United States Senate
Washington, D. C.

Text of Eisenhower Cablegram to Nehru

Dear Prime Minister:

I have read with great sympathy your earnest and eloquent public appeal of Nov. 28 on disarmament. This is a matter which has also concerned me deeply for a very long time.

In the days immediately following the end of World War II the United States proposed that the dreadful power of the atomic bomb, which we alone then possessed, be forever denied all nations. We hoped, instead, that the wonders of the nuclear age could be devoted wholly to the uses of peace. This plan was refused and we were left with no choice but to maintain our armed strength. Since this time the United States has continued an unremitting effort to achieve a just system of disarmament and a secure peace for all nations.

We have repeatedly stated our readiness, indeed our anxiety, to reduce the possibility of war through arms regulation and control, to stop tests of nuclear weapons and to devote a part of our huge expenditures for armaments to the great causes of mankind's welfare. Our only concern is that these measures be accomplished in a way that will not increase the risk of war or threaten the security of any nation.

We earnestly believe that the plan which we joined with the United Kingdom, France and Canada in suggesting at the London disarmament talks on Aug. 29 offers a meaningful opportunity for removing fear and gaining international trust. It is a source of great personal regret to me that these proposals have not so far been found acceptable by the Soviet Union even as a basis for negotiations.

In these circumstances, I have been able to reach no other conclusion than that, for the time being, our security must continue to depend to a great degree on our making sure that the quality and quantity of our military weapons are such as to dissuade any other nation from the temptation of aggression. The United States, I can assure you unequivocally, will never use its armed might for any purpose other than defense.

I know that the subject of testing of nuclear weapons is of understandable concern to many. I have given this matter long and prayerful thought. I am convinced that a cessation of nuclear weapons tests, if it is to alleviate rather than merely to conceal the threat of nuclear war, should be undertaken as a part of a meaningful program to reduce that threat.

We are prepared to stop nuclear tests immediately in this context. However, I do not believe that we can accept a proposal to stop nuclear experiements as an isolated step, unaccompanied by any assurances that other measures -- which would go to the heart of the problem -- would follow. We are at a stage when testing is required particularly for the development of important defensive uses of these weapons. To stop these tests at this time in the absence of knowledge that we can go on and achieve effective limitations on nuclear weapons production and on otherelements of armed strength, as well as a measure of assurance against surprise attack, is a sacrifice which we could not in prudence accept. To do so could increase rather than diminish the threat of aggressions and war.

I believe that bolder and more far-reaching measures are required. Specifically, I believe that any government which declares its desire to agree not to use nuclear weapons should, if they are sincere, be prepared to agree to bring an end to their production. Agreement to devote all future production of fissionable material to peaceful uses is, as I see it, the most important step that can be taken.

Together with this we have proposed that we begin to transfer to peaceful uses, on a fair and equitable basis, fissionable material presently tied up in stocks of nuclear weapons. We believe this is the way to a true reduction of the nuclear threat and to an increase in confidence among nations. So far we have not had a reasoned explanation from the Soviet Union of whatever objections it might have to this program.

I agree that it is in the power of my country along with those others who possess nuclear weapons to put an end to the fear and horror which the possibility of their use imposes. I want to assure you with all the sincerity of which I am capable that we stand ready, unbound by the past, to continue our efforts to seek a disarmament agreement, including the cessation of nuclear testing, that will promote trust, security and understanding among all people.

Sincerely,

Dwight D. Eisenhower

* * *

Importance of Adequate Preparation

Along with the need for a constructive attitude toward the problem of disarmament, there is the requirement of adequate preparation and an expenditure of considerable effort.

A few comparisons of our effort to perfect weapons with those made on behalf of armaments control are revealing. We are all somewhat familiar with the energy, resources, and funds behind the production of a new missile -- hundreds of millions of dollars, detailed blueprints, hundreds of contracts and subcontracts, frequent tests, elaborate facilities, and thousands of individuals, each striving to perfect a single weapon. And all this effort goes into a project which we hope will never be sent on its mission. Major General Schriever, who is in charge of the Air Force ballistic missile program estimated that over 75,000 persons are engaged just in perfecting the Atlas Intercontinental Ballistic Missile.

Compare this to the kind of effort and preparation we are making to realize progress on arms control. The Disarmament Office in the last fiscal year spent some $530,000 and in fiscal 1956, expenditures totaled $450,000. Estimates for fiscal 1958 show a reduced budget of $375,000.

Mr. Stassen has a staff of about 40. I am told this staff is being reduced by half. In the meantime, the staff in the State Department has not appeared to have been augmented. The Defense Department has had one or two individuals working on arms control in the office of International Security Affairs. The Atomic Energy

Commission, to my knowledge, has no one assigned to work on control of nuclear materials except those who are working on the regular U.S. bilateral and international atomic energy inspection programs.

This is the total effort at the staff level of the Executive branch assigned to secure progress on disarmament. It would seem to me that a problem as complex and as interrelated to our entire defense and foreign policies should command an effort vastly greater than this.

The Disarmament Subcommittee made definite recommendations regarding the type of effort that the Executive branch ought to make in order to be thoroughly prepared regarding all arms control possibilities. The Subcommittee suggested in its report the "creation of special advisory groups of non-governmental experts who are especially knowledgeable regarding problems related to disarmament." The Subcommittee also recommended that the President and the Secretary of State make sure that the Head of the Office of Disarmament has the necessary funds and authority to carry out his assignment.

The Congress should determine whether the Administration is considering and acting seriously on these recommendations. Unfortunately, I fear the opposite has been done. The Disarmament staff is being reduced. The Office of Disarmament has an uncertain role in the State Department. No special study groups have been created.

A few weeks ago I added a personal recommendation with respect to the matter of preparation and effort devoted to disarmament. When I heard that Mr. Stassen might be leaving the government I wrote to the President to give my own views regarding the continuation of the Special Office on Disarmament. I also referred to the advice contained in the Subcommittee's report. I ask unanimous consent to insert this exchange of letters into the record.

December 27, 1957

The President
The White House
Washington 25, D. C.

Dear Mr. President:

Recently I have noticed reports in the press to the effect that the Office of Disarmament within your Administration is about to be reduced considerably in size and function. I hope this it not true. However, I am taking this means of expressing directly to you my personal concern over such reports and my apprehension over their apparent accuracy.

The problem of armaments control, as you know, is as complex and difficult a problem as any facing this country. Given continued Soviet intransigence, it may be insoluble. In any case, it will not be solved easily, for we do not have the sole power to achieve a solution. However, the United States has a tremendous and continuing obligation to the people of all nations to put forth our very best efforts to achieve some measure of control over the new weapons now being produced and soon to be spread throughout the world. We must not only say, and say convincingly, that we are devoted to finding new avenues of approach. We must actually, seriously, make these appraoches.

There have also been press statements indicating that your special assistant for disarmament may be resigning his post. If this is true, I hope his successor will be given all the support he deserves in the performance of his difficult assignment.

Last September, the unanimous and bipartisan report of the Senate Disarmament Subcommittee made several very pertinent recommendations regarding the organization of the Disarmament Office. I hope that you will not consider it to be presumptious if I quote the following from that report:

> "The Subcommittee agrees that the Office of Disarmament should be maintained within the Department of State. It should be adequately staffed by competent personnel experienced in the various aspects of arms control . . . The Subcommittee believes that although the Executive Branch has made a considerable effort to resolve the many issues confronting it is formulating disarmament policy, a still greater effort should be made. The President and the Secretary of State should make sure that the head of the Office of Disarmament has the authority and the funds to make this effort. If they are not so confident, then the Subcommittee suggests that the President consider whether the Congress should be asked to grant the necessary authority and to appropriate the needed funds."

Mr. President, I believe these recommendations should be taken seriously and acted upon, now that this matter is up for review.

As Chairman of the Senate Foreign Relations Subcommittee on Disarmament, I have made a genuine effort to treat the problem of arms control in a bipartisan spirit. I have tried to tender my personal suggestions or criticisms primarily in private in the hope that the Administration would give them careful attention, and that if they were rejected, I would be given a reasonable explanation of why a different course should be pursued.

In all honesty I wish to say now, Mr. President, that I find myself increasingly in disagreement with many of our official policies and attitudes. I find that true with respect to the position taken on nuclear weapons tests as expressed in your letter to Mr. Nehru, on the inadequacy of our proposals at the NATO Conference, and on our apparent inability or unwillingness to reexamine our entire disarmament package to determine whether it should be modified.

These issues are by no means dead. Their disposition will be affected by the disposition made of the Office of Disarmament itself.

Sincerely yours,

Hubert H. Humphrey

THE WHITE HOUSE

WASHINGTON

January 3, 1958

Dear Senator Humphrey:

I appreciate your thoughtful letter on the always difficult subject of disarmament. As your letter indicates, I amd my associates are at this very time reappraising the various problems in all of the aspects that you mention. Your personal suggestions will be helpful, and I thank you sincerely for sending them to me.

With best wishes,

Sincerely,

/s/ Dwight D. Eisenhower

The Honorable Hubert H. Humphrey
United States Senate
Washington, D. C.

* * *

I wish to make one further comment regarding the matter of preparation for disarmament negotiations.

Subcommittee's Efforts to Learn of Task Force Studies

Mr. Stassen, when he was first appointed as the President's Special Assistant for Disarmament, made a special point of announcing the creation of eight task forces, each dealing with a different aspect of inspection -- inspection for nuclear materials, aerial inspection, army inspection, navy inspection, budget and financial inspection, communications, industrial and power inspection, and steel inspection.

In telling of these task forces, Mr. Stassen said: "As a result of their studies, . . . I believe we shall have something we have never had before -- a detailed operating manual of what to inspect, how and where it would be inspected, a knowledge of what can and cannot be profitably inspected if we seek to provide a safeguard against surprise attack and to supervise an international arms limitation agreement."

It was announced that when the task forces completed their work United States policy would have a "firmer foundation" and our negotiating position would be enhanced.

All of us would agree that the creation of these task forces was a commendable act and their assignment covers a key element in our country's quest for a safe and workable arms control agreement. Our Subcommittee naturally became interested in the results of the eight task forces. And so we made inquiries regarding them.

Our efforts to learn about the task forces have been fruitless. When we first asked Mr. Stassen whether the Subcommittee might be informed regarding their work, we were told that the reports were not in a form that would be useful to the Subcommittee.

Some months later I inquired again, this time of Secretary Dulles. At that time, the Secretary assured me that the task force reports would be available whenever the members wished to see them. Subsequently, I addressed a letter to Mr. Dulles indicating that the reports would indeed be useful to studies being undertaken by the Subcommittee. Mr. Dulles first responded by suggesting I see another document. When I repeated my request in another letter, Mr. Dulles replied that the task force reports were prepared for the President and that the Department of State had no authority to release them in any manner whatsoever.

I than addressed a letter to the President inquiring whether the results of the task forces might be made available to the Subcommittee. The President's reply was in the negative. He gave as his reason of refusal that the task force reports came under the cloak of Executive privilege and he indicated also that no useful purpose would be served to have anyone else see them besides the few who needed to have access to them. I ask unanimous consent to place at this point in the record the correspondence regarding the request to gain information on the task force reports.

* * *

September 16, 1957

The Honorable
John Foster Dulles
Secretary of State
Washington 25, D. C.

Dear Mr. Secretary:

In your appearance before the Subcommittee on Disarmament on June 27, 1957, you stated that you would make available for use of the Subcommittee the studies on inspection prepared by the task forces of experts appointed by Mr. Stassen, and I said I would contact you when the material was needed. I have now requested the staff of the Subcommittee to undertake a study on inspection of an arms control agreement and would like for them to read the task force reports for background information.

Could you arrange to have them sent to the Foreign Relations Committee in Room F-53 in the Capitol, attention Mrs. Ellen Collier. Or, if you prefer, a member of the staff could come to the State Department to read the reports.

Sincerely,

Hubert H. Humphrey
Chairman
Subcommittee on Disarmament

DEPARTMENT OF STATE
WASHINGTON

October 3, 1957

Dear Senator Humphrey:

I have looked into your request of September 16 for material to assist in a study of inspection of an arms control agreement. I understand that, at your request, the Department has sent you a copy of a Department of Defense report entitled "Outline Plan for Implementation of an Aerial Ground Inspection System in First Phase Disarmament."

I hope this will prove to meet the needs of the study you have in mind. If it does not, representatives of the Department would be glad to discuss the subject with members of the Subcommittee staff.

Sincerely yours,

/s/ John Foster Dulles

John Foster Dulles

The Honorable
Hubert H. Humphrey,
United States Senate.

* * *

October 17, 1957

The Honorable
John Foster Dulles
Secretary of State
Washington, D. C.

Dear Mr. Secretary:

Your letter of October 4 indicates that there may have been some misunderstanding as to the material on inspection that the Subcommittee on Disarmament is attempting to secure. We would like to see the reports on inspection which were prepared by the eight task forces commissioned by Mr. Stassen in 1955 to study various aspects of inspection. The heads of these task forces were Dr. Ernest O. Lawrence, Gen.

James H. Doolittle, Vice Admiral Oswald S. Colclough, Lt. Gen. Walter Bedell Smith, Benjamin Fairless, Walker L. Cisler, Dr. Harold Moulton and Dr. James B. Fisk. As I mentioned in my letter to you of September 16 you stated before the Subcommittee on Disarmament on June 27, 1957 that you would make available for use of the Subcommittee the studies prepared by these task forces.

I should appreciate it if a representative of the Department of State could discuss the matter with Miss Betty Goetz, the Staff Director of the Subcommittee on Disarmament.

We did receive the "Outline Plan for the Implementation of Aerial-Ground Inspection System in the First Phase of Disarmament" which you mentioned in your letter. While this was helpful it was a study of only a limited phase of inspection and apparently was prepared by the Department of Defense rather than a task force group.

Sincerely,

Hubert H. Humphrey
Chairman
Subcommittee on Disarmament

* * *

DEPARTMENT OF STATE
WASHINGTON

November 6, 1957

Dear Senator Humphrey:

I have your letter of October 17, in which you identify eight Task Force studies on inspection which the Senate Subcommittee on Disarmament would like to examine.

I find that these studies were prepared under the direction of Governor Stassen prior to his association with the Department of State. I have checked with Governor Stassen, and he tells me the studies were prepared with the understanding that they would be for the express use of the President. We do not, therefore, believe that we can properly make them available to the Subcommittee.

I regret that under the circumstances I cannot send you a more favorable reply in this matter.

Sincerely yours,

/s/ John Foster Dulles

John Foster Dulles

The Honorable
Hubert H. Humphrey, Chairman
Subcommittee on Disarmament,
United States Senate.

* * *

The President
The White House
Washington 25, D. C.

My dear Mr. President:

On October 7, 1955, Mr. Harold Stassen, as your Special Assistant for Disarmament, announced that eight task force study groups had been appointed to make "a new, fundamental and extensive expert study . . . of the methods of international inspection and control." It seemed to me that the appointment of these task forces was commendable in view of the importance of inspection in any agreement on the control and reduction of armaments.

It is my feeling that the problems of inspection in a disarmament system need to have a great deal of attention by all those concerned with arriving at a safeguarded agreement. Consequently I asked Mr. Stassen whether the reports of the task forces could be made available to our Subcommittee. His response at the time was that the reports were not in a usable form. Subsequently, I repeated my request to Mr. Dulles, and although he first agreed to make the reports available, he later indicated that the task force reports were prepared only for your use. I now, Mr. President, ask of you whether the Subcommittee might have the task force studies made available to it for study. I am sure that the findings of the various task forces on inspection would give the Subcommittee on Disarmament valuable insight into the problems involved in reaching a disarmament agreement and be an aid as background material in the study of disarmament which the Subcommittee is conducting.

You can be assured that any classification of the material would be scrupulously observed in the event you could see fit to extend to us access to the task force reports.

Respectfully,

Hubert H. Humphrey

* * *

THE WHITE HOUSE
WASHINGTON

December 4, 1957

Dear Senator Humphrey:

I have your letter asking that I make available to your Disarmament Subcommittee the eight Task Force studies on international inspection and control that were prepared as a basis for policy decisions in the field of disarmament. These studies were prepared for the National Security Council and for my own use, and I prevailed upon various individuals to undertake these studies on this understanding. In view of this circumstance and the nature of the information these studies contain, I believe it would not serve the public interest to make them available outside the very limited group that has had to have access to them.

With best wishes and warm regard,

Sincerely,

/s/ Dwight D. Eisenhower

The Honorable Hubert H. Humphrey
United States Senate
Washington, D. C.

* * *

The decision of the President in this matter is precisely the same as it was in connection with the request of the Senate Preparedness Subcommittee concerning the Gaither report. It illustrates the difficulty of committees of the Congress in obtaining valuable information in order to carry out their responsibilities.

Suggestions for Future Negotiations

I now turn to a consideration of how our present arms control policies should be modified and to what extent new policies should be devised and tried.

My first suggestion is one I alluded to earlier.

We should take some of the points in the present disarmament package and break them up and offer them as separate proposals.

1. Suspension of Nuclear Weapons Tests

To me, acceptance of an agreement on either one of two of these proposals would be significant. One is the inspection system to verify a suspension of nuclear weapons tests. The other is the inspection system for the cessation of production of fissionable materials for weapons purposes.

As to nuclear weapons tests, I believe that public opinion in the United States and throughout the world would support the suspension of these tests provided an adequate inspection and detection system can be installed in all testing countries and close to all possible test sites.

It has never been clear to me, all of the explanations and arguments of the Administration notwithstanding, why the United States insists a test suspension with inspection safeguards should not be proposed as a separate measure.

President Eisenhower, in his cablegram to Prime Minister Nehru, gave the impression that weapons tests were not important as a factor in halting the arms race. He said, "I do not believe that we can accept a proposal to stop nuclear experiments as an isolated step, unaccompanied by any assurances that other measures -- which would go to the heart of the problem -- would follow." In the first place, the term "heart of the problem" is a new way of stating the objectives of our disarmament policy. I thought it was to be a "first step," a "start toward world disarmament." I would like to know whether the President's cablegram represents a departure in the description of our proposals.

I agree with the President that a cut-off in the production of fissionable material for weapons purposes constitutes the heart of the nuclear weapons problem. But the testing of weapons is not insignificant. A suspension of tests would retard, and I hope prevent, the spread of the production of these lethal weapons to other

countries. According to Admiral Strauss in a letter to the Disarmament Subcommittee last June, "there is no substitute for tests to determine the reliability of a weapon, conventional or atomic." What this means to me is that a test ban would freeze nuclear weapons development where it is now in the United States, the U.S.S.R., Great Britain, and possibly France. According to the former Secretary of Defense this would not preclude testing of missiles. If it did, a new problem would be presented.

Freezing nuclear weapons development at present levels should involve no threat to our security, since we have been assured that we are ahead of the U.S.S.R. in this aspect of weapons technology.

Assuming, therefore, we are equal or ahead of the U.S.S.R. on nuclear weapons development then I think we should press for an agreement on an inspection system to verify the suspension of these tests. I repeat, to gain admission to the U.S.S.R. for inspection by an International Agency, would be a political and technological breakthrough second to none.

Now I wish to turn to the other point in the present United States disarmament package worth exploring as a separate agreement. That is the proposal to cease production of fissionable materials for weapons purposes.

2. Cessation of Production of Fissionable Material For Weapons Purposes

This proposal, according to the Administration, is considered to be the most important of all the points in the package. We should remove it from the package and offer to negotiate on it separately.

The Soviet Union has never flatly rejected this proposal although the Soviets have never appeared enthusiastic about it.

Negotiations for a cut-off would center on the inspection system needed to verify the production ban. The Soviet Union undoubtedly is fearful of such an inspection system. Our negotiators must press harder to persuade Mr. Khrushchev and his subordinates that an inspection system to verify a cut-off of production of fissionable material for weapons purposes is not only essential but urgent if the world ever expects to put a ceiling on the amount of available nuclear ammunition.

Devising an adequate and acceptable inspection system must be determined by the experts and the negotiators. The Administration apparently thinks it would not be difficult. Admiral Strauss has indicated in regard to inspection for a cut-off that "while an adequate system of control and inspection cannot be simple, nevertheless it should be feasible to install such a system." The French weapons control expert, Jules Moch, has asserted that, assuming all nuclear facilities are declared or are known, "on the whole, less staff is required in a large country to control the cut-off of manufacture for military purposes than to verify that there are no secret explosions." Mr. Moch further asserts that as of this time there are less than 100 nuclear facilities in the world that would need to be inspected.

3. New Study Groups Needed

With respect to the requirements for both the inspection system for a cut-off of production and for a suspension of nuclear weapons tests, I propose that the Executive branch appoint two teams of prominent and highly qualified nuclear scientists and weapons experts. One should be charged with making a complete and thorough study of the requirements of inspection for a test ban; the other group for inspection for a cut-off of production. These two groups should offer to meet with comparable scientists and nuclear experts from the Soviet Union in order to devise inspection systems acceptable to both countries. If the U.S.S.R. refuses both of these proposals then we should try such a proposal on the non-governmental level. The United States National Academy of Sciences could appoint two teams of weapons experts. These teams might then negotiate with the Soviet Academy of Sciences to determine whether they could agree on the necessary requirements of an inspection system to verify a test ban on the production of fissionable material for weapons purposes.

The Administration should also create special groups of experts both in and out of government to study in relation to arms control such problems as posed by the succesful testing by the U.S.S.R. of an intercontinental ballistic missile. We should also be investigating to what extent the achievements of the launching of earth satellites will affect present plans for aerial inspection to prevent surprise attack.

Arms Control in Specific Areas

Mr. President, I now offer some suggestions regarding arms control measures in specific geographical areas. I preface my remarks here by quoting from the report of our Disarmament Subcommittee. The Subcommittee concluded that: "Reducing international tension and diminishing the threat of war should be pursued both through efforts to settle political problems and through negotiations to curtail and control armaments." The report also noted that: "Substantial reduction of armaments cannot be made without corresponding progress on the resolution of at least some political issues." Therefore it seems that the United States should be adopting and pursuing concertedly and actively policies designed to reduce international tension in specific areas to the end that armaments themselves can be cut back.

I am thinking of the division of Europe, the tension in the Middle East, and problems connected with the existence of two Koreas, two Chinas, and the two countries North and South Vietnam. The problems confronting these areas are political as well as military. In each area the United States is heavily committed. And the tragedy is that in all five of these areas our policy has been essentially of a military nature. If tension increases, our reaction has been to send more armaments and more military aid. While the immediate situation in each or any of these areas may require more arms or military aid, surely for the long run, we should lay plans and study alternatives designed to relax tension through solutions based on both political settlements and arms control measures. At least, we must try. Hardware consignments to friendly nations and increased armaments to American troops and bases abroad are no substitute for an effective foreign policy. Their purpose is to provide defense capabilities so that we can pursue political and diplomatic policies. They are effective only when they are a part of a broad foreign policy and national security system.

1. Armaments Limitations for the Middle East

Adroit Soviet diplomacy and propaganda have made a shambles of the Eisenhower Doctrine. The only possibility of rescuing that doctrine and American Middle East policy generally is to face up to the challenges of that area in a variety of specific ways.

We and the Soviets are engaged in an arms race in the Middle East that is inconclusive, costly and dangerous. We should initiate proposals to end the arms race in the Middle East by an effective embargo against shipments from any outside source other than under United Nations auspices. To this end, we should seek the establishment by the United Nations General Assembly of a Special Commission

on Arms Traffic, which Commission would be charged with responsibility for proposing early recommendations on regulating all flow of non-United Nations materiel into that region.

We should strengthen the United Nations Emergency Force in the Middle East for its continued and further use in this area if necessary.

We should seek agreement on a pilot project, open-skies aerial and ground inspection system.

We should propose the establishment of a United Nations Good Offices Commission, whose purpose would be to reduce tensions in the Middle East by promoting direct negotiations between the current antagonists and mediating among them if direct negotiations prove to be impossible.

We should reaffirm our interest and support for long-term regional economic development programs. Toward this end, we should take the initiative in the United Nations in proposing a Middle East Development Authority, as an administering agency for the mutual pooling of capital and technical aid in the region.

I consider these proposals to be sound, practicable and indicative of the positive approach which the United States must adopt.

2. Political Settlement in Europe

The second regional arms control proposal concerns Europe. There are three major European security and political problems. One is the continued division of Germany. The second is the subjugation of the majority of the peoples in the satellite nations of Eastern Europe through the occupation of Soviet military troops. The third is the constant danger that either one of these problems could erupt into a European conflagration. If Soviet intermediate range missiles and the 170 divisions of the Soviet army descended upon Western Europe, the present state of NATO defenses would be hard pressed to stop them.

So far the answer of the Executive branch to these three problems is to arm Western Europe with a variety of missiles when they become available. It is a proposal backed by many of us in Congress on both sides of the aisle.

I submit, however, that when the problems and the proposed solution to them are lined up side by side, the solution looks pretty weak and inadequate.

The Senate Subcommittee on Disarmament gave some attention to the problem of Germany in its report of last September. I would like to quote now from that report.

> The achievement of a free and reunified Germany would probably involve some ceiling on the size of its armed forces and its supply of armaments. Such restrictions to be binding, however, must be accompanied by similar restrictions on the armed forces and armaments of other nations in Europe as well as the United States and the Soviet Union. These restrictions should apply to the European NATO countries and the Warsaw Pact countries of Eastern Europe, and would involve relocation and possible reduction of Soviet forces in Eastern Europe and United States forces in Germany.

I think it is important to emphasize here that the report stated that:

> If United States forces were to be withdrawn from Germany provision would need to be made for stationing them elsewhere on the eastern side of the Atlantic so long as NATO military strategy requires it.

The Subcommittee concluded that:

> . . . if German reunification is to become more than a slogan, Western policy must be both persistent and realistic. Neither the Western Powers' nor Soviet policy on German unification appears to be sufficiently flexible to encourage progress toward the solution of this problem.

This section of our report, particularly the last sentence, is just as applicable today as it was five months ago when the report was filed. I urge the Administration to consider the findings and suggestions of the Subcommittee on this question.

It is on this point which I believe Mr. George Kennan, former United States Ambassador to the Soviet Union and one of the foremost American experts on Russia, has made a significant contribution. I do not agree with everything that Mr. Kennan has said but I do believe he has helped to jar many of us loose from a stereotyped kind of thinking about European problems.

We must face up to the possibility of change in the political leadership of our major allies. There are powerful political forces already advocating a withdrawal of allied troops from Germany and Soviet troops from Eastern Europe. If for no other reason than this, it would be prudent for NATO political and military advisers to formulate various plans and alternatives that could serve as the basis of negotiations with the Soviet Union. As the Subcommittee report notes, one of the problems that must be solved in this connection is where else on the eastern side of the Atlantic American troops could be based.

If such a withdrawal did take place Germany would not turn Communist nor even neutral toward Communisn as an ideology or power system. But, a withdrawal of Soviet troops from Eastern Germany and Poland could result in a political upheaval of significant proportions and meaning for a free Europe.

3. Arms Control in Asia

A third area in which tension exists is the Far East. In Korea there is a divided country with each half heavily armed and separated by a thin buffer zone across the middle of the peninsula.

When the Communists violated the terms of the armistice and brought new armaments into North Korea, the United States as the agent of the United Nations felt obliged to protect the forces under its command by modernizing their military equipment.

If, however, we expect to reduce tension in the area it will be through a reduction of armaments available to both sides rather than through a buildup of armaments. Here, then, is another case where the United States should attempt to win support in the United Nations to limit, through adequate inspection provisions, the number of troops and amount of military equipment based in North and South Korea.

I would at least like to see a plan submitted. We have not, to my knowledge, made any proposals of an affirmative nature regarding the division of Korea in over three years. It is time to take positive steps toward bringing a more stable situation in that part of the world. Furthermore, a reduction of armaments, which could be verified by an adequate inspection system would furnish an excellent pilot project to test the adequacy of aerial and ground inspection which might be applied in a more general arms control agreement.

Another area in Asia which is frought with tension and large armaments is the area of China. If we expect to achieve any disarmament among the major powers, some settlement of the China issue must take place. Surely, no thinking person could envisage an overall disarmament agreement with Communist China excluded. Such an arrangement would be an open invitation for Soviet evasion of arms agreements by collusion with Red China.

United States policies regarding China need a thorough reexamination, especially if we are to seriously pursue disarmament.

Competent observers and students of China and Asia have warned us that Communist China is the new aggressive force in Asia. We have commitments in the Asian area. We have already suffered from one terrible example of Chinese Communist aggression. It would be reckless and in fact dangerous to our national security and vital interests to reduce substantially our military strength even if the Soviet Union did likewise while at the same time Communist China was exempt from any control, inspection, and reduction of its military machine.

4. Arms Control in Latin America

Latin America is another geographical area in which armaments expenditures of individual nations might be reduced. This area offers especially hopeful possibilities because of its highly developed machinery for the settlement of inter-American disputes. The Organization of American States, set up in 1948, and the Inter-American Treaty of Reciprocal Assistance of 1947 have provided means to handle any controversy which might arise between the member nations.

The success of the inter-American system does not rest on the absence of political disputes among the nations of the area. As in every area, some grievances of long duration remain. Therefore, it is not the lack of political and economic problems which is responsible for hemispheric peace. It is the creation of a system of handling disputes peaceably and the determination by the member nations to make the system work that give the Americas their admirable record.

The continued and successful operation of the inter-American system should make possible a beginning on the reduction of armaments of the individual countries and also a decrease in United States military aid to the region. It would be much more desirable if United States aid and Latin American national budgets could be geared primarily to developing Latin American economies and raising living standards of the people.

Concluding Remarks

Mr. President, I have made a number of suggestions which I hope will be given serious consideration by the members of this body and by the Executive branch. My aim in all of these proposals is to make some headway toward diminishing the threat of a total and terrible third world war, toward achieving some settlements of the major political problems that account for the persistence of international tension, and finally toward reducing the gigantic burden on all peoples of large armament expenditures.

I realize, too, that the United States cannot do these things by itself. The rulers of international communism must be brought to realize that the only alternative to peace is destruction.

We need to pursue our foreign policies and programs in close consultation with our allies in NATO, with the newly created nations as well as our old friends in the Middle East, Asia and Africa, and with our neighbors in our own hemisphere. We need to make our alliances fortresses of mutual respect, partnership and positive programs. And above all, we must strive unceasingly to strengthen the most important of all international institutions dedicated to peace, the United Nations.

Our sincerity, integrity of purpose, and the realistic nature of our proposals can serve to mobilize the understanding, support, and friendship of the world's non-Communist peoples. To have them and their governments working with us is the true meaning of negotiating from strength -- strength of conviction and strength of support.

Some of my colleagues in this body may disagree with my suggestions. Disagreement, however, often serves a useful purpose when it helps to clarify thought. I want to be helpful to our President and to the Secretary of State because the problems we face affect the very survival of our great country. The President deserves all the support we can give him in the quest for a just and enduring peace. As he said in his State of the Union address: "But of all the works of peace, none is more needed now than a real first step toward disarmament."

I firmly believe that we must keep trying to negotiate as long as there is a faint hope of success. The people of this and all countries desperately want and need peace. The nation which by its dedication, persistence, boldness, and imagination persuades people that it is the champion of peace will have universal support. This is what the United States must represent to the world.

America's foreign policy needs the inspiration of the "works of peace" -- not merely the words of peace.

The works of peace are the very heart and core of our tradition and philosophy. Health care for the sick, food for the hungry, jobs for the unemployed, homes and shelter for the needy, opportunity for youth -- these are the concrete works of peace we must do. This great promise of the good life, with "liberty and the pursuit of happiness" is one we can fulfill, and we should move ahead vigorously to do it.

We have an opportunity to recover that generosity, humanitarianism and compassion that in the past won for us the world's admiration and respect, and even turned our enemies into friends.

Let us be the people of progress, the people of performance, and the people of peace.

Hunt, Clinton

March 3, 1959

Mr. Clinton N. Hunt
London Terrace
440 West 24th Street
New York 11, N.Y.

Dear Mr. Hunt:

Thank you for your letter of February 19. I much regret that my own commitments are so heavy between now and July 1, when I take a year's leave of absence, that I cannot undertake anything in addition.

Sincerely yours,

KRM:skh

WORLD PEACE IN OUR TIME

"THE THINKER"
RODIN

Mr. Edward R. Murrow
c/o W.C.B.S. - T.V.
485 Madison Avenue
New York 22, New York

Dear Edward Murrow:

I have been a steady and interested observer of many of your TV Programs, and fully realize the Topflight position occupied by your presentations on TV.

I happen to be the Founder of the WORLD PEACE Foundation of New York State, which was Incorporated two years ago, and it is dedicated to a Maximum of Action and a Minimum of Talk.

We have, I believe, the only Definite and Explicit WORLD PEACE Plan and Formula extant today, and I am enclosing a Record of our Publications Program this year, which will, I believe, have a very marked effect upon World Thinking. There will be 12 Brochures, 6 Books, a new WORLD PEACE Magazine and at least one interesting News Letter, per Brochure attached. Approximately 75% of the material to be embodied in these various Documents has been written over the past 32 years.

I have spent approximately $8,000. out of my own pocket, some of it borrowed over the past five years, and have devoted approximately 5,000 hours over the same period, and expect to devote my customary 1,000 hours to our Foundation in 1959, without compensation.

The purpose of this letter is to submit for your consideration the possibility of a series of six or eight Panel Programs, represented by 40 to 50 Panelists, consisting of the leading experts in each of the categories shown on the attached list, in order to ascertain their individual opinions of the Causes of Wars since the Dawn of History, and their individual theories on how best to stop War and achieve WORLD PEACE.

I firmly believe that this could provide a very interesting, exciting and informative Program, in which the American people would be extremely interested, in view of the timeliness of the subject.

I also believe that it would not be difficult to obtain Financial Backing from the largest Foundations in the Country, similar to the "Fund for the Republic".

You are the best judge of whether or not this idea could achieve success, and in the event it is undertaken and should prove successful, there are a great many Viewpoints, Subject Matters and Angles that can be worked out from the Ideas contained in the 34 Points included in our WORLD PEACE Plan and Formula, which might carry on this Panel Idea indefinitely.

February 19, 1959

"All that is necessary for the Triumph of Evil is that good men do nothing."—*Edmund Burke*

If the above thoughts are of interest to you, I would like to phone you and have you have Lunch or Dinner with me in the near future. We could meet at the Museum, per sheet attached (no connection whatever with my personal WORLD PEACE Foundation Project). I believe this meeting could be very productive, and then I would like to show you the data I have at home, at London Terrace, on the entire subject of WORLD PEACE, supporting our Plan and Formula, and the complete Plan.

I shall await your reply with a great deal of interest.

Faithfully yours,

Clinton N. Hunt

WORLD PEACE FOUNDATION

February 3, 1959

PERSONAL

Mr. Benjamin A. Ross
c/o Alumni Association
New York University
22 Washington Square North
New York 11, New York

Dear Ben:

I gave you a call last Friday, and have been rather busy so have not called you since, but I would very much like to get together with you, either at Lunch, Dinner, the Office, my Home at London Terrace, or what have you.

Our WORLD PEACE Foundation is moving along by leaps and bounds, as we have a definite explicit WORLD PEACE Plan and Formula which is, I believe, the only one in the World today.

Enclosed you will find a bit of our latest data, which will furnish you with a slight idea of the scope of our Plans.

I had a very friendly exchange of correspondence recently with your Brother, Tom, whom I met when we both served on Dick Ettinger's "Committee of 100", for the election of Tom Dewey as Governor of New York State, some time ago.

Jack Raasch and I have had some most interesting, prolonged conferences recently regarding the scope of work our Foundation is undertaking, and, I believe, has a certain degree of interest.

One of the purposes of this letter is to get your opinion of whether or not it is advisable, purely from the viewpoint of the N.Y.U. Men in Finance Club, to devote one of its Meetings to our WORLD PEACE Plan. I would like you to consider this matter cold-bloodedly, not from the view of doing us a favor.

I figure Dean Collins, one of our prime members, could be M.C. and make a five or ten minute Introductory Speech, then possibly Dr. Nadler might make a ten minute Speech regarding the effect of Economic Conditions as between Nations and their Contributions to the Causes of Wars. Finally, Papa Hunt could give a 20 minute or so Outline and Analysis of our WORLD PEACE Plan. I believe it could be made very interesting. It would also be nice if Jack Raasch could conveniently be present for a brief talk, if agreeable to him.

I anticipate, in the near future, approaching Dr. Heald, President of the Ford Foundation, with respect to a Grant to our Foundation, and with this, I believe, Jack agrees. In this connection, I would later request of each of you a letter of introduction to Dr. Heald, telling all of the bad things you know about me, as both of you are well-known to him, and I am only another of thousands of N.Y.U. Alumni with whom he has shaken hands.

Please let me hear from you.

Cordially and sincerely,

WORLD PEACE FOUNDATION

PERSONAL

February 3, 1959

Mr. George Cabot Lodge,
Assistant Secretary of Labor
Department of Labor
Washington, D. C.

Dear Mr. Lodge:

WORLD PEACE Plan, Programs and Actions

I note, in an Article in the New York Herald Tribune, first that you are the son of the Honorable Henry Cabot Lodge, Jr., and second, that you are in the employ of the Government. A friend of mine was in the Navy with you, and I have received from him some very nice reports of your friendly association with him.

Enclosed is a bit of data regarding our WORLD PEACE Foundation of New York State, which is only two years old, but has achieved a Target Master Plan and Formula for WORLD PEACE, per Synopsis attached. You will also find enclosed a bit of background material, which has been mailed all over the world.

You will also find enclosed a Planned Program of our proposed Publications, which should reach the public this year, most of them within this next six months, and we also have a Program for immediate action regarding the majority of the Points enumerated in the Synopsis of our Plan. The two Items numbered III and IV will, I believe, be of particular interest to you, and that is why I would request, and strongly recommend, that when you can spare the time on your next visit to New York City, we get together and permit me to show you our Plans, which are all worked out.

The Junior United Nations Organization Council originated with the writer, who is the Founder of the WORLD PEACE Foundation, and will consist of five (5) Representatives, Men and Women, ages 18 to 30, from each of the 81 Nations of the United Nations, appointed in the same manner as the Senior Organization, and I visualize you as the Head or President of this Organization, if you are interested, and the Plans for Action by this Organization are already worked out in complete detail.

I expect to visit the Legal Department of the United Nations within the next fortnight, in order to iron out the formalities essential to the Organization of this Council. I believe the favorable repercussions will be world-wide, especially associated with our WORLD PEACE Plan, which has been called the greatest advancement in WORLD PEACE Literature in a Century. We are essentially an Organization for a maximum of quick Action and a minimum of Talk, of which there is entirely too much in WORLD PEACE circles.

My thoughts, as above, were inspired by the fact that a Senior and Junior United Nations Organization, in which I firmly believe, using the same quarters, thereby cutting down the expense, would be headed by a distinguished Father and Son combination.

I firmly believe that the WORLD PEACE and Political repercussions would be priceless for Humanity's 2,700,000,000 Human Beings.

The SPOTLIGHT ON:

CLINTON N. HUNT

By JUNE L. AULICK

Clinton Nottage Hunt, a powerfully built man dressed in a blue T shirt, yellow slacks and red printed neckerchief, smiled cordially at the door of his London Terrace apartment, 440 West 24th Street.

As he led the way into his sunny living room, a canary sang a greeting while the parakeet in the same cage chirped happily. The six-foot founder of the World Peace Foundation sat down in a big swivel chair behind a desk filled with jars of sharpened pencils, glue pots, scissors and piles of papers. He spoke first of his great-grandfather, Walter Hunt, whose portrait hung near the window.

A blue-eyed gentleman wearing the high collar and voluminous cravat of the 1830's, this Quaker forebear made his contribution to society by patenting approximately 30 inventions including the safety pin and fountain pen. Hunt's repeating rifle was a boon to pioneers in search of food in the wilderness, but his sewing machine, first publicly demonstrated in 1832, was not patented because his wife was afraid it would throw seamstresses out of work.

Clint Hunt, who inherited his ancestor's kindly blue eyes, and appears to have a similar flow of ideas and creative type of mind, returned from reflecting on the past to discuss the subject nearest his heart—World Peace.

"One of the objectives of the Foundation, which was inaugurated in January of this year," he explained, "is to recommend the appointment of a 'Secretary for Peace' in the cabinet. We also plan to concentrate much of our efforts on youth throughout the world. Another aim is to arrange a 'World Peace' course at New York University which I believe will be the first of its kind in any university in the world."

In the opinion of the origina-

CLINTON N. HUNT

tor of the project, 80 per cent of all people believe "there always have been wars and there always will be." Hunt is endeavoring to re-educate this group to the effect that wars are not inevitable.

A graduate of N. Y. U. School of Commerce, he received the University's Meritorious Service Award Medallion in 1937.

He has been associated with Guggenheim Brothers for many years, and is currently Secretary of the Solomon R. Guggenheim Foundation. He also serves as Administrator of Business for the Solomon R. Guggenheim Museum, now occupying temporary headquarters at 7 East 72nd Street until the new Frank Lloyd Wright Museum building is completed at 1071 Fifth Avenue.

(*Reprinted From Chelsea Clinton News, July* 3, 1957)

GUEST EDITORIAL

Secretary for Peace in the Cabinet

The WORLD PEACE Foundation strongly recommends that the President appoints a Secretary for Peace in the Cabinet, with full power to function in that position, with authority comparable to all other cabinet members.

His duties should be to perform a full time job, in that capacity, seeking avenues of approach to all threats to peace throughout the world, analyzing and determining their basic causes, as soon as danger signals first appear, taking every available means of satisfying, eliminating or confining the basic causes before minor matters develop into real issues. "A Stitch in Time."

It might be feared that the duties of the Secretary of War might conflict with the duties of the Secretary for Peace. Why? Not necessarily if the situation is intelligently handled by competent men of good will on all sides.

In times of stress the Secretaries of War and for Peace would team up together on the Prevention of War, and if in spite of all peaceful endeavors, war unfortunately ensues, the Secretary for Peace would immediately make every effort to stop or shorten the duration of the conflict.

A Secretary for Peace backed by the proven high principles and reputation of our country in international relations, backed by the strength and power of the United States, would be an extremely powerful exponent for Peace.

The fact that we have had a Secretary of War in the Cabinet since the birth of our country, and no Secretary for Peace would logically lead me to the conclusion that our leaders, have from the beginning, believed that we would always have wars, and up to now still believe WORLD PEACE is presently unattainable.

Approximately 80% of all individuals believe we have always had wars and always will. A very powerful influence creating or influencing this belief, is the self-evident fact that the majority of our leaders hold the same belief. When we manage to reverse the percentage, so that 80% or 90% of the people and their leaders believe WORLD PEACE will be achieved, these beliefs will inspire them to do something about it and WORLD PEACE will then be a complete accomplishment, and not a hope, a dream or a prayer.

The time was never more propitious than today for the fulfillment of what has in the past been but a dream, viz. WORLD PEACE.

We are in the midst of a New Era, with the greatest possibilities for world-wide PEACE and the world of today and tomorrow will be what we make it. Our fate is in our hands. Yours and mine.

Let us begin at the Top this time. Appoint a Secretary for Peace in the Cabinet to prove to Americans and the World that our leaders, believe and prove by their actions, now, that the time has come to eliminate war from the face of the Earth and that WORLD PEACE is presently attainable.

The psychological effect of this action will give Americans and the Earth's inhabitants, a new Hope, which they badly need, and turn their minds to ways and means of achieving and keeping the Peace.

We should have the effect of reversing the 80% to 90% belief from the "War Forever" category to the "Peace Today" probability. Everything flows from the Top. What the leaders believe and practice today permeates the masses of the people tomorrow.

WORLD PEACE will come eventually. Why not now; or aren't we sufficiently intelligent and civilized as yet?

Until our leaders believe that WORLD PEACE is possible and prove it by their actions, the masses of the people will have every reason to believe we will always have wars.

CLINT HUNT

WORLD PEACE FOUNDATION

October 14, 1958

A DEFINITION OF THE SOLUTION OF A SUCCESSFUL WORLD PEACE PROJECT

COPY

It has been difficult to classify the solution of a successful WORLD PEACE Project, when it is achieved.

Should it be classified as a Plan, a Project, a Pattern, a Thought, an Idea, an Invention or what?

After consideration, I firmly believe that a successful WORLD PEACE Project should be labeled or entitled a Mental Invention as distinguished from a Physical Invention, such as The Safety Pin, The Fountain Pen, The Sewing Machine, The Repeating Rifle, etc., etc.; the same thought processes and intellectual aptitudes are involved in the creation of both classifications.

Clint Hunt

WORLD PEACE FOUNDATION

October 14, 1958

The Causes of Wars have their beginnings in every phase of the relationship between peoples and nations.

The Cure is to place all possible inter-relationships between people on a Cooperative instead of a Competitive basis, thereby demonstrating that a WORLD PEACE Program is a complicated problem with many facets, a major path and a separate bypath for every kind of relationship between Human Beings and Nations.

A definite Target WORLD PEACE Plan or Pattern could be likened to a tree with many branches,

First - the trunk would represent the main path from the roots or earth to the top of the tree, and

Second - the branches would represent the many different human activities that have to be analyzed and studied, and the various actions to be taken as a result of these studies would represent the removal of the sources of friction.

Air Conditioning and many of the tools and mechanical contrivances currently used in our everyday Life are based upon Research and Study of the functions of the Human Body.

A workable WORLD PEACE Plan is based upon Human Beings with respect to their relations with their own families and others.

Clint Hunt

Year 1957

Summary Statement of Expenditures

Books, Pamphlets, Publications and Subscriptions	$ 184.74
Entertaining	174.65
Furniture, Fixtures and Equipment	309.91
Legal Expenses	185.00
Memberships, Organizations, Clubs, Etc.	74.00
Miscellaneous Expenditures	154.00
Phones and Telegrams	20.25
Photos	31.00
Postage	125.40
Printing, Mimeographing, and Photo-Offsetting	385.00
Rent	140.55
Salaries and Wages - Employees	303.60
Stationery, Supplies, Rubber Stamps, etc.	103.20
Translations	33.00
Transportation	22.45
Total Expenditures	**$ 2,246.75**

Mr. Hunt contributed to the work of the WORLD PEACE Foundation, without recompense, in the year 1957, 1196 Hours of his time, equivalent to a $14,950. contribution.

All of the above expenditures of $2,246.75 were expended out of Mr. Hunt's personal funds.

No contributions were requested nor received.

The funds were expended for the organization and management of the new WORLD PEACE Foundation.

Alfred B. Nobel Prizes
Which have Not been Awarded
In the Following 5 Categories from 1901 to Date

Physics	- 6 Prizes
Chemistry	- 8 Prizes
Medicine and Physiology	- 9 Prizes
Literature	- 6 Prizes
Peace	- 15 Prizes

COPY

The first four categories, viz., Physics, Chemistry, Medicine and Physiology, and Literature, are to a certain extent governed by scientific laws, which are readily ascertainable or determinable. Literature, not normally being governed by scientific laws and facts, belongs more in the realm of Art, but the leeway of subject matters is without end and can be treated in any manner that the writer desires.

WORLD PEACE is a rather vast and complicated problem that has been with humanity since its inception and is a mixture of History, Experience, Propaganda, Mystery, Distortion, Ignorance, Superstition, False Leadership, which we are facing today, Selfishness, Fatalism, Lack of Organisation, Tradition and the Emotions, and these complications represent the reasons that the only progress that has been exerted or exercised to date has been evolutionary in character, which has discouraged the best intentions of mankind from attempting a solution. The physical and mental inertia of mankind has also discouraged Leadership in this field.

Our feeling is that this entire problem should be broken down and analyzed into its component parts, beginning with an analysis of the Causes of War, and working through to a final solution. No one remedy can be effective. All phases of this vast, complicated problem should be analyzed down to the basic beginnings, and an overall long term and short term plan outlined, the minds of the analysts should be kept open to any and all suggestions of any kind, every possible avenue should be searched, the process of elimination of nonessential ideas and details eliminated, and the final, definite solutions which present themselves, should be combined in a general overall plan, each path of which should be thoroughly explored, and then prompt action be taken with respect to every planned and contemplated action, concentrating on the solutions which offer the best possibilities.

An open mind must be preserved at all times, even up to the successful final solution, in order to receive the benefit of helpful suggestions from whomever or wherever received, and the elimination of actions which have proven fruitless, toward the final objective.

WORLD PEACE FOUNDATION

RADIO ANNOUNCEMENTS

FREQUENCY MODULATION, RADIO STATION, WBFM, 101.9 MEGACYCLES

Announcements, numbers #1, 3 and 4, have been broadcast over the above mentioned Station, by Mr. Delmar Nuetzman, Program Director, to approximately 500,000 listeners in the past months, advising the public of some of our aims, objectives and methods, and giving them hope that WORLD PEACE could be solved.

Mr. Nuetzman was free to broadcast these Announcements, prepared by us, in his discretion, and I noticed he had not broadcast Announcement #2, "CAUSES OF WAR." Upon my inquiring, he stated that he thought it would be a bit disturbing to people because they are receiving vivid descriptions of the horrors of war daily, and would not require any more reminders from us, in order to stir them into thinking of WORLD PEACE, and the elimination of war. I quite agreed with him and believe that our messages have been beneficial to the public mind.

Clinton N. Hunt

WORLD PEACE FOUNDATION

March 26, 1957

Announcement #1

A NEW WORLD PEACE ORGANIZATION

The WORLD PEACE Foundation, a new organization, has entered the field of WORLD PEACE endeavor in a supreme effort to create, now, a new, definite, workable, plan and formula for ending Wars and establishing a true and lasting WORLD PEACE, within the foreseeable future, by vigorously using new ideas, new plans, new outlooks, new original approaches and new Pathways.

* * * * * * * * * * *

March 26, 1957

Announcement #2

CAUSES OF WAR

A diagnosis and analysis of the causes of wars over the centuries, viz., ignorance, poverty, greed, religion, misunderstandings, personal ambitions of rulers, Dictators, Caesars and Saw-dust Caesars, Underworld Characters, behind the scenes tricksters, schemers and charlatans, National Pride, National Honor, trivialities, etc., etc., reveals that not more than one man, two men, three men or a small group of five to ten men, at the outside, have usually decided that wars must be fought.

The people themselves ordinarily do not have the opportunity of considering or making that decision.

The solution to be met and solved by action is how to prevent any more recurrences of this character.

WORLD PEACE Foundation will prove to the world through its meetings, Publications, etc., the truth of this vital fact and recommend solutions, for decisive action now. Today no one wins a War.

* * * * * * * * * * *

March 26, 1957

WORLD PEACE FOUNDATION

Announcement #3

SOLUTION FOR WORLD PEACE

The WORLD PEACE Foundation predicts that WORLD PEACE can and will finally be achieved and solved by the original ideas and plans of some one man or woman, particularly of a creative and inventive type of mind, by an original thinker, a realistic Dreamer, like Ben Franklin, Edison, etc. Like all great truths the solution of this vast and complicated problem, which has thwarted and defied the best efforts of mankind, for well over 2000 years, will be simple.

We have not yet produced this man or woman to date. Let us, of this generation, which has failed, acquaint youth all over the world of the need and search for leadership, amongst today's youth, and their responsibility to achieve "The World They Want" with our utmost and intense cooperation, through our knowledge and experience, for this attainable objective.

* * * * * * * * * * *

March 26, 1957

Announcement #4

NEW YORK UNIVERSITY AND WORLD PEACE

A group of Idealistically minded, self-made, practical Business men and women of New York University and their friends, conceived the idea of combining their efforts and forming a practical, virile, dynamic WORLD PEACE Organization, for immediate action toward the elimination of war from the face of the Earth, and the establishment of a real, definite, practical lasting WORLD PEACE.

They believed the present stage of evolution, intercommunication, transportation, education, intelligence, and publications offered an excellent opportunity from the viewpoint of timing, a most important matter.

On the other hand the creation of the Frankenstein Monsters of Destruction: Hydrogen Bombs, Atom Bombs, Disease germs for warfare, etc., warns us we must hurry before Humanity commits suicide.

WORLD PEACE FOUNDATION

July 29, 1957

SUMMARY OF RESULTS AND PRESENT STATUS OF WORLD PEACE EFFORTS

The following three pages reflect the opinions of those best qualified to judge the results and present status of WORLD PEACE efforts to date, and the lack of competent leadership and a definite plan to meet that challenge.

The WORLD PEACE Foundation has picked up the gauntlet and has confidence in its new ideas, new original approaches and planned dynamic actions based upon a definite workable plan, and believes that it will make valuable, substantial, tangible progress toward the final solution of that elusive problem, viz., WORLD PEACE.

Clinton N. Hunt

February 8, 1957

WORLD PEACE FOUNDATION

THEY SAY

Comments by Clint Hunt

1. "All that is necessary for the Triumph of Evil is that good men do nothing."
Edmund Burke

Comment: It would appear that History, for the past 2,000 years has proven the truth of Edmund Burke's statement.

The countries of the World, as well as most of the World's largest corporations are run by active minorities, by Men of Good Will. The difficulties arise when the active minorities are vicious.

2. "If you wish for PEACE, understand WAR." B. H. Liddell Hart

Comment: People are tired of hearing about War, and from their experience with Peace efforts, which have all proven so fruitless up to date, they show little interest in either subject. A discussion of WORLD PEACE leaves them cold and disinterested, based upon their past experiences. The subject of War is, however, more exciting and interesting to them, and in order to hold their attention and interest them, it is necessary to discuss War and WORLD PEACE in the same breath.

3. ITEM FROM NEW YORK HERALD-TRIBUNE

Saturday, October 8th, 1954

"1954 NOBEL PEACE PRIZE OMITTED: NO REASON GIVEN
By The Associated Press

OSLO, Norway, October 8, 1954, - The Nobel Peace Prize will not be awarded this year -- in one of the most peaceful periods the world has had in two decades.

The Norwegian Nobel Committee announced today the prize will not be awarded in 1954. It offered no reason. The committee has discontinued its practice of issuing a list of nominees. Governments and individual organizations can make nominations for the $35,000. prize.

The prize was omitted also in 1948. While there was no award in 1952 itself, the committee last year designated Dr. Albert Schweitzer to receive the 1952 prize and General of the Army George C. Marshall for the award for 1953.

Others who have won the honor in recent years include Cordell Hull, Dr. Ralph J. Bunche and the American Friends Service Committee."

WORLD PEACE FOUNDATION

4. From The New York Herald Tribune
November 8, 1956

"Can Find No One To Give Nobel Peace Prize To

Oslo, Norway, November 7, 1956 (UP). - The Nobel Peace Prize committee announced today that it could find no one worthy of its award for 1955 and 1956.

The 1955 prize of $36,720. was available for belated award this year. Now it will never be awarded. The 1956 award, with prize money of $38,634., will be awarded next year, (1957) if the committee believes it should be."

Comment: It would appear that the Nobel Peace Prize committee is as well qualified as anyone to decide that there was at that time, and there is at this time, no active, virile leadership offering a new hope for WORLD PEACE. The Newspapers, Magazines, Speeches, etc., reflect that there is no dearth of comments, hopes, requests for prayers only, etc., but as Mark Twain so aptly said,"Everyone talks about the weather but no one does anything about it."

5. Editorial Page
New York Journal American
Friday, January 11, 1957

Extract from:

"THESE DAYS:

Problem of War Not Near Solution
By George E. Sokolsky

Realistically it needs to be faced that no method has yet been discovered by the human mind to overcome the tendency of nations to use war an an extension of diplomacy, to pit strength against intelligence and killing against morality.

That is where we stand in 1957."

Comment: Mr. Sokolsky's statement on January 11, of this year, viz. 1957, sort of clinches the conclusion reaced by the Nobel Peace Prize Committee that in spite of all of the talk, all of the pleas, and all of the money and endeavors concentrated on the subject of WORLD PEACE in this world, there is no dynamic leadership, today, toward this objective, for the population of the Earth, particularly Youth - which is groping for a virile leadership that does not exist, and "wants to know."

6. WORLD PEACE FOUNDATION
January 23, 1957

We believe we have created a formula for WORLD PEACE, that, properly launched, will answer the plea of Andrew Carnegie, when on December 14, 1910 he wrote, "Lines of future action cannot be wisely laid down. Many may have to be tried, ... only premising that the one end they shall keep unceasingly in view until it is attained, is the speedy abolition of international war between so-called civilized nations. December 14, 1910"

Comment: Andrew Carnegie's vision, of action to be taken in connection with the possible abolition of War and the eventual triumph of WORLD PEACE, best expresses the method or methods of approach, viz., that when this terrific, complicated problem is eventually settled, as it will be, that there will be no one single action involved, but undoubtedly a number of different actions, called for possibly simultaneously, in conformity with a preconceived definite plan and formula.

There will undoubtedly have to be a long and a short term plan, and in addition it probably will be essential to improvise as we proceed toward our objective.

817 West End Avenue,
New York, New York.
October 21, 1935.

To Whom It May Concern;

My intensive study of the life, character, and intellectual ability of Walter Hunt, the inventor, and my close association with his great grandson Clinton Nottage Hunt has convinced me that they were cast quite closely in the same mold.

I consider Clinton Hunt a man of uncompromising honesty and unquestionable integrity. He is also sincere, possessed of great vigor and profound intellectual capacity.

Sincerely,

Joseph Nathan Kane

WORLD PEACE FOUNDATION

April 12, 1957

DON'T BLAME THE UNITED NATIONS

Don't Blame the United Nations, blame the eighty-one parents of the child: Too often I hear people cussing, discussing and blaming the United Nations for too many ills of the world.

It is like criticizing a corporation for its acts of omissions or commissions when as a matter of fact its actions and policies are decided by the individual, directors, or trustees, who created the organization, its aims, policies and procedures.

A corporation is loosely defined as "an artificial entity in contemplation of law."

The United Nations since its inception has performed a great variety of services to individual countries and to mankind in general, and many of its operations have created a better understanding between nations, races and people in general.

Even though it were only a debating society, it would still justify its existence by focusing the spotlight of world attention on many vital matters that should be discussed and settled.

Were it not so, some of the member nations would quickly withdraw unless they could derive substantial advantages from membership. Why is Communist China so anxious to join? For the advantage only of the United Nations? Hardly!

As usual, the extremists on both sides, for and against are wrong.

The "Phobes", many of whom are, or think they are, against the United Nations and figure it should be immediately dissolved probably have never read its Charter, Bylaws and numerous information Bulletins and reports.

On the other hand the extreme "Philes" who preach and say they believe we should abandon our Army, Navy and Air Force and be governed and ruled by an International Police Force, thereby surrendering our right to self-defense to an organization where we could be outvoted and outtraded by blocks of votes of others, are unrealistic under present world conditions; are trying to make the United Nations run before it can crawl or walk.

The middle of the road plan of persistent and steady progress, and expansion of its powers and duties, should be actively changed as the necessity arises as we initiate and develop a realistic, tangible World Peace plan, and the World and the United Nations approach a more advanced and civilized maturity, which the World does not possess today.

COPY

The World Peace Foundation is energetically developing a definite active and realistic World Peace Plan, which definitely places its confidence in an aroused and reeducated youth and the women of the world as well as the men.

This International Peace Foundation will be a powerful world-wide group dedicated to working through youth, students and college alumni in a legal, decent manner to curb internal trouble-makers before they mature to the state of international trouble-makers and threaten World Peace.

This group can work with a more powerful, sophisticated United Nations organization, which will, we trust, have the authority and power to curb international trouble-makers by action first, or by diplomatic means and if normal methods fail, then, if necessary apply sanctions of all types, and if these stronger methods do not suffice, quarantine the aggressor, nation, or nations, and if necessary, excommunicate them entirely from the society of law abiding nations, until the basis for the action is corrected. If necessary use force as a last resort in order to maintain World Peace or a threat to World Peace.

We call upon the eighty-one member nations of the United Nations to strengthen its child organization as steadily and rapidly as time and circumstances permit.

WORLD PEACE

In Our Time

The Object of These Conferences

The object of these Conferences is to explore and study with leading Historians, Economists, Political Scientists, International Lawyers, Sociologists, Anthropologists, Business Leaders, etc., the basic causes of wars, with the objective of actively and energetically doing what we can, to set in motion, any influences thru the medium of monographs, copies of lectures, articles, editorials, publications, and the organization of Student Organizations in Colleges, etc., in this country and eventually throughout the world, that will tend toward the elimination, so far as possible, within our powers, of the basic causes of war.

JOHNSON O'CONNOR RESEARCH FOUNDATION
Incorporated
11 East 62nd Street New York 21

May 19, 1945

Mr. Clinton N. Hunt
London Terrace
New York, New York

Dear Mr. Hunt:

Your outstanding aptitudes, as measured by the Johnson O'Connor Research Foundation, are:

Extremely Objective Personality - Executive or sales personality
Tweezer Dexterity - Ability to work with instruments
Tonal Memory - Ability to remember melody
Visual Imagination - Intellectual vision
Creative Imagination - Flow of ideas
Inductive Reasoning - Ability to diagnose, to see idea relationships
Analytical Reasoning - Ability to organize
Accounting Aptitude - Clerical speed and accuracy
Proportion Appraisal - Sense of line in art

The combination, objective personality, creative imagination, inductive reasoning, analytical reasoning, is characteristic of the "group-influencer", that is, the man who influences public thought. In this category fall journalists, editors, publicity men, teachers, statesmen, diplomats, advertisers, men whose primary concern is the promulgation of new ideas. This "group-influencing" pattern you must integrate with your other marked abilities. In other words, your function would be directly to influence public opinion, ideally in a field of music or art. You might find satisfaction in radio or theatrical production, in organizing and directing an art or music center, in editing and running a newspaper or magazine. These suggestions are given only as examples; you yourself must determine the career which will best utilize your abilities.

It is essential that a man whose aptitudes are as numerous and as divergent as yours should have constructive hobbies. Study of the piano or violin would offer an outlet for musical ability; art - painting, sketching, photography - is also manifest in your aptitude pattern; writing is a"must" for anyone who scores high in the reasoning tests and in his flow of ideas. Furthermore, your "borderline" score in Structural Visualization indicates the possible presence of mechanical ability, which might be expressed in such hobbies as wood carving, sculpture or ceramics.

WORLD PEACE

You must guard against the tendency, typical of the man with "Too many aptitudes", to dissipate your energies. Try, if possible to set yourself a tremendous and challenging goal, one toward which you may direct all, or nearly all, of your experience and talent.

Sincerely yours,

NANCY L. HAY (sgd.)
Nancy L. Hay,
Test Administrator

There Always Has Been War,

and . . .

Written in 1939

BY CLINTON N. HUNT

and Reprinted from the Downtown Athletic Club Journal

There Always Has Been War, *and...*

there always will be war. We all believe in the courage, devotion to duty and love of country on the part of our fellow Americans whatever their respective racial origins. Without doubt, the same can be said of the countries of origin of our ancestors. The same is true of all countries.

There is no necessity for these periodic stupid wars. Humanity has demonstrated for all time its ability to achieve, suffer and die for a principle, for love of country, and for those they love. They are not afraid to fight; they are not afraid to die even the horrible, tortuous deaths of the battlefield; they fear more, parting from their loved ones.

Without question there is a basic cause for wars; they do not happen of themselves. They are born out of direct causes and can be definitely analyzed into causes and effects. Like so many other human activities, causes are very often confused, purposely and otherwise, with effects.

In the early dawn of history, to see a strange face or person was sufficient grounds for fighting, based upon fear, ignorance, superstition, hate and suspicion—all traits from the lower animal nature. In time, wars were fought over the need for food, shelter, clothing, territory and the desire for money. Wars have been fought over religion, witness the Crusades, and the Thirty Year War in Germany. What have they proven? After killing adherents of all sides by the thousands and hundreds of thousands the people remaining, professing these religions, have settled down as friends and neighbors and have intermarried and lived peacefully together over the centuries. Why did they fight in the first place? What have their victories and defeats and suffering proven, other than temporary advantages? But, more often no one has gained. All have lost.

Present day wars fundamentally are battles to maintain, defend or improve the standard of living of a group of people, national or continental, larger or smaller. The armies, navies and air forces are the chosen gladiators selected to enter into combat, and when their champions are defeated the people who have backed those fighters usually accept the defeat as personal and are obliged to accept the conditions of defeat laid down by the victors. These conditions usually call for an immediate sacrifice of food, money, shelter and protection and usually in addition a long term continuing sacrifice. This is a definite blow at the former standard of living, in addition to certain restrictions on the liberties of the vanquished.

The men of the backward nations are being drilled to help the leading nations in their wars. In time these soldiers may decide to use their knowledge for the liberation of their respective countries.

"We have always had wars and we always will". The majority of people believe this statement and repeat it parrot-like. When the majority of people say and believe "We have had wars in the past but we can avoid them in the future by intelligent thinking and acting" war will then stop.

The majority of the people of the world want to stop war but do not know how. The main reason is that they do not know how it starts. They feel that the matter is in the hands of a Divine Providence over which they have no control, hence, why try? Most wars are man made, or it might more properly be said, *leader made,* very often for selfish or trivial purposes, although in many cases nations carelessly drift into war without plan or reason, or are maneuvered into war thru the machinations of others.

Too many of the world's leaders have achieved their positions thru an overpowering ambition, love of power or desire to right a real or fancied wrong which has become an obsession, sometimes to the point of insanity. These leaders desiring power manage to achieve their objective by intense concentration, working by all means toward their objectives, sometimes at the risk of life itself, for the fulfillment of their ambitions means more to them than life. Even though they may be successful at times they are not always the most desirable types of men for the position. They frequently are poorly balanced, are not well rounded business men and respond to short term immaterial trends, with the object of pleasing the vocal volume of certain groups, who often do not represent the long term will and needs of the majority of the people. In their hearts they feel superior to their office due to personal egotism and conceit instead of realizing that "The master is the servant of all!" This type concentrates on histrionics, deceit and insincerity. Their cost to the people finally comes high.

Well balanced, intelligent, honest and ethical men who have succeeded in business and have at least a modest financial background to insure independence, will do a better job on the average. This type does not desire the office as a rule nor does it care for the limelight. It has to be drafted, takes up the reins of government and leadership with reluctance and drops them with relief.

Years ago when there were a limited number of industrial and manufacturing nations producing machinery, tools, clothing and wearing apparel far in excess of their own needs, non-manufacturing and agricultural countries and countries rich in natural resuorces including metals, oils, etc. furnished an abundant market for these surplus manufactured goods. The invention of radio and moving pictures, the wider distribution of reading matter, and more rapid communication, has hastened the spread of education and knowledge throughout the world, and Japan and other former unindustrialized countries have not only built factories and machines to take care of their own domestic needs but are producing a surplus for export which competes with the other leading industrial nations. They have gleaned the best and latest business knowledge from the former leading industrial nations and

have become their competitors.

Production throughout the world is gaining in volume, while the world's important markets for manufactured goods are contracting, due to self manufacture of raw materials, or the lack of goods or services to exchange for them.

What present effect does over-production have? The world is overproducing manufactured goods, agricultural and other products. The United States has about cornered the gold market, diminishing further the money and credit capacity of other peoples to buy. The greater portion of international trade is based upon the exchange of goods for goods, in other words, barter; differences being settled in services rendered, gold and silver, imports and exports, tourists spending, and ocean freight carried on foreign vessels.

The result is that an increasing number of manufacturing nations and an ever increasing volume of goods are competing with each other for diminishing markets in a world decreasing in size due to improved transportation and communication, improvements and inventions.

Some world leaders have recommended voluntary abandonment of machines and labor saving inventions and a return of hand labor to "spread work". It is difficult to believe that any intelligent leader with a knowledge of economics or the science of business otherwise known as the "bread and butter science" could so unintelligently hold back progress. This brings us to the crux of our problem.

The demand for goods in the individual as in all social groups, is insatiable. Mankind's wants and needs are without limit. Overproduction is a blessing if mankind knows how to harness it for his benefit; properly harnessed, it can reduce days of labor and bring leisure for hobbies, avocations, human benefits and afford more time to devote to the things mankind loves to do rather than perform the obligations of life. Most of us in business are round pegs in square holes. When we can make our hobbies our business we are happy and fortunate. What percentage are?

Economists disagree as to whether we are suffering from over-production or under-consumption. Does the average human being suffer from voluntary under-consumption or the lack of means to acquire what he desires and needs? The world as a whole has never yet experienced over-production as measured by human needs.

If human productive means are practically unlimited and are fully capable of producing sufficient food, shelter and clothing to render humanity the world over on the average moderately happy in living; if human wants, whether for the necessities or luxuries, are practically without limit then there exists but one remaining important economic function to organize and master in order to become masters instead of the slaves of so-called over-production, and that is the "Science of Distribution or Exchange." The science that will bridge the gap between production and consumption. This science is rarely ever mentioned. Production and consumption are talked and written threadbare. These two branches of economics are not problems; they are either solved or easily solvable. Distribution and exchange are man-sized jobs and a keen, analytical research into this subject would be amply rewarded.

Distribution should be thoroughly analyzed and sub-analyzed into its component parts, in all of its ramifications, and subject to human laboratory tests on a minor basis and the extent to which a barter basis is essential for its success should be carefully studied. A strange parallel is taking place today. Through urgent necessity, occasioned by the need or desire for self-sufficiency, the Totalitarian states of Europe are really conducting extensive laboratory tests of this idea throughout the world, and regardless of their political implications or consequences the world as a whole will benefit by them economically. It is a question whether any smaller units than the state could adequately handle this problem. It would appear subject to proof or tests that individual initiative under government direction is the most efficient form of getting results under some circumstances.

An intelligent system of world-wide distribution of raw materials, food, shelter, clothing, etc. while resulting in a certain leveling process with respect to the leading and backward races, would go a long way toward the elimination of the situation from which we are suffering today, namely, war, stagnant business, social unrest, poverty, crime, and dictatorships which arise because of underlying conditions of unrest in the countries involved. The names of the leaders of the so-called "have not" countries are immaterial. If it were not one leader it would be another, conditions being what they are. It is usually a person looking for the leadership with panaceas and cure-alls, in which he personally may believe or not believe, who assumes or gains the leadership.

Assume that we could today in one bold stroke solve the Distribution Problem of the necessities of life for all countries of the world. Would we in this way cut the support from under the Dictators; removing the main cause of unrest? Would they fall of their own weight? Would it also not stop the recurrent wars which prove nothing, punish everyone, especially the innocent, more than the instigators?

Why should we assume that Divine Providence has ordained a war to punish humanity for imaginary infractions of God or man-made laws, as we are too often told? Why not place the blame where it belongs, viz, on human ignorance, selfishness, stupidity, cupidity, and inexperience with proper living? Why should every generation have a war and a panic simply because it cannot or will not learn from the experiences of its elders and previous generations? Must it always experience these emotions for itself before it believes and then passes on its experiences to an unbelieving succeeding generation?

The elimination of war from the earth forever can be accomplished only by eliminating the causes of war, most of which arise from human want and fear of want more than from cupidity and all other causes combined.

Every nation in the world today

fears war, no nation wants war, and yet the word passes when will the war start? This year! Next year! 1941! When! Why need it start at all? Stop it before it starts.

Only the human beings who suffer and pay and die should have the power to decide whether or not they are to go to war. War should only be declared after a referendum of all people of voting age (men and women) who are expected to serve the forces of war. Let there be an open vote with names shown. Let those in each nation who desire war go on public record to that effect; let them stand up and be counted where they can be seen. Then give them guns and let them fight it out and see what results they achieve. Meanwhile, let the chosen representatives of the majority of each people, with due representation of the minority of the people, get together and straighten out any difficulties like civilized, intelligent human beings with a responsibility toward mankind.

Take the power to create and make war out of the hands of leaders. Who is there among us who has sufficient intelligence, breadth, honesty, etc., to decide whether or not five or ten million of us shall die violent, cruel, deaths and bereave fifty million more? The average, well meaning, intelligent leader would shrink from this responsibility and would not voluntarily undertake it. The leaders who are anxious to make this initial decision for the people are usually not soundly balanced enough and the power to do so should be taken out of their hands.

The Churches should be the leaders in the elimination of war from the face of the earth for good. They have been lax. The Churches and leaders in each country have prayed for the success of each country involved in the war. These countries cannot all be right. It does not make sense. Some individual pastors sensing the wrong of this but not having a clear conception of what to do, have declared that in future wars they will have no part. This is purely negative action. The fault lies with the leadership of the Churches. They should work on the elimination of the causes of wars and not putter with effects after the wars are under way.

Finally, humanity has a tremendously powerful force for good in its hands. Over-production intelligently handled can remove the major cause of war and give us all a decent leisure. Fumbled, present inefficient conditions will continue to torment humanity and it may possibly finish up with humanity stupidly committing suicide.

WORLD PEACE FOUNDATION

Suite 15-B

Mr. Tom Slick
Bennett Building
San Antonio, Texas

Dear Tom Slick:

My good friend, Dick Ettinger, Chairman of the Board of Prentice-Hall, Inc., sent me a copy of your most interesting book entitled "Permanent Peace", which contains analytical figures, that will be very helpful regarding the WORLD PEACE effort. It happens that I have been interested in the study of WORLD PEACE for the past 32 years, and two years ago organized the WORLD PEACE Foundation, Inc. of New York State.

We have created and worked out a very definite and explicit WORLD PEACE Plan, per data enclosed. It is very encouraging to believe that a great many Organizations and other people, like Linus Pauling and yourself, inspired by the present state of the World, will take the trouble to do everything within their power to assist in solving this problem.

One of the Points in our WORLD PEACE Plan, in addition to covering some of the ideas advanced in your excellent book, includes State Affiliates or Chapters of the WORLD PEACE Foundation in every State of the Union, somewhat similar to the Sons of the American Revolution Organization, of which I am a Member. The thought suddenly occurred to me that nothing better could happen to the WORLD PEACE Movement than to have the State of Texas, whose men are world famous for Moral Courage, Physical Courage and doing things in a big way, form a WORLD PEACE Foundation of Texas, as the first State Affiliate, and have a friendly competition, to see whether New York State or Texas can do a better job. I am afraid that we would have pretty stiff competition for a Noble Cause, for the benefit of 2,700,000,000 Human Beings.

Our Files, our By-Laws, our Federal and State Tax Returns, and all of our Records, Plans for Publications, and the services of the writer, are freely at your disposal.

In the event you are interested, may I suggest that we meet when you next visit New York, or perhaps, in the event you have a New York Representative, let him review our accomplishments with me and report to you. Enclosed is pertinent data, which will probably be helpful and interesting.

With warm regards,

Faithfully yours,

CNHisl

WALTER HUNT

American Inventor

An Unsung Craftsman....

BY JOSEPH N. KANE

EDITOR'S NOTE: This interesting story concerns the genius of Walter Hunt, one of America's greatest inventors. As a matter of special interest, we wish to point out that he was the great grandfather of Clinton N. Hunt, one of our well known D.A.C. members.

A popular periodical has just marked the 100th Anniversary of the invention by Samuel F. B. Morse of the Telegraph which has been one of America's major contributions to the progress and onward march of world civilization.

An inventive genius like Morse can do a million times more to move humanity on permanently to a finer scale of living than political parasites can do to temporarily retard the upward trend of progress.

A bank advertisement reminded us that we were also observing the 100th anniversary of the invention by Walter Hunt of the lowely but essential safety pin.

Walter Hunt was born at Martinsburg, New York in the foothills of the Adirondack Mountains near Watertown on July 29, 1796.

A form of safety pin was in use many centuries before Hunt was born but it was lost to civilization and necessity was the Mother of and need for this invention, and Hunt's inventive genius filled the need.

What is in many ways Hunt's greatest invention made the least demands upon his time and energy, for within the space of fifteen minutes he had invented a safety pin and sold the patent rights for four hundred dollars. Before me as I write is one of the three original safety pins that Hunt forwarded with his application to the patent office. The original model is of copper wire, but it is identical with the large style navy pin in use today, precisely the same as are in use today, except that the modern pins are made of a heavier and stronger wire, and that the head or top part is flattened, the better to protect the pin point.

Although Hunt's claim to fame is predicted upon his many inventions, ironically the claim for which he was to receive his greatest recognition was one which was destined to cause him the greatest heartaches. In 1832 he invented a lock-stitch sewing machine, but instead of praise he received condemnation! Seamstresses feared that this invention would put them out of work and, at his wife's request, who heard their distress cry, Hunt made no effort to patent his machine, with the result that nothing was heard of sewing machines until, fourteen years later, Elias Howe, Jr., obtained a patent on a similar machine.

Here, shown side by side in the Smithsonian Institute are, the first sewing machine, designed by Walter Hunt and the later machine which Elias Howe patented.

Many manufacturers went into the sewing machine business; Howe endeavored to thwart them by virtue of his patent but was met by the claim that Walter Hunt was really the inventor. Hundreds of cases clogged the courts and Commissioner of Patents Charles Mason was called upon for a decision. Mason found that, although Hunt first conceived the idea of the lock-stitch sewing machine, and had manufactured a practical machine upon which he could have obtained a patent had he applied for it, yet because he had not applied for a patent within the required two-year period, he could not contest Howe's patent.

Hunt was not perturbed. The fact that his invention was destined to make hundreds of millions of dollars for others meant little, for money held no values for him—he received it only to give it to others less fortunate, often to the impoverishment of himself. The fact, too, that the patent grant caused Howe's name in the popular mind to be identified with the sewing machine meant little to Hunt. He was not a "one idea" inventor, and the loss of recognition for one more or less invention was of no consequence. His mind was constantly at work, and the many patents he received attest to his versatility.

Although all of Hunt's patents were obtained from seventy-five to one hundred and ten years ago, many are in use today in practically the same form as when he invented them. Some of them have been improved upon, but in basic form they still remain as he originally conceived them.

Hunt's first patent was obtained in 1826 on a machine that spun flax and hemp, his second, the following year, on an alarm gong. This gong, used by the stage coach lines, is in all essentials of the same type as a warning signal by street-car motormen today.

In 1829 Hunt obtained a patent on a knife sharpener. Although more than one hundred and five years have elapsed since Hunt invented this sharpener, it is being manufactured today in exact accordance with his patent specifications. The original patent for this invention is on my desk at this writing. It is dated June 22, 1826, and is signed by President John Quincy Adams, Secretary of State Henry Clay and Attorney General William Wirt. It covers a sharpener made up of two sets of concentric wheels, whose circumferences slightly overlap on a common base line so that when a knife is drawn between them, a brand new cutting edge is always obtained. In the same year, Hunt also obtained a patent on a cording machine, a twine twister that enabled several skeins to be made into one large thread.

His next invention was of a stove that burned anthracite coal and radiated a large quantity of heat equally in all directions. It was equipped with a grate and permitted the ashes to be easily removed. Stoves made on the same principle may still be found in the elevated stations in New York City and in country stores. Hunt also invented the steam table now used by restaurants for keeping food warm; unfortunately the original papers for this invention have not been found and details are therefore vague.

Hunt's ability knew no limitations. He obtained a patent on a saw for felling trees, and then on an ice plow which, attached to the bows of ships, was designed to break up ice floes. Also he obtained a patent on a twisted wire spring for holding the tight fitting pantaloons of the day from wrinkling. The strap was fastened to the lower end of the pantaloons; it was run under the arch of the shoes, and served to prevent the tight fitting pantaloons from creeping up or riding. These straps are indentical with the wire straps now used in belts, suspenders, and other forms of apparel.

In 1839 Hunt obtained a patent on a nail machine that produced hundreds of nails a minute, and in 1843 on a new method of feeding nail plates into the machines. In 1839 came a patent on a detachable sole. This sole was studded with iron pegs and was used by iron workers and others engaged in trades where the soles of their shoes would burn or slip on hot or slippery floors. The sole, although made of iron, is almost identical with the modern golf shoe with the threaded rubber bottom.

In 1845 Hunt secured several patents on inkstands, one of which is in general use today in its original form —the pen on being dipped into the inkwell receives a generous supply of ink; when the pen is withdrawn a spring-like attachment forces upward a plug that keeps the inkwell closed. This was followed by a patent on a fountain pen.

Then he delved into ballistics. In those days lead bullets often varied in size and shape, and it was almost impossible to place a uniform amount

The first fountain pen, another of Walter Hunt's many contributions to the betterment of mankind.

of powder into the gun for each shot. Marksmanship was a matter more of gamble than of skill. To remedy this, Hunt invented a wooden cartridge into which both the bullet and the powder were placed. Each bullet contained the same amount of powder, and each bullet was of the same size. Hunt quickly realized the worth of the principle he had invented, and in 1848 obtained a patent on a metallic cartridge which revolutionized the entire arms and ammunition industry.

Hunt's successful cartridge inspired him to later develop a gun in which it could be used to better advantage. He obtained a patent on a repeater gun, a combined pistol breech and firing-cock repeating gun. Louis Jennings made some improvements upon the gun and thousands of them were manufactured. The gun was known as the "Hunt-Jennings," but later was called the "Jennings Rifle."

Another useful device was a bottle stopper that permitted only of a limited quantity of extract being poured with one tilting. It was the forerunner of articles familiar today, such as sugar bottles, syrup bottles, salt cellars.

Then there was the method which Hunt devised for the manufacture of paper collars. This was revolutionary, and proved so valuable that it was renewed by his assignees several times before his death. Even this invention, however, brought him little fame. Shortly after his death the Civil War blazed and the shortage of cotton made the success of paper collars phenomenal. Recognition arrived too late for him to benefit by it.

Hunt, however, was never made despondent by the failure of his inventions to bring him fame and financial success. He went on inventing. In 1859 he obtained a patent on a circular metallic heel so constructed that by turning a screw it could be moved into place as desired. Then there was the lamp with two carbon wicks, tapered together similarly to the principle later used in the carbon and arc lamps.

There were also the small pill boxes sufficiently strong to withstand the crushing weight of one's foot; a gymnastic device, used in circuses, that enabled the performer to walk upside down like a fly on a ceiling; a restorative cordial for use in the treatment of rheumatism; a mixture of mortar and cement used in building construction and so on.

I have barely touched upon the long list of his inventions, many of which contributed so much to the comforts and conveniences of our life today.

Walter Hunt was a genius if there ever was one. He did not dig and delve for the lock-stich or anything else; nor did he fall by accident on his inventions. He conceived the idea of a lock-stich sewing machine, then took his tools and made it, as he had done in the case of a dozen patented and many unpatented articles before that date. He was not a one idea man. His inventions, previous to that date, had covered broad and divergent fields; and they did not stop here. The versatility of his mind was not checked by any obstacles, nor was his failure to obtain a moneyed reward any bar to the continued successful exercise of his inventive faculties.

When money came to him, as it did, it brought no suggestions of the benefit it might be to him. It slipped thru his fingers while he was busy with his next invention. He was modest, studious and more at ease in shop or laboratory, than elsewhere.

Walter Hunt led a correct life and was genial, affable and companionable. He conferred honor upon his age and his country. He had many trials and, like most inventors, earned an ample reward, and, like most inventors, did not receive it.

Mr. Edward R. Murrow
485 Madison Avenue
New York 22, New York

Dear Ed:

I am returning the letter to you from Mrs. Franke, the Chairman of the Navy Ball. Granville Klink, who actually ran the show at the Naval Gun Factory and I both thank you for thinking of us and sending the letter. We were glad to do the job for them and for you.

I saw your wife on the Jack Paar show a month or so ago and it was a big and pleasant surprise to have seen her after so long a time.

My best wishes to you and your family for a very Merry Christmas.

Sincerely,

Clyde

Clyde M. Hunt

New York, 22, N. Y.

Dear Mr. Murrow,

As chairman of the Navy Balls which were held on October 17 and 18 at the Sail Loft of the Naval Gun Factory, I want to thank you for your interest and great help.

The new sound system which we had purchased and installed in the Sail Loft had so many "bugs" in it, Commander

Allendorfer was at his wits end.
The committee was very discouraged.
But after you so kindly sent the technicians from WTOP over we were so relieved, and they were very helpful.

On the night of the Ball all was well, and everyone coned hear the wonderful show.

The Committee and I do appreciate all that you did for us.

With kindest regards, and again many thanks.

Sincerely
Bertha R. Franke

Mrs. William B. Franke

Hunt, Paul

February 25, 1958

Dear Mr. Hunt:

Thank you for your gracious letter about the birthday party for my old friend, Tom Stoddard.

I am afraid there isn't a chance in the world of my being present for the occasion although nothing could possibly give me greater pleasure. My feelings for the man are such that I could not possibly commit them to paper, and he is one of those rare, reliable individuals that you could meet after an interval of ten or fifteen years and discover that nothing has changed.

He was, as a youth, a person of unusual integrity and the years have only served to make that fact apparent to more people. I find it difficult to believe that he is fifty, and could not credit the fact that he is, were it not that I too will soon be just that.

Perhaps you would just shake him by the hand and raise a glass for me.

Sincerely yours,

Mr. Paul D. Hunt

485 Madison Avenue
New York, New York

Dear Mr. Murrow:

Our mutual friend, Tom Stoddard, will celebrate his 50th birthday on the 26th of March and a few of his friends are giving him a surprise birthday party at the Multnomah Club on that night. It is limited to 30 people and I am sure is going to be a very fine affair.

As you know, you are cordially invited to attend if it is humanly possible for you to be here and I know nothing would please Tom more than your presence. We all realize your busy schedule but we want you to know you are welcome and we certainly hope that you might be able to be here.

I will appreciate if you could let me know and if it is our misfortune that you can't come, we certainly would ask for a letter to Tom which we can give him.

Sincerely yours,

Paul D. Hunt

485 Madison Ave.,
NYC

Dear Mr. Murrow,

In connection with your forthcoming radio program, "POW---A Study in Survival," I feel confident you must be acquainted with my books and original research on the ~~subject~~ subject. One of the two books I wrote on brainwashing, entitled, "Brainwashing: the Story of Men Who Defied It," appears June 5 in paperback, put out by ~~Pyramid Books~~ Pyramid Books. As this is the subject with which you are dealing, I feel that it might be worth mentioning.

I enclose some material, and hope it can be of use. I am available in any helpful manner.

very truly yours,

Edward Hunter

Arrived after Pgm.

Some biographical material on Edward Hunter, 64 Webster Ave., Port Washington, New York State; POrt Washington 7-4514

Author:

"Brain-Washing in Red China," Vanguard Press, Inc., NYC

"Brainwashing: The Story of Men Who Defied It," Farrar, Straus & Cudahy, Inc., NYC

"The Story of Mary Liu," Hodder & Stoughton, Ltd., London, and Farrar, Straus & Cudahy, Inc., NYC

50-page biographical and historical introduction to the five-act play, "The People Win Through," by U Nu, Prime Minister of Burma, published by Taplinger Publishing Co., 119 West 57th St., NYC 19

Contributor to numerous magazines, his articles having appeared in Coronet, Esquire, Reader's Digest, Harper's, American Legion magazine, etc.

His biography in 1958-59 Who's Who in America includes:

> HUNTER, EDWARD, foreign correspondent, author, born New York City, July 2, 1902...Reporter, news editor various newspapers, including Newark Ledger, New Orleans Item, N.Y.Post, N.Y.American; reporter Paris edition Chicago Tribune, 1924-25; news editor, Japan Advertiser, Tokyo, 1927; editor Hankow (China) Herald, 1928-29; Peking Leader, 1929,30; covered Japanese conquest of Manchuria, Spanish Civil War, Italian conquest of Ethiopia, International News Service, 1931-36; pioneered in revealing brainwashing, introducing it to written word; consultant USAF, 1953-54. Served as propaganda warfare specialist, morale operations section, OSS, AUS, Asia...

At close of his testimony at brainwashing hearing at Washington, June 19, 1956, the chairman, Sen. John L. McClellan, said, as printed in the official text:

> "I am sure your books and your writings and your experience will be very valuable if we can get all that before the American people."

(Note: The big word in that statement is the IF.)

In interview form, he is author of the publication, "Communist Psychological Warfare: Brainwashing," put out by Committee on Un-American Activities, House of Representatives, Washington, D.C., dated March 13, 1958.

The preface to the article, "Brainwashing," by Edward Hunter, published in Vol. 2 of "Soviet Total War," a symposium of the Committee on Un-American Activities, House of Representatives, dated Sept. 30, 1956, reads as follows:

"Edward Hunter, as foreign correspondent, witnessed on the spot the creation of the puppet state of Manchukuo, the last two civil wars in Spain, and the Fascist conquest of Ethiopia. He served OSS (Office of Strategic Services) as a propaganda specialist in Asia in World War II. During intervals on papers back home, he studied totalitarian infiltration and headed a national committee that helped rid the American Newspaper Guild of Communist domination. He warned in articles that Hitler and Stalin would sign a pact, that ultra-nationalist Japan would attack the United States, and more recently, back in ~~Europe~~ Asia, that the Chinese Reds would enter the Korean war. This background enabled him to recognize the pattern in world communism now known as brainwashing. Mr. Hunter introduced that word into our language and revealed the strategy behind it. His book, 'Brainwashing: The Story of Men Who Defied It,' tells how it can be preserved. Besides being a specialist in the war for the mind, he is recognized as an Asian expert."

Mr. Hunter put the word brainwashing into our dictionaries. He was the first to use the word in print in any language and was the first to use the word in speech in any language ~~except~~ except Chinese. The word was coined by some unknown Chinese hero after the Reds took over in China, and came to the attention of Mr. Hunter.

What was more important, he revealed to the world for the first time the content of the word, the strategy of mind pressure and mind attack by the communists. For the first time, an explanation was given for such strange and hitherto inexplicable phenomenon as the Moscow trials, Cardinal Mindszenty's confessions, the confessions by American military officers in Korean POW camps that they had engaged in ~~bacteria~~ germ warfare——all untrue. Simultaneously, he explained how this technique was used primarily for the indoctrination of subject populations by the Communists, against their own people, inducing them to express belief in what actually was against their beliefs, sometimes actually believing what they said.

He revealed the strategy for the destruction of minds in his first book, "Brain-Washing in Red China," and ~~further~~ what was more important, revealed how it could be beaten in the companion book, "Brainwashing: The Story of Men Who Defied It."

His latest book, "The Story of Mary Liu," which is described as reading as smoothly as a novel, is true in every detail and ~~[illegible]~~ name, and reveals incontrovertibly, as no other book can do, because of the source of the material, ~~[illegible]~~ ~~[illegible]~~ how religion has been made into an arm of the communist government in countries such as China.

Book-of-the-Month Club NEWS

MIDSUMMER 1956

Regular retail price: $6.50

"What detective story could be

FOR August

bones of fabulous monsters; fossilized bodies of animals which had never been seen or recorded by any modern observer; the weapons, the dwellings and even the skeletons of men and women who

derstood technical phrases are broken down and clarified. After describing the economic structure under which the United States functions, the work moves on to various particular enterprises and problems—foreign aid, national debt, farm prices, strikes, control of utilities and so on—devoting enough space to each to make the subject clear to the citizen not used to going much beyond the headlines in the papers. The authors define economics as "the study of how society produces and distributes the goods and services it wants" and point out that their book "does not offer explanations and conclusions ready-made, instead it offers the tools and methods for the analysis of economic problems," so that the reader can learn to make his own decisions. For the puzzled citizen who follows but dimly the economic policies of the present Administration and the charges leveled against it by its enemies, no book could be more highly recommended. In a Presidential election year it should provide valuable information for every voter. (Price, $3.00)

GRAHAM BATES

Amelie in Love

By HENRI TROYAT

HENRI TROYAT

M. TROYAT's novel, translated by Lily Duplaix, is an utterly delightful story of family life in a small French village, Chapelle-au-Bois, in 1912-14. The father is a self-educated blacksmith; the mother and Amelie, the daughter, keep the house and shop; a young son goes to school. But as with all good novels, what it really is about is life in all its aspects—love, marriage, birth, death. Little things are made to seem as important as they are. The steak sauce thickened with bone marrow that young Amelie makes for her new husband becomes a real excitement. Will he notice the new curtains? Will he be angry or pleased when, overcome with the loneliness of Paris, Amelie follows him on a business trip? One delights in every curve of the iron railing her father forges for her mother's grave; in the wedding dress "in which all the style was concentrated in a draped movement over the left hip"; in Amelie's affection for her family and husband, blessedly untainted by Freudian overtones; in her growth in gentleness and understanding—though by nature she, like her mother, is quick-tempered and conscious of her power over those she loves. Then comes the First World War and the birth of her child. The reader waits for Pierre's letters with Amelie's own eagerness. In its deceptive simplicity this is a novel of charm. (Price, $4.50)

KATHERINE GAUSS JACKSON

The Changing Universe

By JOHN PFEIFFER

JOHN PFEIFFER

IN the 1930s it was discovered that stars emit radio waves. Their telltale radiation beams, coming to us as faint streams of static, are now being intensively studied in the United States, England, Russia and elsewhere. Some of the receivers that detect them are so extraordinarily sensitive that they can pick up the energy output of a man's viscera four blocks away. The new radio astronomers—men who can read the dips in a pen line as the work of radioactive hydrogen 3300 light-years off—can already "see" a great deal farther than the most powerful telescope. They have also discovered phenomena overlooked by the conventional instruments, perhaps the most impressive being that the waves from faraway Cygnus are the result of a head-on collision between two galaxies meeting at a speed of about a million miles an hour, the collision occupying a region at least 30,000 light-years across. Mr. Pfeiffer, who has had two Guggenheim Fellowships to help him become an authority on this awesome new science, gives us an engrossing account of its problems and achievements and the dedicated men behind them. Though comparatively few of the radio sources have as yet been positively identified, enough data have been collected to raise new speculation about the nature of the cosmos. The comprehension of infinities is not one of man's inborn abilities, but radio astronomers are doing their best to widen our knowledge, and this story of their work is a most inspiring one. (Price, $4.75)

LEON WILSON

Brainwashing

By EDWARD HUNTER

EDWARD HUNTER

ABOUT five years ago, just after the China mainland fell to the Communists, Mr. Hunter published *Brainwashing in Red China*, a memorable first attempt to report a 20th-century horror that ranks with Buchenwald and Kolyma. His new book is something of a sequel to the earlier one. It takes off from a broader base: an inquiry into the origins of brainwashing as an ideological weapon. The search leads the author back to Pavlov and his celebrated dog and to Lenin's realization that the great physiologist had discovered a tremendously important tool for the Red Revolu-

in paperback, released June 5, 1956, by Pyramid Books

other hand, he was genuinely devoted to poetry, and his creativity was bound up with his numerous love affairs. Duse, consecrated to the theater as to a religion, and left ailing and neurasthenic by her harsh early life as the daughter of poor players and by an early seduction by a heartless libertine, was drawn to D'Annunzio before she met him. Though D'Annunzio seemed to feel a need to destroy all his inamoratas, in Duse he found a lover whose nature seemed to need his cruelty. The background of the book is as fascinating as its subjects: the literary and theatrical circles of Italy and the Continent, the rivalry between Duse and Bernhardt, D'Annunzio's wartime career as an aviator, his march on Rome, his encounter with Mussolini (who kept him a virtual prisoner) and his last years at the Vittoriale editing the definitive edition of his works, surrounded by *objets d'art* and mementos which he loved. All these are part of that glittering, melodramatic, at times comic-operatic world which received its death wound in 1914, but from which a few figures like these survived into our own memories. (Price, $5.00—photographs)

BASIL DAVENPORT

Days of Plenty

By ELIZABETH FENWICK

MISS FENWICK

SOME fortunate novels, like most flowers, seem to attract and intensify the surrounding light, and this tale about a serious, yearning and confused teen-age girl is one of them. Its heroine, Dana, the legitimate child of an illegitimate father, is spending the summer at a cottage in upstate New York with her mother, an elderly woman friend of her mother's, and the easy-going, understanding Eddie, who has lived—out of wedlock — with her mother for some years. Dana dreams adolescent dreams, goes horseback riding, visits her rich, doting, possessive grandfather, known as Giffy, and generally leads an exciting and dangerous existence. The story ends inconclusively. Will Giffy continue to influence Dana despite her mother's opposition? Will her mother, who has known poverty and insecurity, regain her lost spirit? Will Eddie be able to make a happy life for the three of them without the aid of Giffy's largesse? In Dana the author has drawn a memorable portrait of a young girl caught between family tensions and social inequalities, "giving love awkwardly and being unable somehow to win it back." The novel finally floats away, leaving everyone up in the warm, summer air. But, for the reader it has been a relaxing and rewarding experience. (Price, $3.50)

ROGER PIPPETT

The Writer Observed

By HARVEY BREIT

HARVEY BREIT

EVELYN WAUGH smokes cigars. T. S. Eliot says "figger," not "figure." Albert Schweitzer takes a daily siesta. John O'Hara is color blind. Noel Coward composes his plays directly on the typewriter. Carl Sandburg raises goats. C. S. Forester smokes cigarettes. Aldous Huxley says "et," not "ate." James Thurber has never finished *The Pickwick Papers*. Phyllis McGinley used to ride three miles to school on a pony. Robert Penn Warren drinks iced tea. Arthur Koestler is a floor-pacer. Christopher Isherwood says "my-thology," not "myth-ology." William Faulkner smokes a pipe. These are some of the fascinating and important trivia (they are fascinating and important to me, at any rate) that stud this book as raisins stud a fruit cake. One of Mr. Breit's chores as assistant editor of *The New York Times Book Review* (and obviously a pleasant chore) is to interview authors, and in *The Writer Observed* he has collected 29 of these interviews. He is as far as may be from a gossip columnist; he draws sketches, using words instead of lines, and the sketches are crisp, sharp, revealingly effective. These interviews are deceptively compact—the longest runs to some 1200 words, the shortest to half as many—yet they contain material which the eventual biographers of the subjects will welcome, and from which the most casual devotee of contemporary letters will derive enlightenment and entertainment. He will enjoy, too, Mr. Breit's introduction, which discusses the creative and critical processes and also the rationale of the interview with deftness and cogency. (Price, $3.75)

JOHN T. WINTERICH

An Introduction to Economic Reasoning

By MARSHALL A. ROBINSON, HERBERT C. MORTON and JAMES D. CALDERWOOD

THE rather forbidding title of this book should frighten no reader away from what is, strange phenomenon, a serious book on economics that is a pleasure to read. Clear, concise and reasonable, it is truly an introduction to its subject, for the authors have started from the very beginning. All terms are carefully defined, and long familiar but seldom un-

tion. In the end Pavlov was held in a silken thralldom to his Soviet masters; for them he proved that a conditioned reflex can be worked out to every stimulus, though he did not apply his axiom to human beings. Lenin, seeing the possibilities there, exclaimed: "Pavlov, you have saved the Revolution!" Stalin applied the lesson after Pavlov and Lenin were gone, in the notorious purges of the Nineteen Thirties. Mao Tse-tung of Red China has been applying it, on an unrivaled scale and at a ruthless pace, since the early Nineteen Fifties. Mr. Hunter has studied Mao's application through a painstaking series of interviews—with GIs captured during the Korean War, missionaries released from Red China, and others who have survived the brainwashing ordeal. His analysis of the elements involved is trenchant: first, a softening of the mind to establish outside controls, then fixing the broken mind with the ideas of the brainwashers. Among the softening techniques used are hunger, fatigue, tension, threat, violence, drugs, hypnotism. It's formidable. But brainwashing, Mr. Hunter believes, can still be resisted. The primary counterweapon is to understand what Communist brainwashers try to do. This book is must reading for anyone interested in one of the terrible inhumanities of our times. Grim reading, though. (Price, $3.75) FREDERICK GRUIN

The Hope of Refuge

By SIKES JOHNSON

SIKES JOHNSON

MANNERED in its simplicity but cumulatively moving, this novel relates what happens to Hamp, a poor young Texas farmer during the last morning of his life. The time is the Korean War, and the hatred of certain local bullies has been aroused against Hamp because his wife is Russian-born. Sensing trouble, he gets up at dawn, leaves his wife in the house and takes their three small children to safekeeping in the homes of friendly neighbors. On his way back he picks up the sheriff, whom he had persuaded to go with him as protection, but the old man drinks himself into a stupor, and Hamp returns with a sympathetic preacher instead. The tragic denouement of the tale is emphasized by a series of sensitive, if not always relevant, cutbacks to Hamp's past, a device by which the author essays to build up a picture of a man who has won happiness the hard way and is prepared to die defending it. Despite an induced quality in much of the writing, this is a first novel of originality and power, likely to stay in the memory as one more instance of "man's inhumanity to man." (Price, $3.50) ROGER PIPPETT

The Transformations of Man

By LEWIS MUMFORD

LEWIS MUMFORD

MANY of the ideas to be found in Mr. Mumford's previous books *The Condition of Man* and *The Conduct of Life* may be rediscovered here, set in a fresh context. Though not long, this is a serious and searching book, not easily summed up, and requiring the reader's entire attention. It aims to outline a kind of "myth" (with no theological overtones) of the development of man, based on everything that modern science has discovered, yet dependent also on speculation, insight and Mr. Mumford's remarkable power of generalization. He traces first the transitional period during which man emerged from the animal to the human. Then comes "archaic man": communal, earthbound, conservative, from our point of view "nonproductive." He is followed by "civilized man": here "property and power become more dear than life" and the human being loses his wholeness and becomes a specialist. When civilization reaches a dead end, only a new sense of religion can revivify it; this is the time of "axial man": Buddha, Zoroaster, Jesus. We are currently, Mr. Mumford believes, at a watershed. We can, using many of the insights of axial man, create a true humanistic world-culture; or we can drive efficiently toward Orwell's *Nineteen Eighty-Four* and become what has been well-called "posthistoric man." (Price, $3.50) CLIFTON FADIMAN

The Cross of Iron

By WILLI HEINRICH

WILLI HEINRICH

FOR obvious reasons, German novels about German troops in World War II aren't calculated to start prairie fires of enthusiasm in this country. Willi Heinrich's *Cross of Iron* is long, grim, diffuse and loyally German. Nevertheless, those willing to tackle it in this fluent translation by Richard and Clara Winston will find that it has its real rewards, even though the cast consists largely of those very corporals and privates who cost us all so much for so many years. The scene is the Eastern front about 1944. The Russians are mounting an offensive to throw back the invaders from the shores of the Black Sea. The

chief character is a German noncom named Steiner, a brave, complex, resourceful small-unit leader scornful of the Nazi-inspired confusion he senses everywhere and plagued by the attentions of a pompous battalion commander. Steiner is an interesting human being, not a literary cliché; indeed, he is given too many quirks of character by the author, so that he remains something of a puzzle to the end. But a long and exciting introductory episode, about a platoon lost behind the Russian lines, soon establishes the kind of man he basically is, and there is nothing puzzling about the effectiveness of Herr Heinrich's book as a whole. It is a graphic, violent narrative of plain men griping, worrying, fighting and dying, brilliantly realistic in some of its battle scenes and happily lacking in the standard, disingenuous German post-Nazi protestations, explanations and overtones. (Price, $4.50) RALPH THOMPSON

Double Exposure

By THEO FLEISCHMAN

THEO FLEISCHMAN

REINCARNATION, going-back-in-time, is always fascinating to contemplate. That is proved by the success of such different treatments of the theme as *Berkeley Square* and *The Search for Bridey Murphy*. Here is yet another variant, a French version of the time-reversal pattern, and a very good one. Florentin Passavant is a timid, browbeaten little clerk in a government office. A French Mr. Milquetoast, "fear had been his faithful and unrelenting companion." He is pushed around by his fellow workers and by his dominating, bullying wife. Suddenly, by a set of curious chances, he is drawn to the era of the Napoleonic wars, and is particularly haunted by the thought of a certain virile General Baron Taillard, one of Napoleon's dragoons. "A force, hidden and powerful, drove him on," and after further exploration, our "poor little whippersnapper" discovers he was Taillard. It is not fair to give away the ramifications of Theo Fleischman's plot, of how Passavant, fortified by this knowledge, reconstructs his life. It is enough to say that it makes a poignant and convincing story. What is essential here, too, is that the author knows the bygone period quite as well as though he, like Florentin Passavant, had been there. Taillard's campaigns are as convincing as Florentin's dusty days at the office and his wretched home life. Well written, and ably translated by Elizabeth Abbott, *Double Exposure* altogether makes an interesting treatment of time-change, that ever popular and intriguing theme. (Price, $3.50) ROSEMARY BENÉT

Manjiro, the Man Who Discovered America

By HISAKAZU KANEKO

H. KANEKO

MANJIRO, a Japanese fisherman who lived about a century ago, was hardly the original discoverer of America. But at that he must have sounded a great deal like Christopher Columbus when he came home, full of incredible yarns, from his "voyage of discovery." In 1841, at the tender age of 15, Manjiro had been shipwrecked somewhere off his native coasts. The kindly captain of a passing Yankee whaler rescued him and brought him back to Massachusetts. Here he lived for a time, going to school and learning English; later he took part in the California gold rush of 1849; later still he returned to Japan (this was before Perry's epoch-making visit of 1853) to become a teacher and public official and to tell his countrymen about the wonders of the United States. It is amazing that this delightful but true account of the earliest impact of American civilization upon Japan should have waited so long to be published. Hisakazu Kaneko, who teaches English at St. Paul's University in Tokyo, has based it largely on Manjiro's own letters and journals. Professor Kaneko's style is as delightful and diverting as the subject matter. (Price, $2.75) GRAHAM BATES

Eisenhower's Six Great Decisions: Europe 1944-45

By GEN. WALTER BEDELL SMITH

GEN. SMITH

GENERAL SMITH was Dwight D. Eisenhower's Chief of Staff. He was in charge of personnel, intelligence, battle plans, transport and supply. A better vantage point from which to observe the end of Corporal Hitler could hardly be imagined. "Beedle" Smith is also a narrator of much skill, writing factually, with dramatic force and with admirable understatement. As he sees it, General Eisenhower's six great decisions concerned (1) the selection of the day for the cross-Channel invasion of Normandy, (2) approval of General Bradley's Falaise strategy, (3) the rapid dis-

Some excerpts from reviews of "Brainwashing: The Story of Men Who Defied It," by Edward Hunter, published by Farrar, Straus & Cudahy, Inc., and now being put out in paperback (June 5, 1958) by Pyramid Books, 444 Madison Ave., NYC 22.

...the first exhaustive and popularly written story of how brainwashing came about, and more important, how it can be defeated by knowledge...This should be "must" reading for military strategists and all citizens interested in the world of the future.
—Marjorie Smith, Atlanta Journal & Constitution

Mr. Hunter is the American correspondent who was first to publicize the Chinese mental torture technique known as brainwashing...Mr. Hunter has, in fact, made clear to the man on the street for the first time what brainwashing is, how it was born, what it does, and how it may best be combated. Every thinking American should be grateful to him for his illuminating and trailblazing expose.
—John Barkham, Saturday Review Syndicate, as published in numerous newspapers

His findings are profoundly important...His report is a fascinating document of great value to the national defense.
—Walter Simmons, Chicago Tribune

"Brainwashing" should be put on every desk in the Pentagon and in every home where there is a boy who might one day go to war.
—V.P. (Virginia Paisley), Newsday, Long Island

...a picture of brainwashing more comprehensive, comprehensible and terrifying than any heretofore available in print...Edward Hunter has written an important book and made an invaluable contribution to our side in the struggle against Communism.
—Eugene Lyons, New Leader magazine

Mr. Hunter tells their story (the P.O.W.'s) lucidly and sympathetically, with a sense of mission...He has analyzed the effect of brainwashing on the strong and the weak and he has sought the expert advice of psychiatrists in the effort to make his readers understand the persecutors and the persecuted.
—Anthony Leviero, N.Y.Times

Edward Hunter's "Brainwashing" is a highly valuable contribution to the battle against Communism. It provides a weapon and armament the non-Communist world has previously lacked.
—F.J.McNamara, Guardpost for Freedom, published by Veterans of Foreign Wars

For those who doubt that Communism's aim is to capture the minds of men, "Brainwashing" should be required reading. For any reader this book is a revealing documentary account of just what brainwashing is, how it came about, how it is used and—best of all—how it can be beaten.
—Nick Lamberto, Des Moines (Ia.) Register

Hunter's persistent research has provided information of inestimable value to the military authorities who must prepare future soldiers who may have to face a ruthless and savage foe.
——Fredus A. White, Newark (N.J.) News

The book should be required reading for every man in the armed forces.
——Charles H. Spilman, Providence (R.I.) Journal

You must read this book...
——Darsie L. Darsie, Herald Examiner, Los Angeles

Not enough is generally known about this new Red device (brainwashing)...it gives the Reds a decided advantage, unless we know what this threat is and how to combat it. Just the book needed for that purpose is Edward Hunter's "Brainwashing."
——Luther Nichols, San Francisco Examiner

"Brainwashing" gives both the pattern for the destruction of men's minds, and what is more important, the pattern on how it can be beaten.
——Faunce Pendexter, Lewiston (Me.) Journal

His outstanding, first-hand knowledge of the subject has produced an extremely well-written book on a little-known subject.
——Jerry Jergens, Tulsa (Okla.) World

This is an inspiring book about brave men, black and white.
——George S. Schuyler, Pittsburgh Courier

His description of such tactics and methods for fighting them should be of interest to everyone opposed to a totalitarian philosophy.
——Barney Ballard, Nashville (Tenn.) Banner

Please, if you read no other book this year, read Mr. Hunter's... which stands as a titan in today's publishing.
——Whitney Bolton, syndicated column, published in N.Y. Morning Telegraph, Buffalo Evening News, etc.

Excerpts from reviews of the book, "Brain-Washing in Red China," by Edward Hunter (Vanguard Press, 424 Madison Ave., New York City 17):

"No more authoritative and carefully documented account of this state of affairs in China today could possibly be presented." - Gordon Walker, Christian Science Monitor.

"Written with restraint, it gives the reader a feeling of oppressive horror that only Poe has ever beaten - and he has the illimitable canvas of fiction on which to pile up his effects." - W.C. Glazebrook, Transport & General Workers' Record, London, England.

"The book is so thorough in detail that it can well be used as a text for those who wish to understand Communism in its making and development." - E.W. Langley, S.J. Catholic Review Service.

"There has not been another book like this one .. tells us far more about Communist China than any other writer has done .. It certainly is one of the most important books of the decade." - Freda Utley, New Leader magazine.

"Mr. Hunter has staked out new territory .. this soberly exciting book represents a return to reality .. It is the first textbook in 'brain-washing' to be put before the American public." - Julian Steinberg, Saturday Review of Literature, New York magazine.

"Mr. Hunter, more interested in ideas than incidents, has examined the Chinese Communist methods of making over the minds of their own people. As described and documented here, it holds for the layman something of the horror of watching a surgical operation." - John Barkham, Washington Post, syndicated column of Saturday Review of Literature, also used in St. Louis Post-Dispatch, etc.

"There is at present in Hong Kong an author whose book has probably sold more copies here than any other written in English about China .. The book is the first detailed account of the 'indoctrination and learning' system in Red China today." - Sandra Varley, South China Morning Post, Hong Kong.

"Why..do the books revealing these truths get so little notice in the New York press and so modest a play in the book stores? Terror is terror, no matter who perpetrates it. Unless we are to be known as a nation of hypocrites, the time has come to drop our blinders.

"A good way to start would be to go to your nearest bookstore and buy Edward Hunter's 'Brain-Washing in Red China'". - Sterling North, N.Y. World-Telegram syndicated column.

"This is a sober book, written without hysteria or excitement, yet terrifying in its implications. It is the story of how Chinese Communists are making over the minds of millions of Chinese to a standardized pattern .. Mr. Hunter does a capable job of stripping much of the mystery from what is probably the most potent 'secret' weapon in the armory of Communism." - A.T. Steele, Herald Tribune book review section.

"The most readable, if somewhat sensational, account of communist conditioning as applied in China is given in Edward Hunter's 'Brain-Washing in Red China.'" - Alan M.G. Little, Problems of Communism, No. 2, Vol. 2.

"See Eddie Hunter's absolutely essential book, 'Brain-Washing in Red China,' which reveals how the Soviet propagandists are remarking the mental attitudes of several hundred million Chinese. It's a ghastly new technique of mass hypnosis induced by fear and repetition." - Victor Riesel, Daily Mirror, N.Y. in syndicated column, "Inside Labor" distributed to about 150 newspapers.

The Herald Tribune in annual book review section, included the book in its list of the most "outstanding."

The basic list of books recommended by the American Legion, in its America-wide drive to put books on Communism into schools and public libraries, lists "Brain-Washing in Red China" among 12 titles. This list was read into the Congressional Record on May 1, 1952, by Vice President Richard Nixon, then a Senator.

"Despite its journalistic form and style, which makes it lively reading... this soberly exciting book represents a return to reality...It is the first textbook in 'brain-washing' to be put before the American public." - H. Arthur Steiner, Annals, American Academy of Political and Social Science.

"Brain-Washing in Red China" by Edward Hunter
Vanguard Press, Inc.

recognized as standard book by many other books, as:

"Edward Hunter's book, 'Brain-Washing in Red China,' has made the working process (of political pressures against the mind) familiar to the Western public."
---"Communist China Today" by Peter S. H. Tang, 1957.
Frederick A. Praeger, N.Y., publisher

"An emotional path-breaking account of value as a careful description of how brainwashing is actually done."
---Index of "The Prospects for Communist China," by W. W. Rostow, 1954.

"A remarkable book by Edward Hunter, which is most unpleasant reading, is recommended to any reader brave enough to face the truth. It is 'Brain-Washing in Red China,' published by the Vanguard Press, Inc., N.Y. Many fellow-travellers and Canadian and U.S. Communists (enjoying the rights of Canadian and U.S. citizenship, while their loyalty is to Communism, makes this a contradiction in terms) refuse to hear of the evils of Communism, having persuaded themselves that it is wholly good. To them this book is earnestly commended as an entirely true picture."
---"Watching the Chinese Curtain Fall," by W.J.Sheridan, M.D.,
Mitchell Printing & Publishing Co., Ltd., Vancouver, Can., 1954

"The only start at analysis, 'Brain-Washing in Red China,' by Edward Hunter, is still dismissed in some academic circles as mostly fiction."
---"China Under Communism---the First Five Years," by Richard L. Walker, Yale University Press, 1955

Some excerpts from reviews of the book, "The Story of Mary Liu," by Edward Hunter, published by Farrar, Straus & Cudahy, Inc., N.Y., and Hodder & Stoughton, Ltd., London.

"One of the most clearcut pictures of the Communist tactics used in Red China to gain control of the minds and wills of the Chinese people."
---Collier Ford, St. Louis Post Dispatch, April 2, 1957

"The impact of this woman's achievements and her personal philosophy about them is overwhelming."
---Elizabeth Foreman Lewis, Baltimore Sun, March 17

"Hunter recounted the brainwashing techniques in an earlier volume, and this one shows step by step how missionary organizations were brought to destroy themselves by a combination of confusion, anxiety and false hope."
---Olin W. Archer, Rochester Times-Union

"...the most factual, and on the whole the most reliable account I have seen of key demonstrations in the accusation movement. I can therefore recommend it to our readers as an important contribution to an understanding of the church in Communist China."
---Dr. Francis Jones, China Bulletin, Division of Foreign Missions, NCC/YSA, April 1

"You will want to read every sentence of this book, and to see to it that young people come to know Mary Liu's story."
---Margaret H. Brown, Missionary Monthly, Woman's Missionary Society, United Church of Canada, Feb.,1957

"George Orwell in his novel '1984' paints an appalling picture of the completely totalitarian society envisioned by the Reds. His fiction is less horrifying than the reality described in these pages."
---R.L.Langlois, Ave Maria, Notre Dame, Inc., March 30

"Written in moving style, dramatic, eventful..."
---Religious Book Club, July, 1957

"It is the most convincing story I've read of the diabolical brainwashing and use of mass hysteria which the Christian leaders who had sold out to the Communists used on those of deeper religious insight and more independent mind among their colleagues."
---Kenneth J. Beaton, United Church Observer, Canada, Apr.15

"Her story, a remarkable and inspiring one, is sensitively and graphically told by Edward Hunter."
---Phyllis Griffiths, Telegram, Toronto, March 2

"A must book for here and now."
---Dr. Daniel Poling, editor, Christian Herald, March 19

"Recommended for all libraries."
—Beatrice B. Libaire, Book Review Digest, N.Y., April 15

"A true story of a modern martyr."
—Birmingham (Ala.) News, March 5

"Every line of it is true, yet it reads like a novel."
—All American Books, New Rochelle, N.Y., Winter, 1957

"Edward Hunter, the man who introduced and explained the word brainwashing to a onetime incredulous world, has done another great service in relating a remarkable woman's experience in a new book, 'The Story of Mary Liu.'"
—Irene Kuhn, in column, "For the Record," Long Island (N.Y.) Press, Roanoke (Va.) Times, etc., March 30, 1957

"This book is more than a documentary expose of a brave Chinese woman facing the tortures of brainwashing; it will find favor with all Christian-thinking Americans who admire courageous faith and determination."
—Times Herald, Jacksonville, Fla., March 17

"The book is well-written...shows the extraordinary power of strong religious convictions in combatting the enemy."
—George J. Casey, Chaplain (Maj.), USA, "Best Sellers," Scranton, Pa., April 1

"A captivating book, telling of the unconquerability of the individual over monumental obstacles."
—Prof. Jee Woo Tsang, Pittsburgh (Pa.) Post Gazette

"This carefully documented book is not only the personal story of Mary Liu, but the triumphant testimony of the unconquerability of the soul...This is a book no one should miss."
—Chen Mei, American Mercury, February, 1958

"The book is easy reading and suitable for teen-agers and the young especially who find adjustment in life difficult."
—Leon S. Rausch, Catholic Press Service, June 17

"Mr. Hunter proves to be master portraitist for an inspiring new kind of heroine."
—Ann F. Wolfe, New Leader magazine, April 15

"This is indeed a most moving story told with great sensitiveness. The first part of the book is worthy to rank with the classics...The second part, Mary Liu's experiences under Communism, is also challenging; a wonderful story and a timely one, most valuable to our understanding of the China scene."
—Canon H. A. Wittenbach, London, England

"This book is well written and carries a message of hope to handicapped persons and a lesson of faith to Christians everywhere. It should be on the shelves of high school and college libraries."
—Karl Baarslag, "U.S.A.," NYC, Nov. 22

excerpt from April 2, 1958 lecture on "American Foreign Policy: Europe and Asia," television channel 11, WPIX, by John G. Stoessinger, assistant professor of political science, Hunter College, New York City, sponsored by Metropolitan Education Television Assn., Inc., of New York City

Professor Stoessinger: "You have stated," so the viewer asked, "only the negative side of brainwashing. Is it as effective as you imply, or are there techniques to prevent the disintegration of a human personality?" There are such techniques. It is, incidentally, a privileged fact to announce here that it was an American who introduced the word "brainwashing" to the American public---Mr. Edward Hunter, who has written a great deal on this problem, and who maintains in his books that there are various techniques which may prevent the disintegration of a personality---which may preserve the personality. His book on brainwashing discusses the positive side of the American counterattack which might prevent our falling into the subtle strategy of brainwashing ourselves. So there is and there are certain techniques for countering this. Unfortunately, I do not have the time to go into these. Let me, therefore, simply refer to the source of this---Mr. Edward Hunter and his books on the problem of brainwashing.

Mr. and Mrs. Edward R. Murrow
Vice President
Columbia Broadcasting Co., Inc.
485 Madison Avenue
New York 22, New York

Dear Janet and Ed:

I am taking the liberty of enclosing a reprint (printed by our school press) of a report which I made to the Richmond School Board on my trip to the Soviet Union last summer.

Although it is perhaps too detailed to be of general interest to those not directly involved in education, I thought that you might be interested in some of my observations.

These observations are certainly not original, but one has to visit the Soviet Union to become fully conscious of the extent to which the total resources of that powerful nation are being devoted toward the single goal of becoming strong enough to impose its will and Communist way of life upon the rest of the world -- by force if necessary.

With warm personal regards, I remain

Sincerely,

Lewis

May 22-1959.

Dear Mr Murrow.
Last night, I spent a marvelous hour and a half listening to the Testimonial Dinner, honoring Dr Taylor.
I want to thank you and the others.
You were warm, gay and witty.
Would it be possible to get a copy of those speeches, particulary Dr Oppenheimers
Also, I would like to read your remark about being a genius!
All the other ~~remarks~~ "bon mots" I remember

I wish you a very happy
time here and abroad.
Sincerely yours
Ludmilla Hurst.

MASON GROSS, President, Rutgers University, will speak on KANT AND DEWEY, Tuesday, November 10, 12:00 noon. Private Dining Room, List Building. Admission $2.25. Luncheon $1.25.

Human Relations Workshop Series:
The Space Age and the Layman

GUS WEISS, JR., will speak on the implications of space age technology and nuclear energy for modern society, Wednesday, November 11, 12:30 PM. 4th Floor, List Building. Admission $2.50.

Once-a-Month and Special Lectures

Monday, November 9, 8:30 PM
Course: Unsolved Problems in a Changing World
Lecturer: CHARLES ABRAMS
Topic: The Land Problem in Developed and Underdeveloped Areas
Admission: $3.25

Wednesday, November 11, 6:20 PM
Course: World in Perspective
Lecturer: LOUIS FISCHER
Topic: Facts and Fiction About the East-West Struggle
Admission: $3.25

Wednesday, November 11, 8:30 PM
Course: Discussions on Current African Problems
Chairman: SANFORD GRIFFITH
Topic: Panel discussion by sociologists and city planners on "Overcrowding of Cities and Industrial Centers in Africa"
Admission: $1.00

Thursday, November 12, 8:30 PM
Special Lectures: Aspects of Taoism and Zen
Speaker: ALAN W. WATTS
Topic: Taoism and the Psychology of Repression
Admission: $2.50; Associates and Registered Students $1.00

The New School Associates will give a reception for Dr. Watts before his lecture, at 7:30 PM in Room 410, Kaplan Building.

Thursday, November 12, 8:30 PM
Course: The American Hero
Lecturer: HENRY B. PARKES
Topic: Frontier Hero – Leatherstocking and Others
Admission: $3.25

Huth, Arno G

June 4, 1959

Dear Mr. Huth:

Many thanks for your kind letter of June 1st.

I wish very much that I might do as you suggest and spend an evening with you and your class some time between October and May.

I am sorry to say that this will not be possible, since I plan to spend most of the next twelve months out of the country.

With all good wishes.

Sincerely yours,

Mr. Arno G. Huth

June 1, 1959

Dear Mr. Murrow:

You told me a few years ago that you would be quite willing to participate as guest speaker in one of my courses at the New School for Social Research, and expressed regret that your evening appearances on radio and television did not permit you to come to my class.

Now, as you are suspending your regular activities for a year, I dare to recall our previous conversation. Do you think you could sacrifice an evening between October and May ? I will conduct a course on "Communication of Ideas" in the Fall, and a course on "Information, Propaganda, and Public Opinion" next Spring.

My class meets every Thursday from 6:30 to 8:10 p.m., but if you prefer I could schedule your talk as well on a Tuesday from 8:30 to 10:10 p.m., in connection with my Seminar on World Affairs. If neither time is convenient I would be glad to arrange for a session with you on any other day of the week.

Needless to say that I would be very happy to welcome you in my class. I am certain that you will enjoy meeting with my students as did all guest speakers in the past, and that you will find it worth your time to share your ideas with this mature and responsive audience.

I wished I could see you before you leave New York, but I do hardly expect that you have a free moment now.

With kindest regards,

Sincerely yours,

Arno Huth

Dear Mr. Hutton:

Since receiving your letter written to Mr. Murrow in December, I have been reading through his recent speeches to discover which of them you referred to. I am sorry to tell you that I could not find one entitled THE PRESERVATION OF THE REPUBLIC IS A SEVEN-DAY-A-WEEK JOB and think this may be a reprint of one of his speeches under a different title. Perhaps you would be kind enough to let me know the magazine in which you read this speech and then perhaps I can send you a copy of it.

I much regret the long delay in answering your letter. We have been extremely busy with year-end shows and special documentaries and I am afraid that the correspondence has suffered.

Sincerely yours,

Sheila Hogg
Secretary to Mr. Murrow

Dear Mr. Murrow:

I have just read "THE PRESERVATION OF THE REPUBLIC IS A SEVEN-DAY-A-WEEK JOB." I like it so much - and would indeed be happy if I could have a copy of the full content, if available.

I think we are witnessing the "Twilight of the Republic," and I enclose an address by Honorable Samuel B. Pettengill, made in Palm Beach, Florida, which I think covers the situation very well. Please note the cartoon on the front cover.

Thanking you in anticipation, I am

Very sincerely yours,

E. F. Hutton

Bequeathed Us A Republic...

Will We Let It Die?

Are American People Facing
The Twilight Of The Republic?

Civilized life is not possible without adequate government. Yet government itself can be the greatest of social evils. The historic struggle of man to be free has been essentially an effort to subdue the state.

His first notable success came with establishment of the United States of America—a decentralized republican form of government under a Constitution designed to protect the rights of the people, a system so arranged that its powers could not be used to exploit or enslave them.

It was undoubtedly the greatest political advance in the history of the world. And the Republic so founded—for a century and a half—was a model of freedom for the world, and a haven of opportunity for its citizens.

It seems incredible that a people so blessed should allow either the word or the spirit of that great Constitution to be debauched or destroyed. But, if we face the truth, we must admit that attempts to destroy it are gaining force while the majority of the people stand idly by, either in apathy or frustration.

Samuel B. Pettengill, former Indiana Congressman who addressed two civic groups in the Palm Beaches recently, raised the vital question of whether the American people were not, in fact, facing the "twilight" of their Republic. And he offered documented evidence to indicate that they are.

Why? Simply because the American people have abandoned the system of government which made their nation outstanding. They have allowed themselves to be led, bribed, conned, frightened, cajoled, and pushed away from a system of individual initiative and free enterprise into the wasting disease that is the "welfare state."

Some also call it the "nursemaid state," but both terms are synonymous with socialism—the gospel of Karl Marx.

It HAS Happened Here!

Socialism in America? It can't happen here!—we have been told, and are still being told, by many of our political leaders. But, says Mr. Pettengill, it not only can happen here—it HAS happened!

Government ownership of industry is socialism. And when the federal government of the United States takes 52% of the profits of a corporation in the form of income taxes, it "owns"—in effect—52% of the shares of that corporation. It need not actually own the cow, if it gets the milk—and it does.

If you have any income, the government owns a "share" of you, too. Depending on the amount of your earnings, the federal government will demand from 20% to 91% of it to finance its ever-expanding operations.

This income tax not only is evidence of the existence of socialism in America, it is the crack in the Constitution through which socialism slithered into the "land of the free," and it is the trough at which "big government" swills and grows fat.

History may record that the "twilight" of the American Republic began in 1913 when the 16th Amendment to the Constitution was adopted, authorizing the federal government to levy an income tax, "from whatever source derived without apportionment among the several states, and without regard to any census or enumeration."

That amendment was the first grant of unlimited power ever conferred on the federal government. There is nothing now in "the law of the land" to prevent its being used to legally confiscate ALL of incomes over a certain amount—or, for that matter, ALL incomes.

Enforcement procedures of this law have reversed the basic American principle that a man is presumed innocent until proven guilty. Anyone suspected of evading payment of federal income taxes is presumed to be guilty, until and if, he can prove his innocence.

And perhaps even more important, in its effect on the American system of government, the income tax law has provided the weapon by which all Constitutional limits on the powers of the central government may be wiped out.

It is axiomatic that "the power to tax is the power to destroy." Marx recognized it. In his "Communist Manifesto" he advocated the steeply graduated income tax as an instrument for social revolution.

The Great Tax Swindle

It is being used as such an instrument in these United States. Says Mr. Pettengill: "Modern governments . . . tax away the earnings of their people, and then dole some of it back to them in subsidies, gifts, grants in aid, and the award of huge government contracts. By this process they become the masters of men, and cease to be their servants."

The historic relationship is reversed. Instead of government coming to the people for its support, the people come to the government for their support. The great "power of the purse," by which representatives of this nation's taxpayers once held the executive branch in check, has passed into the hands of a political Santa Claus. And this Santa Claus does not carry a bag—the taxpayers are left holding it.

The more money a government has to spend, the more it spends; and the more it needs—to consolidate

its power over those who must come to it as beggars. In the name of "emergency" and under increased demands for more and more "benefits," the government lives beyond even its swollen income, amasses an enormous debt. And, imbued with the philosophy of the welfare state, the government tends to become of, by and for pressure groups.

The promise of cradle-to-grave security weakens economic incentive, tends to make men financially irresponsible and reduce them to the moral level of dependent children. Why should a man struggle to provide for himself, to lay something by for a "rainy day" to protect his family from want, when a paternal state promises to do those things for him?

The desire for "security" replaces the desire for opportunity, which is the mark of a vigorous, liberty-loving people. But even though the citizens of a welfare state give up their liberties one by one for the protection of a paternalistic government, where is their security?

The Death Of Security

The tax-and-spend program of such a government is inevitably accompanied by its twin—inflation. And inflation is the death of security.

Escalator clauses in labor union contracts give a worker a certain precarious security during his productive years. But what happens to his life insurance policies, his government bonds, his bank savings, his pension, his social "security" benefits—on which he must depend to provide for the sunset years?

A big chunk of them are stolen by inflation—

stolen by a government whose policies breed and foster inflation. It has been estimated that during the period from 1945-1951, inflation caused purchasing power losses of $123 billion on savings bonds, time deposits in banks, and life insurance policies alone. That is approximately 65 times the losses incurred by depositors in banks in the years 1921-1933.

One of the surest ways of wrecking a nation's economy, Mr. Pettengill pointed out, is to debauch its currency. History is replete with instances of this tragedy. For a government to embark on a course which will rob the thrifty, the aged pensioner, the widow and the orphan by planned inflation is just as immoral as armed robbery on a dark street.

That is what happens when taxation and government spending get out of control, as they obviously have in the United States today. The trend has gone so far that neither Congress nor the people know the full truth about our fiscal affairs. And neither Congress nor the people have control of them. This function has been taken over by the Washington bureaucrats, who now wield more power—through their control of where and for what tax monies will be spent—than either our elected representatives or the President.

'Night' Need Not Fall

Certainly all of this sounds like the "twilight" of our Constitutional Republic. But "night" need not fall if Americans awake to their duties and responsibilities.

Through a program of education, the something-for-nothing philosophy that has been spreading its blight over this nation since the days of the "New Deal" can be shown in its true light, and the principles

which made America what it is brought back to respectability.

Our youth—yes, and many of their elders—must be taught the meaning of the Constitution; they must be taught American history; and they must be taught basic economics. In short, they must be taught Americanism, instead of the foreign "isms" that have already made such dangerous inroads.

IT CAN happen here!

It can happen that our great Charter of Freedom, the Constitution of the United States of America, be restored to its original purity and strength. And it can happen that freedom and opportunity will be thus reborn to bless our children, and their posterity.

But it can happen only if many Americans, like Mr. Pettengill, refuse to "give up the ship."

Dear Sir Julian:

I am delighted to hear you are coming over at the end of May. I am afraid there is no chance of my being able to contribute to THE HUMANIST FRAME but hope this will not prevent us from spending some time together when you are in New York.

Sincerely yours,

ERM:skh

Will see — won't write!

31 Pond Street,
Hampstead,
London, N. W. 3.

16th April, 1959.

Mr. Edward Murrow,
485 Madison Avenue,
New York 22, N.Y.,
U.S.A.

Dear Ed Murrow (if I may be familiar! but I always think of you thus)

I was just about to write to you, when I got your letter of 9th April. What I wanted to talk to you about was whether I could persuade you, during your "sabbatical year", to do an essay - more or less on any subject you wished - for a book of essays I am editing to be called THE HUMANIST FRAME. I send herewith a copy of the memo. which I wrote rather hastily before leaving for India in January, and sent to various people in this country. I have had a good response from most of those listed and have now ~~[illegible]~~ got some others. I have also spoken to Allen and Unwin the publishers who are not only willing but keen to publish the book and pretty certain that we can arrange for publication through Harpers in the U.S.A.

On the financial side we can offer nothing very princely but will be at least £60 down on receipt of the manuscripts in advance of the printing of 5000, on the assumption that Harpers will come in with us and further payments of about £25 after each further 2000 copies have been sold. We are contemplating essays of probably ~~three~~ to four ~~five~~ thousand words, ~~but a minimum of three thousand and a~~ with a maximum of ~~six~~ five thousand, and we would like them in by January, 1960.

I have now got a really rather remarkable list of people to contribute but badly need someone with your point of view to help. I have to be in New York for the Seagram Celebration and Conference on 27th May and wonder if I could see you about all this then.

What I hope is that I shall get various leaders of thought such as yourself to affirm the importance of the new point of view that I call evolutionary humanism in relation to

over/

continued

Mr. Edward Murrow. 16th April, 1959.

the subject that they are most interested in. This general notion of evolutionary humanism, and of fulfilment and realization of possibilities as the ultimate aim of the human species, grew out of discussions in a little group which I organized here some years ago and we all feel that the time is ripe for a really rather revolutionary change in general attitude, with the building up of a generally accepted system of ideas for the world as a whole.

I have tried to develop some of the ideas arising in my recent book, published by Harpers, NEW BOTTLES FOR NEW WINE.

I do hope that I may have a chance of seeing you in New York.

Yours sincerely,

Julian Huxley

Ralph Turner of Yale has agreed to do a piece on History & Humanism, & Barbara Wootton on Social Pathology - I am trying to get Felix Frankfurter as well.

We all admire your broad human outlook, & very much hope you may even want to affirm your beliefs, in regard to any of the many subjects within your kaleidoscope.

JH

Julian Huxley

The Humanist Frame.

The period since the end of the war has witnessed a widespread breakdown of traditional beliefs, and also a growing realization that a purely materialistic outlook cannot provide an adequate basis for intellectual comprehension, morality, or spiritual aspirations. Meanwhile an increasing number of people are coming to feel that man can rely only on himself in coping with the business of living and the problem of destiny, but feel sceptical about the possibility of his achieving this at all adequately,

If this situation is not to lead to chaos, despair, or escapism, man needs to survey the resources available to him, both in the outer world and within himself, to define his aims and chart his direction, and to plan the outlines of his future course. In other terms, he needs to use his knowledge and imagination to build a system of thought and belief which will provide both a supporting framework for his present existence, an ultimate or ideal goal for his future development, and a guide and directive for action and planning. Such a system I call Humanism, because it can only be based on our understanding of man and his relations with the rest of his environment. Today, Humanism must be evolutionary, because it must take account of the discovery that man is part of a comprehensive evolutionary process, and cannot avoid playing a decisive role in it.

Many people have reached this general conclusion, that man is responsible for his destiny and must free himself from reliance on imaginary supernatural beings, in order to reach an assured reliance on himself, and humanist views and ideas are becoming widely diffused. But they are often vague and uncoordinated: the views need clarifying, the ideas need to be systematized before a valid and effective Humanism can emerge.

I am planning a volume of essays, to be called The Humanist Frame, which I hope will aid in this process of clarification and systematization. An introductory chapter will attempt to formulate the framework of a humanist system congruent with modern knowledge, and will present as its goals the enrichment of the quality of life, and greater fulfilment through fuller realization of possibilities. The remaining essays, (which might run from

2,500 to 5,000 or even 6,000 words each) will be concerned with a number of separate fields of human existence, as they appear within such a framework of thought. Their authors will attempt to relate their subjects to the key concepts of this naturalistic and evolutionary system. I hope to include such subjects as ~~religion~~, science, ethics, education, conservation, resources and population, art, medicine and health, politics, social science and economics, history, psychology, communications, and human possibilities in general.

This brief memorandum is being sent to a number of distinguished men and women who share a general humanist outlook, and who I hope may contribute essays. They include the following names:-

Aldous Huxley	Sir Kenneth Clark	Lady Wootton
Francis Williams,	Sir Russell Brain	Professor Lionel Elvin,
Dr. Alan Bullock,	H. J. Blackham	Professor Morris Ginsberg
Sir William Holford	Dr. J. Bronowski	E. M. Nicholson
Prof. G.P. Meredith	Sir Solly Zuckerman	

others will, it is hoped, be added later.

I feel that this project, properly executed, would be of real value. On my return from India at the end of February, I hope to hear that these authors will be willing to participate in it, and will proceed to work it out in more detail. Meanwhile I append a hasty outline of what I consider would be the humanist approach.

(signed) JULIAN HUXLEY.
Jan. 21st. 1959.

The Humanist Approach.

~~The Frame.~~

The humanist approach seeks to provide assurance and guidance to the human species without recourse to ~~the existence of~~ supernatural agencies of any kind, including philosophical Absolutes as well as Gods, demons, angels and other supernatural beings. It repudiates the idea of supernatural inspiration or of supernatural intervention in events.

For its thinking, it relies on human understanding - on the accumulation, testing and improvement of human knowledge and awareness, and of its expressions. Positively, it seeks for a further understanding of the nature and history of the cosmos, and of man, and of the relations between them. More specifically it aims at a fuller exploration of the possibilities and limitations of human existence and action, always bearing in mind that the details of these are steadily changing with the passage of time; and with the backing of history, it believes in the possibility of improvement through human effort.

The background of Humanism today must be an evolutionary one. Man has over two billion years of evolution behind him, and almost certainly an equal or greater period of evolution before him. His is the latest dominant type of life, and likely to continue so. He is the culmination of a long trend during which natural selection has improved organisms in many ways, e.g. by increasing (a) size and power, (b) complexity, (c) integration (d) self-regulation (e) awareness of all sorts (f) sensory perception (of events in the outer world and within the organism) (g) memory (learning capacity), (h) intelligence and intuition (awareness of situations as wholes), thus leading to behaviour which is more flexible, better integrated, and increasingly anticipatory (intelligent).

The latest step was the passage to a psycho-physical organization capable of conceptual thought (generalization) symbolic language (speech), self-consciousness (reflection) and comprehension (insight). With this, man entered a new phase of evolution - the psycho-social phase, superposed on the biological phase. Life, in his person, became capable of storing experience cumulatively, and so building a continuous tradition - intellectual, practical, moral and artistic - which acts as a second mechanism of inheritance - the inheritance of experience and its results. As a further result, natural selection became of secondary importance in producing adaptive results (including both stabilization or change), while psycho-social selection became of primary importance. The struggle for existence,

operating by the slow differential survival and reproduction of genetic variants, became increasingly replaced by the struggle for enjoyment and fulfilment, operating by the much quicker method of differential propagation of ideas, and ideologies, cultural patterns, and systems of psycho-social integration. In the psycho-social or cultural phase convergent evolution by diffusion of ideas and interpenetration of cultures is increasingly operative, superposed on divergent evolution of genetically or culturally isolated separate streams of life.

The present period is the first in which man has been able to acquire a reasonably extensive and reasonably correct knowledge of himself, and his environment (immediate and cosmic), and his place and role in it (in time as well as in space) - in other words, his destiny.

His destiny, as now emerging from his knowledge, is to be the agent for carrying forward the evolutionary process on earth, and in so doing to realise more and better possibilities for himself and his planet. Survival is a prerequisite for this, but is no longer the main goal. The main goal must be the enrichment of the quality of life, greater fulfilment for more individual human beings through greater achievements by human groups and societies - briefly, the guidance of psycho-social evolution towards the goal of the improvement of human existence. In attempting this, he must keep various facts in mind :-

(1) that though absolute perfection is wholly unattainable (and indeed meaningless), improvement is possible.

(2) the obverse of this is the fact that all characteristics of organisms, including psychosocial man, are in a sense compromises, adjustments between conflicting needs or aims, and that each improvement of any characteristic forms the basis for new needs and new adjustments.

(3) The fact that he is an "unfinished" organism, with many limitations due to his past evolutionary history, and inevitably subject to conflict and suffering.

(4) Man owes his dominant position to the improvement of life's capacities for obtaining, organizing, storing and utilizing knowledge; and can only hope to advance by continuing this trend. More and better knowledge is the prerequisite for man's control of his further evolution. Detailed knowledge, obtained by scientific methods, is the prerequisite for control of nature or of specific human activities - better organization of knowledge into ideas, and effective general idea-systems (and the wider diffusion of knowledge and ideas) is the prerequisite for general human advance.

This evolutionary neo-humanist approach has important implications in

every field.

(1) Every human activity must be be looked at functionally, both in regard to its immediate and its long-term function. Religions, arts, educational systems, business and industry, legal and social institutions - they are all organs of that enduring psycho-social organism, man, and must be considered in that light. Humanism asks the question, can they be improved so as to make further psychosocial evolution possible?

Humanism seeks to base itself on knowledge of phenomena. The central phenomenon for humanism is the phenomenon of Man as a segment of evolution - the phenomenon constituted by the psychosocial process, with its mechanisms and its resultant trends.

One important trend is that towards unity of total social, political and ideological pattern. All major psycho-social units (e.g. cultures and nations) are interthinking groups with certain basic ideas in common. Further major advance in human evolution will only be possible when mankind becomes a single inter-thinking group, sharing a single "noosystem", i.e. a single general system of ideas and beliefs. This general noosystem must be based on scientific (i.e. tested, testable, and communicable) knowledge. Humanism must set itself to help in the forming of such a system.

Per contra, a second main trend is towards diversity, but diversity within a more or less unified whole. Human societies are based on individual diversity, both of temperament, aptitude and training. Cultures (cultural patterns) show a diversity of components - intellectual, aesthetic, practical and religious, and the world has been enriched by diversification of its separate cultures during history. The quality and enjoyment of individual life is enriched by variety and threatened by monotony. In general, progress is achieved through the interplay of a diversity of opinions, ideas and expressions.

For all these and other reasons, humanism must not only tolerate diversity, but actively encourage it within the bounds of a unitary framework or overall pattern. It must seek to prevent the growth of deadening monotony. Its ideal must be variety-in-unity, systems of living where freedom is assured by a unitary overall framework of ideas and institutions which supports the whole, while richness and many-sided achievement is assured by variety of the component parts. The humanist must have a functional-evolutionary approach to the various fields of human activity, regarding them as so many organs of evolving mankind. Let me take the example of religion.

Religions for the humanist are psychosocial organs whose function it is to enable man to cope more or less adequately with the problems of destiny, i.e. man's relations with the visible and invisible forces of his environment and of his own nature. They always contain intellectual (cognitive), moral (ethical), and ritual (expressive) components, a framework of ideas and beliefs, a moral code or ethical system, and a pattern of expressive action and celebration, individual or collective, canalizing and expressing religious emotions. And all these components always involve the numinous, the specifically religious emotion of awe or sacredness. Religions always seek to enable man to transcend the immediate, the local and the temporary, by putting him in relation with something larger, more powerful, more extensive and more enduring. In the long run, the beliefs of a religion determine its moral code and the form of its rituals and celebrations.

The task of humanism is to help in the reformulation of religious beliefs in relation to the growth of human knowledge. Our present body of established knowledge makes it impossible to believe in supernatural magical forces or in gods functioning as creators or rulers outside the natural universe, or in supernatural beings, capable of intervening in the natural world or interfering with events, or granting petitions or of being propitiated by sacrifice or obedience.

On the other hand, man has built up his ideas of gods and other supernatural agencies on the basis of ~~his~~ real experiences. One of the immediate tasks of humanism is to look at man's experiences of the forces of destiny and clarify them in the light of established knowledge and scientifically informed imagination. There do exist realities (phenomena, events, personalities) which we can and should regard as sacred: there are forces at work, invisible to unaided simple everyday experience, which affect our destiny and our beliefs.

The advance of knowledge has revealed a great deal of which we were previously ignorant, but which is relevant to our destiny and to any adequate achievement of our role in the cosmos. Humanism sees the gradual development of principles of action and modes of expression which increasingly transcend the chaos of the immediate flux of events. Nietsche spoke

of the need for a transvaluation of values. Humanism should aim at a transformation of the idea of external supernatural gods into that of the emergence of and increasing manifestation of immanent qualities and possibilities in nature to which the term divine (or transcendent, or numinous) might be ascribed.

Humanism can and must envisage a framework of intellectually satisfactory beliefs about destiny - a naturalistic "theology". It can and must envisage moral codes and ethical systems which are congruent with those beliefs (though not always with earlier beliefs): thus humanist ethics regards population control and resource conservation as moral duties. And it can and must envisage institutions and ceremonies which would express and reinforce those beliefs. For instance it is valuable to have places and occasions where like-minded people can join in celebrations or express their religious emotions, where they can be reminded or remind themselves of the long-term and transcendent realities of existence, can meditate and find inner stability. It is valuable to pray - not petitionary prayer which asks favours, but aspirational prayer — a relating of one's personal desires and conflicts to superpersonal ideals.

Humanism can certainly be religious; and it is possible for humanist (non-supernaturalist) religions to come into being, provided they are primarily concerned not with escape from the world, not with salvation and a future life, but with greater fulfilment and enrichment of life in this world.

.....

The subjects of all the essays can be similarly treated - "within a humanist frame". This involves considering them in relation to fulfilment of the individual personality and of individuals in society: to the enhancement of human significance and dignity; to the greater and better realization of possibilities, individual, social and planetary, both in the short and the long term; to fuller achievement; and to the continued enrichment or improvement of the quality of life. And of course also in relation to the converse of this - to the removal or diminution of suffering, misery, frustration, cruelty, injustice and inadequacy.

For example, in considering population in a humanist frame, it is clear that mere quantitiative increase in human numbers cannot be an ultimate aim or an end in itself, as it has been in various periods and for various religions. The subject must be considered in relation to the effects that human numbers have on the possibilities of realizing adequate health and strength, on nutritional resources, on mineral and energy resources, on convenience (i.e. in over-large cities), and on what may be called enjoyable resources (e.g. landscape and natural beauty, solitude and wilderness, plant and animal life, the seaside, etc.)

Then art subserves various human functions, since it is at one and the same time a potent means of communicating emotionally charged ideas, a mode both of individual and social (community) expression, a source of enrichment of that special type of enjoyment we call aesthetic, and a vehicle for interpreting our experiences of reality: and these different functions are interrelated in various ways, some more satisfactory than others. Without the enjoyment of art, individual fulfilment is diminished; without the achievements of art, the development of a community or a culture is inadequate. Conversely, certain essential human possibilities can only be realized through the development of art.

Science and scientific method have a similar multiple relevance. Science is necessary to provide for man's basic need of fuller understanding, and also to provide increased control over nature via its technical and technological applications. Scientific method can be adapted to cope with many human (psychological) problems, even those which are highly multi-causal, those which are primarily mental (psychological), and those which concern values. In a humanist frame, the aim of pure science is not merely to add to the quantity of factual knowledge, but also (and over-ridingly) to increase and improve the organization and integration of knowledge, with reference to a more adequate understanding of nature and man and the relation between them. The aim of applied science is not merely more efficient control of particular phenomena and processes, but also (and over-ridingly) to provide the basis for guided control for the psychosocial process as a whole.

Next we may take economic development, the creation and diffusion of wealth via agriculture, industry, trade and business. Here again, mere quantitative increase of goods cannot be the ultimate or main aim. Nor can intense economic competition, between individuals, firms or nations, be regarded as the best or main method for realizing economic aims. Nor can profitability be considered as the sole or main criterion of success. The system of creating artificial wants by advertising, with the aim of making increased monetary profit out of their satisfaction is not a desirable one. The subject needs to be considered in relation to securing an optimum or at least an adequate balance between efficiency, individual and corporate incentive, healthy competition and overall planning, always in relation to a social structure geared to providing more opportunities for more adequate human fulfilment.

Or again, social science in a humanist frame needs considerable rethinking. For one thing, it needs rethinking in relation to evolutionary psycho-social concepts. Thus one might suggest substituting the idea of The Fulfilment Society in place of The Welfare State as a key concept or slogan for the next phase of social development. From that angle the aim of social science would be to study how social organization could provide more adequate and more varied opportunities for individuals to realize their possibilities, taking account of the great variation in temperament and aptitudes between different individuals.

An adequate "Fulfilment Society" would aim at providing opportunities not only for the learning of the general facts and ideas and the specialized skills and techniques needed for social efficiency, but also for enlarged comprehension of life, adventure, participation in worth while projects, research, meditation and inner development, recreation, creative activity, aesthetic enjoyment, significant rituals, etc.

The scientific basis of sociology also needs rethinking. How can scientific method be more adequately applied to the phenomena of (psycho-) social organization, with a view to ensuring a more efficient development of particular social institutions and a more desirable integration of society as a whole?

Research is needed not only by way of scientifically conducted surveys and evaluations of particular social problems (e.g. homosexuality, punishment, delinquency, failure to profit by education, etc.) but also on more theoretical problems such as the optimum size and structure of different types of functional groups, the efficiency of motivations and incentives in different conditions, the effectiveness of different modes of communication of knowledge, ideas and attitudes, etc.

Communication, indeed, demands separate treatment as a basic component of all psychosocial organizations and all human activities. How does communication operate at different stages of individual and social (cultural) development and in different sectors of society? How do communication systems develop during psychosocial and biological evolution? How can the vast stores of specialized knowledge and historical information best be interpreted and diffused so as to become socially and individually available and effective? Above all, how can a shared or shareable system of ideas be developed, an overall "noösystem" (to adapt Teilhard de Chardin's terminology), which would make for long-term evolutionary fulfilment by facilitating the growth of an organization of human thought and attitude which is unitary in total pattern but with highly differentiated partial components?

All this demands much basic research on the interrelations of signs, symbols, concepts, ideas etc. in situations of all degrees of semiotic complexity, as well as survey studies of particular types of communication-systems performing different functions in society.

Education is another basic element in psychosocial organization. It provides the mechanism both for continuity (stability) and development (change) of cultural tradition (in the broadest sense, including knowledge, skill, attitude, morality, artistic and literary creation, etc.) from one generation to the next.

How do educational problems appear when looked at in a humanist frame - i.e. in relation to fulfilment, both short-term and long-term, both individual and social? There is first of all the problem of increasing the prestige and rewards of the educational profession, and the material and technical facilities of education. Then it is clear that the overall aim of education should be the eliciting and realization of more human possibilities. At the moment,

Nov 24 1959.

Dear Sir Menon

It is many years since we met, but now I hear you are in England, and would so much like to renew our acquaintance. I gather from my sister in the BBC that you are off on Friday (to-morrow, for Sorbin!) would there be any chance of seeing you on Monday? I could come round to your hotel

anytime ~~before~~ after 5.30 (I have another engagement at 7 or 7.30) — or you might care to come to the Athenaeum for a drink? Could you perhaps ring up here, & leave a message, if I'm out?

My brother Rhodes was delighted to have taken part in your inter-continental discussion — what an achievement to have arranged it!

I should like to tell you something about the work of a great I got going here, with Max Nicholson, Barbara Wootton, Bronowski, & Ayer. Yours sincerely Julian Huxley

even the most gifted and fortunate human beings fail to realize many of their possibilities, and it is all too obvious that most of them realize extremely few. Three-quarters of the world is illiterate; but often literacy does not lead to adequate comprehension; the satisfactions of spiritual fulfilment and aesthetic creation are largely or wholly denied to most human beings. Put the other way round, if we could see people's minds and souls, we should be horrified to find how stunted, unhealthy, unfree and distorted they are in comparison with what they might be.

Various other subjects could be treated along similar lines, so that the volume would stimulate thought on a large range of human activities.

(signed) Julian Huxley.

London, January 21st., 1959.

Huxley, Sir Julian

April 9, 1959

Dear Sir Julian:

I am so sorry I missed seeing you during my brief visit to England. Most of my time was spent outside London, filming an interview with Field Marshal Montgomery. So, I was unable to see many of my good friends.

I hope that next time I am over, we can get together.

Sincerely,

Sir Julian Huxley
31 Pond Street
Hampstead, N.W.3
England

Hyatt, Dave

February 5, 1958

Dear Mr. Hyatt:

Fred Friendly has left for a trip to Germany. Before leaving he handed me your letter of January 15th.

Naturally I am flattered to be considered for the award you suggest. However I know that such an occasion requires certain appropriate remarks and I must tell you that I cannot with my present schedule undertake to prepare an acceptance that would be satisfactory to your organization or to myself. I have had to decide either to make speeches or to do the best I can with my limited talents on radio and television.

I realize that your communication to Mr. Friendly was a personal one, but I thought you might like to have an answer as soon as possible, and I regret that it must be negative. Please do not regard this as any lack of appreciation on my part for the award you considered conferring upon me.

Sincerely yours,

ERM

January 15, 1958

Mr. Fred W. Friendly
Columbia Broadcasting System
485 Madison Avenue
New York, New York

Dear Mr. Friendly:

Attached you will find a letter from Louis Seltzer, editor of the Cleveland Press and our National Brotherhood Week Chairman. Doctor Everett Clinchy our President, Doctor Sterling Brown our Executive Vice-President, and Doctor James Eagan our Vice-President for the Northeastern Division are all, of course, very favorably impressed with Mr. Seltzer's suggestion.

I know that the National Conference of Christians and Jews has given mass media awards to Murrow-Friendly productions for their contribution to Brotherhood, but we have never given Mr. Murrow, himself, an award for his contributions as a person to Brotherhood. Would Mr. Murrow consider accepting such an award at one of our top level Waldorf dinners or at some other important occasion sometime in April or May? Could we discuss this further?

Cordially yours,

Dave Hyatt

OFFICE OF
LOUIS B. SELTZER
EDITOR

January 7, 1958

Dear Sterling, Everett and Jim:

Hasn't the time about arrived when Ed Murrow should be singled out for a thumping big meeting at which he receives a Brotherhood Award?

And, if so, shouldn't it be fairly soon?

In his way Ed Murrow is one of the most effective practitioners in the brotherhood vineyard in this country. I think the American public would applaud such a selection.

If you react favorably to the idea his record could easily be documented. And -- if your reaction is favorable -- I should like to volunteer to make the presentation as representing one medium of communications to what we all believe is the foremost symbol of another medium of communications.

Ed Murrow is widely respected and admired in the whole range of communications for the very thing the National Conference stands. By all means if anybody is ever entitled to such an award Ed is.

Cordially,

Louis

CIRCLE 6-6535

November 27, 1958

Dear Edward R. Murrow,

Thank you very much indeed for the record which I greatly appreciate.

It was an honour to meet and talk with you and I telephoned my piece to London the following day. They held it for a few days on the ground that it was too much eulogy! But it appeared in a somewhat abbreviated form in Thursday's Daily Mail and the syndicate, and here it is.

Thank you again and I hope to see you soon.

Yours sincerely,

Don Iddon

Edward R. Murrow, Esq.

TV's idol slams . .

DON IDDON

HAS A PERSON-TO-PERSON TALK WITH

ED MURROW

NEW YORK, Wednesday.

THE man with the best-known voice and one of the most famous faces in America sat in his tiny office coatless, his collar open, his braces bright red against his white shirt. He was, of course, smoking.

This was Edward R. Murrow, the United States' and, perhaps, the world's most distinguished television commentator and broadcaster. Certainly the most widely seen and listened to.

Mr. Murrow, who has won every award there is in television and broadcasting, delivered a few days ago a speech to his colleagues calling for reforms in television and radio programmes.

A list

THE man whose talks with the great and whose Person-to-Person programmes have been watched and heard by millions of viewers does not like being interviewed himself.

The other week, when the *Saturday Evening Post* sent its Pete Martin to talk to Murrow, the TV star's co-producers, John Aaron and Jesse Zousmer, gave Martin a list of 35 questions and suggested that he submit them to Murrow.

Nothing like that happened before or during our talk. I have admired and known Murrow for years.

He made his controversial speech before the Radio and Television News Directors' Association, and he said in effect: 'Let us be more serious, more informative, more responsible in our TV and radio programmes. Let us cut down the trivial, the purely entertaining, the canned commercials, and give an hour or two each week to the mortal peril which the West faces."

be faced if we are to survive. I mean the word survive literally.

"If there were to be a competition in indifference, or, perhaps, in insulation from reality, then Nero and his fiddle, Chamberlain and his umbrella could not find a place on an early afternoon sustaining show.

"If Hollywood were to run out of Indians the programme schedules would be mangled beyond all recognition."

More mature

AS we talked in his small office on the 17th floor of C.B.S. on Madison-avenue—the door with the name "Mr. Murrow" in gold letters—the broadcaster developed his theme:

"I am entirely persuaded that the American public is more reasonable or restrained and more mature than most of our industry's programme planners believe"

I asked: "Do your criticisms of American television also apply to British television?"

Mr. Murrow replied: "Well, I understand you run an awful lot of our light American entertainment programmes, so it does. Incidentally, I am going over fairly soon to interview Field-Marshal Montgomery."

"Will you smoke in front of the general?"

"Well, I don't know. I smoked before Mr. Macmillan and he did not seem to mind. It's a habit I have had for years, not showmanship or anything like that—just a habit."

Murrow talked on: "One of the basic troubles with radio and television news is that both instruments have grown up with an incompatible combination of show business, advertising, and news.

"Each of the three is a rather bizarre and demanding profession. And when you get all three under one roof the dust never settles.

"The top management of the networks, with a few notable exceptions, have been trained in advertising, research, sales, or show business, and by the nature of the corporate structure they also make the final and crucial decisions having to do with views and public affairs.

"Frequently they have neither the time nor the competence to do this.

Not easy

"IT is not easy for the same small group of men to decide whether to buy new stations for millions of dollars, to build a new building, alter the rate card, buy a new Western, sell a soap opera, decide what defensive line to take in connection with the latest Congressional inquiry, how much money to spend on promoting a new programme, what additions or deletions should be made in the existing [illegible] tion to the manifold [illegible] that confront those who are charged with the responsibility for news and public affairs."

A little pompous this, perhaps, but penetrating. What does Ed Murrow propose?

He says: "I am frightened by the imbalance, the constant striving to reach the largest possible audience for everything, by the absence of a sustained study of the state of the nation.

"I do not advocate that we

Insulated

I SAID to Murrow: "Do you really believe we are in mortal peril?" And the man puffed at his cigarette (he smokes 60 a day) and said simply: "Yes. Perhaps not in a military sense yet, but certainly in an economic. The Soviet is out to defeat us economically and has already penetrated into the Middle East and the Far East.

"During the daily peak viewing periods, television in the main insulates us from the realities of the world in which we live. If this state of affairs continues we may alter an advertising slogan to read 'Look now, pay later."

Then, obviously quoting from his speech, Murrow went on: "Surely we shall pay for using this most powerful instrument of communication to insulate [illegible] the hard, [illegible] ich must

turn television into a 27-in. wailing wall where long-hairs constantly moan about the state of our culture and our defence.

"But I would just like to see reflected occasionally the hard, unyielding realities of the world in which we live."

What does Ed Murrow, at 49, plan next, apart from his crusade to educate and inform the public through the media he has mastered?

Apparently not politics. "I would have to be polite to so many s.o.bs."

And never big business, as he despises what he calls "the money-making machines."

Actually, he recoils from long-range blueprints, but will continue as before, a dedicated man, a perfectionist, and a very fine human being.

Iger, Frances

February 21, 1958

Dear Miss Iger:

I have your letter of February 4th.

To answer your question, I do not accept any speaking engagements due to my very heavy schedule of radio and television.

Best of luck to you in the planning of your new inter-collegiate institute.

Sincerely,

Miss Frances Iger
775 Comstock Avenue
Syracuse 10, New York

mec

Murrow

775 Comstock Avenue
Syracuse 10, New York
February 4, 1958

Dear Mr. Murrow,

Several members of the United Nations Club at Syracuse University, (the U.N.Club being a member of the national Collegiate Council for the United Nations), plus interested parties from other clubs on campus which deal with international affairs, are trying to organize an intercollegiate institute, to be held annually, for the purpose of discussion, inter-change of ideas, and the formulation of what we would suggest as a United States policy for the United Nations, in current situations. This institute would probably run for two and a half days, including two speakers, three sessions of committee meetings, and two conventions of the entire group.

As we are still in the tentative organizational stages, (and this conference would take place in the late autumn of next year), this letter is by no means an invitation. But we would like to know whether, if our plans do materialize, you might be interested in speaking to such a group, on one night of the institute; we would also appreciate an estimate of how much you would charge us, in view of the somewhat limited budget available to the originators of any such ambitious enterprise!

Most sincerely,

Frances Iger

ignore

c/c

Dear Mr. Murrow:

I am writing this letter in the hope that you receive this distress signal and send for help.

S.O.S., S.O.S. "The U.S. Middle Income Group has been rammed by the U.S . Republican Party, off the coast of Tight Money Policy, and is sinking fast."

The G.I. Mortgage is dead and no one has had the decency to publicize it in the obituary column. The F.H.A. Mortgage is suffering from a serious ailment and no one has bothered to notify the doctor. Only one animal remains, the one called the Conventional Mortgage.

The name of the last mentioned is actally a misnomer. It should, in my opinion, be called the "Convenient Mortgage." Here are my reasons w hy:

1) A little over a year ago the rate charged on this type mortgage was 5%, which steadily rose to 5½%, at present to 5 3/4% and soon to go to 6%.
2) The public is told that because banks are paying higher rates on saving accounts, they must be compensated by raising the mortgage rates. To this I hold a nebulous reservation.
3) Then John Q. Public is told that mortgage money is tight. This naturally puts a premium on mortgage money, and very conveniently places it in the number one spot on the Black Market, by coniving bankers.

You are told by real estate brokers, lawyers, mortgage brokers, and bankers, as well, that you can obtain a mortgage even in this so called tight money market, if you are willing to pay a fee for obtaining same. This is not predicated on your credit rating, ability to pay, or the size of your down payment, but rather at the convenience of the banks, if you are a willing prospect and pay a fee commonly called "Points" or "Finders Fees." This legal terminology works as follows:

1) If a seller wants to sell his home for $20,000., he places it with a real estate broker who brings the selling price up to $22,400. The difference of $2,400. consisting of the brokers legal fee of 5% or $1,000. and $1,400; re-s erved for the banking officials. Why? Because the broker knows that in order to get a 2/3 mortgage the bankers receive at least 10 points or $100. for every $1,000. of mortgage money issued, as a Finders Fee for the placing of the mortgage. Of course the contract and closing papers make it appear that the seller received this money, not the reputable bankers.

2) If a buyer buys direct, he is told to see a mortgage broker, who fills out an application, that the average grade school pupil would have no difficulty in doing, and for this service receives anywhere from 1% for the less greedy ones, to 5% for the real hogs, plus a payment of 5 to 10 or more points (each point represents 1% of the mortgage issued) to the bankers, paid thru the brokers. This fee incidently, never appears on any document either.

If you read my signals correctly and have the courage and conviction of preserving the backbone of this nation - "The U.S. Middle Income Group" - please acknowledge receipt of this letter and if necessary, request more data.

Very truly yours,

Robert T. Ilasi.

Dear Friend:

On the occasion of our triennial convention, now in session in Miami Beach, Florida, our General Executive Board has submitted, as customary, its report on the activities of our Union. The report also touches upon the problems of the general labor movement in recent years.

In addition, we are submitting a detailed financial report on the operations of our International Union and of all of its affiliates.

We are pleased to send you both of these reports.

Part I and Part II of the GEB report, which analyzes how the ILGWU has dealt with new problems confronting the labor movement in the fields of ethics, law, leadership and security, will be of interest to you. Your attention is also directed to page 7 of the Financial Report which contains a useful summary, as well as to pages 5 and 6.

We believe that this material, which mirrors the work and progress of our Union, wll be informative.

Sincerely yours,

David Dubinsky

20 January 1959

Dear Sheila:

I just read in Broadcasting/Telewasting Magazine about last night's Ed Murrow radio show. Unfortunately I did not know about it so did not hear the thing.

Would a script possibly be available --- purely for my own information? It sounds like such a remarkable advance in audience maturity (or rather in network maturity) that I should like to see how it was done.

With all best wishes,

Hiff

Irvin, Floyd

7

April 7, 1959

Dear Mr. Irvin:

I have your very nice letter of March 29th with its interesting proposal.

Unfortunately, I have no control over any programs at CBS other than the ones I am, at present, producing which are PERSON TO PERSON, SMALL WORLD and 7:45 nightly news. Your suggestion for a program may, perhaps, have merit, however, I cannot possibly fit it into my format. I am sorry.

If you care to pursue your idea, I suggest you write a letter to Mr. Irving Gitlin, Director of Public Affairs programs for CBS. Thank you for writing.

Sincerely,

Mr. Floyd M. Irvin

Edward R. Murrow
C B S
New York City' N.Y.

Dear Sir:

I write to sugest that we need more help by T V programs in the solution of our Race Problems. Much can be done by suggestion,- by pictures of different races intermingling in school, in sports and in business.

I believe we also need more facts on the net results of racial discrimination. Could you give us a well documented picture built around the question; " Do our segregationalist vote for, or against, Communism in the Cold War?" This could picture the Southern leader's strong contentions that they are anti-Communist, their discrimination against negroes, and how this discrimination is used by Communists in strategic areas to win groups of colored peoples and how this may effect the outcome of the Cold War.

Can you give us such a picture? I hope you can.

If you cannot do it yourself, can you inspire some one else to do it? I trust you can do one or the other.

sincerely,

Floyd M. Irvin

Isolini, Doris

February 9, 1959

Dear Miss Isolini:

Thank you for your nice letter of January 19th and your kind comments on THE BUSINESS OF SEX.

The program brought forth a considerable volume of mail, most of it favorable.

Sincerely yours,

Miss Doris A. Isolini

Dear Mr. Murrow:

I have just heard your broadcast "The Business of Sex". Thanks and congratulations to you and to CBS for the direct and truthful presentation.

You may be receiving many letters condeming CBS for allowing such a subject to be aired -- especially because of the forceful and meaningful manner in which it was broadcast. And so I have decided to write to let you know that I, and many others, appreciate the courage and hard work that brought this program to the air.

Again, deep thanks for bringing to the ears and minds of your listeners a program of meaning and reality. Let us have many more!

Sincerely yours,

Doris A. Isolini

Dear Mr. Murrow:

I am calling this most interesting ISPEX PHILATELIC EXHIBITION to your attention for possible use on one of your programs. ISPEX will be held June 15th to 18th, 1958 at the New York Trade Show Building, 500 8th Avenue, New York 18, New York.

Enclosed you will find a separate list of suggested possible programs and some interesting facts relative to ISPEX. If you would like any further information, please reach me at the address or phone number below.

I thank you very much for any possible help you may give us to publicize this most unusual feature of New York's Summer Festival.

Very truly yours,

ISPEX Publicity Chairman,

Sidney Bernstein

NEWS RELEASE

JUNE 15-18th 1958

ISPEX PHILATELIC EXHIBITION

TO HONOR THE TENTH ANNIVERSARY OF THE STATE OF ISRAEL

SUGGESTED INTERVIEW PROGRAMS RELATIVE TO ISPEX

1. Mr. Jan Bart, a well known night club entertainer, with his collection of postal material and personal belongings of the late President Roosevelt (including a breast pocket handkerchief worn on the day he died).

2. Mr. Vincent Lopez, orchestra leader, with his unusual collection of air mail stamps of the world.

3. Mr. Lionel Hampton, orchestra leader (who will be playing at the opening day ceremonies of ISPEX, Sunday, June 15th), and a discussion of his interest and love for the democracy and State of Israel.

4. Mr. Herbert Rosen and his fabulous collection of "FOUR THOUSAND YEARS OF LETTER WRITING" and his "EVOLUTION OF LETTER WRITING" including a 4,000-year-old clay tablet and letters written on parchment by the Doges of Venice.

5. Mr. Emil Weitz and his unique collection of Judaica including Ghetto and concentration camp postal material.

6. Mrs. Helene Lande Blumkin of the Stamp Department of the Jewish Agency with pages from the collection of Mr. Rudolf G. Sonneborn, industrialist. This exhibit represents full sheets of the first five years of Israel's stamps. Some of the single sheets are worth more than five thousand dollars.

7. Mr. Simcha Pratt, Consul General of the State of Israel, and a discussion of the first stamps of Israel (to be confirmed).

8. Doctor Joseph Burg, Minister of Posts of the State of Israel, and a discussion of his department which encompasses, besides postal matters, radio, telephone and telegraph services in Israel (to be confirmed).

9. Mr. Jan Bart and an unusual collection of stamps relating to music. Each stamp is mounted to represent a musical instrument or conductor. These are mounted on a 30 x 40 board representing the seating arrangement of the Carnegie Hall New York Philharmonic Orchestra.

SOME ADDITIONAL INTERESTING FACTS

- One million dollars worth of stamps will be on exhibit.
- Cardinal Spellman will exhibit his "America - The Beautiful" collection.
- The Minister of Posts, Dr. Burg, is flying here for opening ceremonies.
- The United States Government Postal Authorities are opening a special branch Post Office for the four days of the show.
- The Ministry of Posts of the State of Israel is exhibiting a complete record of 10 years of their postal history. This has been prepared in Jerusalem and will arrive here in a few days.
- Stamp dealers from Canada and Great Britain, as well as the United States, will have material on hand for sale to collectors.
- Mr. Franklin R. Bruns, Jr., Director of Philately for the United States Post Office Department, will make an address at the opening ceremonies.

JUNE 15-18th 1958

ISPEX PHILATELIC EXHIBITION

TO HONOR THE TENTH ANNIVERSARY OF THE STATE OF ISRAEL

FOR IMMEDIATE RELEASE

INTERIM REPORT - ISPEX PHILATELIC EXHIBITION

NEW YORK--A general, world-wide stamp exhibition to honor the Tenth Anniversary of the State of Israel will be held June 15-18, 1958 at the New York Trade Show Building, 35th Street and Eighth Avenue, New York City. The show is being sponsored by the Society of Israel Philatelists comprising over 900 members throughout the world.

The thirty dealer booths and five lounges have all been reserved. Minkus Publications, Ghana Philatelic Agency, Israel Philatelic Center, Mosden Stamp Co. of London, R. J. Geller, Negev Stamp Co. and Andrew G. Flesch are among the participating dealers.

The United States Postal Authorities have arranged to install a branch post office for the four days of the show where commemorative stamps can be purchased and where a special ISPEX cancellation can be applied to outgoing mail. They have also furnished an interesting exhibit of United States material which will be shown in the Court of Honor.

The government of the State of Israel is participating by sending a specially prepared presentation of postal material covering ten years of its postal history. The Minister of Posts, Dr. Joseph Burg, will be the official patron of ISPEX and will donate through his Ministry a beautiful trophy, prepared in Jerusalem, to the most outstanding exhibit in the show.

Many famous collections from eminent philatelists will be shown. Cardinal Spellman's "America, The Beautiful"; a unique collection of Vincent Lopez';

"Rooseveltiana" by Jan Bart; Herbert Rosen's Fipex-winning collection of "Four Thousand Years of Letter Writing" are some of the exciting material which has been submitted.

The Exhibition is divided into two major sections: (1) Israel, which will include Palestine, Mandate, Interim Period, the State of Israel and Judaica; (2) The United States, Canada, Middle East, Latin America, Europe, Asia and Africa. There will also be sections devoted to Topicals, Air Mails, Philatelic Literature and a special section for juniors.

The prizes and trophies are being prepared by master craftsmen in New York and Jerusalem.

An eight-page prospectus was prepared which relates the general purpose of the exhibit and the rules and regulations for entry as well as the various classifications.

A handsome, souvenir program journal priced at 25¢ will be available at ISPEX central booths.

The Washington Press of Newark, New Jersey has prepared an Artcraft First Day Cover to commemorate the event with an ISPEX cachet. This will portray a map of Israel with the official 10th Anniversary emblem. Covers will be available at all dealer booths as well as at the official lounge. They will be priced at 18¢, 2 covers for 35¢ and will bear the U. S. Post Office ISPEX cancel. Those collectors wishing to order by mail, may address Mr. Sam Speigler, Co-Treasurer at 2132 - 70th Street, Brooklyn 4, New York.

The Chairman of ISPEX is Mr. Sol Rozman; Co-Chairman, Mr. Leon Walters; Honorary Chairman, Mr. Rudolf G. Sonneborn; Vice-Chairmen, Mr. Solomon Handel, Mr. Emil Weitz, Mr. Jack L. Minskoff, Mr. Louis S. Schulman and Mrs. Sarah B. Deutsch.

The Board of Judges to date consists of Mr. H. D. S. Haverbeck, Chairman; Mr. John R. Boker, Jr., Mr. Steven G. Rich, Mr. Louis Stich, Mr. Henry M. Goodkind, Mr. Paul P. Lindenberg, Mr. Albert H. Higgins and Mr. Harry Zifkin.

Admission to ISPEX has been set at 50¢ for adults and 25¢ for children.

Dear Sir:

The Tenth Anniversary of the founding of the State of Israel will be celebrated in the United States, in Israel and in some 36 countries, beginning April 24, 1958.

The opening ceremonies in the American celebration will take place at Independence Hall in Philadelphia on April 24.

It occurred to us that you might wish to mark this anniversary with appropriate comment on your program.

In the hope that this is possible, I am enclosing two memoranda which may be of help as background material. These two documents are fact sheets:

I. Chronicle of Israel's struggle to be born, to survive and to grow against the background of international events.

II. Record of Israel's internal growth in its first decade.

The American Committee, in whose behalf I am submitting these documents, represents a distinguished cross section of American leaders of all faiths, in the fields of religion, art, science, law, labor, education, music, literature, theatre, motion picture, radio, TV, baseball and public service.

Under the auspices of this Committee, of which former Senator Herbert H. Lehman, is the General Chairman, a series of programs are being developed in the United States, looking toward recognition of Israel as an enclave of democracy, and the need for pressing for peace and development in the area as a whole in the interests of the region and world security.

We would appreciate hearing what material is used in connection with the Anniversary.

Cordially,

Lillie Shultz

Lillie Shultz
Executive Vice Chairman

INTRODUCTION

This fact sheet has been prepared as a ready reference source of up to date information about the State of Israel which completes its tenth year as an independent state on April 24, 1958.

Throughout the free world, Israel, on its tenth anniversary, is being saluted as a bastion of democracy and as a pilot plant for human rehabilitation.

In ten years, Israel's population has grown almost threefold; its cultivated area doubled; its school attendance quadrupled; production tripled; industry increased sevenfold. Health conditions are on a par with those of the most advanced nations in the world.

In the world of science it has achieved international recognition.

The factual chronicle of this record is detailed in the following pages.

HISTORY

From the year 1516, when it was conquered by the Turks and made part of the Ottoman Empire, until the formation of the State of Israel in 1948, the area known as Palestine was governed continuously by foreign powers.

The Ottoman domination lasted 400 years. After the first World War, in breaking up the Turkish empire, the League of Nations entrusted the Mandate for Palestine to Great Britain; and for the succeeding 30 years the territory was governed by the British.

Thus, for more than four and a quarter centuries prior to the end of World War II, Palestine had belonged in the political sense neither to the Jews nor to the Arabs who, together, made up its population. No validity whatever attaches to claims that Palestine, prior to 1948, was an "Arab" state. For four centuries it had been a Turkish province and for three decades a ward of the League of Nations, governed by Great Britain.

Indeed, Palestine had not been an independent state since before the time of Christ. In the days of antiquity a Jewish state, in 63 B.C.E. it was invaded and conquered by the Romans. Thereafter, it suffered changing fortunes, alternately ruled by Christians and Moslems until 1948.

In 1947 Britain announced that it would relinquish the Palestine Mandate and requested the United Nations, as the successor of the League of Nations, to determine how Palestine would be governed thereafter. British rule formally ended on May 14, 1948.

In anticipation of Britain's departure, the United Nations had appointed a special committee on Palestine (composed of representatives of Australia, Canada, Guatemala, India, Yugoslavia, Peru, The Netherlands, Czechoslovakia, Iran, Sweden and Uruguay) to study the situation in Palestine and to make recommendations regarding its future status.

Partition Proposed

In August 1947 this Committee recommended that the territory be divided into a

Jewish State and an Arab State, joined in an economic union, with the Jerusalem area to be governed by an international authority subject to the Trusteeship Council of the United Nations.

On November 29, 1947, the General Assembly of the United Nations adopted this recommendation by a vote of 33 to 13, with 10 abstentions. At that time the Jewish population of Palestine was about 650,000; the Arab population about one million.

The Jewish Agency, representing the Jews of Palestine, immediately accepted the United Nations Partition Plan, although that plan fell far short of the Jewish claims and hopes. Jewish Palestine began at once to prepare for statehood in the territory assigned by the United Nations and in the stages laid out in the United nations resolution.

But the Arab Higher Committee, representing Palestine's Arab population, and backed by the surrounding Arab countries, flatly rejected the United Nations decision and refused to implement it. Instead, attacks by so-called Arab irregulars, mobilized by the surrounding Arab states, the Arab Higher Committee, and the Arab League, were begun at once against the Jewish population of Palestine.

On May 14, 1948, the British departed with all their administrative and military personnel. The Provisional State Council of Government, established in accordance with the United Nations Partition Resolution, proclaimed the State of Israel.

The Arabs Attack

Simultaneously, the regular military forces of Egypt, Trans-Jordan, Syria, Lebanon and Iraq invaded Palestine from the north, south and east with the avowed purpose of destroying the new Jewish State and its inhabitants. This march on Palestine was announced in formal communications to the Security Council of the United Nations.

"This will be a war of extermination and a momentous massacre," said Azzam Pasha, Secretary General of the Arab League at a Cairo press conference on May 14, 1948.

In four weeks of intense fighting, the Jews drove back the invading Arab armies. On June 11, a one-month truce went into effect at the instance of the United Nations. Thereafter the Arab states renewed the attack; but, after ten days' fighting, during which their forces were severly beaten, the truce was reinstated. During the autumn and winter of 1948, further fighting took place.

Armistice Agreements Signed

Between February and April 1949, mediation by the United Nations produced a series of armistice agreements between Israel and her immediate neighbors, Egypt, Syria, Lebanon and Jordan.

The aim of these agreements was: "To facilitate the transition from the present truce to permanent peace." They prohibited "aggressive action" and "any hostile or warlike acts" by any of the signatories.

But the Armistice Agreements did not lead to peace. Through the ensuing years, the Arab States persisted in open and avowed belligerency toward Israel, involving constant guerilla harassment, stringent economic boycott, and the blockade of Israel shipping in the Suez Canal and the Gulf of Aqaba.

Armistice Lines Fixed

In repelling the 1948 Arab aggression, the Israeli defense forces drove beyond the boundaries proposed for the Jewish State in the United Nations Partition Resolution. None of the additional territory thus gained by Israel belonged to any Arab state. It was part of the area proposed by the United Nations Partition Plan for an Arab Palestinian State, which had been rejected by the Arabs. Some of the territory was relinquished during the armistice negotiations; most of it was not. The armistice agreements

were concluded and signed by the Arab states on the basis of the new boundary lines established by Israel in driving back the attacking Arab armies.

Subsequently, on April 24, 1950, the Hashemite Kingdom of Jordan formally annexed some 2,600 square miles of eastern Palestine west of the Jordan River, including the Old City of Jerusalem, where most of the Holy Places are located. This annexation of territory, intended by the United Nations to be part of the independent Arab State in Palestine, was based on the boundary line established by the Armistice Agreement with Israel.

Inside Israel's present boundaries, which for 10 years have defined the area of the country, 8.6 percent of the land was owned in 1948 by the Jewish population of Palestine; 3.3 percent by Arabs who remained in Israel and have become citizens of the country; 16.5 percent by Arabs who fled Palestine during the fighting and now make up the Arab refugee population. The remainder, 71.6 percent, or nearly three-fourths of the area, was public land with title vested in the British Mandatory Government.

MAPS OF ISRAEL AND THE MIDDLE EAST

GEOGRAPHY

Israel, occupying a narrow irregular strip along the eastern end of the Mediterranean, is about the size of Massachusetts, with a total area of 8,050 square miles.

This is approximately one-half of one percent of the land area of the seven neighboring Arab states, which aggregates 1,675,234 square miles.

Boundaries

Israel is bounded:

On the north by Lebanon -- 49 miles of border.

On the north and east by Syria -- 47 miles of border.

On the east by Jordan -- 329 miles of border; and for 35 miles by the Dead Sea.

On the south by Egypt -- 128 miles of border; and for 6 miles by the Red Sea.

On the west, by the Mediterranean Sea -- 177 miles of coast line; and for 37 miles by the "Gaza Strip," controlled by Egypt.

Thus, for 590 miles the country is bordered by hostile Arab states. Israel is 260 miles long from north to south. Near Tel Aviv, 12 miles separate the Mediterranean Sea and the Jordanian Border; south of Beersheba, the country broadens to its greatest width of 70 miles; but at Elath, on the southernmost tip, the country is only nine miles wide.

Climate

The climate is gentle with warm summers (65 to 105 degrees) and mild winters (40 to 70 degrees) conducive to agriculture and, in some southern regions, to year-round production under irrigation.

Rainfall in the northern sector is ample (21.6 to 37.4 inches per year). The southern half of the country -- the Negev -- is desert, with rainfall dropping to as

little as 1.2 inches per year. For this reason, Israel's irrigation program is designed primarily to bring water from the north to expand the agricultural areas and productive capacity of the south.

Water

Water resources are limited. There are three rivers: the Jordan, (73 miles in Israel); the Yarkon (16 miles); and the Kishon (8 miles); and Lake Tiberias, (also known as the Sea of Galilee and Lake Kinneret) with an area of 63.7 square miles.

The Dead Sea, of which 108 square miles lies in Israel, is too salty for agricultural or domestic use. It is, however, a rich source of minerals.

Cities

Israel's principal cities (over 30,000 population) are:

Jerusalem (population 149,400) the capital; Tel Aviv - Jaffa (365,000) the country's largest city; Haifa (160,000) the main port; Ramat Gan (65,150); Petah Tikva (46,000); Natanya (33,100); Holon (32,200).

There are 21 cities with populations between 10,000 and 30,000, including such historic places as Beersheba (30,000); Nazareth (23,000); Rehovot (20,500); Acre (20,000); and Tiberias (20,000).

At the end of 1956, 1,337,046 persons lived in cities, towns, and villages. The remainder, 514,000 (plus 21,344 Bedouin) lived in small rural settlements scattered throughout the country.

POPULATION

Israel's population almost trebled in the first ten years of the country's existence -- a phenomenon of growth seldom if ever paralleled.

In May, 1948 the infant state had 650,000 inhabitants.

Today, the population is a little under 2,000,000.

With 236 persons to the square mile, the country is about as densely populated as Pennsylvania.

Of the total population on December 31, 1956, Jews numbered 1,667,455, and non-Jews 204,935. These were for the most part Arabs -- either Moslem, Christian or Druze.

Immigration

The country's threefold increase in population in a single decade was produced by a tide of Jewish immigration to the new State from 70 different nations in the world following the United Nations decision to establish a Jewish State in Palestine.

Between May 1948 and December 1957, more than a million Jews entered the country. This tremendous influx had its origin in four main sources: (a) Jewish survivors of the Nazi holocaust in Europe, who had been in "Displaced Persons" camps and had no other haven; (b) immigrants from Eastern Europe; (c) Jewish refugees from Arab countries; (d) newcomers from the free world, drawn by the creative adventure of building a new nation.

Half of the immigrants were refugees from persecution and repression in Arab countries. Israel has absorbed more than 250,000 Jews from Asia, including 125,896 from Iraq, 45,738 from Yemen, 27,534 from Iran -- virtually the entire Jewish populations of these three Moslem states. It has given refuge to 197,820 Jews from Africa, including 34,140 from Egypt and Libya.

Absorption of the Immigrants

The absorption and integration of this flood of newcomers represents a major achievement in human rehabilitation.

The approximate average of 100,000 immigrants per year confronted the new nation with a task comparable in magnitude to the absorption by the United States of ten million new citizens every year for ten years.

Fewer than 2 percent of the immigrants entering Israel after 1948 had any agricultural experience; more than half lacked vocational or professional training of any kind. Most were without means. Included were children of all ages, the aged, and the sick, for which the struggling new state provided treatment and care.

A government "ship-to-settlement" policy, inaugurated in 1954, now moves able-bodied newcomers immediately into agricultural settlements or industrial development areas, where they become self-sustaining members of the community.

Since 1949, some 470 villages and rural settlements have been established to accommodate the steadily increasing population.

Language presented a major problem. Coming from 70 countries and a wide variety of cultural and educational backgrounds, few of the immigrants spoke Hebrew, the language of Israel. Language courses offered by the Government have helped to meet this problem, and local classes are held throughout the country under the auspices of local authorities, labor organizations and other bodies. Over 300,000 adults have studied Hebrew in these courses.

Israel's prodigious effort to receive and absorb the immigrants, care for those who needed care, provide new opportunity for others on the land or in industry, and weld them all into the structure of a new nation, is reflected in the country's record of progress and development in its first ten years.

GOVERNMENT

A republic, Israel is governed by a 120-member, one-chamber parliament, called the Knesset, elected under a system of proportional representation.

The head of the state is the President, elected by the Knesset for a five-year term. The President's functions are limited. The executive functions of the government are carried out by a Prime Minister and a Cabinet controlled by the Knesset, whose vote of confidence is necessary to continue the government in office.

Suffrage, Courts, Defense

Suffrage is universal. Election is by secret ballot and direct vote. The term of the members of the Knesset is four years. Israel has had three general elections since its establishment.

A High Court of the State safeguards the rights of individuals and the execution of the law. In addition to the Supreme Court, there are District Courts and Magistrates' Courts. Judges and Magistrates are appointed by the President on the recommendation of a broad Judiciary Nominations Committee. The complete independence of the Courts is guaranteed by law.

The laws of the country provide for complete freedom of speech, of the press and of religion. Primary education is compulsory and free. There is no censorship.

Menaced from the day of its formation, Israel has been compelled to assure its own security against threats of annihilation continuously voiced by leaders of the neighboring Arab countries. In its first ten years, the country has produced an effective and powerful citizen army with the demonstrated capacity to stand off any local aggression.

The Israeli army consists of a small nucleus of commissioned and non-commissioned

regular officers, most of whom were trained with the Jewish Brigade, fighting on the side of the Allies in World War II; a conscript contingent of men and women called up for military training and service under the Defense Service Law; and a large reserve.

Conscription is compulsory for both men and women. Men between the ages of 18 and 26 are required to serve 2-1/2 years; those between 27 and 29 are required to serve 2 years if they have not previously been conscripted; women between 18 and 26 are required to serve 2 years.

Following their tour of compulsory service, all men and women are members of the Reserve until the ages of 49 and 34, respectively, with annual tours of duty of approximately one month.

The conscription and reserve system enables the State to put into the field an effective, well-trained force on short notice without the necessity of maintaining a large standing army. Reserve units can be called up, equipped and made completely operative in a matter of days.

RELIGIOUS COMMUNITIES

Freedom of religion and conscience, and the safeguarding of all Holy Places and sites of all religions, are guaranteed in Israel's Proclamation of Independence.

In the Government, there is a Minister for Religious Affairs. His Ministry gives assistance to the institutions of all religions; this assistance ranges from aiding repairs of synagogues, mosques and churches to providing extra rations for religious festivals of the different communities.

The Sabbath and the Jewish festivals are recognized as official days of rest. But the right of each religious community to observe its own weekly day of rest and its religious holidays is guaranteed by law.

The majority of Israel's inhabitants are of the Jewish faith.

Moslems

The majority of the Arab community in Israel is of the Moslem faith (138,000 at the end of 1956). The highest Moslem dignitaries are the Kadis of the Moslem Religious Courts. There are about 165 Moslem clergy, who are paid by the State. Regular services take place in about 100 mosques. Moslem Advisory Councils, whose expenses are met by the State, attend to all religious and social affairs of the Moslem community.

Christians

There are about 45,000 Christians in Israel, most of them Arabs. However, almost every Christian Church and Sect has some foothold, however small, in Israel.

There are about 160 Christian churches and chapels in Israel. The clergy number about 1,000, including some 150 monks and about 550 nuns, belonging to some 30 monastic orders.

There are Christian Holy Places in Jerusalem (the Coenaculum on Mt. Zion), on

Mt. Carmel in Galilee (in Nazareth and environs) and on the shores of the Sea of Galilee.

The Israel Minister of Religious Affairs works in close contact with the heads of all the various religious communities. It publishes -- in English, French and Spanish -- a periodical called "Christian News from Israel." The Ministry also co-operates with the Government Department of Antiquities in the restoration and preservation of ancient churches.

As of the end of 1956, the Christian communities in Israel included the following:

Name of Church	Members	Head
Greek Catholic	17,686 (Including 6,445 Melkites)	Archbishop
Greek Orthodox	14,337	Metropolitan
Latin	5,188	Representative of Latin Patriarch in Jerusalem
Maronite	2,470	Vicar of Bishop of Tyre
Armenian Gregorian	779	Vicar of Armenian Patriarch of Jerusalem
Coptic	91	Representative of Coptic Archbishop of Jerusalem
Anglicans, Presbyterians and Lutherans	1,153	
Others (including Abyssinian Church, headed by Archbishop)	1,581	

Druze

The Druze split away from Islam in the Eleventh Century. In Israel, they are recognized as a fully-autonomous religious community. There are 20,000 Druze in Israel, living in 18 villages and communities in Galilee and the Carmel. A council of three heads the community.

Bahais

There are only a few members of the World Bahai community in Israel. However, Israel is the world center of the Bahai faith. The world spiritual leader of the Bahais lives in Haifa, where the founder of the faith was buried. The Bahai shrine is a prominent landmark.

ISRAEL'S ARAB POPULATION

Israel's Arab population of 204,000 is the only minority group in the country. It is mainly Moslem, but includes some 50,000 Christian Arabs, and 20,000 Druzes. The Druzes have recently been given the right to conduct their internal affairs as an independent community.

The Arab population enjoys full citizenship rights in Israel. This includes Arab women.

In dealing with the Arab minority, the Government's policy is to offer its Arab citizens every opportunity to integrate in the country's economic and social structure, while at the same time recognizing their right to preserve their own traditions and culture.

Eight Arabs have been elected to the Knesset; Arabs also serve as members of municipal councils and in other posts of local responsibility and authority.

All Government services available to the Jewish community are available to Arab citizens as well. In addition, a special officer for Arab affairs is attached to the Prime Minister's office, and special departments for Arab affairs are part of the Ministries of Agriculture, Education, Health, Interior and Religion.

Arab Education

To meet the needs of the Arab population, the Government maintains 121 Arab elementary and secondary schools, with a teaching staff of 835 in 1957.

School attendance of Arab children has almost trebled since the creation of the state, rising from 10,092 in 1948 to 29,127 in 1957. Ninety percent of the Arab boys and 60 percent of the girls of school age are enrolled in public schools. About 80 percent of the Arab school-age population attends school. A seminary has been established for the training of Arab teachers.

There are 80 Arab students in the Hebrew University and at Technion.

Arab education is paid for entirely either by the National Government or by the government together with local communities.

The Israel Trade Union Movement includes Arab workers, who are also covered by the country's national insurance program.

Health

The eradication of disease among the Arab population has been a special project of the government.

Infant mortality in the Arab Community has been cut in half in ten years -- from 121 per thousand in 1944, to 61.2 per thousand in 1954.

In 1950, the Ministry of Health established 28 clinics at the Arab population centers, and four mobile clinics to serve Arab citizens in western and eastern Galilee and in the Negev. All public clinics of the country are open to the Arab population.

A tuberculosis hospital has been set up in Nazareth, the largest Arab community. Special clinics exist for mother and child care. District nurses serve outlying areas, and special training courses for Arab nurses have been developed. Malaria and tuberculosis, once rampant among the Arab population, are being eradicated. Full hospitalization for contagious diseases is available to Arab citizens with all costs defrayed by the government.

Modernized Farming

The majority of the Arabs live in rural communities and are engaged in agriculture. More than 80 percent of the Arab farmers own their own land -- in sharp contrast to the pattern of tenancy and share-cropping almost universal in the Arab world. Mobile units of mechanized agricultural equipment are available to Arab farmers for a nominal fee. Special instruction is available on modernization through irrigation,

land conservation and diversification of production. Government loans are also available for these purposes. More than fifty tractors are owned privately by Arab farmers now as against none in 1948.

The agricultural output of Arab farmers in Israel has increased tenfold in ten years, with resulting marked increases in their standard of living.

Restrictions Being Lifted

There is only one restriction on the Arab population. For security reasons, the Israeli Government has required that permission be granted for all movement, Arab and Jewish, in certain sensitive security areas of the country. This has created some Arab resentment.

On July 7, 1957, however, the Israeli Government took a number of steps to meet Arab objections to the curfew and restrictions on travel. Arabs in Galilee are now permitted to travel to various communities such as Nazareth, Acre and Afula without special permits.

The dark-to-dawn curfew in effect in the military district of the Little Triangle along the Jordanian border has been eased. A road hitherto closed to civilians has recently been opened, giving the Arabs more direct access to markets along the coastal plain.

EDUCATION

Universal compulsory free primary education was established by law in Israel in the first months of the country's independence.

Secondary education is provided by schools maintained by local governments and civic organizations, or by private schools on a tuition basis. Scholarships are offered by the Government and the Jewish Agency. In 1956, about one-third of the secondary school students were receiving financial help of some kind.

School attendance nearly quadrupled between 1948 and 1957, increasing from 113,035 in 1948 to 428,241 today. The teaching staff grew from 5,964 in 1948 to 11,295 in 1957.

This does not include attendance at Talmudic schools (about 6,300), Christian missionary schools (7,000), a number of private educational institutions, and 2,000 kindergartens attended by over 60,000 children.

Israel's school system consists of elementary schools (eight years) with a 1956-7 enrollment of 359,000 students; secondary (four years) with 23,000 students; schools for working youth, 11,000; teachers colleges, 3,600; technical schools, 6,200; agricultural schools 6,314; special schools for Arab children, 29,127; and several universities.

The language of instruction in the school system generally is Hebrew, the country's national language. Arabic is taught as an optional subject in the great majority of the Jewish secondary schools. In the Arab schools, Arabic is the language of instruction, with Hebrew taught as a second language.

Higher Education

Institutions of higher education include the Hebrew University at Jerusalem (3,725 students); The Israel Institute of Technology or "Technion" at Haifa (1,867

students); the Bar-Ilan University near Ramat Gan (174 students); and the University of Tel Aviv (1,266 students).

Typical of the country's interest in providing superior educational facilities for its youth was the decision to build a new campus and buildings for the Hebrew University in the Israeli sector of Jerusalem after the original multi-million dollar plant and campus on Mt. Scopus fell into Jordanian hands in the fighting of 1947-48. The new University on the outskirts of the city will be dedicated and opened during 1958, Israel's 10th Anniversary year.

AGRICULTURE

In ten years, Israel has more than doubled the area of land under cultivation, raising the total from 412,500 acres in 1948 to 956,250 acres in 1957. In this period, the country established 470 new agricultural villages and settlements.

Agricultural production showed a corresponding rise from an index of 100 in 1948 to 289 by 1956.

Self-Sufficiency in Sight

Between 60 percent and 65 percent of the country's food needs are now met by its own agriculture.

The country is now self-sufficient in the production of milk, eggs, poultry, vegetables and potatoes. Recent experiments in the cultivation of industrial crops -- groundnuts, tobacco, sugar beets and cotton, for example -- have resulted in a sharp increase in the acreage devoted to these crops. Through its water development and irrigation program, the Government expects to achieve complete agricultural self-sufficiency by 1960.

Agricultural products also accounted for a major share of Israel's growing volume of exports. Citrus fruits and fruit juices were the largest single item in the export list, valued in 1956 at more than $43 million.

Types of Settlements

Israel's pattern of agricultural settlement is the product of special conditions existing in the country, and consists of a number of different types of local organization. The main forms are:

(1) Moshava (plural: moshavot): originally an ordinary village based on private land ownership and private enterprise. Many moshavot (e.g., Rehovot, Hadera, Herzlia) have developed into towns or urban villages, though many have retained their rural character.

(2) Kibbutz or kvutza (plural: kibbutzim or kvutzot): Communal collective settlements ranging in size from about 60 to 2,000 persons. All property is collectively owned, and work is organized on a collective basis. The members give their labor and are supplied, in return, with housing, food, clothing, education, culture and social services. There are central dining rooms and kitchens, communal kindergartens and children's quarters, communal social and cultural centers, and central stores. Individual living quarters give the members personal privacy. Each kibbutz is governed by a General Assembly of all its members.

The kibbutzim are predominantly agricultural, but many maintain considerable industrial enterprises. For example, the oldest collective settlement, Degania, founded in 1909, not only operates a large canning plant for its own agricultural produce, but also manufactures the cans in the settlement itself, and markets the product throughout the country.

(3) Moshav Ovdim (plural: moshvei ovdim): Workers' cooperative small-holders' settlement, based on principles of mutual aid and equality of opportunity. Each individual farm is worked by the member and his family, but the produce is sold through a central cooperative, and purchases are undertaken cooperatively. Certain types of agricultural equipment are owned by the settlement as a whole. The supreme authority is the General Assembly of all members, which elects a village council. No transfer of a farm or acceptance of a new member is possible without the approval of the village council. The moshav ovdim is purely agricultural, and its population ranges from 100 to 1,000. The first settlement of this type was Nahalal, established in 1921.

(4) Moshav (plural: moshavim): Smallholders' settlement, in many ways resembling the moshav ovdim, but without the same rigidity -- hired labor for example, is permitted. These are often referred to as "middle-class" settlements. These is no absolutely standard type. These settlements are predominantly agricultural. The

first and largest, Ramot Hashavim, set up by immigrants from Germany in 1933, has a population of about 500.

(5) Moshav Shitufi (plural: moshavim shitufiim): Settlement based on collective economy and ownership (as in a kibbutz), but with each family having its own house and being responsible for its own domestic services, such as cooking, laundry and care of the children (as in the moshav ovdim). Work and pay are adjusted to individual family circumstances. The moshav shitufi, tends to develop industrial enterprises alongside its agricultural activities. The population ranges from 60 to 300. The first moshav shitufi was Kfar Hittin, established in 1936.

(6) Ma'bara (plural: ma'barot): Temporary, transitional settlement for new immigrants. Each family is provided with temporary accommodation, usually a wooden or aluminum cabin, and is expected to be economically self-dependent. The immigrants are employed in public works, or in nearby factories or farms. The ma'bara generally receives its municipal services from the nearby local authority. The ma'barot are gradually being liquidated.

(7) Work Villages: Settlements of new immigrants, mainly in the Galilee hill areas. The settlers earn their living in public works, afforestation and similar fields in the early years, while gradually developing their own tracts of land to provide them with a permanent livelihood.

Irrigation

Israel's agricultural expansion has been due in large part to a national program of water development which has brought about a 300 percent increase in the country's irrigated acreage in ten years. Some 275,000 acres are now under irrigation, as compared with 75,000 in 1948; an additional 156,250 acres are expected to be irrigated in the next three years.

By the close of 1956, the volume of water available for agriculture and industry had quadrupled in comparison with 1948.

Water Development Program

Recognizing the country's dependence on water for irrigation, the government is devoting approximately one-half of the annual development budget to a 17-year plan designed to provide 2,400,000,000 cubic meters of water a year for agricultural use. This would supply enough water to irrigate more than 1,000,000 acres of land to accommodate 4,000,000 people, and would make the country self-sufficient in food as well as in hydroelectric power for industrial and domestic needs.

In July, 1955, the first of two pipelines of the Yarkon-Negev project went into operation. The second pipeline will be completed in 1958. The project, when completed, will divert 200 million cubic meters of water annually from the Yarkon River, north of Tel Aviv, to the desert area of the northern Negev.

A second major pipeline, bringing well-waters from the Galilee hills and water from the Kishon River to the fertile Jezreel Valley and the plain north of Haifa was begun in 1954 and is partly completed now.

In 1957, the country completed a major land reclamation and water conservation project involving the drainage of 15,000 acres of swamp land in the Lake Hule area north of lake Tiberias. This will conserve for agricultural use some 60 million cubic meters of water a year previously lost through evaporation. The fertile, drained area is now being developed for farming.

Another major water development project, involving the diversion of water from the upper reaches of the Jordan River to agricultural lands on Israel's coastal plain and in the Negev, has been held in abeyance since 1953 at the instance of the United Nations, which undertook at that time to make an "urgent" investigation of Syrian

charges that the project damaged Arab property in violation of the Armistice Agreement. No result of this "urgent" investigation has been published after a lapse of more than five years. Meanwhile, the Government of Israel indicated its willingness to cooperate in a broad Jordan Valley Development program proposed by the United States in 1953, which would encompass Israel's upper Jordan diversion scheme. This United States-sponsored program would divide the waters of the Jordan River between Israel, Jordan, Syria and Lebanon and provide for storage and regulated use of the river flow for irrigation and power development in the four countries touching on the Jordan. In October 1955, the Jordan Valley plan was rejected by Syria, despite its advantages to the Arab countries, because it would also benefit Israel.

INDUSTRY

In ten years, Israel has transformed an essentially agrarian community into the most intensively industrialized economy in the Middle East.

Where virtually no industry existed in 1948, Israel now has an industrial economy representing an investment of over $300 million, of which 70 percent under laws favorable to foreign investment, has come from outside the country.

The value of industrial production increased to $700 million in 1956 -- a 45 percent increase since 1954.

Industrial exports rose from $10.4 million in 1949 to $60.4 in 1956.

New Industries

New industries include steel, copper, pipes, tires and rubber goods, electrical appliances, paper products, fertilizers, refrigerators, radios, Diesel engines, light tools and automobile assembly.

The consumption of electric power -- a valid indicator of industrial activity -- has almost quadrupled in ten years, from 329 million kwh in 1949 to 1,142 million kwh today. Energy consumption by industry totaled 339,707 kwh in 1956, as compared with 96,897 kwh in 1949.

Industrial Products

The range of industrial products in 1957 included: foodstuffs, wine and spirits, cigarettes; seamless and welded steel pipes, nails, screws, locks, tin containers, cooking utensils, barbed wire and fencing, bathtubs and other fittings, glass, ceramics; textiles, knitwear, hosiery, nylon stockings; cement, building blocks, silicate bricks, tiles; plywood, furniture, superphosphates, sulphuric acid, soaps, medicines, paints, plastics, refined oil products; clothing of all kinds; newsprint, cardboard; phosphates,

Dead Sea salts, clays, glass sand; refrigerators, radios, electric bulbs, electric motors, cables and wire; automotive assembly; agricultural machinery, tools, spare parts, precision instruments, watches; cut and polished diamonds; rubber tires and tubes.

Oil Resources

Oil production from recently discovered fields in the Negev is now meeting almost 10 percent of the country's needs. Oil exploration concessions involving three million acres have been granted to nine companies representing Israeli, American, French, Canadian and Swiss capital.

An eight-inch oil pipeline from Elath, the country's Gulf of Aquaba-Red Sea port, to Beersheba, was completed in 1957, and will be extended to the Mediterranean coast.

A 32-inch oil pipeline from Elath to the Mediterranean Sea is now under consideration to provide an overland by-pass of the Suez Canal for oil from the Persian Gulf producing areas.

Mineral Exploitation

Industrial development of the mineral resources of the Dead Sea is well underway. Potash is now being extracted at a rate of 70,000 tons a year; a new bromine plant has an annual production capacity of 2,000 tons of bromine and 1,800 tons of ethylene dibromide.

The Dead Sea is regarded as a virtually inexhaustible source of mineral and chemical wealth, including some billions of tons of magnesium chloride, common salt, potash and magnesium bromide.

Mineral exploration in the Negev has revealed substantial deposits of caustic soda, magnesium bromine, rock phosphates, ceramic clays and glass sand, feldspar, manganese, copper, iron, mica, gypsum, fluorite, chrome and sulphur. Exploitation of these mineral resources is in the hands of a number of development corporations in

which the Government holds 50 to 100 percent of the capital.

A copper plant with an annual capacity of 7,000 tons will go into operation early in 1958.

Phosphate production reached 120,000 tons in 1957, of which one-third was exported. This was five times the previous year's exports.

Chemical Output Rising

The country's chemical industry, centering in Haifa, produced superphosphate fertilizers, ammonia, sulphuric acid, hydrochloric acid, di-calcium phosphate and potassium sulphate. Chemical production was valued at approximately $7 million.

Housing a Major Industry

Since 1948, under the national building program, 155,000 dwelling units have been constructed --- 80,000 for immigrants; 44,000 for rural settlements; 31,000 for general dwelling, including personnel engaged in major developments. Ten thousand more dwelling units are under construction.

COMMERCIAL ORGANIZATIONS

Chambers of Commerce in Tel Aviv, Haifa and Jerusalem have a membership of 2,550. Other commercial and industrial organizations include the Manufacturers Association of Israel; the Workshop Owners Association (40,000 members) composed of 70 industrial groups; and the General Association of Merchants (30,000) representing retail trade.

LABOR

In June 1956, there were 574,300 gainfully occupied persons in Israel -- 17.7 percent in agriculture and mining, 20.9 percent in industry and crafts, 8.3 percent in public works and building, 2.9 percent in public utilities, 12.5 percent in trade and banking, 6.4 percent in transportation, 31.3 percent in health, education, public and professional services.

Labor Laws

Conditions of labor are regulated by law.

The Hours of Work and Rest Law limits work to 8 hours per day and 47 hours per week, and provides for a compulsory weekly rest period of 36 continuous hours.

The Paid Annual Holidays Law grants all Israel workers 14 days annual leave, of which 12 days must be with pay.

The Youth Labor Law prohibits the employment of children under 14, bars children under 16 from certain types of employment, forbids night work for children, and provides for compulsory medical examination of young workers.

The Female Labor Law grants women 12 weeks maternity leave, and several additional months' leave without pay, and prohibits night work by women.

Labor Organizations

The Israeli worker is protected by four central labor organizations.

The largest of these is the General Federation of Jewish Labor, usually known as Histadrut. This is not only a massive union, but an active operator and participant in many of the country's major industrial enterprises.

As of 1957, Histadrut had 570,000 members (including 12,000 Israeli Arabs) who, with their families, represented more than half the country's population.

In addition to trade union branches in the usual sense, Histadrut's interests include collective and cooperative settlements, producers and consumers cooperatives, industrial enterprises, financial institutions, and welfare services.

Some of the most important of its adjuncts are Tnuva, the agricultural marketing cooperative, which in 1956 handled more than 70 percent of all of Israel's agricultural produce; Hamashbir Hamerkazi' the cooperative wholesale society, which acts as buyer for the consumers cooperatives, collective farms and other Histadrut enterprises; the Solel Boneh, contracting and construction company, which also owns a number of industrial undertakings, and the Employment Fund.

Histadrut also owns and operates pension funds, an unemployment pay system, vocational schools, several publishing houses, two daily newspapers, a theatre, and the largest sports organization in the country.

The organization is also a partner of the Government and the Jewish Agency in Mekorot, a water and prospecting company; and in the national shipping company, Zim Israel Navigation Company, Ltd.

Histadrut has developed side by side with private industry, often cooperating with private capital in developing particular projects.

Other labor unions in the country, limited in scope and membership, are: the Mizrahi workers organization (50,000 members), an organization of religious workers; Agudat Israel Workers' Organization (20,000 members), composed of Orthodox Jewish workers; the National Labor Federation (54,000 members), sponsored by the Revisionist organization.

TRANSPORT AND COMMUNICATION

Land Transport

Israel's road system, constantly under expansion, consisted of nearly 1,863 miles of main highways and 347 miles of feeder roads in 1957.

Buses are the principal means of public passenger transport in the country, with railways second, and "jitneys" third.

Railways are State-owned. With modernization and the rapid pace of industrial development, rail traffic has increased substantially. Freight transported by rail jumped from 98,542,000 ton-km in 1953 to 161,772,000 ton-km in 1956. Passenger traffic in the same period increased from 2,416,000 to 4,122,000.

Shipping

In 1948, 10 vessels of all types were registered in Israel, totaling some 14,000 tons.

By January 1957, Israel's merchant marine included 35 ships with a total gross tonnage of 135,731 tons. The fleet consisted of four passenger ships plying the Mediterranean, with accommodations for 1650 passengers; two modern passenger-cargo liners routed to North America, with accommodations for 626 passengers; three tankers totaling 27,000 tons; and 26 cargo vessels totaling 72,000 tons, including 14 fruit carriers built especially for the citrus trade. Twelve additional ships now under construction will raise the total tonnage to 250,000 by 1958. By 1962 the country expects to have a merchant marine of 60 ships totaling more than 600,000 tons.

In 1956, Israeli vessels carried 699,000 tons of cargo, 32 percent of the country's seaborne trade, and an additional 375,000 tons between foreign ports.

Ports

The country's main port is Haifa, with modern facilities for handling 2,500,000

tons of cargo per year. The other principal ports are Tel Aviv and Jaffa, with a combined cargo capacity of 500,000 tons a year.

The southern port of Elath, on the Gulf of Aqaba, opens the way for commerce through the Red Sea between Israel, Asia and East Africa. Use of this natural outlet to the South and East was denied the country for nine years by Egypt's blockade of the Straits of Tiran. With the lifting of the blockade by Israeli military action during the Sinai campaign in 1956, and subsequent assurances by the United Nations and the Western maritime powers that the Straits and the Gulf constitute and will be maintained as an international waterway free to the peaceful passage of ships of all nations, Elath is rapidly developing into a major port. It also offers important resort advantages which are now being developed.

Aviation

Israel's main international airport is at Lod (Lydda), between Tel Aviv and Jerusalem. There are some 20 other air fields in the country, both civil and military. Passenger traffic at Lydda, to and from Israel, increased from 68,984 in 1954, to 86,796 in 1956. Eight foreign lines, as well as Israel's international and internal air services, land on regular schedules at Lydda.

Air Transport

Israel operates its own international air line, El Al, on regular passenger schedules to New York, Paris, London, Vienna, Rome, Zurich, Athens, Nicosia, Johannesburg, Istanbul and Amsterdam. El Al also carries freight to Brussels and Dusseldorf.

During 1956, El Al carried 37,000 passengers, 1,536,885 pounds of freight, and 291,060 pounds of mail.

The Air Line has a perfect safety record in intercontinental operation.

Air transport inside the country is provided by Arkia Airlines, an El Al subsidiary.

Telephones, Telegraph

In 1948, about 18,400 telephones were in service in Israel. At the end of 1956, the number had quadrupled, totaling 72,000.

The country is connected by radio, telegraph and telephone to most countries of the world.

NATIONAL INCOME

Israel's national income rose from $803,600,000 in 1954 to $1,186,720,000 in 1956.

Major sources of national income in 1956 were: commerce, finance and banking ($373,520,000); industry and mining ($245,280,000); government and public institutions ($235,200,000); agriculture ($157,360,000); transportation ($91,840,000); building and public works ($62,800,000); and public utilities ($20,720,000).

Government Financing

Two budgets are presented annually to the Knesset: (1) an ordinary budget financed from local taxes, covering normal expenditures of the government, which includes government salaries, social welfare and related services; (2) a development budget financed from foreign grants, loans, contributions, as well as from local sources. Funds of the development budget are used for agriculture, industry, irrigation and similar public works.

In 1957-58, the total budget for both normal expenditures and the development program was $537,795,000.

Of this amount, $184,815,000 or 34 percent represented the development budget. The remaining $352,980,000 was for ordinary expenses and social services, including 11 percent for education, 10 percent for housing, 5.5 percent for health services, 2 percent for social welfare, 5 percent for labor and 2 percent for pensions.

About 18 percent of the normal budget is required for the country's defense establishment. Certain additional sums are allocated for this purpose, but are not made public for security reasons.

Internal Revenue

The Government's principal sources of income are internal, 65 percent of the

revenue being derived annually from income taxes and other normal sources. The budget for 1957-58 shows a current return of some $356 million from these sources.

The national income tax is the largest single source of internal revenue, producing in 1957-58 an estimated $109 million, or about one-third of the Government's income from normal sources.

Similar in general to the income tax system of the United States, the law taxes all incomes on a sliding scale up to 60 percent, but provides for a variety of exemptions. Companies pay a total of 53 percent, consisting of 25 percent income tax and 28 percent company profits tax.

Other taxes, such as the property tax, inheritance tax, excise taxes, and amusement tax, together with customs and postal revenue and similar collections, make up the balance of the current internal income. A special defense tax, required to maintain the country's defenses against continual threat of aggression from surrounding Arab states, adds from 4 percent to 9 percent to most income tax rates.

External Revenue

About 35 percent of the Government's income has come from sources outside the country in the form of foreign loans and grants, the sale of State of Israel bonds, German reparations payments, contributions from the world Jewish community, and the release of frozen Sterling balances.

From 1948 to June 30, 1957, approximately $1,944.2 million has been received from these sources. This aggregate figure includes the following:

United States Aid

United States economic aid in all forms has totaled $469.2 million. This has included: loans of $135 million from the Export-Import Bank; other loans and grants totaling $276.2 million; $52 million from surplus agricultural products under United

States Public Law 480; and $6 million in United States Technical Assistance.

Israel Bonds

Sales of Israel Bonds throughout the world have produced some $365 million. Income from this source has been used almost entirely for the development program in the fields of agriculture, industry, transport and communications.

Two issues of Israel Bonds have been offered: the Independence issue, open to subscription until May 1954; and the Development issue, now being sold.

About $15 million of interest has been paid to Israel Bond holders, and over $30 million worth of bonds have been redeemed.

German Reparations

Israel has received from the West German Government some $304 million in goods and services under a reparations agreement concluded in 1952. This agreement, designed to compensate for material damage to Jewish interests in Germany during the Nazi regime, provides for payment of a total of $822 million to Israel by the Bonn Government over a period of 12 years.

Contributions

Contributions from the United Jewish Appeal and other sources totaled some $656 million. In most cases, these contributions were earmarked for immigrant absorption, social and health services and similar undertakings.

Frozen Sterling Balances

Release of frozen Sterling balances totaled $150 million. The "Frozen Sterling" balances are funds that were blocked by the British Government after it had given up the Mandatory power.

National Debt

At the end of 1956, Israel's national debt totaled $472,900 in long, intermediate,

and short-term loans. Included in this total was $135 million owed to the Export-Import Bank of the United States.

Banks and Money Supply

Israel's basic monetary unit is the Pound, consisting of 1,000 prutot (singular: pruta). Current official rate of exchange for United States currency is 56 cents to the Israeli pound.

The currency system is regulated by the Bank of Israel, established in December 1954 under the direction of a governor appointed by the President of the State. The Bank's assets and liabilities at the end of 1956 balanced at $270,919,000. The Bank of Israel issues the currency, acts as the sole fiscal agent of the Government, manages the Public Debt, accepts deposits from private banking institutions, and lends money to the Government under certain prescribed limitations.

There are 27 commercial banks in the country, as well as 93 cooperative credit societies. Long-term credits are granted by the General Mortgage Bank of Palestine (urban mortgages), the Israeli Bank of Agriculture (agricultural credit), and Bank Otzar Leta'asiya, Ltd. (industrial credit).

FOREIGN TRADE

Despite an adverse foreign trade balance, caused by large-scale immigration and heavy capital investment, Israel's progress in international commerce is reflected in substantial increases in the total volume of imports and exports during the first decade of its existence.

Imports jumped from $253,120,000 in 1949 to $363,974,000 in 1956; exports rose from $29,680,000 in 1949 to $107,246,000 in 1956.

Reflecting the country's advance in industrial and agricultural production, exports in this period increased 261 percent, while imports rose 44 percent.

Materials needed for the program of industrial and agricultural expansion were the largest single category of imports in 1956, accounting for more than 60 percent of the total. Gains toward self-sufficiency were reflected in the fact that goods for direct consumer consumption were only 15.6 percent of the total.

The United States is the principal supplier of Israel's imports (31.7 percent in 1956) as well as the major market for the country's exports (22.1 percent in 1956). West Germany is the second largest supplier, and the United Kingdom is the second largest purchaser of the country's products.

Principal exports are citrus fruits ($40 million in 1956), and polished diamonds ($25 million). Other major exports are textiles and wearing apparel, cement, fruit juices, plywood, rubber tires, motor vehicles, and drugs and medicines.

PUBLIC HEALTH

Health conditions in Israel are on a par with those of the most advanced nations of the world, and in a sharp contrast to the low standards prevailing elsewhere in the Middle East.

Life expectancy for the Jewish population in 1956 was 69.4 for males, and 72.1 for females as compared, for example, with 66.6 and 72.7 in the United States, 35.6 and 41.5 in Egypt, and 32.4 and 31.7 in India.

The infant mortality rate is 32.3 per thousand births. This compares with 26.6 in the United States, 119.1 in India, and 125.6 in Egypt.

Doctors

Israel's ratio of physicians to population is one of the highest, if not the highest, in the world. In 1957, there were 3,887 physicians in the country -- a ratio of one doctor to each 400 inhabitants. Comparable ratios for other countries are: One to each 760 persons in the United States; one to each 700 in Switzerland; one to 7,100 in India; one to 3,500 in Egypt.

Hospitals

Hospital facilities have almost doubled in the last 10 years, increasing from 63 institutions with 4,626 beds in 1949, to 102 hospitals with 12,250 beds in 1956. These are supplemented by local clinics, dispensaries and convalescent homes.

The Ministry of Health operates 17 hospitals with a capacity of 4,500 beds, as well as a variety of other facilities including 200 infant welfare clinics, a number of nursing schools, mental health clinics and a polio rehabilitation center.

The remainder of the country's health facilities are operated by non-governmental institutions.

Health Insurance

The Workers Sick Fund, a health insurance association organized by the General Federation of Labor (Histadrut) is by far the largest medical organization in the country, with a budget more than twice as large as that of the Ministry of Health. Two-thirds of Israel's population belongs to the Fund, which operates 910 clinics, 14 hospitals and 12 convalescent homes.

Additional medical facilities are maintained by Hadassah of the United States; Malben, the American Joint Distribution Committee's program for the care of sick, aged or handicapped new immigrants; Magen David Adom, Israel's equivalent of the Red Cross; and a variety of smaller voluntary agencies.

Social Security

Israel's first National Insurance Law went into effect in April 1954. It provides the following categories of social insurance:

Old age pensions, expected to be paid to 25,000 people during 1957-58.

Survivors insurance, payable to widows and children of members of the plan.

Industrial accident insurance, payable to persons disabled in industrial accidents or their immediate family survivors.

Maternity insurance.

More than 675,000 of the country's population is now registered with the National Insurance Institute, which administers the plan. Costs range from 1.4 percent of income for workers, 1.9 percent for employers, and 3.3 percent for self-employed people.

SCIENCE

At the end of its first ten years of national life, Israel had achieved international recognition in the world of science.

In 1957, the country was selected by the International Union of Pure and Applied Physics as the locale for the International Conference on Nuclear Structure.

By agreement with the United States Air Force, Israeli scientists are conducting research in aerodynamics and the rheological behavior of substances. Three additional research projects have recently been undertaken for the United States Air Force at the Technion in Haifa.

Research projects are also being conducted in the country for the United States National Institute of Health.

Israeli scientists recently completed a report on several years of study, conducted for the Ford Foundation, in the fields of hydraulic and agricultural engineering, soils, biological and geological problems, sub-tropical medicine, and social science.

Nuclear Research

Israel's program of nuclear research is directed primarily to the production of electric power, since this is a paramount need in the region. Emphasis is being given to the discovery and utilization of materials which are locally available.

Production of uranium in very small, but usable quantities as a by-product of the country's phosphate industry is being tried.

A process for the production of heavy water, perfected at the Weizmann Institute of Science, is now being used by a number of European countries.

Similarly, the Weizmann Institute's output of heavy oxygen, with the highest per-

cent of purity in the world, is now in heavy demand by scientists all over the world.

Desalinization of Seawater

Following intensive research, Israel is constructing a pilot plant for desalinization of sea water, using the partial freezing process. The plant is not intended to produce fresh water in commercial quantities, but to prove the efficacy of the process under actual production conditions. The ultimate objective is to produce fresh water from the sea, first for urban and domestic use, and eventually for irrigation.

In 1957, with the help of the United Nations Educational, Scientific and Cultural Organization, Israel opened a new Institute for Desert Research, in Beersheba. Available to Israeli and foreign scientists, this is believed to be the only institution of its kind in the Middle East, perhaps in the world.

Vaccines

Israel is one of the four or five nations in the world which produced the Salk vaccine in quantity for its own use. It is also producing its own supplies of Asian flu vaccine.

Scientific Training

Lacking the resources and facilities to attract scientists in competition with the larger nations, Israel is producing a new generation of native scientists. In this, it has the benefit of the continuing immigration of teachers, physicists, chemists, mathematicians and others from Europe. The Hebrew University in Jerusalem and the Technion in Haifa are now turning out scientists who compare favorably with those graduating from such American institutions as the Massachusetts Institute of Technology and the Carnegie Institute of Technology. The country's preoccupation with scientific training has already provided it with a reservoir of scientists much larger, in relation to its means and resources, than that of the United States and other major powers.

Scientific Institutions

All scientific activity in the country is coordinated by the Research Council of Israel, an adjunct of the Prime Minister's office.

The Council also maintains a National Physical Laboratory for the Standardization of measures and instruments -- a function similar to that of the United States Bureau of Standards.

Scientific research centers have been established in several institutions in addition to the Hebrew University and Technion. These are:

1. The Weizmann Institute of Science, at Rehovot, a non-governmental institution for both pure and applied research. With a staff of 150 scientists, the Institute includes research in applied mathematics, nuclear physics, electronics, optics, isotope research, polymer research, biophysics, organic chemistry, experimental biology, microbiology, microanalysis, and plant genetics.

2. The Israel Biological Research Institute, which includes departments of bacteriology, virus theory, experimental epidemiology, entomology, micro-organisms, vaccines and chemical therapy.

3. The Atomic Energy Commission, appointed by the Prime Minister, which investigates the occurrence of radioactive materials in Israel and advises on methods for their utilization. The Commission organizes research into nuclear and atomic physics and the use of radioactive materials and isotopes for research and industry.

In addition, agricultural experiment stations located in various sections of the country conduct research in animal husbandry, erosion control, fish breeding, forestry and related fields.

CULTURAL LIFE

Press, Periodicals

Israel's press covers the news without censorship, and in many languages.

Nineteen morning and two afternoon papers appear daily. Fourteen are in Hebrew; the remainder are in Arabic (1), English (1), French (2), German (2) and Hungarian (1). Papers in Bulgarian, Rumanian, Polish and Yiddish appear every other day.

About 320 periodicals, including some 50 government publications, are published regularly. About 60 are weeklies, and 115 are fortnightlies or monthlies. About 200 are published in Hebrew; the remainder in 11 different languages, including Arabic, English, French, Yiddish, Bulgarian, Rumanian, Ladino, Hungarian, Polish, Persian and German.

The Radio

The Israel State Broadcasting Service operates for 17 hours daily with news and entertainment programs in Hebrew, Arabic, English and French.

There is no commercial broadcasting; as yet there is no television in the country.

There were 294,635 licensed radio sets in the country in 1956.

Music

The Israel Philharmonic Orchestra is the most important musical institution in the country. Organized in 1936, before the creation of the State, it has become a major fixture of Israeli cultural life. The orchestra consists of 87 musicians, and gives 135 concerts annually. World-famous conductors and soloists appear with it regularly.

Other musical organizations include the Kol Israel Orchestra, maintained by the State Broadcasting Service, which gives 48 concerts a year; the Haifa Orchestra, of 50 pieces; and the Israel Defense Forces Orchestra.

The country has 13 conservatories of music, a number of chamber music groups, about 100 permanent choirs, a number of folk and ballet dancing schools. A music festival is held every year during Passover, at Ein Gev, a settlement on Lake Galilee.

Theatre and Cinema

Serious drama is presented continuously in Israel by four repertory companies. These are Habimah, which gave 470 performances in 1955-56; Ohel, associated with Histadrut, which gave 581 performances in 1955-56, with an attendance of 425,000 people; the Chamber Theatre, which staged about 1,130 performances in 1955-56; and the Zira Theatre, which gave 312 performances in 1955-56, attended by some 115,000 people.

The country has 160 cinemas, attended by 26 million people in 1955. By far the majority of films shown are American.

Books

About 1,000 Hebrew books are published in Israel annually. Three-fourths are original works, and one-fourth are translations.

Imports of books per capita are the second highest in the world. Israel ranks first among the countries employing the United States Government's Information Media Scheme, by which American books and phonograph records are paid for in local currency.

The country has nearly 700 public and large private libraries. The largest is the Jewish National and University Library, with about 400,000 volumes, exclusive of some 450,000 volumes remaining at the Hebrew University on Mt. Scopus (now an Israeli enclave surrounded by Jordanian-occupied territory).

In addition to the libraries maintained by municipalities and cultural institutions, the Government has established basic libraries in some 240 new immigrant settlements.

Sports

Popular sports in Israel include football (soccer), basketball, swimming (including skin-diving recently organized in the tropical waters of the Gulf of Aqaba, off the port of Elath), gymnastics, track, hockey, tennis, rowing, fishing, boxing, wrestling and fencing.

The Ramat Gan Stadium, largest in the country, can accommodate 60,000 spectators.

Israel participated in the world Olympic Games for the first time in 1952, being represented in track and field events, basketball, swimming and shooting. The Maccabiah World Games, sponsored by the Maccabi World Union, are held every three years in Israel.

All Israel sports movements belong to the Israel Amateur Sports Federation. They are also represented in the Israel Olympic Committee. The Israel Football Association, the Israel Lawn Tennis Association, and other sports organizations are also affiliated with international bodies which supervise such sports.

ISRAEL'S PROCLAMATION OF INDEPENDENCE

(Issued in Tel Aviv, 14 May 1948, by the Provisional State Council)

The Land of Israel was the birthplace of the Jewish people. Here their spiritual, religious and national identity was formed. Here they achieved independence and created a culture of national and universal significance. Here they wrote and gave the Bible to the world.

Exiled from Palestine, the Jewish people remained faithful to it in all the countries of their dispersion, never ceasing to pray and hope for their return and the restoration of their national freedom.

Impelled by this historic association, Jews strove throughout the centuries to go back to the land of their fathers and regain their statehood. In recent decades they returned in masses. They reclaimed the wilderness, revived their language, built cities and villages, and established a vigorous and ever-growing community, with its own economic and cultural life. They sought peace yet were prepared to defend themselves. They brought the blessings of progress to all inhabitants of the country.

In the year 1897 the First Zionist Congress, inspired by Theodor Herzl's vision of the Jewish State, proclaimed the right of the Jewish people to national revival in their own country.

This right was acknowledged by the Balfour Declaration of November 2nd, 1917, and re-affirmed by the Mandate of the League of Nations, which gave explicit international recognition to the historic connection of the Jewish people with Palestine and their right to constitute their National Home.

The Nazi holocaust, which engulfed millions of Jews in Europe, proved anew the urgency of the re-establishment of the Jewish State, which would solve the problem of Jewish homelessness by opening the gates to all Jews and lifting the Jewish people to equality in the family of nations.

The survivors of the European catastrophe, as well as Jews from other lands, pro-

claiming their right to a life of dignity, freedom and labor, and undeterred by hazards, hardships and obstacles, have tried unceasingly to enter Palestine.

In the Second World War, the Jewish people in Palestine made a full contribution in the struggle of the freedom-loving nations against the Nazi evil. The sacrifices of their soldiers and the efforts of their workers gained them title to rank with the peoples who founded the United Nations.

On November 29th, 1947, the General Assembly of the United Nations adopted a Resolution for the establishment of an independent Jewish State in Palestine, and called upon the inhabitants of the country to take such steps as may be necessary on their part to put the plan into effect.

This recognition by the United Nations of the right of the Jewish people to establish their independent State may not be revoked. It is, moreover, the self-evident right of the Jewish people to be a nation, as all other nations, in its own sovereign State.

ACCORDINGLY, WE, the members of the National Council, representing the Jewish people in Palestine and the World Zionist Movement, are met together in solemn assembly today, the day of termination of the British Mandate for Palestine; and by virtue of the natural and historic right of the Jewish people and of the Resolution of the General Assembly of the United Nations.

WE HEREBY PROCLAIM the establishment of the Jewish State in Palestine, be called Medinat Yisrael (The State of Israel).

WE HEREBY DECLARE that, as from the termination of the Mandate at midnight, the 14th--15th May, 1948, and pending the setting up of the duly elected bodies of the State in accordance with a Constitution to be drawn up by the Constituent Assembly not later than the 1st October, 1948, the National Council shall act as the Provisional State Council, and that the National Administration shall constitute the Provisional Government of the Jewish State, which shall be known as Israel.

THE STATE OF ISRAEL will be open to the immigration of Jews from all countries of their dispersion; will promote the development of the country for the benefit of all

its inhabitants; will be based on the principles of liberty, justice and peace as conceived by the Prophets of Israel; will uphold the full social and political equality of all its citizens, without distinction of religion, race or sex; will guarantee freedom of religion, conscience, education and culture; will safeguard the Holy Places of all religions; and will loyally uphold the principles of the United Nations Charter.

THE STATE OF ISRAEL will be ready to cooperate with the organs and representatives of the United Nations in the implementation of the Resolution of the Assembly of November 29, 1947 and will take steps to bring about the Economic Union over the whole of Palestine.

We appeal to the United Nations to assist the Jewish people in the building of its State and to admit Israel in the family of nations.

In the midst of wanton aggression, we yet call upon the Arab inhabitants of the State of Israel to preserve the ways of peace and play their part in the development of the State, on the basis of full and equal citizenship and due representation in all its bodies and institutions--provisional and permanent.

We extend our hand in peace and neighborliness to all the neighboring states and their peoples, and invite them to cooperate with the independent Jewish nation for the common good of all. The State of Israel is prepared to make its contribution to the progress of the Middle East as a whole.

Our call goes out to the Jewish people all over the world to rally to our side in the task of immigration and development and to stand by us in the great struggle for the fulfillment of the dream of generations for the redemption of Israel.

With trust in Almighty God, we set our hand to this Declaration, at this Session of the Provisional State Council, on the soil of the Homeland, in the city of Tel Aviv, on this Sabbath eve, the fifth of Iyar, 5708, the fourteenth day of May, 1948.

INTRODUCTION

This is the story of Israel's struggle to be born.

Israel was attended at birth by war, boycott and the struggle of the great powers for dominance in the Middle East.

Despite this background, Israel has held consistently to three objectives:

1. The open door policy for all Jews needing and wishing to find haven in Israel.

2. The development of the country for the common good of all its inhabitants.

3. Peaceful relations with its Arab neighbors, as with the rest of the world.

The chronology of the struggle for birth, survival and advance as a democratic and progressive country is presented in the succeeding pages.

From that chronology may be seen the extent to which Israel, in one decade, has moved forward to achieve political stability and its three major objectives.

Yarkon-Negev Project, 15

Yemen, 7, 17

1947

November 29	The United Nations General Assembly votes for the partition of Palestine and the establishment of a Jewish State, an Arab State, and an International Zone of Jerusalem, joined by economic union.
November 29	Arab delegates inform the United Nations they will oppose the implementation of the resolution.
November 30	Directed by the Arab Higher Committee and the Arab League, Arab attacks on the Jewish population of Palestine begin, assisted by Arab soldiers calling themselves "volunteers" and infiltrating from neighboring Arab lands.

1948

March 1	The National Council of Palestine Jews, proceeding in accordance with the United Nations resolution, sets up a Council of the people and an administration to serve as the provisional organs of state, following the termination of the British Mandate.
March 1 - May 1	In four stages, responding to broadcast instructions of the Arab Higher Committee and Arab war leaders, Arabs evacuate Palestine. The purpose is to clear the roads and villages to expedite the advance of the Arab Armies, to disrupt services, and to demonstrate that Jews and Arabs could not live side-by-side, in anticipation of a speedy Arab victory.
April	The United Nations Palestine Commission reports to the United Nations that it is unable to implement the 1947 resolution because: "Powerful interests both in and outside Palestine are defying the resolution of the General Assembly and are engaged in a deliberate effort to alter by force the settlement envisaged therein. Armed Arab bands from neighboring Arab states, together with local Arab forces, are defeating the purposes of the resolution by acts of violence."
May 14	The British formally end their Mandate and complete the withdrawal of their forces from Palestine.
May 14	The Provisional State Council, from Tel-Aviv, proclaims the establishment of the Jewish State in Palestine, to be called Medinat Yisrael (The State of Israel).

The Proclamation of Independence pledges:

1. "The State of Israel will be open to the immigration of Jews from all the countries of their dispersion, will promote the development of the country for the benefit of all its inhabitants, will be based on the principles of liberty, justice and peace, as conceived by the Prophets of Israel, will uphold the full social and political equality of all its citizens, without distinction of religion, race or sex; will guarantee freedom of religion, conscience, education and culture; will safeguard the Holy Places of all religions, and will loyally uphold the principles of the United Nations Charter."

2. The Proclamation calls "upon the Arab inhabitants of the State of Israel to preserve the ways of peace and play their part in the development of the State on the basis of full and equal citizenship and due representation in all its bodies and institutions - provisional and permanent."

3. The Proclamation extends its "hand in peace and neighborliness to all the neighboring states and their peoples" and invites them "to cooperate with the independent Jewish nation for the common good of all."

May 14	The Government of the United States gives de facto recognition to the State of Israel, becoming the first nation to do so.
May 15	The regular armies of Egypt, Iraq, Jordan, Lebanon and Syria launch an organized attack on Israel, after first proclaiming their intention to do so to the Security Council of the United Nations.
	Simultaneously, the Arab League initiates a blockade against Israel, including a ban on all trade with Israel, as well as a denial to it of the right to use the Suez Canal.
May 15	Israel opens its doors to the survivors of Hitlerism in the Displaced Persons camps and elsewhere, and begins the fulfillment of its pledge of free immigration to all Jews seeking it.
May 16	Dr. Chaim Weizmann is elected President of the Provisional Council of the State of Israel.
May 18	The U.S.S.R. grants de jure recognition to Israel.
May 24	Israel agrees to a cease-fire order from the Security Council.
May 26	The Arab states reject the order to cease fire by the Security Council.
May 26	The Israel Defense Army is established under an ordinance issued by the Provisional Council of State.
June 11	A truce is established by the United Nations for a 30-day period. It follows the success of the Israel Defense forces in pushing back the armies of the Arab states and in lifting the siege of Jerusalem.
June 11	An administration and services essential to the new State are organized.
July 1	A Merchant Fleet is established, consisting of 10 vessels with a displacement of 14,000 tons.
July 8	The Arabs resume hostilities, which last for ten days.
July 18	The second truce begins.
August 6	Israel asks the United Nations Mediator "to transmit to the Governments of the Arab states, now at war with Israel, our offer that their representatives should meet with the representatives of the Provisional Government of Israel, for the purpose of peace negotiations."
August 16	The first currency of the new State, inscribed in both Hebrew and Arabic, is issued and becomes legal tender.
September 14	The Supreme Court of Israel is inaugurated.

October 15	New Arab attacks begin, the target point of which is the capture of the Negev.
October 21	The fighting ends with the isolation of the Egyptian troops, the liberation of Beersheba by Israel, and the opening of free land communications to the Negev settlements.
November 15	Israel renews the offer of peace negotiations with the Arabs.
November	The first Israel commercial airline, EL-AL, is established.
December 29 - 31	The Israel Defense forces clear all of Galilee.
December 31	The number of new immigrants into Israel reaches the total of 102,000 in the first seven months following the State's establishment, despite the Arab war.

1949

January 7	Hostilities in southern Israel end with the defeat of the Egyptian invaders.
January 20	The United States Export-Import Bank extends a $100 million loan to Israel for development purposes.
January 25	The first general elections for the first Parliament of the new State are held. The vote is by secret ballot of Arabs as well as Jews, of the age of 18 and over, men and women alike.
February 14	The first Parliament of Israel is opened in Jerusalem by Dr. Chaim Weizmann.
February 17	Dr. Chaim Weizmann is elected the first President of Israel.
February 24	An Egyptian-Israel Armistice agreement is signed on the Island of Rhodes.
March 7	David Ben-Gurion is inducted as Prime Minister of Israel, together with his Cabinet.
	Government departments for Moslem and Christian religious affairs are set up, to assure the uninterrupted religious life of the Moslem and Christian communities.
March 12	The Israel flag is hoisted at the ancient Port of Elath, on the Gulf of Aqaba, the southernmost tip of the new State.
March 23	An Israel-Lebanon Armistice agreement is signed at Ras Naqura.
April 23	An Israel-Jordan Armistice agreement is signed at Rhodes.
April 30	Israel informs the United Nations Palestine Conciliation Commission that its purpose is to transform the Armistice agreements into an "honorable and lasting peace"; and submits a draft treaty.
May 11	Israel is admitted to the United Nations as a member.
	Upon being admitted to the United Nations, Israel's Foreign Minister tells this body: "The pursuit of peace is a treasured part of the Jewish heritage.....that pledge becomes an earnest and urgent appeal, when addressed to our closest neighbors, the Arab states and other nations of the Middle East."
June	The Research Council of Israel is established, attached to the Prime Minister's office, for the purpose of organizing and coordinating research in the natural sciences and technology, to accelerate maximum development of all the country's resources.
July 20	An Israel-Syrian Armistice agreement is signed in No-Man's Land, near Mahanayim.

All four agreements provide that:

ARTICLE I

"1. The injunction of the Security Council against resort to military force in the settlement of the Palestine question shall henceforth be scrupulously respected by both Parties.

"2. No aggressive action by the armed forces--land, sea, or air--of either Party shall be undertaken, planned, or threatened against the people or the armed forces of the other; it being understood that the use of the term 'planned' in this context has no bearing on normal staff planning as generally practiced in military organizations.

"3. The right of each Party to its security and freedom from fear of attack by the armed forces of the other shall be fully respected.

"4. The establishment of an armistice between the armed forces of the two Parties is accepted as an indispensible step toward the liquidation of armed conflict and the restoration of peace in Palestine."

ARTICLE II

"1. In pursuance of the foregoing principles and of the resolutions of the Security Council of 4 and 16 November, 1948, a general armistice between the armed forces of the two Parties--land, sea and air--is hereby established.

"2. No element of the land, sea or air military or para-military forces of either Party, including non-regular forces, shall commit any warlike or hostile act against the military or para-military forces of the other Party, or against civilians in territory under the control of that Party; or shall advance beyond or pass over for any purpose whatsoever the Armistice Demarcation Line set forth in Article VI of this Agreement, except as provided in Article III of this Agreement; and elsewhere shall not violate the international frontier; or enter into or pass through the air space of the other Party or through the waters within three miles of the coastline of the other Party."

1950

January 23 — The Knesset proclaims Jerusalem the capital of the State.

The Arab League formalizes the boycott against Israel in an official decision, prohibiting any form of cooperation between the Arab states and Israel, including trade, shipping, travel and cultural relations.

February 6 — Egypt decrees the blockade against Israel and the Suez Canal as applying both to Israel ships and ships of other nations carrying cargo to Israel. Banned cargo include commercial vehicles, spare parts, medicine, chemicals, food, petroleum products, as well as arms and ammunition.

Thereafter, "contraband" cargoes are confiscated from ships flying the Norwegian, Australian, Greek and Italian flags.

(Egypt extends the blockade to the international waters to the Gulf of Aqaba, despite a prior commitment to the United States that it would allow peaceful shipping through the Gulf. It occupies the Islands of Tiran and Sanafir, at the mouth of the Gulf, fortifies them, and sets up gun emplacements at Sharm-el-Sheikh at the tip of the Sinai Peninsula. Israel's Port of Elath is completely immobilized as a result.)

May 8 — Israel offers through the Palestine Conciliation Commission, to negotiate any outstanding question with any or all the Arab states.

June 13 — The Knesset votes in favor of a Constitution by evolution, similar to the evolution of the British Constitution.

July 5 — The Knesset passes the Law of Return, granting to every Jew the right to immigrate to Israel, should he so choose.

September 21 — Israel offers, through the Palestine Conciliation Commission, to sign non-aggression pacts with the Arab states.

September 24 — 47,000 Yemenite Jews are brought to Israel by air to escape persecution in their ancient homeland, in an undertaking known as "Operation Magic Carpet."

The Israel Ministry of Health establishes 28 clinics in Arab areas, and four mobile clinics for the Arabs in the Negev, Western and Eastern Galilee, these to supplement a tuberculosis hospital for Arabs in Nazareth, 9 urban welfare administration offices for Arabs, 21 provincial welfare offices for Arabs, and medical services for the Arab schools. In addition, Arabs have access to all public clinics in the country.

September — The Government of Israel initiates a seven-year project--the draining of 15,000 acres of the Huleh swamps, designed to make available

hundreds of new farming units in the drained area.

December 31

The number of new arrivals in Israel comes to a total of 169,405, while the number of new settlements established in 1950 has risen to 94.

ISRAEL'S TEN-YEAR GROWTH

As it celebrates its Tenth Anniversary, the State of Israel notes the strides it has made in improving its social and economic strength. Some aspects of its growth are revealed by the following figures:

Population:

Israel's population has grown to 1,872,000, almost tripling the 1948 figure. Of this number, 864,000 entered the country after the establishment of the State; half of these came from Moslem countries in the Middle East and North Africa.

The Arab population of Israel, all citizens of the State and enjoying equal rights, totals 204,000.

Agriculture:

Production has increased to the point where 60 percent to 65 percent of local food consumption is produced within Israel's borders. Under government stimulus, 470 new agricultural villages have been established.

The land under cultivation has increased from 412,500 acres in 1948 to 930,000 acres in 1956.

In the Negev, 75 new settlements were established -- where none existed before.

Irrigated area now totals 250,000 acres, an increase of 300 percent by comparison with 1948.

Vocational Training:

The vocational training program engages 15.3 percent of the population in agriculture, 42 percent in industry, mining, construction and transportation. Less than 2 percent of those who came to Israel had agricultural experience, while more than 50 percent lacked vocational or professional training of any kind.

Industry:

At the time of the State's establishment, there was little organized industry. Today, Israel's industries include steel, copper, pipes, tire and rubber goods, electrical appliances, paper products, refrigerators, radios, Diesel engines, automobile assembly, fertilizers and light tools.

The chemical industry includes the exploitation of the mineral resources of the Dead Sea and the Negev. Among these are potash, caustic soda, magnesium, bromine, rock phosphate, ceramic clays, glass sand, feldspar, manganese, iron and mica.

Water:

Israel's water supply for industry and agriculture has been quadrupled.

Infant Mortality:

In 1948, Israel's infant mortality stood at 51.7 deaths per 1,000 births. This figure has now dropped to 32.3 deaths per 1,000 births.

ISRAEL'S 10-YEAR

- **POPULATION:** ***Almost tripled***

1948:	650,000
1956:	1,872,380

- **INDUSTRY:** ***Sevenfold increase***

1948:	negligible
1956:	$700 million

Electricity: (in thousands kilowatt hours)

1949:	329,205
1956:	1,142,673

Exports: Tripled

1949:	$29,680,000
1956:	107,246,000

Imports:

1949:	$253,120,000
1956:	363,974,000

- **AGRICULTURE:**

Cultivated Area (in acres): Doubled

1948:	412,000
1957:	956,250

Production: Almost tripled

1948 Index:	100
1956 Index:	289

Irrigation: (in acres) Nearly quadrupled

1948:	75,000
1957:	275,000

Water Usage (in cubic meters): Quadrupled

1948:	250 million
1956:	1000 million

R GROWTH AT A GLANCE

- **SHIPPING**

Vessels: Tripled

1948:	10
1957:	35

Tonnage: Ninefold increase

1948:	14,000
1957:	135,731

- **EDUCATION**

School Attendance: Almost quadrupled

1948:	113,035
1957:	507,541

Arab School Attendance: Almost tripled

1948:	10,092
1957:	29,127

Teachers: Almost doubled

1948:	5,964
1957:	11,295

- **PUBLIC HEALTH**

Hospitals: Almost doubled

1949:	63
1956:	102

Beds: Tripled

1949:	4,626
1956:	12,250

PHYSICIANS: (3887)

(Comparison ratio of physicians to population)

Israel	1 to 400 persons	**India**	1 to 7100 persons
Egypt	1 to 3500 persons	**Switzerland**	1 to 700 persons
	United States	1 to 760 persons	

Hospitals:

There are 102 hospitals with a bed capacity of 12,250. This compares with a former figure of 63 hospitals and 4,626 beds.

There are 3,887 physicians in active practice, making Israel one of the world's best-cared for populations. This figure means one doctor to 400 persons.

Education:

The expanded educational system includes 102 elementary schools, 278 schools for working youth, 76 high schools, 27 teacher colleges, 42 technical schools, 38 agricultural schools, as well as 92 continuation schools with a student body of 7,581 taught by 981 teachers.

There are 116 Arab elementary schools and 6 Arab high schools, in addition to complete freedom of access by Arabs to all other educational facilities.

The total student body in elementary schools is 359,000, taught by 8,365 teachers, as against 86,387 students and 4,153 teachers in 1948.

Students in high school total 23,000, taught by 1,149 teachers, as against 11,582 students and 704 teachers in 1948.

Students enrolled in teacher colleges are 3,600, taught by 336 teachers, as against 1,470 students and 213 teachers in 1948.

Technical schools showed a 300 percent rise in enrollment.

School attendance of Arab children has doubled over those attending in 1948, with 90 percent of the boys and 60 percent of the girls enrolled in public schools.

Israel's educational system includes six institutions of higher learning: Hebrew University, Weizmann Institute of Science, Haifa Technion, University of Tel Aviv, Bar-Ilan University at B'nai Brak, and a new medical school built by Hadassah. Subjects taught include medicine, dentistry, pharmacology, agriculture, law, pure science, architecture, aeronautics, engineering, social sciences, economics, humanities, health and social services.

Broadcasting:

The Israel State Broadcasting Service conducts programs 17 hours daily, including news broadcasts at stated intervals in Arabic, English and French, as well as Hebrew.

Cultural Activities:

There are four symphony orchestras, 700 choirs, an opera company, six permanent theatrical groups and 50 little theatre groups in Israel.

Merchant Fleet:

Thirty-five vessels with a gross tonnage of 135,000 which include passenger liners, oil tankers and cargo ships, comprise the State's merchant marine. By the end of 1958, it is expected that 12 new vessels will be added, increasing tonnage to 250,000.

Air:

El-Al, the Israeli airline, conducts passenger and freight service to Asia, Europe, North America and Africa.

Communications:

Israel has direct telegraphic, cable and wireless communication with most countries.

1951

February 27	The first Point-4 agreement between the United States and Israel is signed, under which the United States undertakes to grant Israel technical assistance in a number of development fields.
March 15	Syria attempts by force to halt the project to drain the Huleh swamp.
May 3	Prime Minister David Ben-Gurion visits the United States and launches Israel's first Independence Bond issue, intended to help make possible Israel's absorption of new immigrants.
May 18	The United Nations authorizes Israel to continue its Huleh drainage project.
June 12	Egypt formally announces to the Special Committee of the Mixed Armistice Commission, in justification of its blockade against Israel: "We are exercising the rights of war. We are still legally at war with Israel, and Armistice does not put an end to a state of war. It does not prohibit a country from exercising certain rights of war." This becomes the consistent explanation of Egypt and other Arab states for their continuous war on Israel, despite the existence of the Armistice agreements which specifically enjoins such policies.
July 11	Israel brings to the Security Council its complaint against Egypt's blockade of Israel in the Suez Canal, as "jeopardizing the Armistice agreement and endangering peace and security in the Middle East."
July 30	The second elections of the Knesset are held, in which 75,000 Arabs participate, including women. Eight Arab deputies are elected members of the Knesset, consisting of 120 members.
July	Israel completes the evacuation of 110,000 Jews from Iraq, who had been subjected to arrest, persecution and confiscation of their property.
August 23	The United States and Israel sign in Washington a treaty of friendship, commerce and navigation.
September 1	The Security Council of the United Nations adopts a resolution calling upon Egypt to terminate her blockade practices against Israel as being in contravention both of the 1888 Constantinople Convention and the 1949 Armistice agreement.
September 13	The United Nations Palestine Conciliation Commission, at a conference in Paris, submits to the representatives of Egypt, Jordan, Lebanon and Israel, a comprehensive pattern of proposals, suggesting that these be preceded by a solemn declaration by all the parties "to settle all differences, present and future, by

resort to pacific procedures, refraining from any use of force or acts of hostility."

Israel agrees to this declaration. The Arab states decline.

October 10 — Israel obtains its first grant-in-aid from the United States under the Mutual Security Act in the sum of $65 million, $50 million of which is assigned to help in the integration of Jewish immigrants in Israel.

November 4 — Israel announces its readiness to compensate Arab refugees for land abandoned in Israel.

November 19 — Dr. Chaim Weizmann is elected President of Israel for a second term.

December 31 — The total of new immigrants in 1951 reaches 173,901. The number of new settlements in the year totals 67.

1952

January 26	The United Nations General Assembly adopts a resolution establishing a $200 million fund to be used over a three-year period for work projects to help in resettling Arab refugees in the countries of their current abode.
February 20	The Knesset adopts a new economic policy aimed at combatting inflation and increasing productivity, exports, and investment.
May 7 - 14	The first International Congress ever held in Israel takes place in Jerusalem - an international symposium on desert research, organized by the Israel Research Council in cooperation with the United Nations Educational, Scientific and Cultural Organization.
June 4	The United States Congress grants $73 million to Israel for the fiscal year 1952 - 1953 to aid in integration of immigrants and technical assistance.
June 13	An Israel Atomic Energy Commission is established to supervise, coordinate and promote nuclear research.
August 26	A petroleum law is passed, providing a legal framework for the exploration, drilling and production of oil and gas on terms profitable to the operators and fair to the country.
September 10	An Israel-West German Reparation agreement is signed at Luxembourg, under which West Germany agrees to pay Israel $750 million in goods and services on account of Jewish property confiscated by the Nazis.
October 9	Israel agrees to release unconditionally $2,800,000 worth of blocked Arab accounts in Israel banks to Arab refugees.
November 9	Dr. Chaim Weizmann, President of Israel, dies at his residence in Rehovoth, at the age of 76.
December 1	Israel submits to the United Nations a blueprint for peace in the Middle East, proposing direct peace negotiations with the Arab states on all outstanding questions.
December 8	Mr. Itzhak Ben-Zvi is elected President of Israel.
December 11	A resolution, sponsored by eight powers, calling upon the Arab states and Israel "to enter at an early date into direct negotiations" for a "settlement of their outstanding differences", is passed by the Special (Ad Hoc) Political Committee of the United Nations.
December 18	This resolution fails to command the necessary two-thirds majority in the plenary meeting of the General Assembly.

1953

January - June	Intensified border attacks on Israel are carried on, emanating from Jordan, and are retaliated in kind.
March	France and Israel conclude an agreement for cooperation in the development of nuclear energy for peaceful purposes. Israel is presently a source of heavy water production for France.
April 23	Jordan authorities reject the proposal for a high-level meeting, submitted by General William E. Riley, Chief of Staff of the United Nations Truce Supervision Organization.
September 2	Israel begins work on a hydro-electric project on the Jordan, near B'not Yaacov. This is protested by Syria to the Security Council.
September 16	Israel is elected to a Vice-Presidency at the Eighth Session of the General Assembly of the United Nations.
September 22	The first international exhibition in Israel takes place in Jerusalem on the conquest of the desert; more than 500 private firms, organizations and governments from 22 nations, as well as United Nations agencies, participate.
October 21	Ambassador Eric Johnston, special envoy of President Eisenhower, arrives in the Middle East to work out a plan for the joint use of Jordan River waters by Israel, Jordan, Lebanon and Syria.
October 27	The United Nations Security Council passes a resolution ordering the temporary suspension of work near B'not Yaacov, on Syria's complaint.
November 12	Israel proposes a high-level meeting of Israel and Jordan representatives to coordinate efforts to combat border incidents.
November 18	Israel passes a national insurance law as the first step in a comprehensive Social Security plan, a law providing for old-age pensions, workmen's compensation, maternity payments; Israel establishes a Social Security Board to administer the law.
November 23	Israel formally requests the United Nations Secretary General to convoke an Israel-Jordan conference, under Article XII of the Armistice Agreement, to prevent further impairment of the situation. Jordan refuses to respond to the Secretary General's invitation.
December 8	Israel's Prime Minister Ben-Gurion resigns. Mr. Moshe Sharett becomes the new Prime Minister.

1954

January 14	Israel is admitted to membership in the World Bank for Reconstruction and Development and in the International Monetary Fund.
January 22	The Soviet Union vetoes a draft resolution proposed by the Western powers in the United Nations Security Council which would have authorized the United Nations Chief of Staff to permit the resumption by Israel of work on the Jordan hydroelectric plant.
February 15	Israel abolishes capital punishment for murder, restricting the extreme penalty to persons convicted of aiding the Nazis.
March 20	The Soviet Union vetoes a resolution of the United Nations Security Council, supported by eight powers, calling upon Egypt to comply with the 1951 Security Council resolution to end its blockade in the Suez Canal.
April 21	The United States signs a bilateral military agreement with Iraq, whereby the United States undertakes to supply Iraq with arms. This agreement paves the way to the Bagdad Pact, initiated initially as a mutual assistance pact by Turkey, Iraq, and Pakistan, joined subsequently by Iran and Great Britain. The Pact is intended to be a northern tier defense arrangement against the Soviet Union.
July 27	Britain signs an agreement to end its 72-year occupation of the Suez Canal Zone, and to evacuate its $1,500,000,000 Canal Zone base within 20 months. A seven-year treaty provides that Britain can return to the base in the event of an attack on Turkey or on an Arab country. The agreement, though recognizing the Suez Canal as an integral part of Egypt, also recognizes that it is a "waterway economically, commercially and strategically of international importance" and "the determination of both parties to uphold the 1888 Constantinople Convention guaranteeing freedom of navigation of the Canal."
September 1	Israel adopts a resolution, expressing deep concern with the policy of arming the Arab states pursued by the United States and Great Britain, while the Arab states threaten the existence of Israel. Israel notes the disregard of Israel security and the needs of stability and peace, entailed in the agreement for the evacuation of the Canal Zone.
September 28	The Israel ship Bat Galim is seized by Egypt at the entrance to the Suez Canal, carrying a cargo of beefhides and plywood on route to Israel from Eritrea. (The Israeli crew was released after months of detention. The vessel itself has never been yielded by the Egyptian Government.)

October 6	Israel, in the United Nations General Assembly, offers to conclude non-aggression treaties with the Arab states. The Arab response is negative.
October 27	Colonel Masser announces: "When the Suez issue has been disposed of, Egypt will be concerned with one problem only -- the problem of Palestine.... The Palestine problem will not be solved and there will be no peace between us and the Jews as long as a single grain of your soil (the Palestine-Arabs') remains in enemy hands."
November 26	Israel reaffirms in the United Nations its willingness to consider compensation for Arab lands abandoned in Israel, and to enter into negotiations on compensation with any appropriate United Nations organ in advance of any general settlement.
December 1	The Bank of Israel is opened as the sole bank of issue in Israel to "administer, regulate and direct the credit and banking system, in accordance with the economic policy of the Government and with the provisions of the law with a view to promoting monetary measures...."

1955

February 13	The Israel Government announces that it had acquired four of the seven Dead Sea Scrolls discovered by Bedouin shepherds near the Dead Sea in 1947. Israel establishes a national trust to be known as "The Shrine of the Book," under the chairmanship of the President of Israel, to hold in perpetual trust the Dead Sea Scrolls and other documents and monuments relating to the Bible.
February 24	Iraq and Turkey sign a mutual assistance pact.
April 4	Britain ends its preferential agreement with Iraq.
April 5	Britain joins the Bagdad Pact.
June 3	The United States and Israel initial an agreement, whereby the United States leases to Israel 13.2 pounds of enriched Uranium for the development of peaceful uses of atomic energy.
June	Israel completes the first of two pipelines from the Yarkon River north of Tel Aviv, to the waterless, but fertile soil of the northern Negev. With the second pipeline which will be completed in 1958, this system will supply the Negev with 200,000,~~000~~ cubic meters of water annually.
July 24	Prime Minister Ben-Gurion offers to meet Egypt's leader, Gamal Abdel Nasser, at any time or any place--at Nasser's choosing--to discuss peace.
July 26	General elections are held for the Knesset: eight Arabs are elected as deputies in Israel's Parliament.
September 20	The first oil is struck in Israel, at Heletz, after years of prospecting.
September 27	Colonel Nasser announces the conclusion of an arms deal with Czechoslovakia, bartering cotton for arms. Later, it is known that the agreement is actually with the Soviet Union and that the initial agreement is for $250 million worth of arms purchases at cut-rate prices.

The Egyptian-Russian arms deal gives Egypt superiority over Israel in all categories of weapons for use on land, sea or air, which Israel does not possess. The deal provides the means by which Nasser can make good his boast of destroying Israel. Most important, it opens the door to Russia's penetration of the Middle East, its displacement of the West.

The Egyptian-Russian arms deal is followed by a series of economic agreements with Russia, most of the countries in the Soviet bloc, and Communist China. This is followed by cultural agreements, with the teaching of the Russian language, displacing French and, in some instances, English, in Egyptian and Syrian schools.

October 11

Egypt informs Ambassador Eric Johnston that the Arab League had decided at a meeting in Cairo to defer decision on the Johnston plan for regional development of the Jordan River. Syria had vetoed the plan for political reasons. The plan had originally been accepted in its technical aspects by Arab and Israel engineers, and by irrigation experts. Sixty-one percent of the available waters were destined to go to Jordan, and 39 percent to Israel. The project would have irrigated 120,000 acres in Jordan, 33,000 in Syria, about 8,700 acres in Lebanon, and about 100,000 acres in Israel. The project would have made it possible for 200,000 people to find a livelihood in productive agriculture. The plan involved the expenditure of $200 million over a 10-year period. Syria's hatred of Israel determined its action.

November 3

David Ben-Gurion offers to meet with the heads of Arab states to avert "dangers in the present unstable situation."

November 21

The Bagdad Pact comes into formal existence with the holding of the first meeting of its Council in Iraq. One of its first acts is to agree that Israel is never to be allowed to join the Pact.

December 11

David Ben-Gurion returns from his retirement at Sde Boker, and reassumes the posts of Prime Minister and Minister of Defense.

1955

Colonel Nasser organizes a special army, known as the "Fedayeen," to destroy Israel.

The year 1955 sees the campaign of violent propaganda and sporadic marauding, converted into an organized guerilla war through a para-military force directed and equipped by the Egyptian army, recruited for the most part from the destitute Arab population in the Gaza Strip. Many of the Fedayeen were murderers and criminals released from prison, on condition that they join the Fedayeen. Their function was to penetrate deep into Israel territory, blow up wells and water installations, mine roads, ambush road traffic, demolish settlers' homes while the Israelis are asleep, and collect military data.

Fedayeen bases are established in Jordan, Syria and Lebanon, under the direction of the Egyptian Military Attaches.

The formation of this army and its purpose is openly proclaimed by Cairo radio August 31, 1955.

1956

January 16	Colonel Nasser pledges the reconquest of Palestine in a speech announcing a new constitution for Egypt.
January 19	Syria joins Egypt in an arms deal with Russia. (By 1957, the deal is estimated to be worth $400 million. Equally important with the arms is the political reorientation of Syria to the Soviet Union on the economic, cultural and, finally, political level, which is climaxed on August 18, 1957, with the appointment of General Afif Bizri, the most extreme Leftist in the Syrian army, as Chief of Staff and Army Commander and Chief.)
February 15	A directive is issued by the Egyptian Commander of the Third Division to the commanders and officers in Arish, Rafah, Khan Yunis and Gaza, to prepare "for the important battle with Israel in which we are fully immersed with the aim of realizing our lofty position - that is, to overpower and destroy Israel in the shortest possible time and with the greatest brutality and bestiality in battle."
February 20	Israel completes a 48-mile railroad, linking the Negev with the national railroad system at Naan.
February 24	Secretary of State John Foster Dulles tells the Senate Foreign Relations Committee that the Egyptian-Russian arms deal materially alters the situation "to the disadvantage of Israel." Nonetheless, the United States continues to refuse to sell arms to Israel, while continuing to supply arms both to Iraq and to Saudi Arabia.
April 21	Egypt, Syria, Saudi Arabia and Yemen form a joint military command, under Egypt, aimed at Israel.
June 19	Colonel Nasser declares in reference to the Fedayeen: "We are obliged to be strong in order to liberate the entire Arab land from Morocco to Bagdad and in order to retrieve the right of Palestine's people."
July 26	Egypt's President Nasser seizes the Suez Canal, ostensibly in retaliation for American withdrawal of United States support for construction of the Aswan Dam; Nasser takes the occasion to threaten Israel, while he denounces the West.
August 26	Secretary of State John Foster Dulles tells a Washington Press Conference: "Egypt is in defiance of a decision by the Security Council of the United Nations.....that under the terms of the treaty of 1888, Israel shipping was entitled to go through and that Egypt was not entitled to ban it, if it went through."
August 29	Radio Cairo announces a meeting of Fedayeen Commanders in Egypt, Jordan, Syria and Lebanon, to concert a campaign against Israel.

September 21

The Soviet press attacks Israel for siding with the West in the Suez dispute, declaring that Israel wanted only to "profit by the crisis."

(In all subsequent discussions of the issue of the Suez Canal, Russia supported Egypt, opposed international operation of this international waterway, and was the first to send pilots to Egypt to help it operate the Canal, when the pilots of the legal company were withdrawn.

Beginning with the Suez crisis, the Soviet Union ranged itself fully with Egypt and, in subsequent undertakings, threatened the use of its force to protect the Arabs even to the extent of destroying Israel.)

October 13

A Fedayeen attempt is made on the life of Prime Minister Ben-Gurion.

October 22

Egypt, Jordan and Syria announce a unified military command, "the principal concern of which is war of destruction of Israel."

October 29

Israel strikes out to destroy the Fedayeen bases. In the course of five days, it succeeds in destroying the Egyptian-controlled Fedayeen bases in the Gaza Strip, and the Egyptian fortifications blockading the Gulf of Aqaba.

In the Sinai Desert the Israel defense forces capture and displace the Egyptian fortifications at Sharm-el-Sheikh. The Israelis also take the Islands of Tiran and Sanafir. This action produces two results: It puts an end to the terrorist campaign of the Fedayeen; it opens up the Port of Elath not only to commerce for Israel, but as an international waterway, free to peaceful traffic of the ships of all nations.

October 30

Israel informs the Security Council it is ready to negotiate peace with Egypt.

October 31

Following Israel's march on Sinai, Russia warns Israel that its future is at stake.

November 5

The United Nations votes to establish the United Nations Emergency Force, since stationed in Gaza, and at Sharm-el-Sheikh, the purpose of which is to prevent the outbreak of new hostilities.

The U.S.S.R. warns that Israel's "very existence as a state is at stake."

November 11

Great Britain, in a special report, estimates that Egypt had received, in a single year, $420 million worth of military equipment, including bombers and other heavy equipment, and that the infiltration of technicians make it possible for the Russians to form military unions very quickly.

November 29

The Soviet Union proposes that the Israeli defensive troops be tried as war criminals, while Izvestia declares, "the very existence of Israel as a state is now in doubt."

The U.S.S.R. proposes a 24-hour strafing of Israel. Its offer of volunteers to take their place by the Egyptians is regarded as directed primarily against Israel.

December

By the end of December, the Arab boycott is extended to foreign firms having Jewish directors, while foreign firms doing business with Israel are called upon to suspend operations under the threat of being banned from the entire Arab world.

By the end of December, 100 ships have been blacklisted by Egypt, Israel cargoes confiscated to the value of $5,600,000, an Israeli ship seized, while the cost to Israel, as a result of the ban on oil from the Middle East, was $44 million.

By the end of December, Israel has acquired 19 newspapers, numerous weeklies and fortnightlies, the daily circulation of Israel's Hebrew press has reached 340,000, the week-end editions 416,000, while the circulation of foreign language newspapers has reached 103,300 daily, and 133,300 in the week-end edition.

1957

January 15

United Nations Secretary General Dag Hammerskjold upholds the international character of the Gulf of Aqaba in a report to the General Assembly, in which he states: "The international significance of the Gulf of Aqaba may be considered to justify the right of innocent passage through the Straits of Tiran and the Gulf, in accordance with recognized rules of international law."

January 19

Secretary General Hammerskjold, in a report to the General Assembly, declares: "None of the parties to the 1949 Armistice Agreement is entitled to claim belligerent rights, including the application of such rights in the Gulf of Aqaba and the Straits of Tiran. It follows from the finding of the Security Council in 1951....the parties of the Armistice Agreement may be considered as not entitled to claim any belligerent rights and will not assert belligerent rights (including, of course, such rights in the Gulf of Aqaba and the Straits of Tiran.)"

February 11

The United States issues a memorandum emphasizing the international character of the Gulf of Aqaba, the right of free and innocent passage through the Gulf, and the willingness of the United States to exercise and test this right. The memorandum declares: "The United States believes that the Gulf comprehends international waters and that no nation has the right to prevent free and innocent passage in the Gulf and through the Straits giving access thereto. We have in mind not only commercial usage, but the passage of pilgrims on religious missions, which should be fully respected."

The memorandum continues: "The United States recalls that on January 28, 1950, the Egyptian Ministry of Foreign Affairs informed the United States that the Egyptian occupation of the two islands of Tiran and Sanafir at the entrance of the Gulf of Aqaba was only to protect the islands themselves against possible damage or violation and that 'this occupation being in no way conceived in a spirit of obstructing in any way innocent passage through the stretch of water separating these two islands from the Egyptian coast of Sinai, it follows that this passage, the only practicable one, will remain free as in the past, in conformity with international practices and recognized principles of the law of nations.'

"In the absence of some over-riding decision to the contrary, as by the International Court of Justice, the United States, on behalf of vessels of United States registry, is prepared to exercise the right of free and innocent passage and to join with others to secure general recognition of this right."

February 20

President Eisenhower, in a broadcast, states: "We should not assume that if Israel withdraws from Sharm-el-Sheikh, Egypt will prevent Israel shipping from using the Suez Canal or the Gulf of Aqaba. If, unhappily hereafter, Egypt violates the

Armistice Agreement, then this should be dealt with firmly by the Society of Nations."

March 1

Israel's Foreign Minister Golda Meir, on behalf of Israel, affirms Israel's own belief that the Gulf of Aqaba and the Straits of Tiran are international waterways; on the assumption that they would be so maintained, she announces to the General Assembly Israel's readiness to withdraw its forces from Sharm el Sheikh, with their place taken by the United Nations Emergency Force. She states:

"...The Government of Israel believes that the Gulf of Aqaba comprehends international waters and that no nation has the right to prevent free and innocent passage in the Gulf and through the Straits giving access thereto, in accordance with the generally accepted definition of those terms in the law of the sea.

"In its capacity as a littoral State, Israel will gladly offer port facilities to the ships of all nations and all flags exercising free passage in the Gulf of Aqaba. We have received with gratification the assurances of leading Maritime Powers that they foresee a normal and regular flow of traffic of all cargoes in the Gulf of Aqaba.

"Israel will do nothing to impede free and innocent passage by ships of Arab countries bound to Arab ports or to any other destination.

"Israel is resolved on behalf of vessels of Israel registry to exercise the right of free and innocent passage and is prepared to join with others to secure universal respect of this right.

"Israel will protect ships of its own flag, exercising the right of free and innocent passage on the high seas and in international waters.

"Interference by armed force with ships of Israel flag exercising the right of free and innocent passage in the Gulf of Aqaba and through the Straits of Tiran will be regarded by Israel as an attack entitling it to exercise its inherent right of self defense under Article 51 of the United Nations Charter and take all such measures as are necessary to ensure the free and innocent passage of its ships in the Gulf and in the Straits.

"Israel is now prepared to withdraw its forces from the Gulf of Aqaba and the Straits of Tiran in the confidence that there will be continued freedom of navigation for international and Israeli shipping in the Gulf of Aqaba and through the Straits of Tiran."

Foreign Minister Golda Meir appeals through the United Nations General Assembly for Arab-Israel peace, stating: "Can we, from now on -- all of us -- turn a new leaf and, instead of

fighting each other, can we all united fight poverty, disease, and illiteracy?...I can here pledge the Government and the people of Israel to do their part in this united effort. There is no limit to what we are prepared to contribute, so that all of us together can live to see a day of happiness for all our peoples, and see again from that region a great contribution to peace and happiness to all humanity."

March 1 - 8

The views expressed by the Government of Israel are supported in the United Nations General Assembly by the representatives of the United States, Argentina, France, Costa Rica, Great Britain, Italy, The Netherlands, New Zealand, Australia, Belgium, Canada, Norway, Sweden, Denmark, Iceland.

April 6

The United States ship, the Kern Hills, passes through the Gulf of Aqaba, testing the right to freedom of passage, to deliver oil to Israel at its Port of Elath.

April

Israel completes an eight-inch oil pipeline from Elath to a Mediterranean port.

May 14

Secretary of State John Foster Dulles tells a Washington Press Conference that the United States would not oppose an effort by Israel to test her rights by sending a ship through the Suez Canal.

May 15

This statement is confirmed by President Eisenhower.

May 20

Russia, in the United Nations Security Council, challenges Israel's right to test its use of the Suez Canal.

May 24

The Arab states, in a joint effort, try to persuade the United States to change its view on the international character of the waterways of Suez and Aqaba, and the rights of free and innocent passage.

June 3

Israel announces its support of the Eisenhower Doctrine.

The Economic Council of the Arab League decides to strengthen the boycott by blacklisting concerns selling vehicles to Israel, and foreign companies under contract to furnish Israel with goods and services, and further by establishing a unified system to control exports and imports to prevent Arab goods from reaching Israel and Israel goods from reaching Arabs through intermediaries.

June 18

Russia delivers three submarines to Egypt, the first Middle East country to acquire submarines.

June 23

The United States reiterates the views expressed on February 11 and makes public a State Department communication to shipping companies directing them promptly to report any denial of the right of "free and innocent passage."

June 28	The State Department, in an aide memoire, rejects Arab claims denying Israel's right to freedom of passage in the Gulf of Aqaba and the Suez Canal.
July	The first International Congress of Jewish Studies is opened in Jerusalem, participated in by 120 scholars from abroad and 350 from Israel.
September	The first International Stamp Exhibition in Israel is held at Tabil, 33 countries participating.
	Twenty-six countries, represented by 1000 athletes, participate with 5,000 Israelis in the Fifth World Maccabee games.
	An International Conference on Nuclear Structure is opened at the Weizmann Institute of Science at Rehovoth.
October 31	Israel completes its drainage of the Huleh swamps.
October	Excavations at Hatzor confirm Biblical accounts, according to a report by Dr. Yigal Yadin to the 13th Convention of the Israel Exploration Society.
	The total of new immigrants absorbed by Israel since 1948 reaches the number of 899,567.
November	A Desert Research Institute is opened at Beersheba as part of a world-wide zone research enterprise supported by the United Nations Educational, Scientific and Cultural Organization.

Jackson, C.D.

January 13, 1958

Dear C.D:

First of all, thanks for your gracious note on the Marian Anderson piece. We were very proud of it, and the reaction was most encouraging.

We have made a real try at the Negro College Fund idea and simply haven't come up with a formula, format or what have you, that we are prepared to submit.

I am afraid it is something that we will have to continue to worry about and hope that something can be done about it in the fall.

As ever yours,

Mr. C.D. Jackson

Dear Ed:

I have just come back from a studio screening of your Marian Anderson show, and I am absolutely demolished emotionally.

I cannot remember ever seeing such a superb combination of editorial taste, photographic quality, journalistic enterprise, and American message, and I am deeply grateful.

All the best,

C. D. Jackson

Mr. Edward R. Murrow

January 8, 1958

Dear Ed:

Not having seen you for some time, I have not had a chance to ask you what if anything was new on the United Negro College Fund idea that we discussed with Lee Bristol.

As I remember, you were going to toss the problem to your group and see what they could come up with both as to idea and costs, as well as spelling out the multiple sponsorship concept.

Unfortunately I missed your Marion Anderson program, but have heard so much about it that I have arranged for a special showing later today.

All the best,

C. D. Jackson

Dear Miss Jackson:

Thank you for returning the signed release form.

I am very sorry, but after careful evaluation of THE UNIVERSE, we have decided it is a proposal which Public Affairs would not be interested in undertaking at this time.

Your suggestion that Dr. Harrison Brown be used as host of your program is a good one. Perhaps you saw the first program in THE GREAT CHALLENGE series last Sunday in which Dr. Brown was a participant and contributor to the discussion.

We do thank you for letting us see your proposal.

Very sincerely,

John P. Jefferson

Dear Dr. Jacobs:

In reply to your letter of July 22 to Mr. Murrow, I much regret to tell you that he will be out of the country from the end of this August until July 1960 and will therefore be unable to participate in your Convocation.

Sincerely yours,

Sheila Hogg
Secretary to Mr. Murrow

TRINITY COLLEGE
HARTFORD, CONNECTICUT

OFFICE OF THE PRESIDENT

July 22, 1959

Mr. Edward R. Murrow
c/o Columbia Broadcasting System
485 Madison Avenue
New York, New York

Dear Mr. Murrow:

In November of 1955 Trinity College held a very successful Convocation on the subject of "The Challenge to Liberal Education." Since then there have been requests from many sources that we sponsor another such event. As a result we have decided to hold a one-day Convocation on Saturday, April 9, 1960 on the general theme "The New World Ahead, Interpretation and Prophecy." The purpose of this letter is to inquire if your "sabbatical year" schedule will permit you to accept an invitation to appear as the final speaker or summarizer at the evening session of the Convocation.

We are inviting pre-eminent authorities from East and West to direct their attention to the philosophical, historical and economic aspects of the broad general theme. One of the persons we are hopeful of obtaining is Barbara Ward who is planning to be in this country this next winter and spring. There will be three sessions in all, one each devoted to the areas mentioned above, with two speakers at each session. Time will be left at each session for a question and answer period. As in the last Convocation, which was held in our Field House and was attended by several thousand people, there will be extensive radio and television coverage.

I can think of no one more qualified than you to help us tie together the earlier remarks of the day on this important topic and take a brief look at the future. Your presence and participation in this event coming at the start of a new decade would mean much to everyone concerned and go far toward insuring the success of the Convocation.

Should you be available for this assignment may I have some idea of your usual honorarium for the information of our planning committee?

Best wishes for a pleasant and profitable year away from your normal strenuous activities.

Sincerely yours,

Albert C. Jacobs
President

Dear Sir:

We are enclosing two press tickets for the public meeting on the Morton Sobell case, to be addressed by:

Dr. Horace M. Kallen, Research Professor of Philosophy at the New School for Social Research, and author of books on democracy and freedom.

Murray Branch, professor of religion at Morehouse College, Atlanta, Georgia.

Chairman: Professor Thomas I. Emerson, Yale University Law School.

The meeting will take place at 8 P.M. on Friday, June 19th, 1959, at Webster Hall, 119 East 11th Street (between 3rd and 4th avenues), New York City. Between one thousand and 1500 persons are expected to attend.

In the event you would like additional press tickets, please let us know.

Enclosed is a copy of our committee's new newspaper giving information about latest support in behalf of Mr. Sobell's appeals.

Sincerely,

Ted Jacobs

Today's Verdict

IN THE CASE OF MORTON SOBELL

July, 1959 | Published by the National Committee to Secure Justice for Morton Sobell | 389 | 5th Issue—10c

Public Opinion Uniting in Urgent Appeal For Morton Sobell's Freedom or New Trial

"I AM INNOCENT"

In August, 1950, amid a blaze of headlines at the height of the McCarthy period, a young American scientist was kidnapped, brutally beaten, and thrown into prison. Despite his plea of innocence, Morton Sobell was publicly accused of being in a conspiracy to commit espionage and brought to trial with Ethel and Julius Rosenberg. The verdict at that time was guilty. The penalty: 30 years imprisonment.

In the years that have passed, the case of Morton Sobell has burst into the arena of public opinion. The hostile passion that marked the trial has changed to a belief that a terrible miscarriage of justice occurred. Lawyers, judges, scientists, educators, clergymen, writers—eminent persons from many walks of life—have taken a fresh look at the facts and issues. Many are convinced of his innocence. Others feel either that his trial was unfair, that grave doubts exist, or that the sentence was completely out of proportion.

Within these pages is echoed the resounding voice of national and international opinion asking that Morton Sobell be freed or given a new trial. We hope that after reading this newspaper you too will want to act in behalf of Mr. Sobell, who says from his cell in the federal penitentiary at Atlanta in his 9th year of imprisonment: "I am innocent. How much longer will it take for the truth to set me free?"

—COMMITTEE TO SECURE JUSTICE FOR MORTON SOBELL

New Developments in Case

NEW! Eminent Honorary Sponsors Of Committee for Morton Sobell

The Committee to Secure Justice for Morton Sobell announces the formation of a distinguished group of Honorary Sponsors of the Committee. They include (partial listing, with affiliations for identification only): Rev. Gross W. Alexander, Lucerne Valley, Cal.; Rabbi S. J. Bass, Nadick, Mass.; Rabbi Samuel Bernstein, New York; Prof. Kermit Eby, Chicago; Rev. John E. Evans, Columbus, O.; Rabbi Morris Fishman, Margate, N. J.; Waldo Frank, author, Truro, Mass.; Rev. G. Shubert Frye, Syracuse, N. Y.; Rev. Erwin A. Gaede, Los Angeles; Maxwell Geismar, literary critic, Harrison, N.Y.; Prof. Erwin R. Goodenough, Yale; Rabbi Avery J. Grossfield, Wantagh, N.Y.; Judge Norval K. Harris, Sullivan, Ind.; Prof. A. Eustace Haydon, Chicago; Russell Johnson, Petersham, Mass.

Ted Le Berthon, Fresno, Cal.; Daniel G. Marshall, attorney, Los Angeles; Dr. Leo Mayer, New York; Louis F. McCabe, attorney, Philadelphia; Rev. Peter McCormack, San Francisco; Dr. Gardner Murphy, Menninger Foundation, Topeka, Kan.; Rev. Dryden Linsley Phelps, Berkeley, Calif.; Prof. Dale Pontius, Chicago; Howard B. Radest, leader, Bergen Ethical Society, Teaneck, N. J.; Prof. Anatol Rapaport, Ann Arbor, Mich., Lord Bertrand Russell, England; Prof. Malcolm Sharp, Chicago; Dr. D. R. Sharpe, Pasadena, Cal.; Dr. Harold C. Urey, LaJolla, Cal.; Mrs. Clara M. Vincent, Women's Int. League for Peace and Freedom, Livonia, Mich.; Rabbi Jacob Weinstein, Chicago. and Prof. Francis D. Wormuth, Salt Lake City, Utah.

NEW! Modern Sacco-Vanzetti Case, Says Nationally-Known Paper

The **Portland Oregonian**, an Independent Republican newspaper, urged justice for Morton Sobell in an editorial titled "Pangs of Conscience," published April 5. The **Oregonian** wrote: "The interest aroused by a proposal before a Massachusetts legislative committee that a posthumous pardon be granted to Nicola Sacco and Bartolomeo Vanzeti shows once again how the public conscience will not be still when the public has the nagging suspicion that it has been a party to injustice."

Seeing the Sobell case as a "more modern example," the **Oregonian** stated that "many fair-minded persons have searched the transcript of the trial in vain to find just what defendant Sobell was accused of doing, and what the jury found him guilty of. Some day the American public conscience may be sufficiently pricked in this instance, too, to bring a public inquiry that may answer the question of whether anti-Communist hysteria in 1951, when this nation was at war in Korea, may not have been the real reason for this conviction."

NEW! Senators, Congressmen Appeal To President Eisenhower

Senator Frank E. Moss of Utah has written President Eisenhower on the Sobell case. Senator Moss said in part: "As you know there is widespread belief that Mr. Sobell was unjustly convicted and that his case should be re-opened. Because of the many letters I am receiving on this subject, I am writing to ask you to interest yourself in this case to see whether perhaps within the dictates of your conscience, you would like to ask the Attorney General to decide whether a new trial should be granted to Mr. Sobell."

Representative William Meyer of Vermont has written the President asking him to look into the case, as has Rep. Adam Clayton Powell of New York. U. S. Senator William Langer has spoken publicly in Morton Sobell's behalf and has inserted his remarks in the Congressional record.

(Continued on Page 4)

Noted Americans Urge Commutation After Independent Study of Trial

The following analysis of the trial has been sent to President Eisenhower by the undersigned theologians and law rofessors following their independent study of the record:

A STATEMENT ON THE CASE OF MORTON SOBELL

The undersigned are American citizens who believe that the sentence of Morton Sobell should now be commuted. Sobell was convicted of conspiring with others to transmit to the Soviet Union writings and information relating to the national defense of the United States and was sentenced on April 1, 1951 to serve thirty years in Federal Prison.

Morton Sobell was tried with Julius and Ethel Rosenberg, who were convicted of espionage in connection with the atomic bomb and who were sentenced to death and later executed. Sobell, however, was never implicated in any way with involvement in the atomic espionage for which the Rosenbergs were convicted. This fact was confirmed by the judge who sentenced Sobell.

This statement is not concerned with the Rosenberg conviction. The undersigned are and consistently have been convinced anti-Communists. None is associated with any organization, committee, or group of any kind concerned either with the case of the Rosenbergs or that of Sobell, nor are any of the undersigned connected in any way with Morton Sobell or any members of his family. After study of the case, we believe that the following considerations warrant a commutation of the very heavy sentence Sobell is now serving.

1) Sobell was never implicated with atomic espionage for which the Rosenbergs were convicted.

Dr. Reinhold Niebuhr

2) The charges against Sobell, supported mainly by the testimony of one man, Max Elitcher, were that he had solicited information, and had on one occasion taken something which looked like a can of film to Julius Rosenberg. No specific item of information supposed to have been secured by him or transmitted by him to anyone else is specified in the record. The case against him, therefore, is vague in content and slender in proof. The possibility that a trip to Mexico which he and his family took should be construed as flight cannot be ignored, though it is subject to various interpretations.

3) Whether or not the judge and prosecution made sufficient efforts to provide a fair trial, we ought to recognize that the emotions surrounding the trial of the Rosenbergs and the fact that Sobell's case was tried with theirs made it difficult to separate the two cases and to recognize the very different character of the two charges and the evidence introduced to support them respectively.

4) Sobell has already served, with good conduct, nearly eight years in prison, six of them in Alcatraz.

5) As Americans we are fully aware of the threat of communism to our freedom and way of life. Any attack on that freedom without or within must be resisted. Nevertheless, one of the factors which makes that freedom so precious is its capacity to practice a discipline and humane administration of justice precisely in those cases where emotions are aroused which make it difficult to remain objective about the merits of a specific case. We believe a commutation of the Sobell sentence would demonstrate our national faith in that freedom.

Reinhold Niebuhr, Vice-President and Professor of Ethics and Theology, Union Theological Seminary, New York City.
John C. Bennett, Dean and Professor of Ethics and Theology, Union Theological Seminary.
Paul Ramsey, Professor of Religion, Princeton University.
Edmond Cahn, Professor of Law, New York University.
Daniel Day Williams, Professor of Systematic Theology, Union Theological Seminary.
Jerome Nathanson, Administrative Leader, New York Society for Ethical Culture.
Gerhard O. W. Mueller, Associate Professor of Law, New York University.
(titles are for identification only)

Prison Chaplain Certain of Innocence

During the years when he was a Protestant chaplain at Alcatraz, Reverend Peter McCormack developed a close association with Morton Sobell. Rev. Mr. McCormack, a Presbyterian minister for 50 years, is completely convinced of Morton Sobell's innocence and is working in his behalf. At a dinner meeting in San Francisco, the distinguished clergyman spoke of Morton Sobell as follows:

"First, the man, Morton Sobell: If you met him I am sure you would recognize the healthy mindedness of the man; proud of his inheritance, of home, country, of the opportunity he had as a loyal American citizen.

"It was belief in this fact that led me to conclude he was utterly incapable of doing the thing of which he was charged and like other great souls down through history, he suffers punishment, 'the just for unjust.' Many a time a man may act, as we say 'out of character'—but to know Morton, you cannot charge him with that. Falsely accused, cruelly treated, sentenced on the testimony of a self-confessed perjurer, this man of fine character and brilliant mind still suffers within prison walls . . .

Rev. Peter McCormack

Morton Sobell

"To sum up my feelings about Morton, I want you to think of him as a man with profound convictions, a profound respect for the thinking of others, and for the rights of others, his loyalty and devotion to the best things in life, his reverence and respect for sacred things, these made him a man to be admired . . .

"I feel satisfied in my own mind, that Morton is innocent, a victim of perjury, politics and predjudice. So there is a sense of urgency impelling me 'to speak what I do know and testify of the things I have seen.'"

Jacobson, Prof
Howard B.

Professor Howard Boone Jacobson
Department of Journalism
University of Bridgeport
Bridgeport 4, Conn.

Dear Professor Jacobson:

Your letter of November 5 to Mr. Irving Gitlin has been passed to me for reply. You have my permission to use the speech I made recently in Chicago as a chapter in MASS COMMUNICATION AND SOCIETY, and I shall be interested to see a copy when it is published.

Yours sincerely,

Jaffa, Herbert

A NEW PROGRAM OF INTERNATIONAL STUDIES OPEN TO THE GENERAL PUBLIC

about peoples, cultures, and politics

1958–1959

Division of General Education and Extension Services

1 WASHINGTON SQUARE, NEW YORK 3, NEW YORK

These courses on international studies are offered to the general public in the belief that knowledge and understanding about peoples, cultures, and politics of the world have become increasingly meaningful to the American adult and to his role as a participating citizen in a democratic community.

Peoples and Cultures of Asia

The three courses on Asia have been scheduled to follow each other; that is, the ending date of each course coincides closely with the opening date of the one following it. Thus, the *Indian Subcontinent* ends on December 4 and *East Asia* begins on December 11; *East Asia* closes on March 5 and *Southeast Asia* starts on March 12. Also, the hours and days of each course (Thursdays, 8.10–9.55 p.m.) remain the same. Students registering for all three courses, therefore, can be assured, without having to change their own schedule, of an almost uninterrupted program of study from September through May.

Though scheduled to begin at different dates, any one or all three courses on Asia may be registered for during this present registration period. (*See* registration form.)

104. The Indian Subcontinent Fee: $25.00

Among the Asian powers, like China, of overwhelming importance to future world stability is the great Indian Subcontinent. India's meaningfulness has to do not only with her vast population but with an influence that extends far beyond her borders, touching millions of people throughout Asia, parts of Soviet Europe, and the Western world. What are India's chances of success in her attempt to solve problems by methods of parliamentary democracy rather than by authoritarian rule? What are the complicating factors — historical, political, economic, and social—that condition Indian life today? The class investigates these questions and has an opportunity in the latter part of the semester to hear from distinguished Indians. Topics include:

The peoples and languages of India
The Indian cultural heritage
Indian religions and their place in Indian life
Caste and Indian society
The Indian village—the peasant base
The heritage of British rule
Indian politics: Gandhi, the Congress Party, and Nehru
Indian imperialism: Hyderabad and Kashmir
Indian Communism: the threat and the reality
Pakistan—Muslim India
Ceylon—the island neighbor

THOMAS HOVET, JR. Thursday 8.10–9.55 p.m., September 25–December 4.

104.1. East Asia (China, Japan, Korea) Fee: $25.00

In this ancient and teeming population area with and against whose peoples Americans have fought wars in recent years, great changes are taking place. This lecture-discussion course ex-

amines the area and its peoples in terms of history, culture, tradition, religion, and geography, seeking always to relate them to current happenings. What, for example, are the latent forces of Shintoism and Confucianism in the modern world? Can Communist China and a modern Japan use traditional elements of society to build upon? Other questions considered include:

- The impact of traditional Confucianism and Taoism on modern China
- The influence of the military on Japanese democracy
- Korea as an international pawn of the major powers
- Communism and the roots of Chinese culture
- Population pressures on Japan
- Soviet influences in East Asia
- Impact of the West on Chinese civilization
- Present conflicts between Japan and Korea
- The Chinese recognition problem
- Economic and population potentials of Communist China
- Taiwan—the future for Nationalist China

CHARLES H. C. LO. Thursday 8.10–9.55 p.m., December 11–March 5.

104.2. Southeast Asia — Fee: $25.00

Sometimes vividly dramatized in the headlines, sometimes quietly behind them, significant events are taking place in Burma, Thailand, Laos, Cambodia, Vietnam, the Philippines, Malaya, and Indonesia as these nations develop national status in the international field. Here, in these island and mainland communities that lie between China and India, America has interests. It is important that we come to understand the many political, sociological, and economic problems confronting these peoples as they choose paths which they hope will give meaning to their new position of independence. A purpose of this lecture-discussion course is to help the student understand these problems and the background to current events by relating them to the cultures, histories, ideologies, and religions of these lands whose beginnings stem from the earliest occurrence of man. Subjects covered in class include:

- Cash crops, labor, and the plantation in the Asiatic tropics
- Pirates, headhunters, jungle nomads, and government in the islands and coasts of Southeast Asia
- Tribes, castes, classes, and races in the western South Seas
- Natives and white men in the East Indies
- Native rulers and white men's governments in Southeast Asia
- Colonialism, nationalism, and communism in the new nations of Southeast Asia

Oil, tin, and rubber versus rice and meat in the lands below China
Education, religion, and custom in the new nations of tropical Asia
The overseas Chinese of Southeast Asia
Languages and history in the countries south of China
Hindus, Buddhists, and the arts in Southeast Asia
Red and white ideologies in a brown man's world

JOHN L. LANDGRAF. Thursday 8.10–9.55 p.m., March 12–May 21.

Islam

In addition to *Islamic Religion and Culture*, courses are offered in beginning and intermediate Arabic and in great Arabic literature with readings in The Book of Songs *(Kitab al-Aghani)*, The Book of the Misers *(Kitab al-Bukhala)*, The Book of the Poets and Poetry *(Kitab ash-Shir wa ash-Shura)*, The Koran, The Book of Tradition *(As Sahih)*, The Book of Illumination *(Kitab al-Luma)*, The Deliverance from Error *(Kitab Munqid min ad-Dalal)*, and The History of the Caliphs *(Suyuti's Tarikh al-Khulafa)*.

105. Islamic Religion and Culture

Fee: $35.00

One sixth of the earth's people living in ancient and modern cities and villages along the great arc of the world extending from the Persian Gulf to the Atlantic Ocean—these are the scattered people of Islam whose stirrings today in Egypt, Syria, Saudi-Arabia, Algeria, Tunisia, Pakistan, Indonesia, etc., are beginning to change the face of the globe.

Who are these people? And what is their faith of Islam which unifies them midst conflicting interests and loyalties? The religion and culture of the Muslims is the major concern of this new lecture and discussion course. Topics include:

Muhammad—the man and his faith
The Koran
The Five Pillars of Islam
The law and its role in Muslim society
The Islamic sects
Al-Ghazali—the Muslim St. Thomas Aquinas
Mysticism and the Muslim saints
The Islamic state and the role of the caliphate
The aesthetic tradition
Islam and westernization
Modern attempts at reform
Muslim law and the modern state and society
Christianity, Judaism, and Islam—similarities and contrasts

LEON ZOLONDEK, Monday 8.10–9.55 p.m., September 29–January 19.

92. Introduction to the Spanish-American World — Fee: $35.00

The two major civilizations of the Western Hemisphere are Anglo-American and Hispanic. The traditions of Spain are alive in eighteen Latin-American nations as well as in Puerto Rico and among the Spanish-speaking groups in this country. The course deals with Spanish-American cultures and societies in terms of history, sociology, and anthropology. The lectures also include a discussion of Spain, of pre-Columbian civilization (Mayan, Aztec, Incan), of contemporary Indian and Mestizo populations, and of African ingredients in Latin-American cultures. A major part of the course is devoted to the Island of Puerto Rico and the Puerto Ricans of New York.

JOSEPH BRAM. Tuesday 8.10–9.55 p.m., September 30–January 27.

103. Africa, South of the Sahara

Can the Western political system, the economic and social values, find acceptance among peoples winning their way to nationhood south of the Sahara Desert? This course examines political and economic factors in the Belgian Congo, Rhodesia and Nyasaland, Ghana, Nigeria, the Union of South Africa, etc.—dramatizes how they directly affect crucial interests in the United States. The Western impact on Africa is reviewed in terms of its benefit and/or loss to the Africans, its value to Western peoples, and the potentialities for future co-operation or conflict. Topics include:

- The last stage of imperialism
- American responsibility for cultural and technological leadership in a free Africa
- Economic and cultural changes caused by the Western impact
- Tribal versus urban culture in a changing society
- The race and color question
- Western interests in African resources
- The rise of African nationalism: Ghana, Nigeria
- The concept of economic partnership
- Responsibility of the United Nations
- Apartheid in South Africa

THOMAS R. ADAM. To be given in the spring of 1959. Day and hour not yet scheduled.

Related Courses

100. International Affairs—The World We Live In — Fee: $35.00

Reviewing the rapid changes of postwar history in such key countries as Russia, China, India, France, England, Germany, etc., this course is devoted to an analysis of the political, economic, and cultural backgrounds of current international affairs.

NORMAN S. JACOBS. Tuesday 6.15–8 p.m., September 30–January 27.

101. Foreign Policy—Fall 1958: Behind the News — Fee: $35.00

Starting with the headlines, this course deals in depth with the major foreign affairs story each week, bringing out the views behind the news and the facts behind the story. Current developments are related to basic principles that may be guiding United States foreign policy, with particular references to the views of leading analysts and policy makers.

JOSEPH P. LASH. Wednesday 8.10–9.55 p.m., October 1–January 21.

75. The Principles of International Law — Fee: $35.00

An introduction to the principles of international law as they have developed from the time of Grotius till today. Designed for the layman interested in the legal principles underlying international affairs and conditioning foreign policy. Lectures and the reading of actual cases provide the basis for the discussion of such topics as the law of nations, territorial jurisdiction and citizenship, jurisdiction over vessels, treaties and diplomatic relations, international claims and disputes, and the conduct of war.

HAMILTON VREELAND, JR. Monday 8.10–9.55 p.m., September 29–January 19.

MAIL REGISTRATION FORM

Program for International Studies 1958–1959

Miss Gertrude Stoddard
Administrative Assistant
Division of General Education
New York University
1 Washington Square North, New York 3, N.Y.

I wish to register in the course(s) listed below. I enclose a check or money order, made payable to New York University, representing the FULL amount of the tuition fee as listed in the current Bulletin, *plus* a $5.00 nonreturnable registration fee,* making a TOTAL of $.....
(Registrations can be accepted by mail ONLY when the fees are paid in full.)

*Each student in the Division of General Education is required to pay a nonreturnable $5.00 registration fee each term upon enrollment, except where otherwise noted. This fee is payable by the student only once a term regardless of the number of courses taken.

Faculty

THOMAS R. ADAM, A.M., LL.B. [Edinburgh]; *Professor of Political Science, University College of Arts and Science.* Associate, Development Commission, Australia, 1925–1930; author: *Education for International Understanding, Colonial Policies and Practices.*

JOSEPH BRAM, LIC. ÈS. LET. [Paris], PH.D.; *Professor of Anthropology and Sociology, Graduate School of Arts and Science.* Fellow, American Anthropological Association; formerly Vice President, American Ethnological Society; formerly Chairman, Section of Anthropology, New York Academy of Sciences; author: *Language and Society, An Analysis of Inca Militarism;* contributor: *Transactions of the New York Academy of Sciences, The American Anthropologist, Group Psychotherapy, Child Study, Library Journal, Revue de Psychologie des Peuples.*

THOMAS HOVET, JR., A.B., A.M., PH.D. [New Zealand]; *Assistant Professor of Government, Graduate School of Arts and Science.* Vice-President of the Taraknath Das Foundation (Indian-American Relations); member of the Fulbright National Selection Committee (Asia-Pacific Section); formerly Research Associate, International Studies Group at Brookings Institute, Washington, D.C., and Fulbright Fellow to New Zealand.

NORMAN S. JACOBS, A.B., A.M., PH.D.; *Lecturer.* Educational Director, Tamiment Institute; formerly Chief, Political Talks and Features Branch, Voice of America; formerly Press Officer, American Embassy, Paris; formerly Executive Director, American Committee for Cultural Freedom; member United States delegation to Seventh United Nations General Assembly.

JOHN L. LANDGRAF, A.B., PH.D.; *Associate Professor of Anthropology, University College of Arts and Science.* Author of a monograph based on research among the Navahos of New Mexico and of numerous articles based on studies in British Borneo, Malaya, and other parts of Southeast Asia.

JOSEPH P. LASH, A.B., A.M.; *Instructor.* United Nations correspondent, *New York Post;* co-editor, final two volumes, *Letters of Franklin D. Roosevelt;* contributor: *New Republic, The Progressive;* member, Foreign Affairs Committee, Americans for Democratic Action.

CHARLES H. C. LO, A.B., A.M.; *Instructor.* Lecturer on Chinese, Columbia University; formerly Instructor at National South-West Associated University, Kunming, China, and at Chung Hua University, Wuchang, China; English editor with the Chinese International Broadcasting Station (Voice of China) during Sino-Japanese War; served with the Chinese Consulate General in New York, 1952–1955.

HAMILTON VREELAND, JR., LITT.B., A.M., PH.D., LL.B.; *Adjunct Professor of Government.* Formerly Head of Graduate Department of Law School, Catholic University of America; formerly Visiting Lecturer on International Relations, Yale Graduate School; formerly Special Assistant to Attorney General of the United States. Member: American and Federal Bar Associations, American Society of International Law, International Law Association, American Law Institute, Institute of Juridique International (The Hague), American Academy of Political and Social Science. Author: *Hugo Grotius, Validity of Foreign Divorces, Twilight of Individual Liberty.* Lecturer on television on current problems in national and international affairs.

LEON ZOLONDEK, A.B., A.M., PH.D.; *Instructor.* Consultant to informal conference group on Islamic culture; formerly Smith-Mundt Research Scholar in Islamic Studies, University of Leiden; Fulbright Fellow in Near Eastern History, American University at Cairo; and Teaching Fellow in Arabic Literature, University of Chicago.

Registration and Information

About Program for International Studies

You may register by mail for these courses in international studies (a mail registration form is attached) or in person at the Division of General Education, 1 Washington Square North, corner of University Place, New York 3, N.Y., from September 11 through October 1, Monday through Friday, from 5 to 8 P.M. Saturday registration is held from 10 A.M. to 1 P.M. on September 13, 20, and 27.

There are no formal requirements for admission to the courses; only the wish to "continue to learn." If you want additional information about this program, you may write to Herbert C. Jaffa, Assistant to the Dean, Division of General Education, 1 Washington Square North, New York 3, N.Y., or telephone SPring 7-2000, Extension 789.

Dear Mr. Murrow:

Although we did not make it on the Pulitzer, I know that you will be as pleased as we were that Joseph Kahn won the Lasker Medical Journalism Award for his articles on the New York City birth control controversy last year. In case you haven't seen it, I am enclosing a copy of the Lasker Foundation release on this event.

Thanks again for your generous assistance.

Sincerely,

Frederick S. Jaffe

Dear Mr. Murrow:

We certainly appreciate your interest in the Kahn nomination. If your inquiry indicates that it is appropriate for you to go ahead, the enclosed materials may be of help. They include a cover letter and background memorandum which Planned Parenthood Federation is submitting, as well as a fact sheet on the New York hospital controversy itself. We also have available acres of photostats of Kahn's stories, should you want to consult them.

If you do write a supporting letter, I would appreciate a copy. Don't hesitate to call on me if I can be of any further assistance.

Sincerely,

Frederick S. Jaffe

Planned Parenthood is a service mark registered in the U.S. Patent Office

PLANNED PARENTHOOD FEDERATION
OF AMERICA, INC.
501 Madison Avenue, New York 22, N. Y.

Secretary of the Advisory Board
518 Journalism Building
Columbia University
New York 27, New York

Dear Sir:

It is our understanding that the New York Post has nominated Joseph Kahn for a Pulitzer Prize in local reporting, in recognition of his work on the controversy about contraceptive services for patients in New York's municipal hospitals. On behalf of the Planned Parenthood Federation of America, we wish to "second" the nomination.

We had the privilege of working closely with Mr. Kahn on this story during 1957 and 1958 and have consequently attached a background memorandum dealing with that part of the record which does not appear from the published clippings.

Mr. Kahn, working alone for many months in the face of extraordinary difficulties, managed to make public the essential facts concerning the ban on contraceptive services in the city's hospitals -- an unjust medical policy which had become entrenched and institutionalized over the years. His unearthing of this policy and his frank and factual exposition aroused the civic, medical and religious communities in New York to create the climate in which official indifference could be overcome and remedial action made possible.

Seldom has a journalist's work had such a momentous impact. The new policy adopted in New York after a forthright airing of the complex problems involved, has already had an effect in other communities. We believe that it will ultimately form the pattern

for governmental policy throughout the country in the provision of this medical service which has such great social importance.

For these reasons, we regard Mr. Kahn's work as a remarkable achievement in the highest tradition of journalism as a public service and trust, eminently worthy of consideration for the 1950 Pulitzer Prize.

Sincerely,

Rev. Walter E. Campbell
President

Alan F. Guttmacher, M.D.
Chairman, Medical Committee

(4)

SOME BACKGROUND ON THE NEW YORK CITY HOSPITAL STUDY, 1957-58

For years it had been the policy in New York's tax-supported municipal hospitals that physicians were not allowed to prescribe contraception, regardless of the urgency of the patient's need for such treatment. Contraceptive devices were not stocked in hospital pharmacies, and on the rare occasions when a doctor did make such prescriptions, he was warned not to repeat his indiscretion. During the '30s, several leading physicians within the municipal hospital system, seeking to secure the rights they enjoyed in other areas of practice, attempted to implement a policy that would treat contraception in the same manner as any other medical service. These efforts were unsuccessful and the ban, although unwritten and unincorporated in any official regulation, remained in force.

Early in 1957, when Joseph Kahn of the New York Post was doing a housing story, he learned that a settlement house located in a city housing project was barred by the project management from holding a meeting on planned parenthood. This sparked his curiosity and he began to look into the policies of other public agencies on planned parenthood. In no case did he find a policy set down in official regulations; rather he found that a remarkably effective unwritten ban on contraceptive information existed in most agencies.

Since these policies were not legitimized as official regulations, community agencies found it extremely difficult to deal with them, and Kahn's work became incredibly more complex. Instead of confronting an overed, above-board regulation whose merits could be debated, he had first to establish that the ban actually existed and then find ways to get city officials to acknowledge this state of affairs. More than once, during the ensuing 18 months, he had every right to feel he was fighting shadows.

MORE

To get the facts, Kahn developed relationships of confidence with a large number of sources within the Departments involved (Hospitals, Health, Welfare, Housing). As could be expected, the responsible officials of these departments either refused to comment or made evasive statements for the record (although many confided their fears and anxieties off the record -- confidences which Kahn respected). From staff members who had to be assured of anonymity so that their careers would not be jeopardized, Kahn obtained the accurate information he needed.

The results were incorporated in Kahn's five-part series in March 1957. In this series he managed to overcome the taboos surrounding this subject and to place on the record both the official opinions and the actual practices of the various departments. He reported all aspects of the issue, giving comprehensive coverage of the many diverse religious, medical and social viewpoints. It was a painstaking job of digging and a thorough job of reporting.

Not the least remarkable aspect of this series was that no confidences were violated and no careers jeopardized, although literally scores of persons were consulted. Nor were any published facts or statements challenged. Kahn's sensitivity in this regard had ramifications far beyond the scope of the immediate articles. In a situation where doctors, for instance, were generally skeptical of newspaper reporters, his tact and discretion were decisive in developing and keeping open the channels of information which later were used by other reporters and ultimately broke the story.

The publication of the series, however, did not stimulate an immediate reaction. One reason was that other newspapers did not pick up the story, despite its clear indications of inequity and discrimination; as long as this was a "crusade" by only one newspaper, the city administration apparently felt it could safely ignore it. Another reason, later remedied, was that the Commissioner of Hospitals still had not acknowledged the existence of the ban.

At the end of October 1937, the issue was raised at a medical meeting by the chief of obstetrics at one of the largest city hospitals. His comments were covered briefly in several papers. Although it seemed the obvious thing to do, no one but Kahn was sufficiently interested to follow up this story with a query to the Hospitals Commissioner. On October 31, Kahn quoted the Commissioner in a statement that was tantamount to an acknowledgement that the ban existed.

The whole picture thus began to emerge from the shadows into the open. With the Commissioner's acknowledgement, responsible community agencies could begin to deal with the problem. Kahn's work prompted the Public Health Committee of the Academy of Medicine to ask the Commissioner for a clarification of the Department's policy on contraception. After several months' delay, the Commissioner finally replied to the Academy in a letter which foreshadowed the ultimate resolution of the issue: "There shall be no interference in proper and accepted therapeutic practices."

Kahn was the only reporter who had kept after the story and had learned of these developments. The Commissioner's letter to the Academy remained unpublicized until Kahn secured enough information about it to write an authoritative story giving the substance of the Commissioner's reply. This story, published in the early edition of May 2, compelled the Commissioner later that day to make public the complete exchange of correspondence, together with an unexplained statement that the department was not changing its policy on contraception.

With the documents released, several papers published stories, but the interpretations varied: Some regarded the reply as lifting the ban on contraception; others saw no change in policy. The Commissioner himself declined to clarify the situation and reverted to his stock refusal to comment.

Again Kahn found himself working alone on the story and facing, not only indifference and evasion, but also a measure of hostility and derision. Despite the fact that he had already placed on the record a prima facie case, officials (and some

reporters) refused to treat the story seriously. After release of the Commissioner's correspondence with the Academy, Kahn went to a City Hall press conference to ask the Mayor if he agreed with the non-interference policy outlined by the Commissioner. The question brought laughter from the Mayor and some of the reporters; but Kahn persisted and refused to be laughed off. Finally the Mayor stated that he agreed with the non-interference policy and didn't see how contraceptive information could be prevented in city hospitals. The Post ran Kahn's story of this conference, but none of the other papers thought this comment newsworthy, despite its obvious importance in view of the religious complexities of this issue.

The Commissioner's refusal to elaborate on his letter to the Academy left the situation in the hospitals confused, and doctors did not know whether or not they could prescribe contraception. In May, Kahn reported that despite the state non-interference policy, no contraceptive supplies were being stocked in the hospitals and many doctors felt the ban was still in effect.

Thus Kahn laid the groundwork for the events of the summer of 1958. In mid-May his isolation was ended when the Times assigned Edith Asbury to investigate the confused situation which had developed in the hospitals. Her comprehensive report, published on May 22, confirmed Kahn's earlier findings and represented the first time that another newspaper had treated the issue in a serious manner.

On July 16, when the Commissioner ordered a doctor to refrain from fitting a contraceptive device on a diabetic patient, Kahn scored a clear beat with the story, which was subsequently carried by several other papers. The Commissioner refused to explain his order, despite inquiries by the Post, the Times and other newspapers. This action triggered a wave of protest by medical, civic and religious organizations which continued unabated for nine weeks until the Board of Hospitals met on September 17 and reversed the ban on contraception.

In the homestretch, of course, the birth control issue was the major local story and was well covered by many papers. But it took more than 15 months of persistent digging

[illegible] newspaper reporting by Joseph Kahn before the New York newspaper [illegible] could function effectively as the city's conscience force in this [illegible] field. In the opinion of many who participated in these developments, the right of [illegible] in city hospitals to practice medicine without interference would not have been won without Kahn's pioneering work and the attention given this matter by the *New York Post* and its editor, James Wechsler.

At the end of this lengthy assignment, as at the beginning, Kahn retained the confidence of all parties involved, including the Commissioner. That he was able to do so, after a long and occasionally bitter controversy, is perhaps the most meaningful tribute to his qualities as a newspaperman.

BACKGROUND FACTS ON THE N.Y. CITY HOSPITAL/BIRTH CONTROL SITUATION

On March 26, 1946, the Committee on Public Health of the N.Y. Academy of Medicine, issued a report on contraceptive services which included the following recommendations:

> "The N.Y. Academy...should assume leadership in the recognition of medically indicated contraception as an integral and essential part of preventive medicine... Child spacing should be recognized as a medical indication....Inasmuch as family planning advice is a health service, private physicians and hospitals, as well as the proper health authorities, should assume the responsibility of providing it."

Over the years, sporadic and largely ineffectual efforts were made in the city hospital department to implement this policy. While the approach--that contraception is an integral part of preventive medicine -- has been adopted by the overwhelming majority of physicians, there remained an unwritten, but nevertheless effective, ban on such service in the city's tax-supported hospitals. Some doctors who attempted to provide their patients with this service or to refer them to private clinics, were reprimanded by their superiors and ordered to desist. In at least one case, the order came directly from the Commissioner's office.

The New York State Penal Code (Secs. 1142 and 1145) confers upon doctors the right to advise their patients on the control of conception and to prescribe contraceptive devices when, in their opinion, it is necessary for the health of the patient. Under the Academy of Medicine's resolution (and indeed, under the standards of medical practice currently being observed by the vast majority of private physicians), child spacing is considered a medical indication for contraception.

Nevertheless, the city's Department of Hospitals continued to enforce an unwritten ban on this service.

In December, 1956, a motion was introduced in the Medical Board of Kings County Hospital to grant permission to physicians in the department of obstetrics and gynecology, pursuant to Secs. 1142 and 1145 of the Penal Code, to give contraceptive advice and to dispense contraceptive devices to patients "upon medical indication when requested by the patient."

After discussion of this motion by the members of the Medical Board, it was amended to delete any specific mention of contraception but to read "that it be observed that Secs. 1142 and 1145 of the Penal Code...extend to the physicians of the Obstetrical and Gynecological Service of the Kings County Hospital."

This motion was adopted by the Medical Board in February, 1957, and sent to Commissioner Jacobs for his approval. On March 28, 1957, Dr. Jacobs notified the Kings County Dept. of Obstetrics and Gynecology, via telephone, that "until further study, it is requested that no action be taken on the motion submitted and that procedures and practices...will continue unchanged as heretofore."

In April, June and again in September, Dr. Louis Hellman, chairman of the Kings County Department of Obstetrics and Gynecology, met with Commissioner Jacobs and spoke to him several times in an effort to secure a decision on the Medical Board motion; each time the decision was put off.

On October 1, 1957, the executive committee of the Medical Board again passed a motion asking the Commissioner to inform them of his decision on the motion to permit contraceptive service.

Meanwhile, in the spring of 1957, the ban on birth control in city hospitals and other municipal health facilities was revealed in a five-part series by reporter Joseph Kahn in the New York Post. Kahn presented

evidence that the prohibition existed, although Mayor Wagner was quoted as saying: "There is no ban on birth control information in city departments. I have never issued such an order and to my knowledge, there is no city law against it. Department heads may do whatever they believe is right to further the health and general welfare of the people." Commissioner Jacobs, newly appointed, declared: "This matter has been brought to my attention.... I am studying the problem and looking into its many facets."

By the end of October, Commissioner Jacobs had still not replied to the Kings County Medical Board motion; but he was quoted, in the N.Y. Post of October 31, 1957, as saying: "I do not consider it the function or responsibility of the municipal hospitals of this city to disseminate birth control information."

The matter was brought to the attention of the Academy of Medicine's Public Health Committee, which discussed it and decided to ask the Commissioner to clarify the Department's policy. On Jan. 7, 1958, Dr. H.D. Kruse, executive secretary of the Academy, conveyed this request to the Commissioner in a letter which stated:

> "On two previous occasions the N.Y. Academy of Medicine... has issued reports on contraceptive counselling. It has pointed out the need for this service and has asserted that 'the public is entitled to expert counsel and information by the medical profession on the important and intimate matter of contraceptive advice.'
>
> "It has declared that contraceptive counselling is part of the practice of medicine. In its first report the Academy stated that as a medical organization, it is concerned solely with the medical and public health aspects of the subject. In a later report, it specified that contraceptive counselling 'should be given by well trained physicians, both in their offices and in hospital clinics, only when on the basis of a thorough medical study, they are professionally and morally satisfied that such action is justified.'

> "The Committee on Public Health requests that the Board of Hospitals place on its agenda the subject of contraceptive counselling in municipal hospitals."

Following receipt of this letter, the subject was discussed in the Board of Hospitals, which is charged, under the Charter, with responsibility for policy in the Hospitals Department. At the Board's suggestion, Commissioner Jacobs formulated a reply to the Academy, dated April 11, 1958, which stated:

> "This subject was discussed by the Board of Hospitals and the following conclusions were reached. The care and treatment of patients are the responsibility of the Medical Board. There shall be no interference in proper and accepted therapeutic practices nor intervention in ethical relationships between patient and physician. The office of the Commissioner and the Medical Superintendent have not, at any time as far as I can ascertain, issued orders in conflict with the above stated policies. This policy will continue as it has in the past."

This communication, although ambiguously worded, was construed as lifting the ban and settling the issue. When physicians practicing in city hospitals pointed out its vagueness, they were advised to proceed with dispensing the service since it was the general understanding that the ban had been lifted; they were also advised to place orders, through the normal channels, for contraceptive supplies and materials, to be stocked in the hospital dispensaries.

Accordingly, on May 28, 1958, Dr. Hellman, as chief of department, sent to the superintendent of Kings County Hospital, Dr. H. Gollance, an order for contraceptive supplies. He also sent Commissioner Jacobs a copy. These

actions were reported to the Kings County Medical Board on June 3. On June 10, a conference was held between the director of the obstetrical and gynecological outpatient department, the nursing supervisor of the outpatient department and the medical director, to work out procedures for implementing the service to patients who, in the opinion of the medical staff, should not have pregnancies in the immediate future because of health reasons. If these patients desired the information, it was to be given to them at the postpartum clinic held in the outpatient department. If the patient was Catholic, no action was to be taken until the "Catholic Church representative had been contacted so he could speak to the patient." It was felt advisable to have the nurse in attendance at the dissemination of information fully understand what was taking place and preferably, to have non-Catholic nurses in attendance. This procedure was acceptable to both the nursing supervisor and the medical director.

On June 18, Commissioner Jacobs spoke to Dr. Hellman by telephone, advising him that there had been some nursing objections, and asked him to bring the matter again before the hospital's Medical Board. On July 1, the Board met and sent a memorandum to the Commissioner which stated that the Board "has carefully considered the possible nursing objections to the prescribing of contraception....It finds these objections are not serious and, furthermore, since this activity constitutes needed medical care for the sick, the Board finds no possible basis for any nursing opinion whatsoever. It therefore confirms its previous actions in this matter and expresses its confidence in the Director of Obstetrics and Gynecology."

Dr. Hellman received no reply from Dr. Gollance concerning his order for contraceptive supplies. Accordingly, he arranged to have some supplies

provided free of charge by a large pharmaceutical company, a procedure which is used quite frequently by municipal hospital doctors to secure needed medications.

On July 16, the outpatient department was set to fit a contraceptive device on a diabetic woman with three children, whose two previous pregnancies were delivered by caesarean section. The patient was of the Protestant faith and desired contraceptive service. The device had been supplied without cost to the city. Approximately one-half hour before the appointment was to take place, Dr. Hellman was told by Dr. Gollance, the superintendent, that Commissioner Jacobs had ordered that the woman not be fitted with a contraceptive device. Dr. Hellman asked that the order be issued to him in writing and Dr. Gollance said he would have to ask the Commissioner. Shortly thereafter, he telephoned Dr. Hellman to say that the Commissioner refused to put the order in writing. Nevertheless, Dr. Hellman ordered the outpatient department to refrain from fitting the woman; instead, the doctors in the department, believing a further pregnancy would endanger the patient's life, referred the woman for admission to the hospital as soon as possible for sterilization.

When this incident was publicized in the newspapers, the Commissioner still refused to comment for publication, although he did confirm that he ordered Dr. Hellman not to fit the device. Editorial comments protesting Dr. Jacobs' action have come from the New York Times (July 18), the New York World Telegram and Sun (July 18, 24) and the New York Post (July 17, 25).

On July 18, Mayor Wagner asked Commissioner Jacobs to report on the incident. The Commissioner's report was submitted on July 23, but up to this date has not been made public. On August 5, Mayor Wagner, when queried, made the statement that . . . "as a practicing Catholic, I am opposed to contraception. That's my own opinion. I emphasize again that I will not interfere with decisions of the Board of Hospitals and the Commissioner. This is a medical matter. I leave it to their judgment."

St. Louis 9, Mo.

Dear Mr. James:

Your company's sponsorship in the St. Louis area of the quarter-hour news program I broadcast daily has, it seems to me, a dual significance.

In the first place, the need for news programs which attempt to place the day's events in understandable perspective has never been more urgent. Second, recognition of this need by organizations such as yours underscores the growing acceptance of responsibility by industry to the community of which it is a part. Our national welfare requires just such understanding on the part of all its members. I am pleased, too, that your bank deems the program a worthwhile advertising vehicle.

Sincerely,

ERM:skh

TO Mr E. R. Murrow

FROM

You haven't done this sort of thing before, but I think a letter along the lines of the attached would not be harmful.

Please let me know whether you send it

Jim

November 25, 1958

Mr. Edward R. Murrow
C. B. S. T. V.
485 Madison Avenue
New York, New York

Dear Mr. Murrow:

Subject: "PUT CHRIST BACK IN CHRISTMAS"

This is the plea of the Jaycees of Pennsylvania for the coming Christmas season. We are spearheading a drive to subdue the commercial aspect of Christmas and replace it with the true and significant religious meaning, the birth of Christ.

We ask your help in bringing this plea to the rest of the nation. We feel that with your cooperation we can get to most of our fellow Americans.

You will admit, we are sure, that "Merry Christmas" looks and sounds much better than "Xmas, Yuletide or Seasons Greetings," etc. Therefore, it is our earnest and sincere desire that upon entering the time of the year that is so joyous, we remember the very center of all our joy and

"PUT CHRIST BACK IN CHRISTMAS"

Sincerely yours,

John DiRusso

John DiRusso
Pennsylvania State Chairman
"PUT CHRIST BACK IN CHRISTMAS"

JDR: g

PUT CHRIST BACK IN CHRISTMAS

A Christmas Plea

Put Christ back in Christmas,
With this you will agree
Put Christ back in Christmas
That's where He ought to be
He came on earth one Winter's night
For all to share His joys
He came for all us grownups
As well as girls and boys
He went through life with Love and kindness
Helping the sick, the poor the meek
And to His enemies one and all
He turned the other cheek
He made the dead to rise the lame to walk
The blind He made to see
To us He gave the greatest gift,
Of life eternally
So in this Christmas Season
Stop! Just pause a while
Think of Christ's loving tender heart
And the warmness of His smile
Put Christ back in Christmas
We beg you to impart
And Christ will dwell forever
In the cathedral of your heart.

Poem by John Di Russo

Merry Christmas

Edward R. Morrow
CBS Radio
New York City

Dear Mr. Morrow:-

It is with much pleasure that I look and listen to your many programs, both radio and TV. Tonight, the latest one, "The Business of Sex" was most informative. I hope it had a wide audience. The educational nature of your programing, it seems to me, is the best that is offered on any network.

I needn't add my most insignificant two cents worth to your standing. It has met with first place honors in just about every award in radio and TV. Truthfully, this is the first time in many, many, years that I have summened up my courage to write a word of congratulations. But I am doing this now because all of us like to feel we are doing a good service.

You were here in Abilene when Ike first ran for the office. I spotted you then and wanted to go up and say a few words, but didn't.

(over)

I think you were the only one that wore a suit that day and when the Santa Fe special rolled in, you signaled the engineer to blow his wistle; and he did !

While my life is not very rewarding, I attempt to be a photo journalist in a small fashion. I'm enclosing a few photo's from that day in Abilene, when you were here, in hopes that perhaps you keep a scrap book of your travels ~~that~~ and that these may fit in there.

I would consider it a great honor, if you have a standard stock 8x10 photograph of yourself that you could ~~sign~~ sign for me? I have a small part of my room devoted to people who I think are a great contribution to American reporting.

Your staff is not to be left out. I'm sure that they are as ~~devote~~ devoted to their work as you are. My best to you, your associates, and your family. Thank you for your considerate kindess.

Most cordially,

Bill Jeffcoat

Jefferson, John

CBS NEWS

Office Communication

to: John Jefferson

from: Jim Fleming

July 31, 1958

The hour special with Edward R. Murrow would be designed on these lines:

We take note of the historic fact that Khrushchev's coming to New York marks the first visit by a Soviet ruler to the United States. We ask ourselves whether this visit has merely propaganda aims or whether Khrushchev will use the occasion to work for real rapprochement on common problems.

To put the new "summit" meeting into historical perspective we will devote the first fifteen or twenty minutes to a review of the earlier "summitry" of Teheran, Yalta, Potsdam and Geneva, using brief film clips as we recapitulate the results of those meetings.

As well we will want to review briefly the "hot and cold" range of Soviet-American relations from the all-out friendship of wartime to subsequent animosities.

Against this background we devote the remaining two-thirds of our hour to an estimate of the agenda for the new summit. The range of the conversations - an appraisal of what may come out of the meetings, analysis of the extent of agreement or disagreement to be expected.

To discuss the substance of the summit meeting I suggest we invite some people of the stature of former President Truman, Dean Acheson, George Kennan, John McCloy, Christian Herter, George Allen, Paul Nitze, W. Bedell Smith, Walter Lippman, etc.

No more than three or four such guests would join with Ed Murrow in a discussion of the summit agenda and its prospects.

Such an hour would be particularly useful on the eve of the meeting. The running news story will inevitably center on Khrushchev's arrival and his activities. It will be important to get the issues, the substance of the meetings before the public, in the midst of the general excitement.

March 22, 1958

Dear Mr. Edward Murrow

It is a introducing by myself that I wish you would please forgive this extravagant letter. I am a Korean, age of twenty-four, and married two years ago, having a nine months-old baby girl. In March 14, 1958, I have graduated from Kent State University, Kent, Ohio, with a dgree of B.A. in Social Science.

Recently, I came to New York looking for a job, a job which anything I may be able to find and do, however, inefficiency in my personnel relationships and informations of which concerning the matter I am facing great difficulties in all things as a stranger.

This motivated situations and coercing facts of my recent life finally led me to write this entreating letter to you. I am, insight enough, acquainted with your intelligences and versatilities in respectful character of yours through the "person to person" TV cast since long time. May I carefully say that you are the man who undoubtly know-well all the social strata from janitor to chief executives, and from retailors to millions of stockholders and wealthy peoples.

Wants interviews c ERM re advice Empl

I sincerely wish that you would not scorn this reality of begging, and I would like to send my earnest supplication to your warm feet.... Dear Mr. Murrow, please give me an opportunity and encouragement from which I could be able to debouch into sang-froid social phenomena. Frankly, I do not have any specific skill, however, I am willing to work in any firms of businesses, for instances, a trainee, state helper, office work, hotel, restaurant, or domestic work, and any profit-making organizations.

I am certain that I will be benefited from your benevolent exegesis of this humble so that I may be able to unravel this dreadful situations. I feel like I am vitiated from a dictums of oriental tradition of so-called "pride" but I certainly feel great and feel important at this moment. I do not know how greatly my wife and I would grateful to you, I wish I could remunerate back in future, I will wait for the day.

I am, anxiously, looking forward to be seen you everyday.

Sincerely yours,

Jong Siik Jin

Jong Siik Jin

Hoping that you would be kind enough to give me a ring for appointment. Thank you.

Mr Mike Wallace
ABC
7 West 66th St
New York.

Dear Mr Wallace, I found your chatt with the four hundred in N.Y. most interesting especialy (he Sir John from Scottland)

This was the first time I ever heard of him but will never forget the impression he made.
He said more in the few words than the President said in his speech of five thousand words to congress,
Too bad Washington cant hear the comments of the four thousand word letter to Russia?

Cant someone close to the President wise him up that in this dymamic world of today there is no time for hour long speeches.

Of all the people I know no one listened to the speech but me?

I must say I am dissapointed in the Presidents speeches,being a five star Gen , I expected his speeches to be short and to the point, and follow up with DEEDS.
Of course there are two points the President makes clear
no tax cut for Americans.
More foreign aid.
I believe at this time instead of raising wages of workers either in or out of goverment, there should bea a dymamic program put into effect to give work to the unemployed,
if necessary shorten the hrs of the employed.
cut down on foreign aid, give a tax cut to the American people?

The Presidents first duty is to make good his 1952 camapign promises,
Everyone is entitled to the fruits of their own toil?
trade instead of aid.?
build schools, hospitals, roads etc instead of GUNS.
what happened to all these issues that slide Gen Ike into office?

As Sir John said the peoples of the world want peace in our time.
Look at nine out of ten Americans in debt house,car,furniture
National debt etc we are worse off than the foreign peoples
they may not have nothing BUT at least they are not in debt
for the rest of their lives?
I told our tax man about your program, he neverheard of it but listens to E. Murrow's I watch both with much interest.
I like to hear different points of view.

Sincerely
Mrs B. Johnson

Johnson, Mrs Clara

February 7, 1958

Dear Mrs. Johnson:

I have your very nice letter of January 31st.

I appreciate the time and trouble you took in informing me of Paul Hoffman's "Crash Program for Peace", which I read with a great deal of interest and regret to have to tell you that I no way for me to incorporate it into any of my programs in the near future.

Thank you again for writing as you did.

Sincerely,

Mrs. Clara Sturges Johnson

January 31, 1958

Edward R. Murrow
Columbia Broadcasting Company
Madison Avenue
New York

Dear Mr. Murrow:-

Your large audience of radio listeners, have become accustomed to hearing a point of view that streches their minds and helps to build attitudes more conducive to peace.

I a m , therefore, writing to ask your cooperation in giving more publicity to what I consider a timely and practical new approach to peace for which so many concerned groups and individuals throughout the world long. I enclose Paul Hoffman's " Crash Program for Peace", which appeared in the January 21 issue of Look Magazine. Could you mention the main points in his plan in one of your broadcasts? Of particular significance, it seems to me, is his suggestion for the establishment of a Supreme Council of Peace within the Administration with the same authority as the Joint Chiefs of Staff. Just at the time that there is some dissatisfaction being expressed over the organization of the Defense Department and a committee is working on plans for reorganization, it might be timely to introduce this suggestion.

The interviews with world figures and symposiums that CBS has initiated, have been most stimulating and informative. Could a similar procedure be used to get before the public some recent pronouncements, ideas and proposals that throw a fresh light on the burning issues of the day that have been made by scientists, church leaders, commentators and prominent citizens, like Paul Hoffman? A symposium or panel composed of these oustanding people might stimulate the thinking of the American people along new ways to achieve the peace we all need and want. I hope you will seriously consider these suggestions, since the power of mass media in which you ha ve worked so effectively, can have a profound influence on an informed and concerned public opinion.

Sincerely yours,
Clara Sturges Johnson
Clara Sturges Johnson

PAUL HOFFMAN

A noted industrialist and White House adviser warns that building bigger and better missiles will lead to disaster unless we can persuade Russia's rulers to call off the arms race. This will be a long, hard job, but he shows how America can take the initiative right now by launching

Broadway actors in Moscow help make friends for America.

a crash program for peace

THE launching of mankind's first satellite into space should have been an occasion for universal rejoicing at a great human triumph. Instead, the Western world reacted with alarm and dismay. For it became obvious at that moment that the Russians have it in their power to wipe out tens of millions of us at a blow and reduce our cities to radioactive rubble. And though we have the power to retaliate, with equal or greater destructiveness, the consequences of such a war would be utter disaster.

No wonder we are alarmed: We live in a stalemate of mutual terror that must at all costs be preserved by military and scientific exertion; for no one can deny that the world requires an American capacity for terror to counterbalance the Russian terror.

But the notion that this stalemate resembles peace or brings us any nearer peace is absurd.

No American satellite carrying two dogs instead of one; no missile hissing 10,000 miles through space instead of 5,000 miles; no new bomb capable of wiping out 40 million rather than 20 million people will give us or our children any security against disaster. Producing bigger and better arms than the Russians will never be a lasting solution to the greatest crisis in history. What mankind needs is real peace, not stalemate.

By real peace, I mean simply a state of world civilization in which problems continue to exist among nations, but in which the nations agree to solve these problems in an orderly way, without the explosive tensions that have been so active and hovering a threat since World War II. This kind of peace will not just happen—it must be waged and striven for. It will require efforts at least as great and possibly greater than those of our scientists and engineers grappling with the complex problems of exotic fuels, re-entry and gravitational trajectories.

Up to now, the biggest obstacle to real peace has been the attitude of the Soviet Union's leadership—a leadership that, for its own ends, persistently and aggressively has sought to exploit all of the problems left over and created by World War II. For what has developed in Russia in the past 40 years is a novel kind of society, expanding technologically, but governed by a bureaucracy whose basic motive is power. This Russian power bureaucracy is a closed oligarchy of men who distrust everyone—even each other. They are strangely uninformed about the free world. They apply to foreign affairs their own domestic habits of unceasing struggle for power. And as world conditions change, they see in each change only an opportunity to increase their own power.

In all of 12 years of negotiation with them, we have been able to achieve only marginal agreements. There is no evidence that we can accomplish anything more—at present. Yet, to move toward peace, we must eventually have more fruitful conversations with them. Our problem, therefore, is to bring to bear on them—to engineer—new influences that will make such conversations possible.

I believe that there are already several influences or forces that we can rely on and encourage.

The first exists inside Russia. The very success of the Soviet Union in mastering a complex industrial system, its haste in training hundreds of thousands of teachers, scientists, engineers and administrators, have created a new class of men in Russia, outside and apart from the power bureaucracy—but dominated by it. These men are our potential allies, whether they realize it or not, because they want what we want too—tranquillity to pursue their careers and improve their standard of living. Above all, because they are intelligent, they crave dignity; and since dignity comes only with freedom, a conflict of interest must always exist between them and the power bureaucracy. These new men in Russia are growing rapidly in number and prestige. Our problem is to get to them and, through them, to their masters.

There are also influences outside Russia that can affect the Soviet leaders. The support of the heads of satellite nations and neutral nations is a matter of deep concern to the members of the power bureaucracy in their endless jockeying for power and prestige at home. Even though we cannot get to the power bureaucrats directly, we can and should try to get to them through the Nehrus, Titos, Maos and Gomulkas with whom they are in frequent contact.

Finally, there is the contagion of freedom.

Over the past 10 years, we have shortsightedly behaved as if communism were the most contagious of ideas, a disease of the mind against which we must quarantine ourselves. We have experimented with a vast assortment of devices—fingerprinting of visitors, cumbersome security procedures, postal censorship, visa and immigration regulations—that can only be described as fantastic. These are apparently based on the strange notion that our ideals cannot compete with those of communism.

The truth is, however, that events of recent years have proved freedom to be an infinitely more explosive ideal than communism. The East Berlin riots of 1953, the Poznan uprising and the bloody Hungarian revolt of 1956 showed that the ideal of freedom flourishes even in the caverns of Communist dictatorship.

It is against this background of stalemate and hope that we must now shape the strategy by which Russia's leaders can be persuaded to talk seriously about real peace. It is a rugged task and it will require substantial expenditures. But we cannot waste a day to get started on what we might well call a crash program for peace. Our defense effort since World War II—an absolutely indispensable effort—has cost us $443,000,000,000; during the next five years, we may be required to spend another $40,000,000,000 annually on defense. Surely we can afford to invest at least $2,000,000,000 annually on a peace program that

Russian visitors in Washington admire U. S. housing developments.

Americans parade at 1957 Moscow Youth Festival. Cost of Festival was more than total U. S. foreign-information program last year.

could make vast arms expenditures unnecessary for all time.

Our lines of action should be clear enough:

1. Our Government must take so clear and vigorous a stand in favor of peace that the whole world will know we threaten no one.

2. We should make it as plain as possible that we accept the right of other people to choose their own form of government, no matter how detestable it may seem to us; conversely, that we have no desire to force our ideology or our economic system on any other nation, that we genuinely subscribe to a policy of live and let live.

3. Our President should use the United Nations as a forum, to report to the people of the world on what we mean by peace and to challenge the Russians to do the same.

4. In the light of the new weapons—ours as well as theirs—we should take a new look at our entrenched military positions and see if any can be yielded without harm to our safety. We should invite the Russians to do likewise.

5. We should expand our technical assistance and economic aid to the developing nations, among them the 22 nations that have won their independence during and since the end of World War II. The quicker these nations become strong, the quicker the Russian leaders will realize that attempts to communize them will fail.

6. We should give our moral support to the program for promoting economic unity in Western Europe, which will help assure its continued prosperity. A Western Europe in which people are not only living happier lives in freedom, but also making a much better living than those in satellite countries, is our best assurance that the people there will continue to resist Russian domination.

Having clarified our stand, we can then tackle the problem of mobilizing all our communications resources to get the message across to the neutral nations, the satellite countries and, finally, the growing executive groups in China and Russia. This means making communications between us and the people behind the iron and bamboo curtains as free and easy as possible. For it should be obvious that the more Russians, Chinese and other presently insulated people see America, the better they will understand us.

Therefore, to spread the contagion of freedom, we should:

Revise our visa regulations with a view to stimulating rather than restricting contact between the Communist world and our own.

Offer at least 2,000 scholarships a year in our universities to students from the Communist world and another 2,000 to students of the new non-Communist nations of Asia and Africa.

Arrange for scientific and cultural congresses to be held in our country with visiting scientists and artists from the Soviet world.

Meet the hunger for information in the Soviet world by a planned program of publication in the Russian language of books and periodicals that their own censorship prevents them from reading. In 1956, 548,000 Russians went to other countries on business and as tourists; they would find these books and periodicals on foreign newsstands.

Immediately increase the size and scope of the American information program abroad. The entire budget of our USIA informational activities abroad from June, 1957, to July, 1958, was only $95,000,000. By contrast, it is estimated that the last Youth Festival cost the Russians $100,000,000.

Finance whatever research is necessary to prevent the jamming of our broadcasts beyond the iron curtain.

Offer the Russians equal time on the Voice of America or Radio Free Europe to answer our questions or try to refute our statements.

Our immediate objective is to reach the groups within and without the Soviet Union who can influence their leadership. But we must continue our policy of creating a larger, more closely knit world community.

This requires an unrelenting effort to make the United Nations the sounding board of our ideas; it means that, as far as practicable, we must channel our technical assistance and economic aid through the United Nations; it means we must continue our efforts to break down the barrier between East and West.

But it means more than that, for we wish to create a community of world interests in which all people may join. Any number of new projects serving this end, large or small, come to mind:

We might help finance ourselves, or invite the Russians to join us in financing, the completion of the new All-India Institute of Medical Sciences, at present delayed for lack of funds.

We might do something as small and homely as building a hostelry in Jakarta, the capital of Indonesia, simply to offer shelter to the many scholars and scientists of the United Nations who are there to help that nation develop its resources.

We might do something as technical and germinal as the launching of a series of small international organizations, including the Russians, to work in common on the frontiers of nature and technology—to make a co-ordinated research attack, for instance, on "incurable" diseases.

We might do something as broad and diffuse as financing the teaching of English all over the world as a highway for our ideas to travel.

No such set of suggestions as those in this article can pretend to be a blueprint for waging peace. For this, our Government ultimately, soon rather than late, must set up some kind of a Supreme Council of Peace, with the same authority as the Joint Chiefs of Staff, to consider and carry out all the ideas the fertile American imagination can dream up.

What I have tried to stress here is that we must pursue peace actively—with boldness, imagination and dedication. The alternative is stalemate. And stalemate—let's face it—means the end of our way of life.

Johnson, James W.

Dear Mr. Johnson:

Thank you for your letter of December 29. I did one television program dealing with Anna Lee Moss, and reached no conclusions regarding her status at that time. Since you are interested in the subject, I venture to enclose a script of the program.

I wish it were possible for me to get back to eastern Washington more frequently.

Sincerely yours,

EEM:skh

Dear Mr. Murrow:

I am enclosing herewith copy of a letter which I have addressed to several United States Senators, which I believe should also be called to your attention.

As one having a background in this western country and almost "related" to all of us in Eastern Washington, I would like to see you do the right thing in some way by correcting the mistake that you have apparently made in your radio program in the past, as referred to in this editorial.

I do not say this as a former or present admirer of the former Senator McCarthy, but certainly he was right in this instance.

December 29, 1958

Senator Mike Mansfield
Senate Office Building
Washington, D. C.

My dear Senator:

I am breaking a rule of long standing by writing this letter to you as a friend, acquaintance, and my United States Senator as well. I assure you I shall not get into this habit because I don't normally do such things.

The thing that occasions my ire is an editorial which appeared in the December 27 issue of the Saturday Evening Post entitled "Here's an Informer the Reds Should Not Have Tangled With". Probably this editorial has been called to your attention by other constituents.

Certainly something should be done about this Anna Lee Moss case, and of course by Edward R. Murrow as well, for the public information. A great many people do not read the Saturday Evening Post and everyone should know of this shocking circumstance.

It is my honest opinion that if some action is not taken to correct and publicly reveal the condition as explained by this editorial anyone in possession of the information is derelict in his duty.

I trust that I have not imposed upon you too much in this instance.

Sincerely yours,

JWJ:pc

Edward R. Murrow
Columbia Broadcasting System
New York, N. Y.

Dear Mr. Murrow:

Some tube or other on my television set burned out a couple of weeks ago. As far as I am concerned, it can stay that way. My family is mired down in enough trivia to choke them down to the vegetable level as it is. Television in its present state (with a very few exceptions) just about completes the job. And radio, ugh! The news, once an hour, so concise that if one sneezes you've missed it is literally separated by noise so bad it is a shame to call it

music.

I'll grant that occasionally this pattern is broken but usually at a time when a family must indulge in the barest mundane activities to keep body clean, fed, or rested. If one lives beyond the reach of the great metropolitan areas, these occasions are found to be so rare as to be non-existent.

Why can't television and radio use some of its "good" time to review old ideas and present new ideas. The kind of ideas that separate man from beast are shunned by all methods of communication — this includes what little conversation is left in society, most of education as well as our subjects.

Disregarding the reputation I am earning — that of a "nut," — I have interrupted conversations on lousy bosses, latest hero scandal, the "they're taxing me to death" theme, automobiles, gossip, and, many times, just meaningless groups of words, to ask, "Why is man different from beast?," "What is dignity of man?," "What makes a slave?," "Which part of us is God's image?," "What is the use of having intelligence?." The response usually indicates I'm insane, psychotic, or maybe even obscene. And yet, these are only a few of the questions that seem pertinent when trying to decide more taxation or less, more spending or less, this senator or that, this job or that, down to the question of "keep fighting or just

vegetate."

Certainly there must be other people who might not be able to present new ideas but would like to trade opinions on ideas, old and new.

It is people like you who are leaders. Please lead, don't follow. The people need stimulus not the opiate we've been getting in every medium of communication. People are lonely, because noise has been substituted for thoughts, and as they forget the art of communication they become more lonely.

Sincerely yours,

Nina M. Johnson

January 12, 1959

K.C. — Very thanks —

Dear Ed:

I would have written you before, but I thought it would be interesting to wait a few days and get some reactions to your wonderful party the other night.

Frankly, you and your colleagues took the town by storm. I have heard from perhaps not hundreds but scores who thought it was the most interesting and delightful evening Philadelphia has offered to her citizens in a long, long while.

I do thank you personally, Ed, for getting down here yourself. The program would have been fine without you, but it was ten times as effective with you in the driver's seat.

I also enjoyed your program last night so much, and I understand next week I am to have the pleasure to meeting Miss Callas at a little reception for her in Philadelphia.

With warmest personal regards,

Faithfully yours,

Bob Johnson

The Bulganin Proposals Neglect Vital Point

The latest letter to President Eisenhower from Nikolai Bulganin, Soviet Union premier, proposes a nine point agenda for a summit conference.

At first glance it could be said that the points proposed include about everything needed to work out a lasting peace.

There is provision for termination of nuclear and atomic tests; renunciation of the use of these weapons in war; creation of an atom-free zone in Europe and a non-aggression pact between NATO and Warsaw pact powers.

Equally important is reduction of foreign troops in Europe, discussion of questions connected with preventing a surprise attack, an end to the propaganda war, expansion of trade and lessening of Middle East tensions.

Has anything been left out?

The most important question of all has been ignored and that is the right of Eastern European satellites of the Soviet Union to govern themselves as they see fit and in accordance with the Russian agreements at Yalta.

Agreement on our part on the outlined basis would be acknowledgment that snuffing out the freedom of each of those countries was legal and that we approve.

Maintaining that status for Poland, Czechoslovakia, Roumania, Bulgaria, Hungary, Latvia and Lithuania would be American agreement that these peoples need never look for independence or freedom so long as the Soviet Union has the power to enforce her will.

Empire Stateway—Excellent Choice

A Long Island boy has been awarded a prize for being the first to name the new highway connecting Canada and Pennsylvania the "Empire Stateway."

That is an excellent name and has a real New York State connotation.

The original, and unofficial, name of the highway was "Penn-Can." It was obviously inappropriate as it carried no hint it traversed our state.

On Sept. 11 it was suggested here the road be named "Empire State Expressway."

The abbreviated and winning form—Empire Stateway—is much better.

Thanks are due Governor Harriman for initiating the contest.

Probe Pressure By Congress Too

The shadows of mink coats and deep freezes are being cast on the walls of a hearing room in Washington. Two Federal Communications Commissioners admit accepting TV sets, paid up plane tickets and speaking emoluments.

The $250,000 Commerce Subcommittee inquiry into six of twenty federal regulating agencies started, ostensibly, to find out whether the agencies were really independent and actually regulating. Underlying the high sounding motivation is a determination to discover if Eisenhower appointments stacked the agencies in favor of Administration tenets.

Obviously, no justification can stand up for a commissioner to accept gifts.

There's another side to the lid being lifted on agency "improprieties." Whether it will be exposed is debatable. But it should be. That's the pressure individual congressmen themselves put on these regulatory agencies.

All of which suggest the course of remedies: Further insulation from the political arena and a beefing up of their "judicial character." Even that doesn't promise much for the "hide bound" agency tied to the problems of the past and reluctant to face new conditions of competition, which is the core, for example, of the railroads' situation before the Interstate Commerce Commission.

HOOVER TRUMAN

Recording For the Future

By ALEXANDER F. JONES

Executive Editor, Herald-Journal

It has long been the conviction of this corner that Edward R. Murrow of Columbia Broadcasting is one of the brightest stars, if not the brightest, in our journalistic firmament.

Ed Murrow has so many outstanding achievements to his credit in the business of bringing vital information to the public that it would be difficult to select a starting point in his career to begin the business of recounting them all.

But if he had done nothing else his latest idea of putting great men of the day on record in interviews that start with boyhood and come on down the years through important careers is something for which the world will long accord him its applause.

He made an auspicious start with Harry S. Truman.

One hour of the many he spent with the former president in making a permanent record was made public Sunday.

For sustained interest and for better understanding of a man who served his country in nearly eight crucial years, it was superlative.

There was nothing particularly new or startling in the interview.

To me the important thing is the preservation of a pictorial and vocal record which will give coming generations an indelible impression of the men so interviewed.

What a delight it would be to sit down on Washington's or Lincoln's birthday and listen to their interpretations of what transpired in their time.

This is living history of a more vital nature than anything we have ever had and the idea will spread from national and world figures to business and family records.

In recent decades we have seen great industries develop from minor original scientific beginnings—electric power, the automobile, the airplane, radio and television.

I believe recording will become another giant, dwarfing anything we now know in that line.

Why shouldn't every family have a record on what mother thought of everything from making apple pie to raising babies?

Why shouldn't father set down matters of family interest to those who come after him?

It will help roll back the curtain that falls when we pass on.

What fun—if that is the proper word—it would be to turn on a little machine and watch, and listen to, your great grandmother on life in her time.

Of course we have had records on wax for a long time, but it seems to me development of the idea used by Ed Murrow has come along comparatively slowly. It should gain great momentum from now on.

The next man I would like to see and hear given the Murrow treatment is Herbert Hoover.

There is a wonderful old man who has been grossly mistreated and who, with the passing years, has grown in stature until he has attained gigantic proportions.

A Fighter in Politics And in Business

"Whatever I got I earned. I've done plenty of menial work, more hard labor than most of the members of this Congress will ever do."

Bertrand H. Snell of Potsdam, dead at 87, was talking then as a member of Congress, representing the Northern New York district which had sent him to Congress for nearly 25 years.

He had worked as a lumberjack and a bookkeeper before making a fortune in the lumber business. He took to Congress, too, his competitive spirit. President Hoover ran up against it in backing a losing candidate for minority leadership in the House. President Roosevelt couldn't budge the Northern New Yorker in his opposition to Roosevelt's court packing plan.

An early champion of the St. Lawrence Seaway—he introduced the first enabling legislation in 1917—the new locks should certainly be named in his honor.

Merger of Syria, Egypt; Or Is It?

On paper, at least, Egypt and Syria have joined hands in a single enterprise.

Last March Syria complained all over the world of being menaced by Turkey. In August, a leftist coup d'etat took over in Damascus. Egyptian troops landed in Syria a month later. Two months later, the parliament in Damascus joined the parliament in Cairo in voting on steps leading to the unification.

Despite differences in living standards, even of military efficiency, Egypt possesses a six to one advantage in population, contributing 24 million people to Syria's four million. Forecasters are confident Col. Nasser of Egypt will become the new combined chief-of-state.

The story of unification has been presented as originating in Syria, almost forced onto Egypt. These events remind us of the old limerick that ends with:

". . . back from the ride
With the Lady inside,
And a smile on the face of the tiger."

The Soviet Voice in 1958: What Does It Say?

Forces Train for Limited War With Nuclear Weapons

Expert on Russian affairs Andrew R. MacAndrew quotes, excerpts, analyzes and interprets from a wide variety of Russian pronouncements and publications and brings us up to date on Soviet thinking.

By ANDREW R. MACANDREW

DURING THE fall, Tass, the Soviet news agency, reported that Soviet armed forces were out on training exercises which included the use of "nuclear weapons."

However little information this announcement gave out, it was the first time that it had been made public that the Soviet Union had conducted tests of its atomic and hydrogen devices in conjunction with the regular training program of its Army, Navy, and Air Force.

A recent issue of Drasnaya Zvezda (Red Star, the house organ of the Soviet Army) described the following scene during an army training exercise:

"The force under Lt. Col. Butta was getting ready for the attack. But, at dawn, the "enemy" suddenly opened an artillery barrage which included chemical warfare shells as well as shells loaded with radioactive elements . . ."

From these and many similar items, it is apparent that the "radioactive elements" which are issued to troops on maneuvers must be produced on a very large scale, and a likely place for their production is in the reactors of the Soviet Union's new atomic power stations.

HERE ONE should mention two well-established facts:

That today the cost of electrical energy from atomic power stations considerably exceeds that from conventional power plants, and

That many of these stations are built in the Soviet Union "under the slogan of peaceful use of atomic energy."

To justify this economically unsound use of atomic energy, the Soviets argued that electricity produced with atomic fuel was to be used mainly in areas deprived of coal or other natural fuel. Soon after which an announcement was made that "the building of the most powerful atomic power stations (400-500 kilowatts) is to begin in the Urals and in the Moscow area"—areas that are, perhaps, the best situated with regard to coal peat and other fuels.

It is quite possible, then, that the Soviets decided to build these uneconomical power stations because they were in great need of a byproduct of the process: Plutonium 239 which forms in the reactors. Although the process of separation of plutonium from uranium is quite complicated and costly, the Soviet Union must need as much of it as can be obtained for the preparation of the type of warfare included in the present training exercises.

NOW IT may be inferred from the above that, whatever its present strength in strategic "deterrent" terror weapons, Soviet military thinking may be visualizing the possibility of limited objectives being pursued through limited wars with a limited use of nuclear (and perhaps chemical and even bacteriological) warfare.

Thermonuclear "massive retaliation" by a great power against the territory of another great power in possession of similar gadgets — a greater or lesser means of delivery notwithstanding —seems to be considered unlikely in the case of a limited aggression conducted against an outside territory. If the Soviet armed forces could win a local conflagration by any means (including the use of radiation), they would rely on their "deterrents" to discourage a U.S. attack against their homeland.

And then, perhaps, pressure could be applied elsewhere.

Generally speaking, this school of Soviet military thinking is in agreement with the conclusions drawn by the study group of the U.S. Council for Foreign Affairs, whose report was presented by Professor Henry Kissinger of Harvard University under the title, "Nuclear Weapons and Foreign Policy."

ANOTHER interesting feature of the Soviet armed forces, connected with Soviet views of the various possible emergencies, came to the fore with the removal of Marshal Zhukov from the post of minister of defense and his replacement by the less glamorous and more pliable Marshal Malinovsky.

Probably, there is considerable truth in the common belief that Zhukov was brought down noisily in one of the dog-fights that have recently been going on in the rarefied atmosphere of the Soviet summit.

What was more unfounded was the surprise expressed by some that the Soviet army officer caste not only failed to step in on Zhukov's behalf.

And in this last-mentioned accusation lies the answer to why the Soviet officer caste did not step in to save its ranking member. There is no room for any officer caste in the Soviet totalitarian system, no room for any caste except the Party.

Like a poisonous little ant domesticating a relatively gigantic beetle by paralyzing its nervous centers, the Communist Party of the Soviet Union working within the armed forces can always shift as much authority as it wishes from the executive officers to its representatives.

TO SUM up, from the recent Soviet moves and statements, it would appear that, Soviet superiority in ICBM's notwithstanding, the Soviet armed forces are being geared mainly for limited, local conflagrations, followed, where need be, by limited occupations by Soviet armies, with their loyalty especially polished up to counteract the fascination somehow exerted upon them by the wicked outside world.

TOMORROW: Soviet Gloating from Strength.

Drive at Top Slows; Dems, GOP Stalled

By DORIS FLEESON

WASHINGTON — Washington enjoyed a cheerful weekend for a change. The success of The Explorer took the pressure off everybody —politicians, defense contractors and scientists.

Fleeson

"The heat's off, it's up," rejoiced one contractor with heavy space age contracts.

Not only was it up, but the Horatio Alger story in which Americans still deeply believe despite their supposed sophistication had been proved again. The downtrodden Army came up from far behind to win the race from the favorite. Yesterday's gloomy generals now feel like the heroes of pluck and luck; they expect their rags to turn into riches if the Alger ethos continues to run true to form.

The truth is that despite the rosy glow, Washington's basic problems remain unchanged. It was inevitable that the United States would succeed in sending a satellite aloft. It had never been anything but a question of giving the enterprise priority. In recent weeks it finally achieved that priority the hard way.

BY COINCIDENCE, leaders of both parties from all sections of the country were conferring here at the time. Not by coincidence, all of them gingerly stepped around the problem which perplexes the free world most—lack of leadershlp here.

The Republican National Committee, holding the winter meeting which had been postponed because of the President's third major illness, dutifully hailed the president and vice president. They listened politely to the cabinet, including Agriculture Secretary Benson whom they would really like to see orbiting in The Explorer.

The Democratic Advisory Council met and viewed with dull and uninspired alarm. The council contains many of the party's best brains; its members genuinely understand the real dangers which the United States and the West now face. Despite its individual excellence and ability, it still managed to lay a collective egg.

The reason why neither group faced the real problem—the exercise of presidential power—is because neither has found a way to handle it without embarrassment.

REPUBLICANS know they are responsible for the situation and must suffer its consequences. They are finding it as hard to live with as any member of the opposition.

The growing withdrawal and isolation of the president means that there are fewer and fewer possibilities of appeal from decisions taken by these non-elected officials. This has removed coherence and flexibility from federal policy.

Even more important, it prevents any daring, newness and innovation in a period of crisis both at home and abroad. Republicans understand all this and what it conveys in the way of portents for the party's future.

Democrats in recent months have been more daring in discussing Mr. Eisenhower, but they remain fearful of public reaction to what might be viewed as direct attacks on a President who still has an emotional hold on many Americans.

The Explorer

By DAVID LAWRENCE

WASHINGTON—What does the successful launching of the American "Sputnik" really mean?

Propaganda-wise, an unquestioned triumph for America—a plus of tremendous proportions.

The American achievement is welcomed by the Soviet commentators for a strange reason—it might hasten the day of East-West talks at the "summit."

Militarily, satellites are not military weapons. It's the missile that counts. America successfully fired big missiles of long range more than a year ago, and it's the progress of the race in missiles that's important.

Politically, the Republicans now "point with pride."

Psychologically, it may give a lift also to the mood inside the United States.

'Tell the Peasants to Step Aside'

Our Readers' Viewpoints

Raise, Also Ease, Jobless Pay

To the Herald-Journal:

I have read with considerable interest, the remarks of J. J. Wuerthner, concerning the question of unemployment insurance, and the only conclusion I can reach is that he is either a sort of spokesman for big corporations in the state or that he is not completely informed as to the nature of the amendments. I certainly hope it is the latter.

When the Republican dominated legislature first proposed their unfair bill, it would have been necessary to earn $105 per week or more, in order to receive the maximum benefits of $45. Later, these same legislators made a concession so now it is only necessary to earn $100 per week or more to get the maximum benefits.

In other words, this great piece of legislation would offer the wage earner 45 per cent of his wages up to a maximum of $45 when he was laid off. Previously, it was recognized that benefits be no less than 50 per cent of wages. Since the average wage per week is slightly over $80, it is not difficult to see that with benefits based on 45 per cent of wages, only a few individuals would be able to take advantage.

Although it is true that the employer alone pays into the fund that provides for unemployment insurance benefits, it is not true that he pays all the costs. The cost of this program is paid by the consumer who uses the products and services that are made available to him.

Furthermore, these costs are all deductible by employers as a business expense before they calculate what they must pay in income taxes to the state and federal government.

Does Mr. Wuerthner know that seasonal and irregularly operated businesses account for nearly 40 per cent of all business in this state? This 40 per cent of business supplies $5,600,000,000 of the $14,000,000,000 in payrolls on which unemployment insurance taxes are paid.

Perhaps this $5,600,000,000 payroll should be eliminated because big corporations, led by G.E. which made over two-hundred fifty million profit last year, (a great deal of that right in New York) want greater rebates, and higher taxes for marginal, seasonal and irregular business.

Did Mr. Wuerthner know that as a result of the Hughes-Breese Amendment, enacted in 1953, employers received $695,000,000 in rebates and that seven dollars out of every ten went to just seven per cent of the state's business firms? In other words, just 7 per cent of the corporations received 70 per cent of the rebates, and on top of the list was General Electric.

Could anyone really believe that it would be in the interest of the people of this great commonwealth to drive 40 per cent of the state's business to another area, in order to satisfy the insatiable greed of the largest and most profitable corporations? And now they want more!

Also, as a result of the Hughes-Breese Amendment in 1953, some 300,000 employes can't receive unemployment benefits because they haven't worked twenty weeks, regardless of how much they earned. All of these people need and deserve unemployment insurance, but the proposed legislation will not take care of them. We must have a return to the fifteen week eligibility requirement.

U.S. Weak, Impotent?

Not Now, But Can't Stand Still

By ROSCOE DRUMMOND

HAS THE United States suddenly become weak and impotent, a second-rate military power in mortal peril?

Drummond

This question comes from so many readers from so many parts of the country that it must represent a widely held impression, a very great anxiety.

It is vital to get—and to keep — the facts in perspective.

The facts do not justify any complacency, any easy, wishful, shuteye attitude that if we concentrate on something else the Soviet challenge will go away.

But, equally, they do not justify a national wailing-wall or any panic-stricken despair that all is lost; they do not justify any cowering attitude toward Moscow's Sputnik diplomacy.

Wherein, then, does the truth lie between these opposite poles of unjustified complacency and unjustified panic? It lies, I believe, right here:

The United States is today militarily superior to any possible enemy.

But unless we sharply increase the pace of our defense effort, there is a real danger that we may drop behind and that the United States, two or three years hence, could be militarily inferior. This would be mortal peril.

IT IS understandable that public attention has been focused more on what's wrong than on what's right with our defense effort. What happened to the Senate Preparedness Subcommittee report shows how the picture can get pushed out of balance.

Every newspaper, radio and TV report out of Washington centered upon the Committee's 17 recommendations on what needs to be done better.

Most reports neglected the Committee's 14 citations on what the Defense Department is doing very well—praise for such actions as:

Removing over-time restrictions on missile programs.

Restoring funds for basic research.

Putting Thor and Jupiter simultaneously into production.

Creating a new advanced research project agency in the Pentagon.

Accelerating the Atlas and Polaris missile programs and directing the Army to go ahead with a new solid fuel missile.

Establishing the new post of Director of Guided Missiles.

Further dispursing the Strategic Air Command and enlarging the Air Force early-warning facilities.

Giving the Army responsibility for developing the anti-missile missile.

Putting more muscle into anti-submarine warfare capability.

Putting more drive into a wide-ranging reorganization of the Pentagon.

I AM not suggesting that these actions are enough; they aren't; but they are a solid beginning. I am suggesting that we have the resources to act today to keep in the lead tomorrow and that we have every reason to take the needed actions in a mood of confidence, not in any mood of palsied panic.

Grin and Bear It

By Lichty

"Roscoe will be furious when I tell him this country was founded on liberty and justice! . . . He had me believing it was founded on 3 meals a day and a balanced household budget!"

July 31, 1959

Dear Colonel Jones:

I am answering your letter of July 13th in Mr. Murrow's continued absence from the city.

Due to a number of changes in Mr. Murrow's plans, I fear it would not be possible for him to make the recording you asked for. I know that he would have been delighted to do it had it been at all possible and that he will regret very much having to refuse you.

I am returning herewith the material you sent us, also the reel of tape.

Sincerely yours,

KAY CAMPBELL

Dear Mr. Murrow:

The Special Warfare School is currently engaged in producing a presentation on special forces operations that will be given throughout the Army.

As an attention step and introduction to our presentation, we have a brief skit on a mythical future Hungarian operation. Part of the skit calls for a broadcast by a news commentator. Because of your reputation as a reporter and audience familiarity with your voice, it would be greatly appreciated if you would consent to make a tape recording of this fictious broadcast. The tape recording will be used only in conjunction with official Army instruction.

The desired broadcast text is inclosed together with a blank recording tape. Please feel free to make any changes in the wording of the text to suit your style.

Your cooperation would assist us greatly in producing an interesting and realistic piece of instruction.

Sincerely,

George M. Jones

February 25, 1959

Dear Mr. Murrow:

You may remember meeting us at Bob Dixon's one day last summer.

We have been watching "Small World" quite faithfully, and rejoicing each time something is said or even inferred, that might have been cut out of a less courageous program. It seems to us that you have found a good vehicle for introducing unpalatable truths to the public and perhaps doing away with some of the apathy and ostrich-like avoidance of facts that have troubled you.

Although we are sorry to see you leaving for a year, we hope that this sabbatical will do you all of the good you want it to. No doubt Arthur Godfrey will keep the "Person to Person" pot boiling merrily, and we are very sure that the things you learn in your reading, thinking, traveling, looking, and listening will be passed along for the benefit of the rest of us.

It was a great pleasure for us to talk with you and Mrs. Murrow and Casey. Please remember us to them. I hope we may see you again sometime. If you ever venture into an undertaking that involves public support of any kind, please regard us as your helpers.

Very sincerely yours,

Kay and Parker Jones

Editor, New York Times
Times Building
New York, New York

To the Editor:

Unfortunately, I did not hear the program "The Hidden Revolution" narrated by Edward R. Murrow on November 19th.. Consequently, I do not know if the inaccuracies concerning the Hutterites in Mr. Gould's review, published in your November 21st. issue are due to him or to the program. In either case, it is important that these be corrected. The statement that in North Dakota, the sect has been forbidden by state law to expand its activities or purchase more land is a minor inaccuracy indicating, at most, careless reporting. It is South Dakota which has passed the law discriminating against the Hutterites. It is likely that this law is unconstitutional. A costly attempt to test the law, however, resulted in a decision by the Supreme Court of South Dakota that the law had not been violated. Space does not permit the reporting of details.

Errors which may contribute to the unjustified prejudice against these fine people are the statements that the Hutterites pose an economic threat, and that their belief in pacifism led to their sons staying at home to farm while their neighbors' boys went off to war.

Whether or not any group, a large corporation, the store that competes with yours, a trade union, etc., constitutes an economic threat is in large measure a matter of opinion. I think it important to note, however, that the Hutterites own less land per family than their surrounding neighbors, and that they sell their produce on the open market to make as great a profit as possible, in the same way that their neighbors do. Theirs is a profit-making enterprise.

Whether or not the Hutterites' sons remained on their farms during the war is a question of fact. It is a matter of public record that these boys served, as did other pacifists, in our country's camps for conscientious objectors. It is also a matter or record that some of these boys joined the armed forces.

The Hutterites are modest, self-effacing, hard-working, loyal citizens who do not use self-advertising techniques, so dear to our society, to justify themselves. They do not, for example, mention their unselfish and intelligent cooperation in scientific studies, which seek solutions to problems of importance to the health of our people. They offer themselves for study without fanfare, and without any expectation of, or desire for remuneration of any sort. They cooperate, because they want to help humanity--God's children.

These people were pioneer settlers on our prairies. They helped to convert these lands to fertile productive farms. We owe them, a vote of gratitude for their former and their continuing efforts for the welfare of our nation.

Sincerely yours,

Arthur G. Steinberg
Professor of Biology

UNIVERSITY OF MINNESOTA
COLLEGE OF SCIENCE, LITERATURE, AND THE ARTS
MINNEAPOLIS 14

SCHOOL OF JOURNALISM

November 17, 1958

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York, New York

Dear Mr. Murrow:

I thought you would like to know that former newspaper associates and friends who admired and respected Mr. Carroll Binder as a foreign affairs and editorial page editor, correspondent and contributor to significant international meetings in his field of special competence, have established a Carroll Binder Memorial Scholarship at the University of Minnesota. His legion of friends and admirers know that Carroll's influence extended over wide areas. His professional and personal integrity, his sound scholarship, his unfailing helpfulness to all who knew him marked him as a great person--one of America's outstanding journalists and, in truth, a world citizen.

The Memorial Scholarship Fund was initially created within the news-editorial department of the Minneapolis Star and Tribune, but when it became known that the Scholarship had been accepted by the University, others quickly joined in with contributions to support the basic grant. The foundation fund has now reached $14,200, but it is hoped that additional grants may augment the foundation so that in the future a substantial annual scholarship can be awarded to an outstanding student majoring in the School of Journalism here.

The terms of the scholarship provide that the interest from the foundation grant will enable the faculty in the School of Journalism to name each year an able senior or graduate student in the School who has distinguished himself on the basis of reporting or interpreting international affairs while pursuing advanced work here. The award winner will hold the Scholarship during his final college year prior to graduation.

All of us are indebted to Mr. Wilbur E. Elston, editor of editorial pages of the Minneapolis Star and Tribune, and his associate, Mr. Bradley Morison, for initiating the original grant. When it became apparent that many persons outside of these newspapers wished to contribute, both Mr. Elston and Mr. Morison gave further assistance to the foundation project.

The mimeographed enclosure is a tribute to Carroll written by Mr. Morison. I plan before this letter is sent to include a fuller statement on the nature of the scholarship and the terms that will govern the selection of the winner. These terms were worked out by a small committee of Carroll's former newspaper associates and representatives of this faculty.

Yours sincerely,

Robert Jones

Dear Mr. Murrow,

How nice it was to see you again the other day in Washington. All of us, the Ambassador, Minister Chatterjee and myself, enjoyed our meeting with you.

Thank you indeed for inviting the Ambassador to appear in your program, "Person to Person", on June 19. The Ambassador has asked me to inform you that he gladly accepts your invitation to appear in the program.

Mr. Zousmer of your office was kind enough to telephone me this morning about the matter. I have told him also that the date of June 19 is acceptable to us. The Ambassador had accepted an engagement at Purdue but, in view of your program, has cancelled it.

As discussed with you I am hoping to be in New York on Friday, June 5, for further discussion with you.

So till I meet you again.

With my very best wishes.

Very sincerely yours,

M. C. Jugran

THE HANSARD SOCIETY FOR PARLIAMENTARY GOVERNMENT

79/80, Petty France,
London, S.W.1.

Information for the Press
For release on Monday, June 1st, 1959.

The Hansard Society for Parliamentary Government announced today the gift of 500 Study Boxes on American Government to schools throughout the United Kingdom. The Study Box (shown below), a collection of representative materials (see attached listing) dealing with all aspects of the American political scene, is part of the Hansard Society's programme to encourage the study of American government in the United Kingdom.

The value of these materials, (many of which are not commercially available, and were specially produced for this undertaking), is approximately £4,500.

Joining with Dr. Alfred Junz, Lecturer on leave from the Department of Political Science, Hunter College City of New York, serving as Director of Studies of the Hansard Society in this undertaking were, among others, Senator Hubert H. Humphrey and Mr. Edward R. Murrow.

It required eight months to collect and bring these materials to the United Kingdom; special tax and import rulings by the Board of Trade were generously granted.

The Study Boxes are available to schools upon written application by the Headmaster to the Hansard Society.

AMERICAN STUDY BOX MATERIALS.

1. The United States Political System by David Cushman Coyle.
   A publication by the Hansard Society for Parliamentary Government.

2. Wall Chart -
   The basic principles of the Government of the United States. A comprehensive one sheet index to the major principles of American government and their relationship to one another.

3. Election Posters, Political Platforms, Speeches and Handbills.
   A selection of materials available at National Party Headquarters at the end of the 1958 election campaign.

4. The Congressional Record and Related Senate and House Bills.
   Selected by the offices of Senator Hubert H. Humphrey and made available for purchase by the Hansard Society by special arrangement with the United States Government Printing Office.

5. The New York Times and New York Herald Tribune.
   Issues relating to date of Item 4.

6. Congressional Quarterly Students Guide, Spring 1959.
   The only living study aid on the American Congress. Authorative, up-to-date, indispensable.

7. American Congressional Procedure by Charles J. Zinn.
   Written for European readers. An authorative hand book by the Law Revision Counsel of the United States Congress.

8. Time Magazine, Reporter Magazine and U.S.News and World Report.
   Specially selected covering respectively:- The American House of Representatives, the fight in the American Senate over the Filibuster, the analysis in depth of the November 1958 Congressional elections.

9. A Documentary History of the United States by Richard D. Heffner.
   The words and writings that have shaped the path of American History brilliantly interpolated, containing all the basic documents, from the Constitution through the segregation decision of 1954.

10. Precinct to President.
    An interview with former president Harry S. Truman answering questions put to him by Mr. Edward R. Murrow. A piece of living history which is included here by special arrangement with President Truman and the Columbia Broadcasting System.

11. The American Presidency by Clinton Rossiter.
    A succinct but major analysis of the powers, duties and role of the American executive.

12. Through These Men, by John Mason Brown.
    A spirited picture of and insight to the men who have been shaping the recent history of the United States.

13. The Forty-Eight States, by The American Assembly.
    The best single introduction to the multiplicity of governmental problems at the state level in the United States.

14. American Government Annual 1958/59.
    An excellent series of articles to supplement the text book bringing the student up to the minute on the major problems of the American scene.

15. Profiles in Courage by John F. Kennedy.
    A highly readable insight to a group of unique men who have served in the American Congress.

16. <u>Our American Government</u>
The answers to 1001 questions on how it works. The answers to the questions that are asked most frequently.

17. Mimeographed teaching aids and suggestions.

18. Selected articles, charts and related material.

2nd March, 1959.

Mr. Edward R. Murrow,
485, Madison Avenue,
New York 22, New York,
UNITED STATES.

Dear Mr. Murrow,

Thank you for your letter of 24th February authorizing me to make use of your interview with former President Harry S. Truman under the terms and conditions set forth in my letter to Mr. William McClure of February 9th.

I much appreciate your kind word about the project - the American Study Box - but hasten to tell you that I feel all together "minor league" as regards courage and initiative in undertaking challenging projects. Having admired your work for many years, I am one of a great number of people who will sorely miss the imagination and forthright honesty which you have brought to broadcasting during your "sabbatical".

I hope that this year of travel will bring you to London and perchance to the Hansard Society where, in addition to introducing a few exciting ideas to you, we should enjoy a first-hand opportunity to express our appreciation of your co-operation and contribution to the American Study Box.

Yours sincerely,

Alfred J. Junz. Ph.D.,
Director of Studies.

All communications should be addressed to the Secretary

Kaczorowski, T.

Sir,

I do not pretend to be either a politican or writer, or to the right to have given a perfect elaboration.

I knew there are a lot of deficiences, especially owing to my English.

But I hope that you, - in your generous and liberal leniency, - will overlook the mistakes and try to understand the feeling and thoughts of a Middle-European about

the "German-Polish" - - - "Oder-Neisse" frontier, - and

the "present Eastern and Central European Problems," - what I wanted to present to you.

Glen Arden Farm,
Pawling, New York.
February 1958.

T. Kaczorowski,

We all remember very well the slogans about "liberating the en - slaved nations" which circulated during the first Eisenhower Presidental campaign,and which in the early days of his administration seemed to be seriously accepted in Washington and other Western capitals.

In the succeeding period these slogans were forgotten and replaced by the policy which has led to failures and disappointments painfully felt not only in the enslaved East European countries,but by all peoples of the West too.

This policy of "coexistence" with Soviet Russia is based on the belief in a spontaneous evolution of her internal totalitarian system towards democracy and her external aggressive imperialism towards a peaceful stability.

The belief in a spontaneous evolution of Soviet Russia in the direction desired by the West was fortified by the acceptance at face value of the "destalinization" and "collective leadership" slogans in fa - vour of the Kremlin.

The Western politicans were conviced that the self-liberating forces of Eastern and Central Europe,encountering the new destalinizing policy at the Kremlin,would gradually widen the scope of their achievements. Furthermore they hoped that the said process which would take place among the captive nations would in turn strengthen the liberating trend within the post-Stalin-Russia.(Theory of wishful Thinking..)

This conviction appeared in several statements of some Western politicans,-who either made short flying trips to countries behind the Iron Curtain,or based their opinion on foreign observers and correspondents who came to some hasty conclusions..-after superficial canvassing of informations,-seldom sure whether their sources stem from the people,or from shrewd Communist prepagandists,or may be some times based on erroneous or faulty translations.

The American Secretary of State,J.F.Dulles too, spoke of irreversible

trend towards self-liberating in Poland and other enslaved nations. There was mentioned that the revolt in Hungary and Poland is proof that the Communist System could not win the hearts and minds of the people,-that the peoples are rather ready to die than to continue to be subject to that kind of Communist rule,-that there is a "fatal defect" which in the end is going to lead to the Communism'undoing.

The American Secretary of State mentioned that the revolution in Hungary was the beginning of the end of the Soviet Russia,-and fixed even a period of time of a decade or so.

Western News corrspondents reported from Poland about partial liberalization,-new achievements in the field of freedom,-general improving,higher living standard etc,etc.--and the average reader of the American and Western Newspaper & Magazin got the feeling,and could get convinced-that the East European peoples,especially Poland have already won the total independenc and freedom,- -

while,-in reality,- as the last true informations from Poland indicate,- the enslaved East European peoples have been gradually deprived of all freedom gained the last year,-(since Oct.1956),- that the "liberalization" of Poland is not only halted,but that the restricted liberation won by the own exertions is now again threatened,and that there are signs of a reverse process to"Stalinism". It seems that all hopes of some Western politicans and also of some Poles for an early liberating have become vain.

Also J.F.Dulles,-in one of his last interviews,-questioned re the "decade of years",-in which he previously thought to see the end of Soviet Russia,corrected that this period would depend "on circumstances"-and nobody can estime it,-this means for me:an unlimited time..-

In any case,- the events and the whole development of our history of the last years have shown that the enslaved and captive nations

can not reckon on any military help or intervention from the outside, from the Western World, -and that a self-liberating of the enslaved nations is completely impossible so long as the Soviet troops are present on their soil.
It remains the fact, -unfortunately, by virtue of the Yalta agreement, - these peoples are just condemned to live under Communist rule, indifferently, whether Soviet or "National," as some call the Communism, so long as the shadow of the Kremlin reaches into the heart of Europe.

Russia during the last thirteen years has done everthing in order to keep Europe divided along the Iron Curtain, -and it is still clear that a divided Europe is the aim of the Soviet Union.
The still enslaved Eastern European peoples, however, -although they have no illusions that the West may liberate them by force, -are still convinced that sometime.. the liberation will come to them, -and that this must happen by their own exertions, that they may be supported by the West if only it would be possible, - that then the Iron Curtain, which divides them now from the free World, will be swept away, and that a peaceful "modus vivendi" between the East and West will be found.

Consequently, -excluding all military action from the outside World, - here remains to be considered whether the present situation in East- and Central Europe could be changed in a peaceful way, -how could be the Iron Curtain lifted, and the dignity of man, the freedom of peoples, be restored, and the liberated nations be once for all protected against any new aggression and enslavement.
The views differ on what can be done towards solving these questions, - however all have one in common, : the central point, focus, of all discussions re the East-West Europe problems is always the future of Germany and the German-Polish relations. These are the fundamental questions, and as soon they are solved, the main steps for a peaceful modus vivendi are done.
No doubt, normalization of all German-Polish relations would create a

a favourable impression in the whole World,-and this would contribute to the reunification of Germany,-and finally to the settlement of the whole Eastern-Central-European questian ,-to creating the peaceful era which the harassed peoples of Europe need and are looking for,already for long,long time.-

The basis for good neighbour relations between peoples is their unquestioned and settled boundary.- Unfortunately the German-Polish border is still questioned by some people.The last years brought a widespread discussion of the German-Polish frontier,and the question of the Oder-Neisse Line occupied a good deal of space in the world press, and it seems there will be more in the future.
In connection with this,the problem of the Oder-Neisse frontier must be studied with considerable interest.

First of all,it may be recalled that the territorial arrangement in Europe created after the First World War by the Versailles Treaty contained germs of future international conflicts,especially in Eastern-Central Europe.
This was particulary true where some milions of Germans were left outside of Germany,-mainly in Czechoslovakia and Poland.- These German minorities were afterwards used by Hitler as the pretext for aggressions.
The history of our time proved that the Versailles-treaty-frontiers did not secure the independent existence of the East European counries.
The Great Powers being aware of the anomaly of the in Versailles creaeted Eastern frontier of Germany,and the permanent danger of war connected with the existence of such a border,-during the World-War-Two-knowing very well that they bear the responsibility and will have the right to determine the future political and territorial world system, decided,-in order to grant a permanent peace and security to the world the change of these frontiers in favour of Czechoslovakia and Poland.

The President of the United States Roosevelt Franklin Delane,-The Prime Minister of Great Britain Churchill Winston Spencer,agreed at Yalta,and President Truman Harry and Prime Minister Attlee Clement sealed the agreement at Potsdam that the future frontiers of Germany must secure her neighbours against any German aggression,and therefore agreed to the Oder-Neisse Line as the future German-Polish border. This agreement was made unanimously,and all great statemen and politicans consent with this decision at that time.-
The agreement and decisions made at Yalta and Potsdam in1945 are still binding,not only the Great Powers and their Allies,but Germany too.- The last one,owing to the fact that Germany was completely in the hands of the Great Powers,and in consequence of the accepted "unconditional Surrender"clause.

In execution of the Potsdam Conference agreement and decision all territories East of the Oder-Neisse rivers were handed over to Poland, and the sovereignity of Poland over the incorperated by Poland territories acknowledged. - The German population of the ceded to Poland territories,which wished to repatriate to their Vaterland-Germany could return to Germany.
It must be stressed that the idea of repatriation to Germany of Germans was promoted by the Great Powers,and was justified by the attitude of the Germans,as minorities in Czchoslovakia and Poland between the two World Wars.
The repatriation of the Germans took part voluntarely under the authority and supervision of the Great Powers,-not by force.
The arguments for the taken decision,re repatriation of Germans from the ceded to Poland Territories,at Yalta and Potsdam by the Great Powers by themselves,and the fact that the repatriation was supervised by the Great Powers,and finally that the repatriation was a voluntary one(-nobody was compelled to leave-)is a convincing argument for the intention of stability of the German-Polish frontier along the Oder-Neisse rivers.

Strictly speaking the Oder-Neisse frontier should be a"sanctum", and should not be questioned by anyone,-Unfortunately,recently some revisionists in West Germany,especially "the Bund der Heimatsvertriebenen und Entrechteten",-mostly former repatrians from East-Europe (from Poland,Czechoslovakia,Hungary,Lituania,and other East-Europa countries)started argumenting re the present German-Polish boundary,- and what more,they are supported by some responsible German leaders and statemen.

May be that the revisionists have been encouraged by some irresponsible,imprudent and lightminded politicans from the Western countries..-

The revisionists question not only the Oder-Neisse rivers frontier, but they challenge the legal basis of the Great Powers right to undertake any change in the prewar GermanoPolish border. They argue that so long as there isn't any Peace-Treaty,the only right German-Polish frontier is still the border creaeted at Versailles,and that the Potsdam decisions are not binding Germany at all.(Here is worthwhile to recall: between the two World Wars the Germans questioned the at Versailles creaeted frontier as complete unrealistic,and demanded a pushing of their Eastern frontier more to the East for more Lebensraum,-and now ?)

Examineing the arguments,by which the revisionists intend at the abelishment of the legal basis,it will be found that they are groundless.:

As to the Great Powers right to decide over the future of Germany and her territories,: The Right is based on"the right of a conquerer"and the acceptance of "UNconditional Surrender".

As to the assertation that the Oder-Neisse frontier decided by the Great Powers at Potsdam is only a temporary one,because there was not yet signed any peace treaty,in which the final delimitation should be done,here may be said:

A state of War is usually terminated by a peace treaty,that is right,

So long as a peace settlement is not signed it should be assumed that the war is not terminated,-consequently there should be still a state of war between the Great Powers and Germany.
But the action of war was over in 1945,and thus the Second World War finished.-Germany has been divided,and the different parts are under diametrically differant influences and governments.Therefore a peace treaty with all-Germny could not be signed,and it seems quite un - thinkable that a peace treaty may be signed in the near future.
In this unusual international situation the Great Powers found another way out to end the status belli.They terminated the state of war formally by one-sided declarations.
These one-sided declarations,although binding only one of the German States-the one recognized by the particular declaring State-Great Power,confirmed that the war was over with Germmny,and by the formality of Declaration de facto replaced the peace-treaty.-

As to the "delimitation"of the frontier,which according to the Potsdam agreement had to be postponed till a peace treaty,here were to mention: A"delimitation"of a border means a demarkation of a already decided od determined frontier in the open field-territory and on the map attached or exchanged between the interested States,-"Delimitation" means only a technical action,to draw the frontier along the decided line and to describe the frontier,but without any authority to change any fundamental principles.In this case "delimitation"of the Oder-Neisse Line means to mark the frontier along the Oder-Neisse rivers,on the spot,of the frontier determined at Potsdam.
Besides,German-Polish Boundary Commissions have already executed the delimitation in accordance with the Great Powers decision,and East-Germany,the interested neighbour of Poland,-has already recognised the Oder-Neisse rivers as the only legal boundary between Germany and Poland.-- while West Germany still continues to stress her revisionary attitude,-probably speculating on some..still unknown political aspects

of the World,-may be reckoning on suppert from the West,which also after the First World War had made the error,-supperting Germany,and by endearment and carrasing her breught up the renaissance of the old-Prussian militarism,--and this caused the Second World War.-

The present German-Polish frontier along the Oder-Neisse rivers is the shortest frontier-line leaning on the natural border of the rivers Oder-neisse,-thus the securest and easier to defend boundary.

The Oder-Neisse frontier is also a historical and ethnic line.-West of this line are Germans,and East of it only Poles. The voluntary departure of the Germans who lived there signifies their belief that the frontier along the Oder-Neisse must have the aspect of permanence.The reptriants to Germany were them only residents as descendants of colonists settled there by the Prussian-conquerers,in the last centuries.-

It must be not fergotten that the territory East of the Oder-Neisse were terrible devastated by the retreating German army,carried out deliberately in 1945,-that the advancing Soviet treeps completed the devastation by ruthless robbing and pillaging of this country,-and when Poland took over the devastated,plundered and burnt out towns and villages,she was confronted with a tremendous task.- Now the territory is repepulated by Poles from within Poland and from the Polish territories East of the Curzon line(ceded to Soviet Russia at Yalta)-and the reconstruction has been carried out,damaged ports reopened,railways and bridges restered,towns and villages rebuilt,-Poland has vast sums invested,and everthing indicates that this land will return to its normal life.

Besides,it is difficult to immagine that the Poles would ever agree to abeden Stettin and the mouth of the Oder or some part of the territory from wich Poland has already been,and still could be again easily attacked by the Germans,- who twice during our short life-time attacked the East (1914 + 1939),twice started the World War,always pursuing

their guiding principle "the Drang nach dem Osten" policy.-
The conclusion is,:A formal peace treaty,to which the revisionists refer,is only thinkable if all German frontiers are unquestioned and recognised,-it means that the Oder-Neisse rivers line must be recognised as German-Polish boundary by the West Germany too.-
So long as West Germany is still wavering to recognize this frontier and thus does not respect the once accepted Potsdam agreements,-so long will last the division of Germany,-the division of Europe,-the main cause of tension in the international relations.-

By the way,here I may add that it seems,that a "recognition"is not necessary by the Great Powers,because the frontier was decided at Potsdam,executed by delimitation,the frontier exists already for thirteen years,-one must assume that the recognition has been given "per facta concludentia". But if the Great Western Powers would join in an explicit recognition or declaration re the present German-Polish border,-they would contribute a lot to appease and to stop the growing revisionists tendency,-and thus they would advance the peaceful solution of the Eastern Central European question.
Such recognition would have some declaratory value,and would be a guarantee for the stability of the German-Polish boundary,and furthermore give the Poles a point of support in their struggle for complete independence from Russia.
Letting the situation so as it now,-is dangerous,and time is working against the West,- there may be born the first spark to the Third World War.- -
The East European peoples,still in captivity,surrounded by Soviet armed forces,tanks,jets,and millions of soldiers,look and belief on the West,-and any frustrated time could weaken the confidence in the sincerity of the Western Powers to help the captive Eastern European nations in their struggle to liberate themselves from the Soviet orbit, and could raise even the suspicion that the West is favouring,and on

the side of Germany in the contest about the right to the present Oder-Neisse frontier.The Eastern European peoples are very sensitive in relation to Germany,and this is based on the long German "Drang nach dem Osten"policy.
Till 1957 the West contributed nothing except words of sympathy,just since the last year the West showed more understanding,and granted some financial help,for which the Polish people is very thankful to the West, but that still is not enough to relieve the misery of the population and to reestablish the freedom and independence of Poland,-the nation called by President F.D.Roosevelt the "inspiration of the free nations", but-by virtue of the Yalta agreement-remaining still in captivity.-
Any declaration re the stability of the Oder-Neisse frontier as well as any decidive step,undertaking which would assist in making the Soviet troops leave Poland and the other Eastern European countries,and any further economical aid will be welcomed with the greatest gratitude by the oppressed East-European peoples.-

Hitherto ther could be found no thesis and no way out which would satisfy the Western Powers and Soviet Russia in order to solve the East-Central European question.
The Cold War lasts,and a hopeless stalemate rules,-and meanwhile the Russians are doing all possible to strengthen their position.-
All trials and hopes are fading away. -
The disarmement talks proved also a waste of time.-
In pursuing her policy of initiative recently the Soviet Russia offered the called "Rapacki-Plan" or Polish-Plan(undoubtly suggested and sponsered by Russia-herself,it shows the dependence of Polish Foreign Policy, because a free-Polish plan would demand an immediate withdrawel of all foreign troops,).-
This"Rapacki-Plan"is in fact a plan to stabilise the "status que" of the present Russian relations with the Eastern European countries,her satellites.- The plan aims to get the sanction for a continuation of

the occupation of the enslaved nations under the guise of friendly garrisoning of these countries by Warsaw pact armies.-
The plan is concerned solely with "nuclear" weapons, the only deterrent weapons,-and if the Western would agree to give up these weapons, the Russians would have the preponderance of conventional forces,-they would have a much greater number of troops in the deatomized area, and thus,-if an "incident" should occur,-what is possible and thinkable on a common east-west frontier, still questioned by the West Germans,-then the Westerns would be in a military disadvantage.-
The most important thing is that the Rapacki-Plan does not contain any "neutralization" clause and does not give any firm "guarantee" that Soviet Russia will evacuate her armed forces from the East-European countries, which she is subjugating as a result of Yalta.-
In short, the Rapacki-Plan has serious disadvantages from the standpoint of the security of the Free World, and the decision of rejection of this plan by the Western World was a proper and right one.-

More convincing and more realistic is the plan of creation a neutral zone between the Soviet Union and the American allied states of Western Europe.
That "neutral zone" would reduce tension in a traditionally inflammable area,-and would roll-back Soviet influence much more effectively than the flamboyant words of some Western orators.
Since Budapest demonstrated, more than a year ago,-that the West had no intention of following talks with brave deeds, and Liberation of the captive nations cannot be expected from outside,-the idea of creating a Neutral-Zone in Eastern Central Europe has been enthusiastically accepted by all East European nations. In the present circumstances, they see no hope for liberating from the Soviet occupation and progress in Eastern Europe at all, as only by negotiating and creating a "Neutral Zone" with all enslaved nations of East and Central Europe and West Germany in it.-

The plan of "Neutralization" of Middle Europe was at first submitted by Sir Anthony Eden at the Geneva Conference in1955,-later again raised by Russian leaders for "establishment of a demilitarized zones in Europe,-unfortunately dropped mainly due to the opposition of West-Germany. Recently the idea revived in the Hugh Gaitskell' plan,the Labour Party'Parliament Member Denis Healey supports the plan,Goerge F. Kennan,once U.S.Ambassador to Moscow started a very excited debate in the whole Western World,the discussion is "pro"and"contra" the plan, and the idea is accepted by some West German political leaders.-
Herr von Eckardt,interviewed by reporters,told that the West German Gouwernment did not insist on Germanys reunification prior to the establishmmnt of a new"European-security-system",-that means a silent agreement for neutralization-negotiations,-because the only thinkable European security system is a neutral belt covering the whole Central and Eastern Europe.-

The Neutral-Zone in Middle Europe would cause a withdrawel of all American allied troops from Germany,-but also the long desired withdrawel of all Soviet troops from the East European countries.-
The Neutralization would end the"partitioning"of Europe into zones of influences of the Great Powers.- This means that the present captived East Europe peoples would get free from the dependency of Soviet Russia,the single Great Power which occupies them.-Thus the desatelized nations would be enabled to return freely to their own political,economical and cultural life.-

It is true that the presence of Allied troops alone permits Western Europe to withstand the Soviet pressure,but the sharp critics of the Neutral Belt may be said,:
Once the Soviet troops leave the countries of East Europe,-any attempt to recross their their eastern borders would be met with the resistance from every man,woman and even child. Consequently the Neutral Zone would not diminish the strength of the Western shield,but,-on the

contrary,-would strengthen the defence potential of the West. Furthermore,in case of establishment of a neutral zone,the first battle by conventional weapons would be not fought near the Rhine but theusand,or several hundred miles more east,-what were also an advantage for the West.

As to the fears expressed by some politicans that under a neutralization pact,binding the Western Powers,the Western Great Powers would be committed to go into the war,if the Soviets intevened after a Communist gouvernment was overthrown in a former satellite country,-and that the creating of a neutral zone would increase rather than decrease the risk of war,-here may be said,:

After the tragic experiences of the last years the Germans,Poles and Hungarians as well as the other East European peoples have recently shown enough political maturity,-unfortunaltely acquired at the price of bitter disappointments,-they do not want revolt at all.

Any developments in political or economical life will take place in an evolutionary way,-in peace and stability.-

And if anyone still sees some risk in setting up a neutral zone,he may not forget;the risk is like in every other political or military decision.- The alternative of Neutralization may be an atomic War,the risk of creating a neutral zone is then worth taking.-

It seems therefore that there would be no greater danger for the West to support the idea of Neutralization and to put a constructive plan for negotiation,-may be before the next"Summit Conference"

Undertaking of such a historical mission by the West will be lauded by all Eastern and Central European nations,-and this is also an important factor,because the opinion of the concerned nations must be taken in consideration too.

Naturalization would not only liberate the enslaved nations from the Soviet captivity,but solve the everlasting German-Polish frontier quarrels,and the reunification of Germany,and open the way to an all "European Unity".

Kahn, Mich

June 5, 1959

Dear Mrs. Kahn:

Many thanks for your nice note of May 26th.

Your kind comments about my programs are greatly appreciated. It is always nice to hear the reactions of our audiences. In this way, we know whether or not we are presenting programs to please them.

I hope that when I do return to CBS next year, it will be with a program worthy enough to warrant your continued attention.

Sincerely yours,

Mrs. Michael Kahn

Dear Mr. Murrow,

Before you depart for your extended leave of absence, I wanted to tell you how much I have appreciated your work in both radio and television. Your format has varied, but your programs have been consistently informative, provocative and entertaining. Also, I infer from columnists such as John Crosby that you have been influential in raising the level of network responsibility for the caliber of the programs presented to us. On all these counts, I have become a great admirer of yours and I shall look forward to your return.

My best wishes for a very pleasant year.

Sincerely,
Shirley Kahn

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York 22, New York

Dear Mr. Murrow:

Following discussions with Larry Lowenstein and Miss Schofield, we are writing to ask your participation in a high-level campaign concerned with foreign trade, specifically the importation of furs from our allies, Norway, Denmark and Finland.

As the advertising agency for the Scandinavian Fur Committee and their product SAGA Mink, we have planned a series of ads to appear on the back pages of "Women's Wear Daily," which is the business "bible" of the fashion industry. The first is scheduled for early in November.

We envision a format which features a photograph of you, we hope, interviewing a prestige figure from retailing, such as Adam Gimbel of Saks Fifth Avenue or Stanley Marcus of Neiman-Marcus. Question-and-answer text will stress the international good will idea strongly, as opposed to commercial considerations, and will, of course, be submitted to you for your prior approval. Suitable credit for you and CBS will be included. The photography will be arranged at your convenience.

We shall be happy to provide further details of the campaign if this preliminary proposal is pleasing to you. I shall contact your office by phone in a few days to learn your reaction.

Cordially,

Harriette Kahrs

A SERIES OF PUBLIC SERVICE ADVERTISEMENTS
PUBLISHED IN COMMENTARY 1952-56

THE WELCH GRAPE JUICE COMPANY, INC.
J. M. Kaplan, President

This series of public service advertisements was started in 1952 primarily because of an interest in Commentary Magazine. The selections proved interesting to some people and stimulated correspondence from various parts of the country. Because of some requests for copies, it was decided to reprint privately the entire series, to date, of these public service messages.

by *Bertrand Russell*

IT IS URGED THAT, in a war between Liberals and fanatics, the fanatics are sure to win, owing to their more unshakable belief in the righteousness of their cause. Fanatics have failed, over and over again because they have attempted the impossible, or because . . . they were too unscientific to adopt the right means; they have failed also because they roused the hostility of those whom they wished to coerce. In every important war since 1700 the more democratic side has been victorious. This is partly because democracy . . . does not demand a distortion of facts in the interests of theory. Russia and Canada, which have similar climactic conditions, are both interested in obtaining better wheat; in Canada this aim is pursued experimentally, in Russia by interpreting the Marxist Scriptures.

"Systems of dogma. . . have the disadvantage of involving persecution of valuable sections of the population. Spain was ruined by the expulsion of the Jews and Moors; France suffered by the emigration of Huguenots . . . Germany would probably have been first in the field with the atomic bomb but for Hitler's hatred of Jews . . .

". . . Our world needs various things if it is to escape disaster, . . . one of the most necessary is that, in the nations which still uphold Liberal beliefs, these beliefs should be whole-hearted and profound, not apologetic towards dogmatisms of the right and of the left, but deeply persuaded of the value of liberty, scientific freedom, and mutual forbearance. For without these beliefs life on our . . . planet will hardly continue to be possible." *

by *David Lilienthal*

"IN THE ATOMIC ADVENTURE we sight one of those great mountain peaks of history, a towering symbol of one of the faiths that makes man civilized, the faith in knowledge. I look forward to atomic development not simply as a search for new energy, but more significantly as a beginning of a period of human history in which this faith in knowledge can vitalize man's whole life. . . .

"Our chance for great adventure can however be lost to us. If this feeling of living in a very fruitful and special period is not sensed by people generally, and by our representatives and civic leaders, the atomic adventure may be stifled in the throes of politics, of routine, of sluggishness and apathy. . . .

"There is evidence now and then that the shock and excitement of the Hiroshima blast has induced a kind of atomic neurosis, a constricting fear and hysteria that if allowed to continue and grow can distort our understanding of the true scope and meaning of the atomic development. . . .

"The development of atomic energy will pose many broad issues where the judgment of individual citizens will be essential, if they are to have a share in determining their democratic destiny. . . .

"What may be in people's minds a year or two hence depends in part on leadership in each community and upon how successful the press, the radio and education generally will be in inspiring people to think clearly about and to appreciate the force of the facts about atomic energy. . . .

"There is not a single one of us who is a mere spectator, who can turn a knob and tune himself out, or leave if he is bored, or horrified, or is more interested in his private affairs. We are all participants in that future chain of events that these epochal discoveries have set off. There are no supermen to solve these problems for us."*

This *I believe*

"FREEDOM IS THE RIGHT to choose: the right to create for oneself the alternatives of choice. Without the possibility of choice and the exercise of choice, a man is not a man but a member, an instrument, a thing.

"FREEDOM is the right to one's soul: the right of each man to approach God in his own way and by his own means. It is a man's right to possess his mind and conscience for himself. To those who put their trust in freedom, the State can have no sovereignty over the mind or soul —must be the servant of man's reason, not the master.

"FREEDOM is the right to one's dignity as a man. In a free society no individual, no group is entitled to diminish the human dignity of any man regardless of his race, his creed, or his color."*

This *I believe*

by *William O. Douglas*

"THE GREAT DANGER of this period is not inflation, nor the national debt, nor atomic warfare. The great, the critical danger is that we will . . . limit or narrow the range of permissible discussion and permissible thought. . . . If we do, we will lose flexibility. We will lose the capacity for expert management. We will then become wedded to a few techniques, to a few devices. They will define our policy and at the same time limit our ability to alter or modify it. Once we narrow the range of thought and discussion, we will surrender a great deal of our power. We will become like the man on the toboggan who can ride it but who can neither steer it nor stop it.

The mind of man must always be free. The strong society is one that sanctions and encourages freedom of thought and expression. When there is that freedom, a nation has resiliency and adaptability. When freedom of expression is supreme, a nation will keep its balance and stability.

Our real power is our spiritual strength, and that spiritual strength stems from our civil liberties. If we are true to our traditions, if we are tolerant of a whole market place of ideas, we will always be strong. . . ."*

This *I Believe*

"THE CENTRAL THEME in our American heritage is the importance of the individual person. From the earliest moment of our history we have believed that every human being has an essential dignity and integrity which must be respected and safeguarded. Moreover, we believe that the welfare of the individual is the final goal of group life. Our American heritage further teaches that to be secure in the rights he wishes for himself, each man must be willing to respect the rights of other men. This is the conscious recognition of a basic moral principle: all men are created equal as well as free. Stemming from this principle is the obligation to build social institutions that will guarantee equality of opportunity to all men. Without this equality freedom becomes an illusion. Thus the only aristocracy that is consistent with the free way of life is an aristocracy of talent and achievement. The grounds on which our society accords respect, influence or reward to each of its citizens must be limited to the quality of his personal character and of his social contribution.

This concept of equality which is so vital a part of the American heritage knows no kinship with notions of human uniformity or regimentation. We abhor the totalitarian arrogance which makes one man say that he will respect another man as his equal only if he has '*my* race, *my* religion, *my* political views, *my* social position.' In our land men are equal, but they are free to be different. From these very differences among our people has come the great human and national strength of America."*

The Report of the President's Committee on Civil Rights, 1947

This *I Believe*

by Hans Simons, *President*
New School for Social Research

"NOTHING IS AS MISLEADING as military terminology applied to political conflicts. They are not as simple or as clear-cut as is physical fight. For democracy, there is neither total victory nor total defeat. The aim of its struggle is not to annihilate the adversary but to include him in the process of persuasion. Even if this fails there remain the individual's personality despite his errors and the peoples' potentialities regardless of their governments. Enforcement is the last and the least productive of democratic methods. Truly, the decline of democracy begins when it permits its enemies to force their methods upon it.

"This process is already far advanced. We begin to accept over-simplification—the technique used by extremists of all sorts. In over-simplifying they answer a human need for certainty which obviously democracy cannot fully satisfy. They cater to a human weakness, namely, intellectual and moral laziness which any totalitarian policy can exploit to its great advantage, but which saps democracy's strength.

"The simple rules of war become dangerous delusions if we accept them as political maxims. The worst of all is the most popular: that the enemies of our enemies are our friends, and the friends of our enemies are our enemies. This is a fallacy even in international affairs. Much of our present troubles can be traced to the unfortunate fact that we applied it too readily during and after the war. In domestic matters it is worse. If democracy accepts this view it loses its distinct role in politics. This means that as a force in society it will eliminate itself. For eventually it will be left without its own friends, having yielded to its enemies the declarations and decisions which define its particular place."*

This *I Believe*

by Victor Hugo*

"IF FOUR CENTURIES AGO, some one had dared to predict to Lorraine, to Picardy, to Normandy, to Brittany, to Auvergne, to Provence, to Dauphiné, to Burgundy—'A day shall come when you will no longer make wars: You will still have disputes to settle, but do you know what you will substitute instead of armed men: You will select a small box of wood, a ballotbox, and from which shall issue—what?—an assembly, which shall decide, judge, resolve everything—which shall make the sword fall from every hand, and excite the love of justice in every heart. You will no longer be Burgundy, Normandy, Brittany, or Provence—you will be France!'

"If some one had uttered these words, all prudent men would have cried out, 'What a dreamer!'

"A day will come when you, France—you, Russia—you, Italy—you, England—you, Germany, will, without losing your glorious individuality, be blended into a superior unity, and constitute a European fraternity. A day will come when bullets will be replaced by the venerable arbitration of a great Sovereign Senate, which will be to Europe what the Parliament is to England, what the Legislative Assembly is to France.

"A day will come when these two immense groups, the United States of America and the United States of Europe, shall be seen extending the hand of friendship across the ocean, exchanging their produce, their arts, their genius, and uniting, for the good of all, these two irresistible powers, the fraternity of men and the power of God.

"But, French, English, Germans, Russians, Slavs, Europeans, Americans, what have we to do to hasten the advent of that great day? We must love each other! To love each other is the best manner of aiding God!"

This *I Believe*

by Spinoza*

"IN A DEMOCRACY everyone submits to the control of authority over his actions, but not over his judgment and reason. What shall be accepted as true or rejected as false, or what opinions should actuate men in their worship of God, are questions falling within a man's natural right, which he cannot abdicate even with his own consent.

"Government which attempts to control minds is tyrannical. What greater misfortune for a state can be conceived than that honorable men should be sent like criminals into exile because they hold diverse opinions which they cannot disguise?

"When people try to take away liberty of thought, and bring to trial the opinions of mankind, they only succeed in surrounding their victims with an appearance of martyrdom and raise the feelings of pity and revenge rather than of terror. He that knows himself to be upright shrinks from no punishment; he holds that death in a good cause is an honor, and that death for freedom is glory.

"The ultimate aim of government is not to rule by fear, but to free every man from fear, that he may live in all possible security; in other words, to strengthen his natural right to exist and work without injury to himself or others. The object of government is not to change men into puppets, but to enable them to develop their minds and bodies in security, and to employ their reason unshackled. In fact, the true aim of government is liberty."

This *I Believe*

By H. A. Overstreet*

"WHEREVER exploitation and poverty exist, Communists become more self assured, more violent in their denunciation, and more powerful to tell the world that the true way of life is not to be found in the way of "democratic freedom." The most effective way to drain the strength of the Communist enemy is to do the things that freedom calls for.

"This, then, is the alternative to disaster: to make more freedom. The emphasis needs to be, not merely upon defending something, but rather upon extending it.

"Fifty or a hundred years from now, some historian may make the discovery that in the mid-twentieth century the democratic peoples of the world became suddenly aware that if they did not act pretty quickly to make more freedom in the world, they would lose even what they had. Examining the things that those mid-twentieth-century peoples began to do to remove old enslavements and bring new opportunities into life, he may come to the surprised conclusion that in those years, when tyrannies were at their height of terror, the democratic peoples learned a new way of warfare—that of defeating the enemy by doing the things that took away his psychological weapons."

The Saturday Review, August 2, 1952

This *I Believe*

By Lord Acton*

"By liberty I mean the assurance that every man shall be protected in doing what he believes his duty against the influence of authority and majorities, custom and opinion. The state is competent to assign duties and draw the line between good and evil only in its immediate sphere. Beyond the limits of things necessary for its well-being it can only give indirect help to fight the battle of life by promoting the influences which prevail against temptation—religion, education, and the distribution of wealth. The most certain test by which we judge whether a country is really free is the amount of security enjoyed by minorities . . .

"Liberty is not a means to a higher political end. It is itself the highest political end. It is not for the sake of a good public administration that it is required, but for security in the pursuit of the highest objectives of civil society and of private life. A generous spirit prefers that his country should be poor and weak and of no account but free, rather than powerful, prosperous and enslaved. It is better to be the citizen of a humble commonwealth in the Alps than a subject of the superb autocracy that overshadows half of Asia and Europe."

This *I Believe*

By Judge Learned Hand*

"I believe that that community is already in process of dissolution where each man begins to eye his neighbor as a possible enemy, where nonconformity with the accepted creed, political as well as religious, is a mark of disaffection; where denunciation, without specification or backing, takes the place of evidence; where orthodoxy chokes freedom of dissent; where faith in the eventual supremacy of reason has become so timid that we dare not enter our convictions in the open lists to win or lose. Such fears as these are a solvent which can eat out the cement that binds the stones together; they may in the end subject us to despotism as evil as any that we dread; and they can be allayed only in so far as we refuse to proceed on suspicion, and trust one another until we have tangible ground for misgiving.

"The mutual confidence on which all else depends can be maintained only by an open mind and a brave reliance upon free discussion. I do not say that these will suffice; who knows but we may be on a slope which leads down to aboriginal savagery. But of this I am sure: if we are to escape, we must not yield a foot upon demanding a fair field, and an honest race, to all ideas. 'Blame not before thou hast examined; understand first and then rebuke. Answer not before thou has heard; interrupt not in the midst of speech.' Those words were written nearly 2000 years ago; they came out of an experience already long, and refined in the fires of passion and conflict; they are the product of a wisdom bought by ages of bitter trial; and by that wisdom alone shall we be saved, we, who boast ourselves to be the apostles of a faith in the eventual triumph of wisdom."

*from "The Future of Wisdom in America"
The Saturday Review, November 22, 1952

This *I Believe*

By Bertrand Russell*

"THERE are certain things that our age needs, and certain things that it should avoid. It needs compassion and a wish that mankind should be happy; it needs the desire for knowledge and the determination to eschew pleasant myths; it needs, above all, courageous hope and the impulse to creativeness. The things that it must avoid, and that have brought it to the brink of catastrophe, are cruelty, envy, greed, competitiveness, search for irrational subjective certainty, and what Freudians call the death wish.

"The root of the matter is a very simple and old-fashioned thing. . . . The thing I mean—please forgive me for mentioning it—is love. . . . If you feel this, you have a motive for existence, a guide in action, a reason for courage, an imperative necessity for intellectual honesty. . . . Although you may not find happiness, you will never know the deep despair of those whose life is aimless and void of purpose; for there is always something that you can do to diminish the awful sum of human misery."

*from "The Impact of Science on Society", published in 1953

This *I Believe*

By Herbert J. Muller*

"AS WE seek to understand the Soviet, we must dwell on its own sources of corruption. Immediately, the abuses spring from the strange faith that evil methods will automatically produce good, and tyranny will necessarily end in freedom. . . .

"The plainest objection to Soviet theory is that . . . it is a government run by a small group, who wield tremendous power. They are supposed in time to surrender this power, but Marx himself insisted that no group in power has ever voluntarily relinquished it. Meanwhile, they are more likely to abuse their power because they are not subject to free criticism or public recall. . . .

"Russia's diseases are aggravated by . . . the ingrained habits of conspiracy and terrorism . . . the Party breeds the informer, promotes mutual suspicion and distrust, and puts a premium on cynical expediency and servility. It creates a petty-bourgeois aristocracy of right-thinkers and yes-men, and makes scapegoats of precisely its most thoughtful . . . members. . . .

"Ultimately, the curse of the Soviet is rooted in its famed unity. 'Unity' is always a magic word. Many educators, columnists, and churchmen are now crying that what America needs is a uniform philosophy. They seem to forget that Russia has such a philosophy. . . . There is nothing novel about the civilization of the Soviet. It is profoundly, literally reactionary, reverting to the ancient ideal of absolute conformity; and it is demonstrating again that this ideal cannot be achieved except by repression. . . . Free men will never agree on a uniform philosophy or common objective. . . .

"Many liberals believed that once communist Russia was firmly established it would make steady progress toward the democratic ideals of the classless society. As it kept moving instead towards severer repression, disillusioned liberals have tended to make Stalin the villain of the piece . . . but more fundamental . . . is the ancient fallacy of authoritarianism. . . . The 'mere formal freedom' that Marx saw in democracy is in fact the only possible security for any real freedom. 'Liberty . . . is the possibility of doubting, the possibility of making a mistake, the possibility of searching and experimenting, the possibility of saying "no" to any authority.' "

*from "The Uses of the Past"
Oxford University Press, 1952

This *I Believe*

By George Orwell*

"ANY writer who accepts or partially accepts the discipline of a political party is sooner or later faced with the alternative: toe the line, or shut up. It is, of course, possible to toe the line and go on writing—after a fashion. Any Marxist can demonstrate with the greatest of ease that 'bourgeois' liberty of thought is an illusion. But when he has finished his demonstration there remains the psychological fact that without this 'bourgeois' liberty the creative powers wither away. In the future a totalitarian literature may arise, but it will be quite different from anything we can now imagine. Literature as we know it is an individual thing, demanding mental honesty and a minimum of censorship. And this is even truer of prose than of verse. It is probably not a coincidence that the best writers of the 'thirties have been poets. The atmosphere of orthodoxy is always damaging to prose, and above all it is completely ruinous to the novel. . . .

"No decade in the past hundred and fifty years has been so barren of imaginative prose as the nineteen-thirties. There have been good poems, good sociological works, brilliant pamphlets, but practically no fiction of any value at all. From 1933 onwards the mental climate was increasingly against it. Anyone sensitive enough to be touched by the *zeitgeist* was also involved in politics. Not everyone, of course, was definitely *in* the political racket, but practically everyone was on its periphery and more or less mixed up in propaganda campaigns and squalid controversies. Communists and near-Communists had a disproportionately large influence in the literary reviews. It was a time of labels, slogans, and evasions. At the worst moments you were expected to lock yourself up in a constipating little cage of lies; at the best a sort of voluntary censorship ('Ought I to say this? Is it pro-fascist?') was at work in nearly everyone's mind. It is almost inconceivable that good novels should be written in such an atmosphere.

"Good novels are not written by orthodoxy-sniffers, nor by people who are conscience-stricken about their own unorthodoxy. Good novels are written by people who are *not frightened*."

***From "Such, Such Were The Joys"**
1953, Harcourt, Brace and Company

This *I Believe*

By Albert Schweitzer*

"IN MY JUDGMENT . . . of the situation in which mankind finds itself at the present time, I am pessimistic. I cannot make myself believe that that situation is not so bad as it seems to be, but I am inwardly conscious that we are on a road which, if we continue to tread it, will bring us into 'Middle Ages' of a new character.

"The spiritual and material misery to which mankind of today is delivering itself through its renunciation of thinking and of the ideals which spring therefrom, I picture to myself in its utmost compass. And yet I remain optimistic. One belief of my childhood I have preserved with the certainty that I can never lose it; belief in truth. I am confident that the spirit generated by truth is stronger than the force of circumstances. In my view no other destiny awaits mankind than that which, through its mental and spiritual disposition, it prepares for itself. Therefore I do not believe that it will have to tread the road to ruin to the end.

"If men can be found who revolt against the spirit of thoughtlessness, and who are personalities sound enough and profound enough to let the ideals of ethical progress radiate from them as a force, there will start an activity of the spirit which will be strong enough to evoke a new mental and spiritual disposition in mankind.

"Because I have confidence in the power of truth and of the spirit, I believe in the future of mankind."

*From "Out of My Life and Thought"
Henry Holt & Co., Copyright, 1933, 1949

This *I Believe*

By Frank W. Abrams

Chairman of the Board, Standard Oil Company (New Jersey)

"... INCREASING numbers of business managers, I believe, feel that corporations should not take substantial benefits from their membership in the economic community while avoiding the normally accepted obligations of citizenship in the social community.

"This widening sense of social consciousness is disclosed in many ways: enlightened employee policies, openness in relations with shareholders, greater participation in community efforts. Here I want to talk about still another area, that of business contributions to private educational institutions.

"... Education, more and better education, is needed if we are to maintain that most cherished of man's works—a free society. More than ever before, men today need to know how to think; to weigh and appraise; to achieve the steadiness of vision and purpose that wisdom brings.

"The circle of problems that besets the American people is ever widening, calling in ever sterner tones for maturity and good judgment in their solution. Unless we have prudent and mature people on whom we can rely, great dangers are ahead for the general well-being of the country, and, incidentally, for stockholders' investments in corporations.

"The direct benefits are more evident.

"The task of management is becoming increasingly complicated, requiring a wide diversity of talents and training. We must look more and more to institutions of higher learning for the men and women we need. Corporations pay the colleges and universities little or nothing for training the personnel which they now eagerly recruit each June. I am convinced that American business neither needs nor wants a free ride, least of all from our private educational institutions, which we know to be hard pressed financially.

"... It is particularly important for us to retain a strong and vigorous group of private institutions of higher learning. The independent liberal arts college especially must be preserved in its full vigor. So-called liberal or general education is essential to the kind of free society in which business moves ahead and prospers. Maintaining the private liberal arts college as a genuinely independent institution, I believe, is indispensable to our way of life. For freedom rests on the competition of free choice, both in the business world and in the world of ideas.

"... It is appropriate to predict that business management will continue to enlarge its social vision; and that business contributions, including those to education, will become an important aspect of this enlarging viewpoint. The interests of the stockholders of the corporations of America require no less."

This *I Believe*

By George F. Kennan*

"WHAT is it that causes us to huddle together, herdlike, in tastes and enthusiasms that represent only the common denominator of popular acquiescence rather than to show ourselves receptive to the tremendous flights of creative imagination of which the individual mind has shown itself capable? Is it that we are forgetful of the true source of our moral strength, afraid of ourselves, afraid to look into the chaos of our own breasts, afraid of the bright, penetrating light of the great teachers?

"It may not seem to many of us too dangerous that we should all live, dress, eat, hear and read substantially alike. But we forget how easily this uniformity of thought and habit can be exploited, when the will to exploit it is there. We forget how easily it can slip over into the domination of our spiritual and political lives by self-appointed custodians who contrive to set themselves at the head of popular emotional currents.

"There is a real and urgent danger here for any one who values the right to differ from others in any manner whatsoever, be it in his interests or his associations or his faith.

"The forces of intolerance and political demagoguery are greedy forces, and unrestrained. There is no limit to their ambitions or their impudence. They contain within themselves no mechanism of self-control.

"It is for these reasons that I feel that you, in setting up at this time within this great academic community a center for liberal arts, are taking upon yourselves a great, though honorable, burden. You are going to have to swim against the tide of many of the things I have been talking about. You are frequently going to find arrayed against you, whether by intent or otherwise, the materialists, the anti-intellectuals, the chauvinists of all sizes and descriptions, the protagonists of violence and suspicion and intolerance, the people who take it upon themselves to delimit the operation of the principle of Christian charity, the people from whose memories there has passed the recollection that in their Father's house there are many mansions."

*Excerpts of an address delivered at a University of Notre Dame Convocation on May 15, 1953 by George F. Kennan, former Ambassador to Russia.

This *I Believe*

by Stanley A. Wolpert*

"FREEDOM will not be saved by men who have so little faith in her strength that with every sign of totalitarian attack they flee from her finest outposts and race into the arms of tyranny and suppression. Those who would shield our youth from the dangers of incitement forget Oliver Wendell Holmes' statement that 'every idea is an incitement.' Those who insist their only interest is national security forget Mills' warning that 'A State which dwarfs her men, in order that they may be more docile instruments in its hands even for beneficial purposes—will find that with small men no great thing can really be accomplished.'

"Daily the meaning of academic freedom is defined by the student who insists upon his right to be guided, not led or driven, in the direction of truth and understanding; by the teacher who resists all doctrinaire shackles, faithfully following the light of reason and conscience; by the administrator who values free inquiry above the largess of monetary endowments.

"Academic freedom means big minds and brave men. The flame burns lower, yet where it still burns it is fired with a fiercer light. We must not let it be killed, we dare not watch it die."

*Excerpt from First Prize Essay in nationwide essay contest on "The Meaning of Academic Freedom" sponsored by The National Council of Jewish Women.

This *I Believe*

By Robert M. Hutchins*

"... ONE gets from some of the statesmen of the day the impression, that under the influence of the Cold War, they have concluded that a country is not safe unless it is united, which is true, and then that a country cannot be united unless everybody in it agrees with everybody else about everything, which is false. The pleas for unity during the last electoral campaign had the same specious quality. That civilization of which a true university is a paradigm is one that is based on the premise that the truth is arrived at by discussion. Discussion implies that there is more than one point of view. The notion that the truth is arrived at by discussion is peculiarly applicable to practical, political, economic matters. A civilization in which the opinion of the majority is taken on such matters and must then be adopted by all is one that is doomed to stagnation. It ignores the fact that the most precious possession of any society is the thought of the minority, even a minority of one. The rule of the majority without discussion and criticism is tyranny.

"A great new term of reproach nowadays is 'controversial.' A university that is not controversial is not a university. A civilization in which there is not a continuous controversy about important issues, speculative and practical, is on the way to totalitarianism and death.

"Such a society may be said to be united, but it cannot be regarded as strong. We do not think it is a sign of strength that the rulers of Russia find it necessary to seek out and punish dissent. On the contrary, we have sense enough to see that the secret police and the Iron Curtain and the universal program of indoctrination practiced in Russia amount to a confession of weakness. The rulers of Russia do not have enough confidence in the adherence of the people to the principles of Communism—or in those principles themselves—to permit a free continuing discussion of them. If we want an example of a strong society all we have to do is to look at that association of thirteen struggling states which at the outset of its career, as it faced a sea of troubles, adopted the Bill of Rights of our Constitution. The United States of that day may have looked weak and disunited. Actually it was strong because it was not afraid. It was not afraid to have its principles submitted to critical examination. It was united in the conviction that strength and progress lay not in social and political conformity, but in the constant exercise of individual judgment, in independent thought and criticism."

*Reprinted from May 1953 issue of the *Bulletin of the Atomic Scientists*, and based on one of a series of Walgreen lectures given at the University of Chicago, April 6-9, 1953. The series of four lectures will be published in book form by the University of Chicago Press late this year. Copyright by The University of Chicago.

This *I Believe*

by Elmer Davis*

. . . "WHY should we be saved? What have we got that our adversaries have not that makes us worth saving? Our faults, God knows, are numerous and glaring enough; recognition of those faults is the chief cause of the loss of confidence that has afflicted so many people of the Western world. But we do recognize them; we do not pretend that our failures were decreed by ineluctable historical necessity; nor do we rewrite history according to the precepts of Double-think, to prove that they never happened at all.

"What we have to offer, to the contemporary world and to the future, is a method; and the freedom of the mind that makes that method possible. Not an infallible method, but the best yet discovered for reaching increasingly closer approximations to the truth. It will never offer its conclusions with such assurance as does dialectical materialism—which, by a singular coincidence, always seems to produce the conclusions that are convenient for the men in power. It can only say, We have kept the door open for exploration of all possibilities, consideration of all objections, application of all possible tests; and this is what seems to be true. Maybe something else will seem more probable later on, but this is the best we can do now. Or, as the method was summarized long ago—Prove all things; hold fast that which is good.

"This method has been responsible for almost all human progress. Outside the Western world it does not exist, except in those parts of the East which have been influenced by Western thought; if it died here, it would die there, too. President Conant has remarked that the right to think and question and investigate is the basic difference between the free world and the world of totalitarianism. It might well be the basic difference that would save us, if it came to a shooting war; and whether it does that or not, this one thing—the scientific method, and above all the freedom of the mind that makes it possible—is what makes us worth saving."

*Reprinted from the August 1953 issue of Harper's Magazine.

This *I Believe*

by Robert Redfield*

"TODAY WE have an immense Governmental enterprise . . . popularly known as the 'Voice of America.' . . . It is desirable that other people see the good about us that can give them reason to like and to help us. So we help them to see the good about us by telling them about it. We 'sell' the American way.

". . . But I do think our talking is insufficiently balanced by listening. I do not think that we listen enough to what other people are trying to say to us about themselves, and I do not think we listen enough to the sound of what we say in the ears of him to whom we say it. . . . Just because we think great combines moving over vast fields of wheat are proofs of what great fellows we are, we took it for granted that Chinese and Middle Eastern peasants would look at pictures of these combines and admire us. By just listening for a moment to the sound of our voices in their ears instead of in our own we could find out that the combines, the tiled bathrooms and the skyscrapers in most cases make those peasants feel more remote from us and more suspicious of us than they were before. . . .

"Freedom of speech is not just speaking; it is speaking honestly and as one thinks. Also, it is listening. No one is really free to use speech effectively unless other people listen, and no one has earned the freedom to talk to a listening audience unless he listens when another talks. The perception of both difference and likeness is a necessary basis for a conversation between two individuals or between two nations. To talk as free men each must in effect say: 'You have a different view from mine, but we are both reasonable and human creatures, and I should like to know what your view is.' . . . A vote won by a reasonable argument understood and accepted is also a mind grown stronger. . . .

"At home and abroad to talk and then to listen, to listen with the help of reason and then reasonably to talk, is to strengthen us just where we can be so much stronger than the Soviets. It is to build the community of free minds, 'the civilization of the dialogue.' "

This *I Believe*

by Pericles*

Athens versus Sparta

"ATHENS favours the many instead of the few; this is why it is called a democracy. If we look to the laws, they afford equal justice to all in their private differences; if to social standing, advancement in public life falls to reputation for capacity, class considerations not being allowed to interfere with merit; nor again does poverty bar the way, if a man is able to serve the state, he is not hindered by the obscurity of his condition. The freedom which we enjoy in our government extends also to our ordinary life. There, far from exercising a jealous surveillance over each other, we do not feel called upon to be angry with our neighbour for doing what he likes, or even to indulge in those injurious looks which cannot fail to be offensive, although they inflict no positive penalty.

"If we turn to our military policy, there also we differ from our antagonists. We throw open our city to the world, and never by alien acts exclude foreigners from any opportunity of learning or observing, although the eyes of an enemy may occasionally profit by our liberality; trusting less in system and policy than to the native spirit of our citizens; while in education, where our rivals from their very cradles by a painful discipline seek after manliness, at Athens we live exactly as we please, and yet are just as ready to encounter every legitimate danger.

"Instead of looking on discussion as a stumbling-block in the way of action, we think it an indispensable preliminary to any wise action at all."

*Born circa 493 BCE.
"Funeral Oration of Pericles," from Thucydides' *The Peloponnesian War*.

This *I Believe*

By Harold D. Lasswell*

THE FINAL FACT OF WAR is likely to be less perilous than perpetual preparation for war. Perpetual crisis is likely to reverse the trend of historical development *from* progress toward a world commonwealth of free men, *toward* a world order in which the garrison-prison state reintroduces caste-bound social systems. . . .

The internal consequences of militarization are . . . far-reaching. Beginning as advisers of the civilian arm of government, soldiers and policemen gain stature. . . . In the name of security the soldier is permitted to impose restrictions upon the free flow of information and comment. The policeman is authorized to look into the loyalty of government employees, and of ever enlarging circles of persons who might under any conceivable set of circumstances prove dangerous to the state. Legal sanctions designed to protect the individual against official interference come to be more honored in the breach than in the observance. Public opinion becomes less well informed and less respected. Political parties decline as instruments of public control. Legislatures and courts decline in relation to the executive arm of government, elections degenerate into plebiscites, local initiative subsides, and civilian agencies give way in effective power to the organs of the military and the police. (In terms of skill, specialists on violence rise in power when compared with specialists on civilian administration, party administration, private business, and political propaganda.)

Perpetual crisis will bring the most extensive change in countries with a minimum of state-ism, and with a maximum of democracy, decentralization, and pluralization. (This takes in most of Western Europe and the English speaking peoples.)

In countries like Russia, long the domicile of Oriental despotisms, progress in the direction of a free man's commonwealth had been proclaimed, then slowed down, and finally brought to a full stop. Accentuating the danger of war, Russian elites reinstate the methods of despotism in the name of protecting the freedom which they have learned to postpone indefinitely.

Socialism and liberal capitalism both suffer as the garrison-police system consolidates. It is not socialism to bend all the resources of the community to military purposes, because the socialist ideal is to produce for use. . . . Capitalism wanes when the energy of the community is centrally directed toward military ends. Both socialism and capitalism postulate a higher level of freedom than is compatible with the garrison-prison system.

Hence it is inadequate to say that the dominant crisis of our time is socialism *versus* capitalism. More correctly, it is socialism *and* capitalism *versus* the garrison-prison state.

*"The Universal Peril: Perpetual Crisis and the Garrison-Prison State", PERSPECTIVES ON A TROUBLED DECADE: SCIENCE, PHILOSOPHY, AND RELIGION 1939-1949 (A symposium edited by Lyman Bryson, Louis Finkelstein, R. M. MacIver) Harper & Brothers (1950)

This *I Believe*

By Tocqueville*

"MORALISTS are constantly complaining that the ruling vice of the present time is pride. This is true in one sense, for indeed everybody thinks that he is better than his neighbor or refuses to obey his superior; but it is extremely false in another, for the same man who cannot endure subordination or equality has so contemptible an opinion of himself that he thinks he is born only to indulge in vulgar pleasures. He willingly takes up with low desires without daring to embark on lofty enterprises, of which he scarcely dreams.

"Thus, far from thinking that humility ought to be preached to our contemporaries, I would have endeavors made to give them a more enlarged idea of themselves and of their kind. Humility is unwholesome to them; what they most want is, in my opinion, pride."

*DEMOCRACY IN AMERICA (1835-40)

This *I Believe*

RUTH BENEDICT*

"... NO MAN ever looks at the world with pristine eyes. He sees it edited by a definite set of customs and institutions and ways of thinking. Even in his philosophical probings he cannot go behind these stereotypes; his very concepts of the true and the false will still have reference to his particular traditional customs. John Dewey has said in all seriousness that the part played by custom in shaping the behaviour of the individual as over against any way in which he can affect traditional custom, is as the proportion of the total vocabulary of his mother tongue over against those words of his own baby talk that are taken up into the vernacular of his family.... The life history of the individual is first and foremost an accommodation to the patterns and standards traditionally handed down in his community. From the moment of his birth the customs into which he is born shape his experience and behaviour. By the time he can talk, he is the little creature of his culture, and by the time he is grown and able to take part in its activities, its habits are his habits, its beliefs his beliefs, its impossibilities his impossibilities. Every child that is born into his group will share them with him and no child born into one on the opposite side of the globe can ever achieve the thousandth part. There is no social problem it is more incumbent upon us to understand than this of the role of custom. Until we are intelligent as to its laws and varieties, the main complicating facts of human life must remain unintelligible."

*"Patterns of Culture"
Houghton Mifflin Co. (1934)

This *I Believe*

Julian Huxley*

"VALUES appear absolute for two reasons. The first is a result of the structure of language. The very existence of general and abstract terms like true and truth implies that an absolute Truth exists, and also that there is always an absolute difference between truth and falsehood. This, however, is not the case. Truth is only absolute when it deals with the incomplete, such as the abstractions from reality that form the basis of mathematics. The absolute difference between truth and falsehood only applies in a limited number of situations. The fact remains, however, that man's capacity for conceptual thought makes it extremely difficult for him to think in relative terms. The general and the abstract tend, almost automatically, to become invested with the intellectual halo of the absolute. The lesson of science is that this tendency should be resisted. Paradoxically, we find that we are enabled to accumulate a more complete and a more certain store of knowledge when, as in science, we reject the possibility of absolute completeness or absolute certainty, and are prepared to abandon our dearest theories in the face of new facts.

"What holds for truth holds also for beauty and goodness. But in the case of goodness in particular, this predisposition to translate the particular into the general, the general into the abstract, and the abstract into the absolute, is reinforced by another effect—the sense of emotional certitude which in its origin is to be traced to the mental mechanisms growing out of the need for infantile repression. Thanks to repression, it is natural for us not only to think in absolute terms, but to feel in them. The inhibiting influences of the super-ego tend to produce an intolerant assurance of being right, because only through such an assurance could they have succeeded in repressing their opponents into the unconscious. In so far as they succeed, they acquire emotional certitude; and that emotional certitude, given the construction of the human mind, inevitably tends to rationalize itself by claiming absolute value."

*MAN IN THE MODERN WORLD
HARPER & BROTHERS (1944)

This *I Believe*

By Pascal*
(1623-1662)

"MAN would fain be great and sees that he is little; would fain be happy and sees that he is miserable; would fain be perfect and sees that he is full of imperfections; would fain be the object of the love and esteem of men, and sees that his faults merit only their aversion and contempt. The embarrassment wherein he finds himself produces in him the most unjust and criminal passions imaginable, for he conceives a mortal hatred against that truth which blames him and convinces him of his faults."

*Pensées

This *I Believe*

By Eric Hoffer*

. . . . . "SELF-CONTEMPT, however vague, sharpens our eyes for the imperfections of others. We usually strive to reveal in others the blemishes we hide in ourselves. Thus when the frustrated congregate in a mass movement, the air is heavy-laden with suspicion. There is prying and spying, tense watching and a tense awareness of being watched. The surprising thing is that this pathological mistrust within the ranks leads not to dissension but to strict conformity. Knowing themselves continually watched, the faithful strive to escape suspicion by adhering zealously to prescribed behavior and opinion. Strict orthodoxy is as much the result of mutual suspicion as of ardent faith.

"Mass movements make extensive use of suspicion in their machinery of domination. The rank-and-file within the Nazi party were made to feel that they were continually under observation and were kept in a permanent state of uneasy conscience and fear. Fear of one's neighbors, one's friends and even one's relatives seems to be the rule within all mass movements. Now and then innocent people are deliberately accused and sacrificed in order to keep suspicion alive. Suspicion is given a sharp edge by associating all opposition within the ranks with the enemy threatening the movement from without. This enemy—the indispensable devil of every mass movement—is omnipresent. He plots both outside and inside the ranks of the faithful. It is his voice that speaks through the mouth of the dissenter, and the deviationists are his stooges. If anything goes wrong within the movement, it is his doing. It is the sacred duty of the true believer to be suspicious. He must be constantly on the lookout for saboteurs, spies and traitors."

This *I Believe*

By Adlai E. Stevenson*

"THE cause of freedom, of human decency, does not advance in measured tread. There are times of retreat and times of enduring advance. It may be given to our time to recognize that the reputation of our government, of surpassing importance in the affairs of men, reflects in no small measure the extent of its concern for justice, honesty, and restraint in dealing with all its citizens at all times and under all circumstances.

"And let me say also that government, to the man in the street, is frequently as all-inclusive as it is ill-defined. He is not much given to speculation about the separation of powers; and the executive, the legislative, and the judicial often manage to get hopelessly intermingled in his mind. He does not distinguish too sharply between a cabinet member, a district judge, or a congressional committee chairman. He simplifies and personifies, and government takes its coloration for him from the acts of all. All have, therefore, a responsibility for the picture that emerges. Anyone can deface it.

"The short of the matter is that the survival of our freedoms, individual and collective, is closely linked to the good name, the private reputation, if you please, of our government. Its preservation is necessary to evoke the loyalties, both at home and abroad, upon which government must make heavy drafts."

*Harper's Magazine, April 1954.

This *I Believe*

By José Ortega y Gasset*

"OUR firmest convictions are apt to be the most suspect, they mark our limitations and our bounds. Life is a petty thing unless it is moved by the indomitable urge to extend its boundaries. Only in proportion as we are desirous of living more do we really live. Obstinately to insist on carrying on within the same familiar horizon betrays weakness and a decline of vital energies. Our horizon is a biological line, a living part of our organism. In times of fullness of life it expands, elastically moving in unison almost with our breathing. When the horizon stiffens it is because it has become fossilized and we are growing old."

This *I Believe*

By H. A. Overstreet*

"WHERE the individual stops the learning process too soon; where he is content to be 'an ignorant old man'; or even an 'ignorant middle-aged man,' he becomes a breeding place not only of misinformation, but of wrong opinion, prejudice, suspicion, and hatred. The tragic antagonisms of the world come mostly out of the dark ignorance of men. Where men, by the millions, never develop into a mature awareness of the facts of their world; where their minds remain trapped in childish half truths, in rumor and innuendo, they are the soil for the growth of all kinds of noxious weeds.

"Again, where the individual is arrested in his emotional development; where in the forties and fifties he is still emotionally a child—irresponsible, self-centered, wanting things for his own satisfaction, oblivious to others—he is a dangerous person to have around. Multiply such emotional child-adults by the millions and we have a civilization in which centering in oneself rather than in the common well-being becomes the ugly rule of survival.

"The issue of our life, then, is to keep the psychological growth processes going; the growth of the mind into a fuller and clearer apprehension of its world; the growth of emotional life into a wider and more generous relating of the self to its world. Where the growth processes stop there is various tragedy: it may be merely a tragedy to the individual self—a flattening out into harmless dullness; or it may also be a tragedy to others—as when the ungrownup self, in ignorance, or in selfishness, or in both, plays havoc with the life around him."

This *I Believe*

By Arnold J. Toynbee*

"THE way of wisdom and hope surely lies in being true to our fathers' Western liberal faith. Now that the non-Western majority of mankind has made our Western liberal ideas its own, we ought to welcome their demand for liberty, equality and fraternity as a fulfillment of our Western liberal mission in the world. We ought to welcome it and to show that we are not going to stand in its way, and then we may look forward to winning Asia's and Africa's goodwill.

"But what about the enemy who has been sowing tares in the field? If we countenance the world revolution, shall we not be playing into communism's hands? No, surely it is the other way about. We shall be playing into communism's hands if we are so foolish as to behave like Metternich.

"Communism has two sides to it. It is both a religion and a political movement. Its prospects as a religion are unpromising. Its prospects as a political movement lie on the knees of the West. Communism's political fortune will be made or marred, not so much by what the Communists do or do not do as by the West's choice between alternative Western policies for dealing with those submerged three-quarters of the human race who have been treated by the West as 'natives' for the last few hundred years."

*"The Revolution We Are Living Through"
By Arnold J. Toynbee
The New York Times Magazine, July 25, 1954

This *I Believe*

by D. W. Brogan*

"THE American problem is the British problem, the French problem, the Polish problem: the reconciliation of real national autonomy, of real national tradition, with the needs of a new world society. There is no hope at all in creating a world society whose unity is to be bought at a cost of sacrificing what the nations (the only communities that now exist) have painfully learned about themselves. Each nation will have its own handicaps to overcome, but this is given by the nature of the case. The American people can contribute to the world community only as Americans. As Americans they have much to give, materially and spiritually: a well-founded optimism about their own possibilities; a well-founded belief that some of the problems of unity in the absolute essentials, combined with diversity in all departments of life where diversity is possible, have been solved in the American historical experience. The problem set us and all peoples by the technological unification of the world is extremely difficult. It will be hard to solve, at best, and it may easily be made insoluble by pretense that its basic difficulty either does not exist or can easily be got round—the difficulty of creating an effective sense of common duty and common interest among the separate and quite different peoples of the world. That separateness, that difference, need not be insuperable obstacles if they are first allowed for and their origins understood. It is, I have been told, one of the most formidable of Chinese imprecations to wish that your enemy lived 'in interesting times.' We live in very interesting times; times not to be made better by any simple formula. Understanding each other is not enough, but it is an indispensable beginning."

This *I Believe*

By Paul G. Hoffman*

"When the danger appears, people naturally become excited—both sober people and people given to excitability. There is a demand for fast, forceful action. As the pressure mounts for counter-measures, many people become impatient with due process of law and begin resorting to vigilante methods. There is a readiness to let anyone who can promise a panacea take the law into his own hands—a willingness to accept demagogic assaults on freedom and justice in the hope that perhaps the demagogues will have the quick answers. In the guise of 'patriots,' lawflouting organizations and personalities appear. . . .

"But as time goes on more and more people arrive at the realization that the problem becomes only deeper when justice is mocked, that innocent people are getting hurt, and that the demagogues' answers not only are repugnant to a free society but they are wrong! In the end, wisdom prevails, the danger is met and conquered through democratic processes, and the nation emerges stronger than ever."

This *I Believe*

By John Jay Hopkins*

"Cooperation by American private enterprise groups with their opposites in friendly foreign nations on creative uses of the atom must eventually erase economic inequalities and political uncertainties. I look for the rapid development and export of industrial atomic equipment and techniques for implantation in 'have not' nations.

"Such a program, peaceful in purpose but revolutionary in effect, could shatter the Communist ideological appeal in Asia and Africa, in Indonesia, Indo-China, China, India and Arabia, by abolishing for all practical purposes the abyss between those who 'have' and those who 'have not'. By unlocking and sharing the secret of the industrial, chemical, biological and medical atom, we might in due time reduce the difference between the 'haves' and the 'have-nots' to something like the difference between 99 and 100 instead of the difference between 1 and 200. The conflict between East and West cannot be resolved by military means, by Marxian dialectic, by paper proposals, or by conference technique. Reconciliation of man to man can be effected only by eliminating the causes of conflict—fear and want, greed and hate.

"Such a program of private atomic assistance would be of necessity a gradual one. For experience teaches us that nationalism, coupled with poverty, is an impatient and brutally aggressive force. We must, therefore, maintain a formidable defense with one hand while with the other we assist those less fortunate."

This *I Believe*

by W. W. Rostow*

"INDIA has begun its attempt to industrialize in a way exactly opposite to Communist China. China is investing in heavy industry. India has plowed its scarce capital, for the First Five Year Plan, primarily into agriculture. China is forcing its peasants into collectives, by threat and force. India is trying to induce the peasant to improve his methods, to increase the use of chemical fertilizers, to install new irrigation facilities, to double-crop his land. All this is done painstakingly by education and example.

"The results thus far are remarkably hopeful. The substantial increase in agricultural output planned in India for the First Five Year Plan has been achieved in three years; and the evidence is that a constructive chain reaction is sweeping the Indian countryside, far beyond the demonstration villages. The returns are not yet in; but there is a distinct possibility that this truth will become evident: in underdeveloped areas, starting from scratch, with a population predominantly made up of peasants, the method of consent is not only right morally, it is right technically as well.

"A Free World economic program, with strong U.S. support, might demonstrate this simple truth, notably in the competition between India and Communist China. These two great nations are simultaneously attempting a radical transformation. Over the next decade they plan to put themselves in a position where economic growth will be relatively automatic. Throughout Asia, and throughout the vast underdeveloped portions of the world, the relative performance of Communism and Democracy at this monumental task will be closely watched and weighed."

This *I Believe*

by Lao Tzu*

As for those who would take the whole world
To tinker it as they see fit,
I observe that they never succeed:
For the world is a sacred vessel
Not made to be altered by man.
The tinker will soil it;
Usurpers will lose it.

For indeed there are things
That must move ahead,
While others must lag;
And some that feel hot,
While others feel cold;
And some that are strong,
While others are weak;
And vigorous ones,
With others worn out.

So the Wise Man discards
Extreme inclinations
To make sweeping judgments
Or to a life of excess.

This *I Believe*

by Harrison E. Salisbury*

. . . "THE Great Dictator cannot shuffle and experiment. . . . His choice of generals is limited. Even his choice of tactics and strategy may be restricted. For he cannot lose. . . . The famous Stalingrad encirclement was achieved by the Russians largely because Hitler's commanders had no freedom to obey the ordinary laws of military necessity. . . .

"Thus, the supposed 'freedom of action' of the dictator, his ease in meeting problems, the absence of controls over his acts become in reality a straitjacket which is often more constricting than the checks and balances of democracy. The dictator must walk a narrow path leading only upward. He is limited by the dialectic of communism or Nationalist Socialism in his choice of techniques and only too often is even more sharply restricted by the urgencies of his presumed infallibility. He must reveal no mortal flaw in his divine apparatus. Thus, considerations of prestige often do not permit him to utilize the men whose brains and ability he and his country badly need. And there is no parliament to compel him. . . .

"Every dictatorship by its very nature must be a police state. Only police can provide the terror which is necessary to make people work and accept such conditions. But once the population is intimidated the police themselves become a problem, for in the absence of threats to the state threats must be created. It is only in an atmosphere of threat and terror that the wheels of the mechanism can be made to turn over. Ordinary motivations are destroyed or paralyzed by the terror.

"The closer you look at dictatorship the more you are surprised, not at its surface 'efficiency' but that the system can be made to run at all. The sheer effort which a man like Stalin had to mobilize just to make his clumsy dictatorship work would have produced miracles if applied to our supposedly cumbersome democratic apparatus."

*THE FATAL FLAWS OF DICTATORSHIPS

This *I Believe*

By Bertrand Russell*

"AS GEOLOGICAL time is reckoned, Man has so far existed only for a very short period—1,000,000 years at the most. What he has achieved, especially during the last 6,000 years, is something utterly new in the history of the Cosmos, so far at least as we are acquainted with it. For countless ages the sun rose and set, the moon waxed and waned, the stars shone in the night, but it was only with the coming of Man that these things were understood. In the great world of astronomy and in the little world of the atom, Man has unveiled secrets which might have been thought undiscoverable. In art and literature and religion some men have shown a sublimity of feeling which makes the species worth preserving.

"Is all this to end in trivial horror because so few are able to think of Man rather than of this or that group of men? Is our race so destitute of wisdom, so incapable of impartial love, so blind even to the simplest dictates of self-preservation that the last proof of its silly cleverness is to be the extermination of all life on our planet? For it will be not only men who will perish, but also the animals and plants, whom no one can accuse of Communism or anti-Communism.

"I cannot believe that this is to be the end. I would have men forget their quarrels for a moment and reflect that, if they will allow themselves to survive, there is every reason to expect the triumphs of the future to exceed immeasurably the triumphs of the past. There lies before us, if we choose, continual progress in happiness, knowledge, and wisdom. Shall we, instead, choose death, because we cannot forget our quarrels? I appeal as a human being to human beings: remember your humanity, and forget the rest. If you can do so, the way lies open to a new Paradise; if you cannot, nothing lies before you but universal death."

This *I Believe*

By Judge Learned Hand*

"HERETICS have been hateful from the beginning of recorded time; they have been ostracized, exiled, tortured, maimed and butchered; but it has generally proved impossible to smother them; and when it has not, the society that has succeeded has always declined. Facades of authority, however imposing, do not survive after it has appeared that they rest upon the sands of human conjecture and compromise. And so, if I am to say what are 'the principles of civil liberties and human rights,' I answer that they lie in habits, customs—conventions, if you will—that tolerate dissent, and can live without irrefragable certainties; that are ready to overhaul existing assumptions; that recognize that we never see save through a glass, darkly; and that at long last we shall succeed only so far as we continue to undertake 'the intolerable labor of thought'—that most distasteful of all our activities. If such a habit and such a temper pervade a society, it will not need institutions to protect its 'civil liberties and human rights'; so far as they do not, I venture to doubt how far anything else can protect them: whether it be Bills of Rights, or courts that must in the name of interpretation read their meaning into them."

This *I Believe*

"The Challenge of Bandung"*

"THE voices of Asia often seem alien and distant. Yet an American, listening carefully as 29 Asian and African nations met at Bandung, couldn't help but hear echoes from his own country's past—reminders of the days when America was newly free, and jealous of its freedom, sensitive of its dignity, anxious to be left alone to make its own way.

"Yet it was something of a surprise—welcome and encouraging—that nation after nation got up at Bandung to shout for freedom. More, they spoke in support of the United States; Pakistan's Ali, the Philippines' Romulo, Iraq's al-Jamali, Sir John Kotelawala of Ceylon, and others exposed the promises of Communists and the woolly thinking of neutralists.

"But these Asians are not committed, willy-nilly, to the West and to the U. S. They are Asians, first and always. And as Asians, they often sympathize with the problems of China and China's Communists. Peking's able premier, Chou En-lai, made a strong impression at Bandung with his soothing talk of peace. Clearly the Communists can still increase their influence in Asia—and are bound to try by all means at their disposal.

"The U. S. can do the same. We can, that is, provided our approach to Asians and their problems is flexible, imaginative, and infinitely patient. Above all, Asian nations are concerned with independence and economic progress. We can help them help themselves toward their goals. But we must lean over backwards to respect their independence. This is essential in our efforts to avoid war; and if war should come, it is equally essential that they stand on the side of freedom.

"The 1.4-billion people of Asia and Africa speak in many voices. But they are speaking louder and more insistently to the world. That may well be the central fact of the next half century. And it is the challenge we must face."

*BUSINESS WEEK
May 7, 1955.
(Editorial)

This *I Believe*

by Arnold J. Toynbee*

"IN a World War III, each of the two belligerent camps would be totally encircled by the other. And total encirclement of each by all in an atomic war surely spells self-destruction for the human race.

"What is the moral? The moral is that we must aim at reaching, and at keeping on, a moral level that is high above our ancestors' most exalted moral ambitions. Though both camps feel—and not unreasonably feel—today that they must arm themselves heavily as a necessary measure of insurance, we must school ourselves to arm effectively, as a deterrent against possible attack (for we can hardly hope any longer to achieve effective self-defense), without feeling hostile or bitter or angry toward our potential opponents.

"On both sides of the Iron Curtain we human beings have now to be unprecedentedly self-controlled and patient with one another. We are all now in the same boat, on board this small atom-bomb-haunted planet. And we are all in the same spiritually humbling situation. Ever since man has known anything about himself he has known that he is an incongruous creature, in whom astonishingly high moral, as well as intellectual, capacities are combined with abysmally low moral depths.

"In our own time the spiritual paradox of this inner contradiction in human nature, and also its practical perilousness, has been accentuated by the speed and range of our intellectual triumphs in the field of physical science and in the practical applications of science in technology. So today, if ever, 'I see another law in my members, warring against the law of my mind, and bringing me into captivity to the law of sin which is in my members. O wretched man that I am! Who shall deliver me from the body of this death?'

"Here is a common human plight that is more serious even than the possession of atomic weapons, because it is our moral plight that makes our physical weapons dangerous. Here is ground for a humility that lies deeper than the various superstructures of mankind's religions and ideologies. Here is a problem that is common to all human beings as such. Cannot we cooperate to cope with it, without prejudice to our prejudices about other things?"

The New York Times Magazine—May 1, 1955.

This *I Believe*

by Julian Huxley*

"As a biologist, but also as a human being, I want to affirm the unique importance of love in life—an affirmation badly needed in a tormented age like ours, where violence and disillusion have joined forces with undigested technological advance to produce an atmosphere of cynicism and crude materialism.

"Love is indispensable. Mother love is indispensable for children's healthy and happy growth, both physical and spiritual. Personal love is indispensable both for the continuance of the species, and for the full development of the individual. Love is part of personal education; through love, the self learns to grow. Love of beauty and of all lovely and wonderful things is equally indispensable for our growth and the realization of our possibilities. It brings reverence and a sense of transcendence into personal love, and indeed into all of life. Love is a positive emotion, an enlargement of life; it leads on toward greater fulfillment and counteracts human hate and destructive impulses.

"Let the final word be that of a poet who was also a man of science—Robert Bridges: '. . . God's worshiper looking on any beauty falleth straightway in love; . . . love is a fire in whose devouring flames all earthly ills are consumed'."

*ALL ABOUT LOVE
By Julian Huxley
Look Magazine—July 12, 1955

This *I Believe*

Albert Schweitzer*

"As one who tries to remain youthful in his thinking and feeling, I have struggled against facts and experience on behalf of belief in the good and the true. At the present time when violence, clothed in life, dominates the world more cruelly than it ever has before, I still remain convinced that truth, love, peaceableness, meekness, and kindness are the violence which can master all other violence. The world will be theirs as soon as ever a sufficient number of men with purity of heart, with strength, and with perseverance, think and live out the thoughts of love and truth, of meekness and peaceableness."

*"Memoirs of Childhood and Youth"

The Macmillan Company

This *I Believe*

By John Herman Randall Jr.*

"THE essence of the American spirit is to be cosmopolitan, to be free from the provincialism, the parochialism, and the prejudices of European lands, with their tight unified national traditions bred of a millennium of competition in warfare. That spirit is found at its best in our metropolitan cities, like San Francisco, Chicago, or New York. Our fellow countrymen often say that such cities are not like the rest of America; they sometimes insist that Chicago or New York is not truly "American" at all. On the contrary, I am profoundly convinced that our great cosmopolitan cities are the most "American" of all our many communities. They have learned to understand best just what America really means.

"For America is not a nation, but a continent—a continent in process of growing into a community. It is not a "nation": it is not bound together by those ties which European nations cherish—a common origin, a common "stock," common traditions, a common religion. America, thank God, is united by no common and shared faith, to make it intolerant of other faiths and loyalties, as faith so often does. America has always been a welter of differing faiths, in which each has had to learn first to let the others alone, then to respect them, and eventually to cooperate with them. Hence for Americans a man's "faith" has not been a "public" but a "private matter"—an attitude quite incomprehensible to Europeans, for whom "faith" has normally served as a club to enforce public uniformity.

"America is united in no common tradition—save that of living and working together. America faces forward to a shared task, not backward to shared memories. It is willing to learn—and what is still harder, to forget, to scrap prejudices, and to experiment with what is new. The United States is bound together not, like European nationalities, by a common past, but by a common future—by common interests, common enterprises, and common methods of getting along with each other. It is unified, not in a common religion, which would inevitably look to what has already been, but in a common education, which looks to what is yet to be."

This *I Believe*

By Homer W. Smith*

"As a fallen angel, man would be ludicrous. As an intelligent animal, he has reason to be proud because he is the first who can ask himself, 'Whither, Why, and Whence?'

". . . he can know himself as a creature of earth who has risen by his own efforts from a low estate. If he would rise higher he must be true to earth, he must accept that he is its creature, unplanned, unprotected and unfavored, conatural with all other living creatures and with the air and water and sunlight and black soil from which their dynamic pattern has been fabricated by impersonal and indifferent forces. . . .

". . . No pattern of living is written in the stars: each may be tried and esteemed according to the individual. No principle of justice is foreordained: justice must be realized between individuals as a reasoned compromise. . . . To analogize between the human organism, the individual, the highest court of appeal in all human affairs, and the aggregate of individuals that comprises society is to fall into a grave biological error. No value, right or virtue can be discovered in any pattern of living that does not stem from the individuals concerned. . . . Individual men must dictate their Bill of Rights, and not 'society.'

". . . But appended to the Bill of Rights is an unwritten Bill of Duties: sharing the benefits of collective effort in no measure abrogates man's individual responsibility. What man does, he does as an individual, what he would do, men as individuals must do. . . . His fate was not decreed in the temple of Osiris, or written on the tablets of Marduk, or settled by Olympian conclave or predestined by a righteous Yahweh—he has always had it clutched in his own hands, he need but open his fingers to read his lifeline. . . . He alone by his own efforts can enlarge the bounds of empire, to the effecting of all things possible, to remolding this sorry scheme of things nearer to the heart's desire. He alone can see himself and his world in width and depth. He alone can choose, out of his vision of the present and the past, his future course."

This *I Believe*

By Maeterlinck*

"AT EVERY crossway on the road that leads to the future, each progressive spirit is opposed by a thousand men appointed to guard the past. Let us have no fear lest the fair towers of former days be sufficiently defended. The least that the most timid among us can do is not to add to the immense dead weight which nature drags along.

"Let us not say to ourselves that the best truth always lies in moderation, in the decent average. This would perhaps be so if the majority of men did not think on a much lower plane than is needful. That is why it behooves others to think and hope on a higher plane than seems reasonable. The average, the decent moderation of today, will be the least human of things tomorrow. At the time of the Spanish Inquisition, the opinion of good sense and of the good medium was certainly that people ought not to burn too large a number of heretics; extreme and unreasonable opinion obviously demanded that they should burn none at all.

"Let us think of the great invisible ship that carried our human destinies upon eternity. Like the vessels of our confined oceans, she has her sails and her ballast. The fear that she may pitch or roll on leaving the roadstead is no reason for increasing the weight of the ballast by stowing the fair white sails in the depths of the hold. They were not woven to molder sider by side with cobblestones in the dark. Ballast exists everywhere; all the pebbles of the harbor, all the sands of the beach, will serve for that. But sails are rare and precious things; their place is not in the murk of the well, but amid the light of the tall masts, where they will collect the winds of space."

**Maeterlinck: Our Social Duty*

This *I Believe*

"**Lord**, make me an instrument of Your peace. Where there is hatred, let me sow love; where there is injury, pardon; where there is doubt, faith; where there is despair, hope; where there is darkness, light; and where there is sadness, joy.

"**O Divine Master**, grant that I may not so much seek to be consoled as to console; to be understood as to understand; to be loved as to love; for it is in giving that we receive; it is in pardoning that we are pardoned; and it is in dying that we are born to eternal life."

(Attributed to SAINT FRANCIS OF ASSISI)

This *I Believe*

By Harry A. Bullis*

"Intellectual maturity can no longer be left to a small element of our society. It must expand to cover large segments of our people, spread out from universities and bring a re-examination of human values and problems in the light of new facts. It is imperative for our survival that we develop an army of intellectually grown-up men and women. Today's undergraduates are candidates for tomorrow's corps of leaders. To justify their membership they must use their academic education as the starting point, not the termination of their intellectual growth. It is the future they must look to, a future inevitably to be far different from the present. Only the penetrating and highly trained mind can appraise the future and prepare to win success in it.

"A highly educated man has been educated at two levels: first, he has a practical understanding of modern technology, is able to foresee its developments and their economic and sociological impact on modern society. Second, he has been tutored in humanistic values. His knowledge of history, economics, religions, sociology, and psychology must be so thorough that he can evaluate change in terms of continuing human progress rather than as a threat to human stability.

"At the same time he must be so mentally flexible that he can avoid at all times the psychic shock that too often comes with changes. He must be able to accept new techniques and precedent-destroying discoveries without discarding the valid experiences of the past. Rather he must be able to re-examine historic contributions to human progress and relate them to current thinking and technological advance. The ability constantly to reappraise the factors of civilization in terms of progress is the mark of the intellectually and emotionally mature man."

This *I Believe*

By John Stuart Mill*

"The disposition of mankind, whether as rulers or as fellow-citizens, to impose their own opinions and inclinations as a rule of conduct on others is so energetically supported by some of the best and some of the worst feelings incident to human nature that it is hardly ever kept under restraint by anything but want of power; and as the power is not declining, but growing, unless a strong barrier of moral conviction can be raised against the mischief, we must expect, in the present circumstances of the world, to see it increase."

The Vision of Micah

IN THE end of days it shall come to pass,
That the mountain of the Lord's house shall be established on the top of the mountains,
And it shall be exalted above the hills.
Peoples shall flow unto it,
And many nations shall come and say,
"Come, let us go up to the mountain of the Lord,
To the house of the God of Jacob;
So that he may teach us of his ways,
And we will walk in his paths;
For the law shall go forth from Zion,
And the word of the Lord from Jerusalem."
And He shall judge among many peoples,
And rebuke strong nations afar off;
They shall beat their swords into plowshares
And their spears into pruning-hooks;
Nation shall not lift up sword against nation,
Neither shall they learn war any more.
They shall sit every man under his vine and under his fig tree;
And none shall make them afraid;
For the mouth of the Lord of hosts hath spoken it.
For as all the peoples walk every one in the name of his god,
We will walk in the name of the Lord our God for ever.

Micah, Chapter IV

This *I Believe*

JUDGE not, that ye be not judged.

2 For with what judgment ye judge, ye shall be judged; and with what measure ye mete, it shall be measured to you again.

3 And why beholdest thou the mote that is in thy brother's eye, but considerest not the beam that is in thine own eye?

4 Or how wilt thou say to thy brother, Let me pull out the mote out of thine eye; and behold, a beam is in thine own eye?

5 Thou hypocrite, first cast out the beam out of thine own eye; and then shalt thou see clearly to cast out the mote out of thy brother's eye.

6 Give not that which is holy unto the dogs, neither cast ye your pearls before swine, lest they trample them under their feet, and turn again and rend you.

7 Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you:

8 For every one that asketh, receiveth; and he that seeketh, findeth; and to him that knocketh, it shall be opened.

9 Or what man is there of you, whom if his son ask bread, will he give him a stone?

10 Or if he ask a fish, will he give him a serpent?

11 If ye then, being evil, know how to give good gifts unto your children, how much more shall your Father which is in heaven give good things to them that ask him?

12 Therefore all things whatsoever ye would that men should do to you, do ye even so to them: for this is the law and the prophets.

13 Enter ye in at the strait gate: for wide is the gate, and broad is the way that leadeth to destruction, and many there be which go in thereat:

14 Because strait is the gate, and narrow is the way, which leadeth unto life; and few there be that find it.

15 Beware of false prophets, which come to you in sheep's clothing, but inwardly they are ravening wolves.

16 Ye shall know them by their fruits. Do men gather grapes of thorns, or figs of thistles?

17 Even so every good tree bringeth forth good fruit; but a corrupt tree bringeth forth evil fruit.

18 A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit.

19 Every tree that bringeth not forth good fruit is hewn down, and cast into the fire.

20 Wherefore by their fruits ye shall know them.

St. Matthew, Chapter VII

This *I Believe*

DECLARATION OF THE RIGHTS OF MAN AND CITIZEN—French National Assembly, 1789

1. Men are born and remain free and equal in rights. Social distinctions can be based only upon public utility.

2. The aim of every political association is the preservation of the natural and imprescriptible rights of man. These rights are liberty, property, security, and resistance to oppression.

3. The source of all sovereignty is essentially in the nation; no body, no individual can exercise authority that does not proceed from it in plain terms.

4. Liberty consists in the power to do anything that does not injure others; accordingly, the exercise of the natural rights of each man has for its only limits those that secure to the other members of society the enjoyment of these same rights. These limits can be determined only by law.

5. The law has the right to forbid only such actions as are injurious to society. Nothing can be forbidden that is not interdicted by the law and no one can be constrained to do that which it does not order.

6. Law is the expression of the general will. All citizens have the right to take part personally or by their representatives in its formation. It must be the same for all, whether it protects or punishes. All citizens being equal in its eyes, are equally eligible to all public dignities, places, and employments, according to their capacities, and without other distinction than that of their virtues and their talents.

7. No man can be accused, arrested, or detained except in the cases determined by the law and according to the forms that it has prescribed. Those who procure, expedite, execute, or cause to be executed arbitrary orders ought to be punished: but every citizen summoned or seized in virtue of the law ought to render instant obedience; he makes himself guilty by resistance.

8. The law ought to establish only penalties that are strictly and obviously necessary and no one can be punished except in virtue of a law established and promulgated prior to the offence and legally applied.

9. Every man being presumed innocent until he has been pronounced guilty, if it is thought indispensable to arrest him, all severity that may not be necessary to secure his person ought to be strictly suppressed by law.

10. No one ought to be disturbed on account of his opinions, even religious, provided their manifestation does not derange the public order established by law.

11. The free communication of ideas and opinions is one of the most precious of the rights of man; every citizen then can freely speak, write, and print, subject to responsibility for the abuse of this freedom in the cases determined by law.

12. The guarantee of the rights of man and citizen requires a public force; this force then is instituted for the advantage of all and not for the personal benefit of those to whom it is entrusted.

13. For the maintenance of the public force and for the expenses of administration a general tax is indispensable; it ought to be equally apportioned among all the citizens according to their means.

14. All the citizens have the right to ascertain, by themselves or by their representatives, the necessity of the public tax, to consent to it freely, to follow the employment of it, and to determine the quota, the assessment, the collection and the duration of it.

15. Society has the right to call for an account from every public agent of its administration.

16. Any society in which the guarantee of the rights is not secured or the separation of powers not determined has no constitution at all.

17. Property being a sacred and inviolable right, no one can be deprived of it unless a legally established public necessity evidently demands it, under the condition of a just and prior indemnity.

Quoted in GREAT EXPRESSIONS OF HUMAN RIGHTS, Edited by R. M. MacIver, Harper Brothers, 1950

This *I Believe*

by Harry and Bonaro Overstreet*

"THE very temptation we face, in a time of fear and anger, to 'huddle' with our mental, emotional, and professional kind can lead us into a far from healthy state. It involves the risk that, exercising freedom of speech and assembly, we will talk ourselves into adding phantom threats to real ones—hitting out as furiously, or as nervously, at the one as at the other.

"Further than this, the temptation to 'huddle' with our kind involves the risk that we will, as a 'fear-sharing' group, talk ourselves into a strange 'apartness' from our society—an 'apartness' that can all too easily turn into a sense of being *excluded, discriminated against,* and *undervalued.*

"As a matter of fact, working as we ourselves do and have done over the years, with many different types of groups—racial, economic, religious, professional, political—we have been struck by the number and variety of groups that seem increasingly to feel themselves excluded, discriminated against, and undervalued. More than once we have found that when two groups—liberal and reactionary, or labor and management—are opposing each other over some issue *each sees itself as a beleaguered minority.*

"When a *sense of minority status* is thus simultaneously experienced by both parties to conflict it means, we believe, that each party has been talking too exclusively and too anxiously to itself. The members of each side have been *monologuing in unison*—and have monologued themselves into a state where they feel that their one consuming task is that of self-defense. Or to put the matter another way, they have exercised their Constitutional freedom of speech and assembly to trap themselves: to induce in themselves the distribution of energy that goes with fear and anger rather than with constructiveness and clarity of thought. Above we ventured the term 'voluntary catatonia' to describe the immobility of a mind that has been given room to move. Here—even though we recognize that the term is an exaggeration—we are tempted to speak of 'voluntary paranoia' to describe this use of freedom to talk ourselves and assemble ourselves into a conviction of being persecuted."

The Saturday Review—June 30, 1956

1956 Annual Report

THE WELCH GRAPE JUICE COMPANY, INC.
NATIONAL GRAPE CO-OPERATIVE ASSOCIATION, INC.
WESTFIELD, NEW YORK

TWO GREAT ORGANIZATIONS JOIN

On September 1 ownership of The Welch Grape Juice Company, Inc. was purchased from Old Welch Company, Inc. by National Grape Co-operative Association, Inc. Acquisition of the Welch business and trademarks by National culminated a contractual arrangement signed on June 2, 1952 and established a marketing precedent for agriculture in the United States.

The joining of these two great organizations—the oldest and most respected fruit juice processor in the United States and the strongest co-operative association of Concord grape growers in the world—was actually consummated after a close working relationship over the previous four years. During this period Welch achieved increasing sales each year, and National's membership quadrupled as the returns to members for grapes reached record levels.

The future for National and Welch is excellent. Members of National have now all the advantages that accrue to ownership of an outstanding trademark, including established consumer acceptance of Welch's top-quality, well-known products developed by nearly a century of outstanding advertising and marketing achievements. Members' grapes are processed in nine modern food plants; the processing and marketing of their products is handled by what has been described as "the most efficient and loyal production and sales team in the American food industry." They have the advantages of modern, well-equipped laboratories in which the quality of Welch products is assured, and in which constant research is conducted to develop new products and to improve present ones.

For the employees of both Welch and National the joining of these two great organizations means more opportunities for accomplishment. For the consumer it means continued availability of WELCH'S quality products and continued good services at fair prices.

J. M. KAPLAN

"We are grateful for the vision of the men who had confidence and faith in our association from the beginning, and to the one man—Jack Kaplan—who had the vision, imagination and courage to back us in our great endeavor."

HALL R. CLOTHIER, *First President*
National Grape Co-operative
Association, Inc.

THE WELCH GRAPE JUICE COMPANY, INC.

Since Dr. Thomas B. Welch produced the first unfermented grape juice in 1869 and pioneered the industry of canned and bottled fruit juices in America, The Welch Grape Juice Company, Inc. has been the acknowledged leader in the Concord grape processing and marketing field. Its products are known throughout the world. Its famous trademark "WELCH'S" has meant "pure enjoyment" to millions of people and, through 87 years of continuous satisfaction to consumers, has become synonymous with Concord grape products the world over.

Under the leadership of J. M. Kaplan, president of the firm until its acquisition by National Grape Co-operative Association, Inc., a tremendous expansion of the Welch business has taken place. Plant capacity has been increased to handle four times as many tons of grapes as were processed by Welch ten years ago. Sales volume is now four times higher than it was ten years ago.

NATIONAL GRAPE CO-OPERATIVE ASSOCIATION, INC.

National Grape Co-operative Association was organized in March, 1945, for the purpose of purchasing the grape processing plant at Brocton, N. Y., then owned by National Grape Corporation. This plant subsequently came under Welch ownership when J. M. Kaplan bought control of The Welch Grape Juice Company and was one of nine plants acquired by National on September 1, 1956.

From a membership of 891 in 1945 National has grown in size to its present strength of 4,278 Concord grape growers in New York, Pennsylvania, Ohio, Michigan, Indiana, Arkansas, Missouri, Washington, Oregon and Idaho. In 1945 National delivered 8,357 tons of Concord grapes to Welch plants. Out of the 1956 harvest its members delivered 93,000 tons.

Today, National is one of the foremost farmer cooperatives in the nation and represents one of the strongest farm groups in American agriculture. Its association with Welch has brought strength to the entire Concord grape industry.

LETTER FROM THE PRESIDENT

D. M. MOORHEAD

OUR goal has been reached. We now own The Welch Grape Juice Company, Inc. That historic event took place when the shares of Welch stock were delivered to National on September 1, 1956, giving all of us, as members of National, possession of our own processing and marketing facilities. These will continue to be managed and operated by the same outstanding group of people who made Welch a successful and internationally-known firm, famous for its quality products.

Due to most favorable operating results National was able to take title to the Welch properties out of the proceeds of only five crop years. The $15,000,000 paid for the Welch plants and equipment was accumulated as follows:

From the 1951 crop	$ 1,591,323.44
From the 1952 crop	3,235,069.72
From the 1953 crop	3,960,963.82
From the 1954 crop	4,341,546.67
From the 1955 crop	3,565,515.44
Five-year accumulation	$16,694,419.09

This amount is $1,694,419.09 over and above the $15,000,000 required by the agreement of June 2, 1952. This excess has been used to reduce the amount we owe for the net current assets, made up of grape juice inventories, supplies, trademarks, etc., which we took over from Welch on September 1, 1956. When these assets have been fully paid for, the money borrowed to pay for capital improvements and acquisitions since September 1, 1952 will then be repaid. Our total remaining debt on this purchase is now $13,432,724.87, which can be paid off in about four years if results of operation of the Welch business are as successful during the next four years as they have been in the recent past.

While the acquisition of Welch was being accomplished our members were, at the same time, receiving very high returns for their grapes. Here is a summary of those earnings:

Eastern Pool

	1951 Crop	1952 Crop	1953 Crop	1954 Crop	1955 Crop
Cash (per ton)	$ 90.00	$ 95.00	$100.00	$100.00	$ 95.00
Certificates (per ton)	38.67	55.33	52.38	53.91	50.75*
Total (per ton)	$128.67	$150.33	$152.38	$153.91	$145.75

*On November 28, 1955 your Board of Directors voted to pay 25 per cent less for unclassified grapes than for U. S. No. 1 juice grapes, in both cash and certificates; consequently, certificates for unclassified grapes will amount to $38.06 per ton.

Western Pool

	1952 Crop	1953 Crop	1954 Crop	1955 Crop
Cash (per ton)	$ 60.00	$ 65.00	$ 56.75	$ 80.00
Certificates (per ton)	38.27	44.90	38.66	23.93
Total (per ton)	$ 98.27	$109.90	$ 95.41	$103.93

These results were achieved in the face of highly competitive conditions in our industry. Western Pool returns were substantially higher for the 1955 crop than for the 1954 crop because the larger 1955 crop resulted in a reduction of expenses per ton when all operating expenses were "averaged" over the larger tonnage.

1955 Crop Sales

Competition was keen right from the beginning of fiscal 1956; low competitive prices prevailed throughout the year. Yet, in spite of these conditions, Welch advertising, promotion and merchandising was so effective that for the fourth straight year Welch earnings enabled us to pay our members the highest grape prices of any processor in the business.

Welch net sales volume was down about $1,500,000 from 1955. About one-half of this sales decline occurred in Welch's tomato juice as a result of a short pack in the fall of 1955. Welch's grape products sales were going well in 1956 until we experienced unseasonably cool, wet weather in many sections of the country during July and August, with the result that we did not get our usual summer lift in sales volume.

Capital Improvements

The principal additions and improvements at the Welch plants during the past year included a new tank room housing six steel tanks, plus additional refrigeration and heating equipment, at Brocton, New York; and a new tank room housing six steel tanks, plus extension of the sewage disposal system at North East, Pennsylvania. Further experimental work, on a production basis, was successfully carried on with newly-developed processing methods using continuous presses. Welch's plant properties and equipment were all maintained in tip-top condition.

The 1956 Harvest Season

The 1956 harvest was accomplished under unusually difficult conditions in almost every section of the country.

The Washington area, particularly the Kennewick-Pasco section, experienced a freeze during the fall of 1955 which ruined the crop in many vineyards—yet others in the Grandview area were hardly touched. As a consequence, Washington members delivered about 57 per cent of a normal crop.

Arkansas and Missouri growers had many problems because of adverse conditions which included a spring freeze, high winds, hail storms, plus extremely hot weather. This combination of conditions made it difficult for our members to harvest their crops. In spite of these problems, however, our members in these areas cooperated splendidly with management to the fullest extent, and for the first time in several years most growers in Arkansas and Missouri harvested a good crop.

In Michigan the pre-harvest prospect was for a bumper crop—one of the largest in history. However, the season proved tardy. The fruit did not mature normally and, consequently, the Welch plant at Lawton could not start processing as early as our members would have liked to deliver. Recognizing that such a late start meant unusual risks for our members, Welch took advantage of the delayed crop harvest in the East, secured more than 200 trucks and moved nearly 1,500 tons daily into the plant at Lawton and to the plant at Westfield, New York. Unfortunately, a freeze occurred on the 10th of October making it impossible to salvage the entire Michigan crop. If the movement of grapes to the East had not been undertaken, however, an additional 6,000 tons would have been lost. As it turned out over 90 per cent of the Michigan crop was handled in 19 days.

Growing conditions in the Chautauqua-Erie belt were probably the most unfavorable ever experienced. With a large crop on the vines, the cool summer and lack of sunshine made it impossible to start processing in volume until October 15, the latest date Welch plants have ever started. It was not until October 15 that grapes met Federal-State standards for juice grapes and even then only when growers "select-picked." Welch assisted the growers in their problems by encouraging "Brix testing" before picking and continued Brix testing of every load. This testing helped the growers to determine the kind of job their pickers were doing.

I cannot praise too highly the majority of our members, those who did such a wonderful job in "select-picking" their vineyards. It was an outstanding demonstration of cooperation. The work Welch has accomplished in holding up quality standards makes possible the marketing of our grapes under the famous Welch label with the assurance that consumers will have the same high quality grape products they are accustomed to expect from Welch.

Fortunately, we were blessed with perfect weather in October and early November, and as a consequence most of our members picked and delivered as many —and, in some cases, more—grapes than in 1955.

National-Welch

Many people have asked: How will Welch operate under new ownership? As we have mentioned many times before, there will be no material change;

DIVISION OF WELCH'S *1956* NET SALES DOLLAR

the operating management of Welch is made up of the same group of men who made the company so successful during these last few years. Welch will continue to operate as a separate organization, and will have its own board of directors who will employ managers to conduct the business under the general supervision of the board.

Directors of Welch are elected by National. The relationship between Welch and National really started back in 1945. Since 1952 Welch management has worked closely with National's board of directors. Actually, the business has been operated entirely for our benefit since 1952. The transfer of the Welch stock to National should not, in any substantial way, affect the character of the Welch business or its relationship with National's members.

General

Our report this year includes within one cover the separate reports of National and Welch—giving emphasis to the results of Welch operation. Study these pages carefully; this is *your* business, and you should become familiar with it. It has played, and should continue to play, a very important part in your life.

No cooperative organization in America has ever had our rare opportunity of taking over a successful, internationally-known business with such consumer acceptance as the brand "Welch's" enjoys. Welch has earned its reputation for quality, stability and dependability. These attributes have been achieved through sound business practices and good human relations by capable men and women who have earned our whole-hearted support.

I wish to thank all our members, committeemen, delegates and directors for their "all-out" cooperation, and to acknowledge the outstanding job the employees and officers of both National and Welch have accomplished.

Cooperatively yours,

Douglas M. Morshead

President

OUR NATION-WIDE FACILITIES

Headquarters for Welch-National operations is in Westfield, New York. Nine modern processing plants are strategically located in New York, Pennsylvania, Michigan, Washington and Arkansas. These plants have a combined yearly processing capacity of approximately 110,000 tons of grapes, or nearly 20,000,000 gallons of grape juice a year.

Because Welch products and services are used throughout the country, sales offices and broker representatives are located in key cities across the nation.

NOTES

(1) On August 31, 1956, The Welch Grape Juice Company, Inc., was merged into The Welch Plants Corporation. The accompanying Balance Sheet sets forth the assets and liabilities of these corporations at the beginning of business on September 1, 1956, and is issued in the name of The Welch Grape Juice Company, Inc., which, after the changes in name hereinafter set forth, is the present name of this organization.

(2) Under and pursuant to agreements entered into during the year 1952, National Grape Co-operative Association, Inc. (hereinafter referred to as the Co-operative) had the option to purchase the stock of The Welch Plants Corporation for $100,000 when the aggregate of the latter's 20-year non-interest bearing promissory notes issued to the Co-operative reached $15,000,000. This total was reached during 1956. However, pursuant to agreement between the Co-operative and Old Welch Company, Inc., the option to purchase The Welch Plants Corporation was transferred by the Co-operative to its wholly-owned subsidiary, National Subsidiary Corporation. The option was exercised by the latter on September 1, 1956.

Prior thereto, on August 31, 1956, The Welch Plants Corporation purchased the capital stock of The Welch Grape Juice Company, Inc. (representing capital of $501,942.21) and all accounts receivable by Old Welch Company, Inc., from The Welch Grape Juice Company, Inc. The price for such stock and accounts receivable, paid in mortgage notes, was $8,855,824.76, which comprised the book value of the company's assets plus $3,000,000, less the amount of its liabilities other than its obligations to Old Welch Company, Inc. The additional $3,000,000 represented payment for trade-marks, trade names, goodwill, etc. On the same date, immediately following the sale of its stock and obligations, The Welch Grape Juice Company, Inc., was merged into The Welch Plants Corporation. On September 4, 1956, the surviving company was merged into National Subsidiary Corporation and the latter's name was changed, first to The Welch Plants Corporation and then to The Welch Grape Juice Company, Inc.

(3) On September 4, 1956, a crop purchase agreement was made with the Co-operative covering the purchase of grapes and other produce and payment therefor, running for a period of 21 years, with payment for such purchases to be made in the following manner: (a) by cash payments during and shortly after each fiscal year in an amount determined by The Welch Grape Juice Company, Inc., but after consultation with the Co-operative and (b) with respect to additional payment for grapes, by the delivery to the Co-operative as at the end of each fiscal year of a

CAPITAL

Common stock—authorized, issued and outstanding 1,000 shares, par value $100.00 per share	100,000.00
TOTAL LIABILITIES AND CAPITAL	$34,592,357.66

20-year non-interest bearing promissory note in an amount equal to that pro rata share of 10% of the total net sale price of all products sold during such fiscal year which the tonnage of grapes delivered by the Co-operative members and patrons bears to the total tonnage of all grapes purchased, or the same pro rata share of the entire amount of the net proceeds, whichever is less. However, if with respect to any fiscal year, the net proceeds shall exceed the amount equal to 10% of net sales, the entire amount of such excess shall be paid in cash or at the direction of the Co-operative, the whole or any part of such payment shall be made in 20-year non-interest bearing promissory notes. Such promissory notes are subordinated to other debts of The Welch Grape Juice Company, Inc.

(4) The fixed assets are shown at the purchase price of $15,000,000, paid by The Welch Plants Corporation, plus net additions at cost, less accumulated depreciation to date consisting primarily of amounts deducted for federal income tax purposes.

The mortgage notes payable to Old Welch Company, Inc., amounting to $13,432,724.87 are payable on or before September 1, 1963; $4,576,900.11 bear interest at the rate of 3% per annum and the balance, $8,855,824.76, are non-interest bearing. This indebtedness is secured by a mortgage on the land, buildings, machinery and equipment. Beginning with the fiscal year ending August 31, 1957, in addition to the payment of interest, The Welch Grape Juice Company, Inc., shall pay on account of principal a sum equal to ten per cent (10%) of the net sales during such fiscal year, which is to be applied first to payment of the non-interest bearing notes.

(5) The 20-year non-interest bearing notes ($16,694,419.09) due to the Co-operative are subordinated to other debts of The Welch Grape Juice Company, Inc., and are pledged by the Co-operative as security for its own 20-year non-interest bearing obligations of approximately equal aggregate amount designated Allocation Certificates, which have been and are to be distributed to the individual grape growers. The capital stock of The Welch Grape Juice Company, Inc., is also pledged as security for the Allocation Certificates.

(6) Early in September, 1956, arrangements were consummated with two New York City banks for loans totaling $6,000,000. The mortgage notes payable to Old Welch Company, Inc., have been subordinated to these loans.

(7) Contingent liability:

On guarantee of conditional sales contracts covering sales of fountain dispensers—$60,768.88.

We have examined the accompanying Statement of Results of Operations and Determination of Amounts Payable in Cash or 20-year Promissory Note Pursuant to Agreements with National Grape Co-operative Association, Inc., of The Welch Grape Juice Company, Inc., for the year ended August 31, 1956. Our examination was made in accordance with generally accepted auditing standards and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. We have also examined the general agreement dated June 2, 1952, between The Welch Grape Juice Company (now Old Welch Company, Inc.) and National Grape Co-operative Association, Inc., the crop purchase agreement dated September 1, 1952, between The Welch Grape Juice Company, Inc., and National Grape Co-operative Association, Inc., particularly the provisions thereof relating to payments required to be made thereunder, and the provisions of Paragraph 7(b) of the September 1, 1952, agreement relating to the "Western Area Pool."

In our opinion, the accompanying Statement of Results of Operations and Determination of Amounts Payable in Cash or 20-year Promissory Note Pursuant to Agreements with National Grape Co-operative Association, Inc., fairly presents the results of operations of The Welch Grape Juice Company, Inc., for the year ended August 31, 1956, determined in accordance with the provisions of the said agreements, and the related amounts of the cash payable to National Grape Co-operative Association, Inc., and the promissory note deliverable to National Grape Co-operative Association, Inc., pursuant to said agreements.

EMPLOYEES AND PAYROLL

THE WELCH MANAGEMENT CREED

The Welch Grape Juice Company ranks high among the leading food organizations in the United States.

This leadership imposes serious obligations; we strive to meet our responsibilities by being good citizens and by living in accordance with the Golden Rule.

It is our aim always to:

1. Supply consumers of our products with top quality merchandise.
2. Foster good relations with those who furnish us with operating supplies and services.
3. Pay our employees well; provide steady jobs, good working conditions and every possible opportunity for advancement.
4. Earn for members of National Grape Co-operative a good return on their grapes.
5. Conduct the Welch business in such a way as to serve the best interests of all who participate in its activities.

Welch regularly employs about 1,250 people. Approximately 167 of our employees have between 10 and 25 years of service, and nearly 40 have more than 25 years with the company. One employee has worked for Welch for more than half a century.

LENGTH OF SERVICE—ALL EMPLOYEES

THE MANAGEMENT

THESE are the executives and the managers of the many departments of The Welch Company and National Grape Co-operative. Each is charged with the responsibility for a function of the business; each is well-trained in his own specialty.

This management group is assisted by many capable people who make up our organization.

We employ specialists in chemistry, food technology, law, engineering, sales, advertising, horticulture, personnel work, purchasing, traffic management, accounting, public relations, plant operations, and a multitude of allied fields in which highly-skilled employees are directing their effort toward keeping Welch the top company in its field.

PROMOTING AND ADVERTISING

Welch's®

QUALITY PRODUCTS

The consumers of Welch's quality products are, in our opinion, the most discriminating in the world. We strive wholeheartedly to please them, and thousands of letters each year prove we are doing just that!

But competition for consumer preferences goes on relentlessly—competition for desirable display locations in food stores and, in many instances, for suitable shelf space among literally thousands of other food items vying for customer attention.

The need for effective advertising, selling and merchandising is nowhere more emphatically underscored than in the marketing of a food product, and singlehandedly in our industry we have developed and maintained a favorable nation-wide market for *all* Concord grape products.

Our marketing success is made possible by the high quality of Welch products, the outstanding competence of our sales and promotion personnel, the magic of the famous Welch's trademark and the long, friendly relationships that we have established with our brokers and distributors—wholesale grocers, chain store operators, frozen foods distributors—and the hundreds of thousands of retailers through whose stores our products reach the consumer.

Our prime consideration is to continue to earn the cooperation of our distributors by providing efficient service, merchandising promotions and sales-impelling consumer advertising to enable them to enjoy an ever-expanding volume on Welch brand products at a fair margin of profit.

The history of American industry—and of the food industry in particular—illustrates graphically the fact that advertising more than pays for itself. It sells products efficiently and in great volume and makes possible mass production and mass distribution. Welch's—the greatest name in Concord grape products on the American market—is kept constantly before the public by means of modern advertising techniques, including television, magazines and newspapers, plus effective point-of-purchase display material.

Our advertising now includes participation in one of the most popular daytime programs on television —"It Could Be You," developed by the Ralph Edwards' organization of "This Is Your Life" fame and starring Bill Leyden. This program originates in Hollywood and is seen daily by millions throughout the country over more than 55 stations on the NBC network. In order to capitalize on the vast teen-ager audience—who in the past were followers of Welch on "Howdy Doody" and other TV shows for children —we now sponsor "Comedy Time," a series of outstanding situation comedies, including "I Married Joan," "It's A Great Life," "Topper" and "Dear Phoebe." This popular NBC afternoon television program appears on 47 stations.

Another outstanding feature of our current advertising program is a series of four-color advertisements in leading national magazines. Reproduced on the opposite page is one of these appealing ads.

because
no one has a way
with grapes
like

In his own small way, this child is showing he has taste . . . a taste for Welch's . . . lots of Welch's . . . all the Welch's he can get his little hands on.

But that's the way it is with fussy eaters and Welch's. They just can't seem to get enough of that extra *grapey* flavor they always find in Welch's spreads.

If your youngster is a fussy eater—and most kids are—watch what happens to that fussy appetite when you spread a sandwich thick with Welch's Grape Jelly . . . or, with wonderful Grapelade, Welch's *exclusive* grape jam.

On sandwiches—on biscuits—in omelettes—over pancakes—on desserts—or, on fingers, Welch's Grape Jelly and Grapelade are the most delicious treats your child can have.

HERE'S HOW WELCH'S GRAPE PRODUCTS ARE M

MADE

The "flow chart" below does not, of course, reflect the great pride with which every single container bearing WELCH'S trademark is packaged. Nor does it indicate in any measure the skills and talents of our employees or the devoted effort they make to produce and sell the very best quality products possible.

It may help you to visualize our plant operations from the time the grapes are delivered for processing to the time our delicious products are marketed.

Welch's®

for Pure enjoyment

LITHO IN U.S.A.

A MESSAGE FROM J. M. KAPLAN

A few weeks ago, for the first time in history, a group of American farmers acquired ownership of a great international business, the leader in its field, with a sales volume of nearly $40 million a year. They had not put up one cent of their own money, nor was there any financial loss to the previous stockholders. The farmers thus assured their own financial security for the future; they also had taken part in a spectacular new advance in American agriculture and industry. These farmers themselves now own, not only their land, their homes and their tools, but the processing plants which convert their entire grape crops into the product that is found on the shelves of grocery stores throughout the country.

This remarkable achievement came to a head on September 1, 1956, when the ownership of the Welch Grape Juice Company was transferred to the National Grape Co-operative Association, Inc., representing some 4500 grape growers.

The event itself attracted widespread attention. But it seems to me that neither the drama nor the importance of this acquisition of Welch by

National has been fully realized yet. Sometimes I feel that not even the growers—and perhaps not even I myself—altogether appreciate the importance of what recently happened.

On the eve of the formal transfer, we had a get-together near Westfield. I spent that evening among my friends and co-workers of many years — the growers themselves, the officials of the cooperative, and a few other distinguished visitors. We had some speechmaking. Doug Moorhead, on behalf of National, presented me with a portrait and a beautifully printed tribute; and college scholarships were established in my name. It was an evening I shall always remember, for in its sincerity and friendliness it was a symbol of what we have succeeded in doing at Welch's. No man could stand unmoved in that situation.

I must respond to that tribute, and I address my reply to all the farmers who today own Welch, to the Company employees who also have a stake in Welch, to the resourceful men who manage its business affairs, and to all the others who form the backbone of this unique organization.

" . . . Juice was kept in hundreds of thousands of 5-gallon glass carboys, clumsy to handle and wasteful of labor and space . . ."

The first time I visited the Chautauqua-Erie grape belt was in 1933. I went there from New York because someone had said there was an opportunity to buy a small grape processing plant in Brocton. I decided to take a look, and was appalled by what I saw:

Abandoned vineyards. Weeds growing where the vines should have been bearing the rich Concord grapes. Neglected farmhouses. Barren earth. Dispirited men and women.

The art of growing grapes had declined. Little or no fertilizer or sprays were used. Grape yields averaged little more than a ton an acre. Grapes were selling at a penny a pound, and for many there were no buyers. Some fruit rotted on the vines, unpicked.

The farmers were worried about their mortgages. At harvest time, they sat in their trucks for endless hours at the processing plants, ready to deliver their crops at less than cost of production. They never knew how much of their harvest they would be able to sell; and in most cases they did not even know the price they would be paid until long after their grapes were processed.

It seemed as though no one, anywhere, cared what happened to them. They had no way of discussing their problems with the processors. No processor showed them how to improve their crops, or encouraged them to do so.

I looked into the methods used by all the grape processors, including Welch. Welch was America's leading grape juice producer, but it used obsolete processes and equipment. There was no bulk, refrigerated storage. Juice was kept in hundreds of thousands of 5-gallon glass carboys, clumsy to handle and wasteful of labor and space. There was no research program. There were no pension or insurance plans for employees.

On top of all this, because of their variety and fancy presentation, California grapes had captured most of the market for table use from Concord grapes. And with repeal of prohibition the widespread custom of making wine at home quickly disappeared.

By that year, 1933, the depression had hit hard all over America. But nowhere was it more tragic than among the families whose livelihood depended on the Concord grape.

If ever there was a challenge to a businessman, I found it here. It seemed to me that we could revive the vineyards, produce not less but more and better grapes, manufacture a pure fruit juice to compete on equal price terms with other juices and soft drinks, and restore new vigor and ambition among the farmers. I thought this was good business, and decided to tackle the job.

"... Welch's was more than a good processing company – it was an American institution ..."

"... Dr. Thomas B. Welch was the father of an entire industry: the canning and bottling of grape and tomato juices .."

I bought the Brocton plant in November, 1933. It had been owned by a group of six small cooperatives, and it was badly run down.

We hired chemists and mechanical engineers and learned to make better grape juice more efficiently and economically. We produced a more delicious beverage, of uniform quality. We introduced bulk refrigerated storage in concrete tanks. We established a floor price for grapes at $50 a ton, guaranteed before the grapes were picked. Our whole approach was based on confidence, know-how, and volume movement. The growers themselves took new hope; and the results could be seen soon in the improved farms and vineyards throughout the countryside. Growers began to concentrate on the growing of grapes.

By 1939 the capacity of the Brocton plant had been more than doubled. Prices paid to growers for grapes rose steadily, output increased, and so did net profits.

In 1945 the members of six small cooperatives that comprised the original group at Brocton, together with other growers, joined to form a new and stronger group, the National Grape Co-operative Association, Inc.

From the beginning, I had always thought that some day the Brocton processing plant should belong to the farmers themselves. I felt that this would be the only final guarantee against a recurrence of those dismal days of 1933. I thought it would be good business to make a fine product, operate an efficient plant, develop topflight management, and when the whole operation showed a real profit make it possible for the grape growers themselves to own it. From the growers' point of view, the more they concentrated on a single crop the more evident it became to them that ownership of the whole production and sales organization would become necessary and inevitable for their permanent security.

That is what we did at Brocton. We worked out a plan by which the growers, through National, would acquire ownership of the plant over a ten year period without paying any money out of their pockets. We signed a contract which provided that a part of the sale price of each case of goods be set aside and accumulated for eventual payment for the business. That was in 1945. Soon after the arrangement was developed, I was offered an opportunity to buy a major stock interest in the Welch Grape Juice Company.

Our Brocton business was tiny compared to Welch. At Brocton we had no brand name, only a private label business; whereas Welch was a household word, a giant in its field, with an annual volume of $9 million and with six plants in four states.

The farmer leaders of National urged me to purchase the Welch Company, can-

cel the contract for their purchase of the Brocton plant, and merge that business with Welch, thus providing greater strength for the members of the Co-operative itself.

Now let me tell you what buying Welch meant to me. I must become somewhat personal, but I think you will understand.

My parents were immigrants. My father was a rabbi who settled on a farm in Lowell, Massachusetts. He scrimped and struggled and finally earned enough to bring my mother here from the old country. I was born on that little farm in Lowell 63 years ago.

We were always poor. I worked from the earliest moment I can remember. I recall walking five extra miles daily as a newsboy to save two cents. My father died when I was nine, my mother five years later. I left elementary school in the eighth grade, before graduation, and assumed responsibility for a family of four. I suppose it would be accurate to say that, because of poverty, I really had no childhood at all.

In my teens I went to the West Indies as an employee of a molasses company. For working day and night, while fighting giant black mosquitoes, torrential rains, malaria, and local revolutions, I received the grandiose salary of $20 a week. It was a rough and ready life. If it did one thing for me, it taught me respect for men who grow the crops by which the world lives.

My work in the West Indies led to new opportunities in the field of sugar products. Ultimately I had responsibility for managing companies which handled more than half the molasses produced in the world.

But the Welch purchase presented a new type of challenge to me.

This was more than a food processing company – this was an American institution. It had been founded in 1869 by Dr. Thomas B. Welch, who was communion steward of his Methodist Church in Vineland, New Jersey. A teetotaler, he had applied the principles of Louis Pasteur to produce unfermented grape juice as a substitute for wine at church ceremonies. He was the father of an entire industry – the canning and bottling of grape and tomato juices.

He and his son, Dr. Charles E. Welch, had built the business with rock-like integrity. But after Dr. Charles E. Welch died in 1928 majority stock control passed to private investors in Nashville, Tennessee.

For all its great heritage, the Welch Company in 1945 was running downhill under its absentee owners. Technologically it was obsolete. There was no research program, no attempt to develop new grape products. In contrast to our attitude at

Brocton, Welch was unfriendly to grower cooperatives. To a man with my background, it was an irresistible challenge.

And so began a new chapter in the history of Welch, a good, healthy chapter – which eleven years later blossomed into another even better and healthier one.

We relegated those five-gallon carboys to the Dark Ages where they belonged. We erected new stainless steel tanks, each holding about 150,000 gallons of juice, in new refrigerated buildings. We scrapped ancient machinery held together only by the loyalty and skill of Welch employees, and put in the latest and best processing equipment.

We introduced Frozen Grape Juice Concentrate in 1949 and Fruit-of-the-Vine in 1953, and expanded the market for Welch's Grape Juice, Jelly and Jam.

We gave management the direction and authority to build a successful business and put Welch products into 400,000 retail outlets.

We earned the confidence of bankers who were willing to extend all necessary credit on the basis of personal respect for our know-how, experience and business judgment. This confidence is to this day one of Welch's greatest assets.

We helped Welch employees to achieve an increased sense of participation in the Company. We established a profit-sharing plan that produced for them year-end cash bonuses amounting to about 12% of their wages in 1954 and 1955. We established employee insurance and pension plans, with the Company paying the total costs.

But we never forgot that the key to Welch is the grower – and the grape.

We felt that it was good business to raise the price Welch paid for grapes, and to introduce the profit-sharing contract that offered growers, for the first time, a security they had never enjoyed before. We gave the growers what they need most – a home for all their quality grapes, and a reason to keep on growing grapes. Our profit-sharing plan returned to the growers everything above 10% of annual net sales, less the actual expense of running the business. This resulted in bonus prices to the growers.

In 1933 the average farmer was getting a yield of about one ton an acre, at little more than $20 a ton. Now his yields average from three to more than four tons an acre, at prices up to $153 a ton.

We also sought to give the growers more than dollars – respect. We put an end to the long and dreary waits outside the plants. We set up a system of scheduled deliveries, so that each farmer would know when to come in and be sure his truckload of grapes would be handled promptly.

7

We set up a research department to explore new ways of improving the flavor and quality of our products. We asked agricultural colleges and experimental field stations of the U.S. Department of Agriculture to look into new methods of production, new fertilizers and insecticides, new vineyard practices. We awarded grants for study and experimentation. We employed field men to pass on to the growers the latest horticultural information.

We cut operating costs by good management methods. From 1946 to 1952 the volume at Welch jumped from 34,000 to 70,000 tons, and sales leaped from $9 million to $26 million.

Everything soared, except the price to consumers, which remained virtually the same. We were demonstrating the secret of American business success—that highest quality, highest efficiency, highest volume, plus technological improvements, will combine to make possible the lowest unit cost to consumers, and the highest resulting prices to farmers. Unless all these elements exist and are made effective, grape juice could very easily price itself out of the market.

Looking back over the years, I see now that what we had done at Brocton, on a small scale, was a kind of preview of what we were to do at Welch itself. Always, as at Brocton, there was in the back of my mind the idea that some day the growers themselves should own the industry that had as its foundation the grapes they produced. I bought more and more Welch stock, so that in the end it would be possible to transform this idea into reality.

We had removed the marketing gamble from grape-growing, by encouraging emphasis on the one crop that had an assured market. But the growers themselves were aware of their complete dependence on their one big market, Welch. If the Welch business should ever change hands again they might find themselves, in effect, sold with it. And, human nature being what it is, the growers would quite naturally feel unable to trust the motives of the Company, however beneficial its actions. The only solution, they concluded, was for National to buy Welch. Our discussion of this novel idea began in 1949. The contract was signed on June 2, 1952.

We stockholders of Welch waived all our profits, starting with the 1951 grape crop, and turned the entire net income over to National regularly as additional payment for the grapes delivered. This extra money was held in the business and accumulated toward future payment for the Company.

The plan was sound. It attracted more and more growers. Tonnage and income increased each year as new growers joined. Originally the growers had thought it

would take ten years to accumulate enough money to effect the transfer of ownership. It took half that time. On September 1, 1956, National took over Welch, with its nine plants in five states. The Welch Grape Juice Company today belongs to the 4500 growers who are members of the National Grape Co-operative Association, Inc.

It was a good deal because both the growers and the Welch stockholders, including myself, received fair values for their respective interests. This unique fact forms the essence of the transaction. Grower membership, production, sales and profits have all greatly increased – thereby greatly increasing the company's value to the growers today.

I believe that what we have done, together, will be recognized as one of the important economic achievements of the twentieth century. We have, in the Welch-National arrangement, provided America with an example of a solution to its so-called "farm problem."

We have shown that at last it is possible for the American farmer to own a big business. Instead of farm subsidies, instead of soil-bank devices, instead of warehouses bulging with surplus crops, we have today a unique and I think typically American method of giving security and self-respect to the farmer. The method is simplicity itself: the farmer, through his cooperative, is himself the owner of the vertical operation that processes his crop and sells it to the consumer. This makes him an independent, self-supporting business man.

The grape growers never asked for and never received a government handout. They have always believed, as I believe, that our government has no place in the business of farming – although there will always be a need for research and education through our fine Department of Agriculture experimental stations and county agents.

The grape growers have always believed, as I believe, that there is no reason to spend billions of tax dollars to bail out big farmers producing unwanted crops, or marginal farmers producing virtually no crops at all.

They have always believed, as I believe, that there is no room for the inefficient or lazy farmer, any more than there is room for the inefficient or lazy business man, or factory worker, or storekeeper. Certainly there is no reason to support the one and not the others.

I believe in the family farm, as a place for the small farmer to maintain his independence and educate his children to the values of responsibility via useful work. But there is a great difference between the marginal farm and the family

" . . . We scrapped ancient machinery held together only by the loyalty and skill of Welch employees, and put in the latest and best processing equipment . . ."

farm. The small farm needs an enterprising farmer with know-how. It needs good soil, and at least 100 acres – 200 acres per family would be better. If necessary, the government can help him get started, through loans, not through subsidy; and I think, in fairness, it should do the same for the small businessman. These loans, either from local banks or with capital assistance from government, should be made available to men with character, know-how and industry, for these human assets are worth more than any amount of capital itself.

Through loans, I repeat – not through subsidy. Subsidy is endless. In the end it can demoralize a nation. If one segment of the population receives a handout, why not the others? If we put a premium on inefficiency, why be industrious? The world is hungry for new products, new foods, new ways to satisfaction and enjoyment of life – can we really hope to satisfy this hunger by collecting more and more taxes and giving away more and more subsidies?

What we need is to encourage our people to release their energy and develop their skills in producing quality crops and profits. Farmers, like other businessmen, strive for profits and distinction. There is no better incentive to be creative and industrious. Therefore farmers should locate good rich soil and plenty of acreage, produce quality crops, and meet the market demand for their produce. Under our system of free enterprise these ingredients add up to a formula for success on the farm.

I believe that in Welch we have found the answer. American farmers, through their cooperatives, should receive government assistance in the form of adequate loans to acquire ownership of well-established, well-managed, modern processing companies of the character and good management that National has just acquired in Welch—companies that are leaders in their fields and produce advertised brands.

Thus the wheat farmers could acquire the great milling companies, the dairy farmers could acquire the leading milk, butter and cheese processors, the fruit and vegetable growers could acquire the great processing and canning companies, and the cattle raisers could acquire the huge meat-packing companies.

Government loans for such purposes should replace government subsidies; the loans could be handled by local commercial banks, whose officers know the character, dependability and methods of local farmers. This system would prove sound, and prevent political pressures and waste. To acquire control, the cooperative would have to invest a portion of each year's proceeds. The aim should always be total ultimate ownership.

Cooperatives seeking government loans for this purpose should call upon qualified

"... We erected new stainless steel tanks, each holding about 150,000 gallons of juice, in new refrigerated buildings ..."

commercial bankers to analyze the companies in which they are interested. I believe banking institutions would perform these services at very reasonable fees because farmer-ownership would revitalize our entire economy. These government loans, even if they meant establishment of a revolving fund of, say, $10 billion in the beginning, would cost but a fraction of the billions now being poured down the drain by subsidy. And it is well known that farmers repay loans as conscientiously as any group of Americans, and better than most. National's payment for Welch is a perfect example of what I mean.

The country has many alert businessmen, farmers and employees who will recognize the wisdom of pooling their skills, resourcefulness and energy for their greater common security. It is both practical and feasible for the government to play a creative role in solving the so-called "farm problem" in this way. Here, in truth, is a worthwhile area for Congress and the Department of Agriculture to study, and I think such a study might begin with Welch. The entire subsidy system should be reappraised, and we would be delighted to show how our experience could apply to commodities other than grapes. Welch-National is a proven pilot operation, a kind of trailblazer.

I think too that there is a need to revitalize farmers' cooperatives as a whole. I have watched the co-ops carefully through the years, and I believe many are badly managed, unimaginative, inefficient and slow-moving. Too many long-established cooperatives are modern only in their speeches and pamphlets.

They lag in training and paying for top management personnel. They do not realize the necessity for constant research to improve quality all along the way, and to create new products. They must practice better business methods, and be well-versed in the intricacies of finance. They must appreciate the value of a brand name and methods of building public confidence in it. Agriculture cannot prosper in the twentieth century with nineteenth century methods of production, and completely inadequate research and marketing.

To be successful, a cooperative must have a product of integrity, must know the market and its competition, must have a passion for quality, and the energy and drive to sell it broadly. When a co-op consistently shows these characteristics it deserves financial support from any good banker.

Basically, a company owned by a cooperative should show no taxable profit on crops grown by its members and processed and sold for their account, for its net earnings should be distributed immediately to the members of the cooperative itself as the full cost of quality crops. Farmers must, of course, pay an income tax

on their earnings, just like members of any partnership. When a co-op-owned company needs money for expansion or any other business purpose, the funds should come out of reinvestment by the members of the co-op or from bank loans—in each case to be repaid before any distribution of income to growers, thereby maintaining an A-1 credit rating.

Today, the members of National can actually demonstrate what happens when a progressive, intelligent cooperative takes over the ownership of a well-managed business with an outstanding reputation. National itself must grow with the business it owns. As the new owner it has been invited to New York by the banks, which have assured it that as long as Welch continues to operate with the same efficient management and to maintain leadership and growth the banks will gladly make available crop loans as and when needed, on the best terms. The mere existence of such credit demonstrates the prestige that has been earned just as it imposes a great responsibility on the borrower.

National must bear in mind the whole complex over which it now presides — ranging from the farmer to the chemist in the laboratory, from the top executive to the sales organization throughout the country. It must recognize that each part of the whole fulfills a special need. A farmer may not have any great executive skill; and an executive at Westfield may not know how best to tend the vines. Yet both are essential and will thrive by sticking to their special skills — and cooperating with the others. And management itself must continue to seek new blood.

Men of high knowledge and specific skills are too few. The best way to assure and safeguard honest, capable, vital management is for the growers to attend district meetings. They should ask questions. They should learn about management's needs and problems. This will help them to elect honest and intelligent farmers to the board and the district committees. It is equally essential that management keep the growers informed of business needs and trends. Every grower has the competence to judge the character of the man he chooses to represent him—and to judge performance as well.

I urge these principles on both management and membership equally. It will encourage that eagerness to learn and to understand which is crucial to preserving a successful business and making it ever sounder, safer and more profitable.

National must continue to grow. It must never slow its stride. It must aim to expand capacity in order to take care of increasing tonnage of its present membership and to handle grapes from other responsible growers desiring to become members. Because the small grape-grower cooperatives in the Chautauqua-Erie belt,

"... We gave the growers what they needed most — a home for all their quality grapes, and a reason to keep on growing grapes ..."

and in Washington State, may not have the resources or capacity to develop quality products, to carry on research, to improve their processes and equipment, to develop a brand name that the consumer will recognize, to merchandise and advertise it aggressively, and to maintain a fair price along with high quality, they naturally ought to be, and I think will be, eager to become a part of the larger and more efficient operation in their own best interests. National's doors should always be kept open for these groups; and they should be encouraged by their managements and membership, as well as by the government and the public, to join in the greater security and more assured outlet for their grapes which awaits them in the National-Welch partnership.

For this new partnership is a great development. National and Welch are now united. They form a powerful team.

To the growers themselves, to the top management of the Company, to all the employees of Welch, to the horticulturists, the laboratory technicians and research people, to the sales organization throughout the country, I say this word in farwell:

The whole nation is watching what you do, for you are embarked on a most important venture in the U.S. food industry. You have it in your power to provide yourself and your loved ones with a prosperous and contented life through the continued efficiency and growth of the business. You have it in your power, also, to show the way to similar prosperity and contentment among millions of American farm families.

I have lived through exciting and wonderful years with all of you. I treasure the friendships I have made with all of you who have done so much to make Welch more than a business – an institution – a leader in the finest American tradition of free enterprise. Officially I am retiring from the grape juice business because I have complete confidence in the integrity, ability and interest of every person in your management, and in their capacity to operate the business successfully and harmoniously and to maintain its alertness and leaderhip. I will always remain your interested and devoted friend. God bless you all!

John Kaplan,

EXECUTIVES OF THE WELCH FAMILY

Of course, there are many others
who make up the whole organization,
beginning with the growers themselves.

Louis Kaplan

August 20, 1959

Dear Judge Kaplan:

Many thanks for your kind letter of August 3rd. I regret that I cannot accept your gracious invitation to become a member of the Advisory Council of the Association for the Help of Retarded Children since I am now taking a year's leave of absence and present plans call for me to be out of the country for most of the coming year.

Sincerely yours,

Hon. Louis I. Kaplan
Commissioner of Investigation

New York 5, New York

gw

Commissioner of Investigation
City of New York

JUDGE LOUIS I. KAPLAN
PERSONAL & UNOFFICIAL

August 3, 1959

Dear Mr. Murrow:

I was happy to accept the chairmanship of the current Special Gifts Campaign for the Association for the Help of Retarded Children for the same reason that should impel you to be interested in this great cause - I know how important the work of this non-profit, non-sectarian organization is, especially in this vital period that finds 5,000,000 retarded children throughout the country, 250,000 from the New York City area.

I was certain, too, that I'd get the cooperation of our leading citizens, you among them.

As AHRC embarks upon this all-important drive, it is faced with its greatest challenge. Our Greater New York Campaign must raise half a million dollars so that the long waiting lists that exist for diagnosis, treatment, workshops, vocational guidance and other myriad essential services can be abolished. Frankly, I'd be worried if it weren't for one fact: The wonderful way in which humanitarians such as yourself, have in the past rallied to the side of those less fortunate.

There's so much suffering, so much pain and agony in this world, that anything we can do to lighten the burden of these youngsters by aiding this worthy organization is - well, it's like battling on the side of GOD. The parents of retarded children know perhaps better than anyone else just how heavy the burden is.

For this reason, I am asking you to become a member of the Advisory Council for AHRC. I seek your advice and I need your counsel. Enclosed you will find a reservation card and return envelope for your convenience. I would appreciate hearing from you at your earliest opportunity.

Remember, what we do for humankind, we do really for ourselves.

Cordially yours,

Louis I. Kaplan

Karasik, Dan

February 25, 1958

Dear Dan:

I have your letter of February 4th.

I am as distressed as anybody else over the recent developments here, but unfortunately, I see no chance of SEE IT NOW picking up your operation. With only nine programs a year and the vast amount of ground to be covered, there just would not be enough work in your area to justify the expense.

I am sorry.

Sincerely yours,

Mr. Dan Karasik

Mr. Ed Murrow
See it Now
485 Madison Avenue
New York 22, N.Y.

Dear Mr. Murrow:

You've no doubt heard that in the current economy slash in the news department my bureau was axed. After we finish our next assignment -- we expect to go to Prague in two weeks -- we fold our tents and start packing for New York.

This happy news reached us after just completing what we considered a fairly successful three-week assignment in Hungary.

I'm writing you this letter in somewhat the same spirit that a hockey player on the losing side whips the puck the full length of the ice at the last second of the game in hopes of that one-in-a-million goal.

We have a fine office, a good set of files, a top-notch multi-lingual secretary -- a real working organization. I've been building up my background on the area, now have excellent contacts through most the Satellites, have excellent relations with their Communist officials and a good reputation as a man that deals with them frankly and fairly. We've done all the spade work, and now I'm one of the few correspondents that can get visas --more or less regularly -- to Hungary, Czechoslovakia Bulgaria, etc.

Is there any chance of See It Now picking up the whole works? It seems such a complete waste to let the whole thing go down the drain.

Cordially,

Dan

Katzander, Shirley

January 16, 1959

Dear Mrs. Katzander:

Thank you for your letter of January 7th enclosing the background material on Dr. Ascoli. Thank you also, for sending a copy of your letter to Fred Friendly.

We have been so busy on the production of our Virginia story, scheduled for air on January 21st that Mr. Friendly and I have not had time to discuss any possibility of Dr. Ascoli appearing on SMALL WORLD, but we shall hope to be able to do so very soon.

Sincerely yours,

Mrs. Shirley Katzander
The Reporter

THE REPORTER

136 EAST 57th STREET
NEW YORK 22, N. Y.
Murray Hill 8-4033

January 7, 1959

Mr. Edward R. Murrow
Columbia Broadcasting System
485 Madison Avenue
New York, N. Y.

Dear Mr. Murrow:

Enclosed is a copy of my letter to Mr. Friendly on the possibilities of Max Ascoli's appearing on "Small World."

I am also sending along a background piece on The Reporter, with details on Dr. Ascoli, which you might want to see.

As you know, The Reporter will be ten years old in April -- and I can't think of any better way to observe it than with a good "Small World" conversation. I hope it can come to pass.

Sincerely,

Shirley Katzander
Director of Promotion

January 7, 1959

Mr. Fred Friendly
Columbia Broadcasting System
485 Madison Avenue
New York, N. Y.

Dear Mr. Friendly:

Your secretary tells me that you are considering Max Ascoli for "Small World," and we are, of course, delighted to know that there is such a possibility.

I wonder if it would be possible to think in terms of this coming April, when The Reporter will be ten years old. At that time, the Overseas Press Club will devote a "Media Night" to The Reporter, and through the year, we hope to do a number of other things -- such as publishing an anthology and a second book of fiction and reminiscences.

Enclosed is a background piece on The Reporter, with details on Dr. Ascoli.

If there is anything we might do on this end, we'll be happy to volunteer. I'd very much like to talk with you about it and, if I may, will call you sometime next week.

Sincerely,

Shirley Katzander
Director of Promotion

THE REPORTER

The Reporter was founded by Max Ascoli in April 1949 as "an experiment in adult journalism" and has long since passed the experimental phase as 125,000 readers turn to it fortnightly for the kind of journalism that has become The Reporter's hallmark -- responsible journalism.

Specializing in depth reportage, with attention to motivation and detail, The Reporter covers domestic and foreign events, politics, science, business and the arts. Very much aware of America's role as world leader, The Reporter attempts to relate domestic and foreign events in all fields. It does not digest, nor does it rehash news; rather, it tries to bring to readers new facts and new ideas about the important issues of the day.

The Reporter has a point of view. Max Ascoli maintains that The Reporter is "always objective, never impartial." Our editorial policy from the beginning has been clear and consistent.

In writing about "This Liberal Magazine" in April 1955, Max Ascoli said that "a liberal, a man who cultivates the skills that make freedom operational, is always a man on special assignment. Because of its devotion to freedom, this magazine is always on special assignment."

In pursuing this course, one of The Reporter's great distinctions, we believe, has been not to leap to conclusions, not to consider world events in black-and-white terms, and never to compromise with principle.

Perhaps a few concrete examples of how The Reporter has covered important issues best tell the story:

The McCarthy Era

The Reporter was the first national publication to take up the challenge of the late Senator Joseph McCarthy. Where a great segment of the press merely "reported" the statements and activities of McCarthy, The Reporter, recognizing his threat to America both at home and abroad, sought to bring to light his influence for evil throughout the country.

Despite virulent attacks by McCarthy and his supporters, The Reporter covered him thoroughly, detailing his publicity techniques, his "numbers games," and, equally important, his effect on people in government, industry and education.

The breadth of the coverage is seen in just a few articles published on the subject:

"McCarthyism: How It All Began," by former Senator Millard E. Tydings (August 19, 1952). Tydings was on the Senate committee investigating McCarthy's charge of subversive elements in the State Department.

The Reporter in July 1953 devoted virtually an entire issue to McCarthy and his effect on the United States and its Allies. This issue featured:

Max Ascoli's editorial "The Time Has Come, Mr. President," called on President Eisenhower to take a stand on McCarthy;

Richard H. Rovere's article, "The Adventures of Cohn and Schine," described the effects of McCarthy's two aides on Europe during their notorious investigation abroad;

"The McCarthyization of Theodore Kaghan," written by the victim, told how his State Department career was wrecked by McCarthy, despite his long record of outstanding service;

"Voices Within A Voice," by Philip Horton, described McCarthy's rampage through the Voice of America and how the senator managed to render it ineffective in this period;

Raymond Swing's piece, "V.O.A. -- A Survey of the Wreckage," reported on the real inadequacies of the Voice of America as opposed to those invented by McCarthy.

"Victim of Nameless Accusers," by Anthony Lewis (March 2, 1954), told the story of a government employe suspended as the result of baseless rumors after 23 years of government service. As a result of the story, the rumors were thoroughly investigated and the employe, Abraham Chasanow, reinstated. This was published at the height of McCarthy's influence when scores of government workers were either dismissed or suspended on the basis of secret testimony.

"Galileo and J. Robert Oppenheimer," by Professor Giorgio de Santillana (December 26, 1957), was an examination of the political climate during the lives of both men and the forces that were brought to bear on them.

Max Ascoli's editorial in the same issue, "Minds on Trial," emphasized the effects of the decision on Professor Oppenheimer.

Desegregation

The Reporter has fully supported integration of the schools, but it points out that equality for all men lies in their having the ballot. It recognizes Governor Faubus as a demagogue; but places equal emphasis on a compassionate view of the South and the vast social and economic problems the South faces.

In an issue of the problems of desegregation, entitled "The Ordeal of the South," The Reporter published a white minister's report on the Montgomery bus strike; a Negro's view that "Surely, They Can't Stop Us Now"; and Max Ascoli struck a typical Reporter note when he lead off his editorial, "The Courage of Prudence," by saying:

> "What a national tragedy this whole thing is, and how humble we feel when we think of those anxious fellow citizens of ours down there in the South, white and colored, who are still trying to keep communications open between the two races."

The Middle East

Through the years of virtually constant crisis, The Reporter has provided its readers with complete coverage of this crucial area, linking it, as always, with America's role as world leader. We have covered the rise and fall of the rulers, the economic factors, the racial troubles. (Incidentally, during the Suez crisis, the American oil industry was gratified to find what it called the first full and fair account of its difficulties in the Middle East at a time when the industry was under attack both in and out of government.)

The Reporter's coverage of this area has been extensive. A look at the year of the Suez crisis, 1956, best tells the story. Trouble was obviously brewing that year and The Reporter published 17 articles on the Middle East.

They were:

> "Miscalculation in Jordan," (January 26) by Hal Lehrman
> "Half a Million Slaves in Arabia," (April 19) by Ray Alan
> "Egypt: Potemkin Village on the Nile," (May 3) by Hal Lehrman
> "Iraq: Nuri es Said Drives a Hard Bargain," (May 17) by J. H. Huizinga

"Israel: The Moment of Decision Goes By," (May 17) by Claire Sterling
"And the Answer Was Suez," (September 6) by Simon Malley
"Siren Songs in Damascus," (September 6) by Hal Lehrman
"Where Nationalism Become Nihilism," (September 20) by Ray Alan
"The Pint-Size Potentates of the Persian Gulf," (September 20) by J. H. Huizinga
"The Malevolent Genie That Nasser Set Free," (September 20) by Claire Sterling
"The Tragedy of Hatred: The Arab Refugees," (November 1) by Ben H. Bagdikian
"The Middle East: When Foreign Policy Fails," (November 15) by Claire Sterling
"The British Look at the Balance Sheet," (November 29) by Alastair Buchan
"How the United States Saved Nasser," (December 13) by Claire Sterling
"The Arab World Since Sinai," (December 27) by Ray Alan
"The Anglo-French Convulsion of Despair," (December 27) by Graham Hutton
"'Or to Take Arms Against a Sea of Troubles'", (December 27) by R. L. Bruckberger.

Western Europe and the Alliance

The Reporter has thoroughly covered society, politics and economics in Western Europe, particularly in relationship to the Western Alliance. We have had continuing reports on individual nations and their leaders and their contributions to the strength of NATO.

The status of the Alliance, its successes, its failures, its crises have been carefully detailed in The Reporter.

Some major articles and editorials in this area include:

"Interlocking Commonwealths," (December 25, 1951) by Max Ascoli
"The Ragged Edge," (June 24, 1952) by Max Ascoli
"The Unity Europe Can Have," (September 23, 1954) by Max Ascoli
"NATO on the Operating Table," (August 9, 1956) by Alastair Buchan
"Civilization Is the West," (December 27, 1956) by Max Ascoli
"'Little Europe' Is Growing Up," (May 2, 1957) by Claire Sterling
"Where Do We Go From Here?," (December 12, 1957) by Lester B. Pearson
"New Lease on Life for NATO," (January 9, 1958) by Max Ascoli
"Europe Stakes Its Claim for Full Partnership," (January 9, 1958) by Edmond Taylor

Views and Reviews

In addition to coverage of major issues, The Reporter regularly publishes fiction, essays and travel reportage. Over the past nine years, The Reporter has published 112 pieces in this category, apart from regular book, film, music and television reviews.

Among the writers who have contributed are: James Thurber, Ray Bradbury, Diana Trilling, Santha Rama Rau, Bill Mauldin, William Saroyan, Christine Weston, Anthony West, Robert Ardrey, John Cheever, Mark Van Doren, Saul Bellow, May Sarton, Gore Vidal, Malcolm Cowley, J. F. Powers, Joseph Szigeti, Sir Osbert Sitwell, Vladimir Nabokov, Dean Acheson, (the latter, incidentally, wrote a "critique" on popular songs.)

- - -

Individual articles in The Reporter have been singled out for honors many times in the last six years. (A list of awards is appended). The latest came from Sigma Delta Chi, May 1958, for "distinguished public service in magazine journalism." It was given for Paul Jacobs' report on "Fallout From Nevada," the first national report on the dangers of radioactive fallout in the United States. The citation read in part:

> "In a year. . .notable for the number of excellent magazine articles fulfilling important public service functions, Paul Jacobs' report on the AEC's weapons-testing program was outstanding.
>
> "Official secrecy hampered his investigation; the climate of public opinion insured that the questions raised by his disclosures would be unpopular. Yet he dug out a comprehensive set of facts. . .so that Americans were alerted to a real danger and provoked to a discussion of policies that have deep significance for people everywhere."

Other outstanding representative stories over the years include:

1. The World of Jimmy Hoffa, by Paul Jacobs (January 24 and February 7,1957)

   The series on the Teamsters' leader, published before the Senate investigation, revealed the breadth of Hoffa's activities before he was in the headlines.

2. The China Lobby (April 15 and April 29, 1952)

   A series of articles detailing the operations of the China Lobby in the United States and considered the definitive report on the China Lobby's activities.

3. The Day We Didn't Go to War, by Chalmers Roberts (September 14, 1954)

   Mr. Roberts' revelations of how President Eisenhower kept the U. S. from intervening in Indo-China despite the urgings of Admiral Radford and other members of the National Security Council.

4. Juan Peron's War With the Catholic Church, by Herbert Matthews (June 16, 1955)

   Mr. Matthews' story of the persecution of the Catholic Church by Peron preceded by only a few days the outbreak of rioting in Argentina between Catholics and Peronistas.

5. Hungary: Guilty Consciences and Rehabilitated Corpses, by Leslie Rain (October 4, 1956); Behind the Scenes in Poland's Model City by S. L. Shneiderman (October 4, 1956)

   A month before the Polish and Hungarian revolutions, the two articles cited above gave a premonition of the tragedy that was to come.

6. Enemy Assets: The $500,000,000 Question, by William Harlan Hale and Charles Clift (June 14, 1956)

   A minutely detailed story of enemy alien property held by the United States since World War II and the attempts by its owners to retrieve it.

7. A Bulwark Built on Sand, by Haynes Miller (November 13, 1958)

   An account of U. S. foreign aid gone wrong in the kingdom of Laos where funds were wasted and businessmen of dubious practices have been able to use American funds to enrich themselves.

8. Ike and the Peaceful Atom, by John Lear (January 12, 1956)

   Mr. Lear traces the genesis and development of President Eisenhower's atoms-for-peace plan through the first memorandum sent from the White House to the Atomic Energy Commission to the President's address before the United Nations.

9. Doctor Zhivago, by Boris Pasternak (July 10, August 7, September 4, 1958)

   Breaking precedent in its own pages, The Reporter published three sizeable excerpts from Pasternak's novel three months before the book was published in the United States. The Reporter has never digested or excerpted material; Max Ascoli decided that "Doctor Zhivago" was an exception to the rule.

The above is only a small indication of what The Reporter has published in the past nine years, but its variety will serve to give an idea of the depth and breadth of Reporter coverage.

Reporter writers are recruited from all fields in order to get the most authoritative job done on a subject. A battle-wise general reports on atomic warfare;

an economist writes on the status of the U. S. economy; a Southern minister discusses segregation; a diplomat writes about disarmament; a top-ranking Washington correspondent reports on politics. (A partial list of Reporter writers is appended).

The Impact of The Reporter

Perhaps one of the best measures of a publication is its readers and the use to which the publication is put.

The Reporter is read for information. And it is read particularly by the working press, including radio and television, of the nation. (Please see the survey, "The Reporter and the Working Press," with quotations on why the press reads The Reporter and how it finds the magazine useful in its work).

Indeed, we have reached the conclusion that The Reporter is read by the people who keep the public informed, for the magazine's readers are found primarily among the working press, and the upper echelons of government, education, religion and business and industry. The frequency with which The Reporter is quoted in these circles is evidence indeed of its impact on them. They may not agree with what The Reporter says; they are rarely indifferent to what it says.

MAX ASCOLI, Founder of The Reporter

Max Ascoli, Editor-in-Chief and Publisher of The Reporter, was born in Italy where he received his doctorate in philosophy at the University of Rome and taught jurisprudence at Italian universities.

Because he could not tolerate Mussolini's Fascism, and was briefly jailed for opposition to the dictator, he left Italy and arrived in the United States in 1931 as a Rockefeller Foundation Fellow. He traveled extensively in the United States and studied at Harvard and the Universities of Wisconsin and Chicago.

On becoming a citizen of the United States in 1939, he wrote in an article in the Atlantic Monthly that "Americans are born - not made."

"There are people who -- no matter where they were born -- can fully find themselves only when they come over here," he said. "At least, this has been my case."

In 1933, Max Ascoli was appointed Professor of Political Philosophy at the New School for Social Research and elected Dean of the Graduate Faculty 1940-41.

In 1940, he was appointed by Nelson Rockefeller as Associate Director of Cultural Relations in the Office of the Coordinator of Inter-American Affairs, a post he held until 1942.

At the end of 1944, he established a foundation to help Italian handicraft producers and the promotion of their products in this country. He calls it his "pre-ECA project." As a result of his efforts to revive the Italian handicraft industry, he was honored by the Italian government with the most distinguished award to foreign citizens -- The Italian Star of Solidarity, First Class.

Max Ascoli has written extensively in the Atlantic Monthly, Yale Review, Annals of Social Science, Foreign Affairs, etc. Most of his writing has been on what he calls his pet obsession: how, in the democratic climate of our times, freedom

can perish. His first article on American domestic controversy appeared in the New York Herald Tribune in 1937; it was a criticism of President Roosevelt's attempt to pack the Supreme Court.

Max Ascoli was president in 1940 of the Mazzini Society, principal organization of Italo-American and Italian anti-fascists. He is a member of the Council on Foreign Relations and the American-Italy Society. He is the author of "The Power of Freedom", "Fascism for Whom?" and "Intelligence in Politics."

His editorial on an important issue of the day leads The Reporter in each issue. Perhaps one of his best statements on the United States was his "The Hidden America," first delivered as the keynote address at the 75th anniversary of Marquette University and later published in The Reporter.

Max Ascoli founded The Reporter as "an experiment in adult journalism," believing in the innate good sense, good taste and maturity of the American people. The Reporter's staying power and its continuing growth (from an initial circulation of 15,000 to its current 125,000) have confirmed this belief.

AWARDS TO THE REPORTER AND ITS WRITERS

1958

Sigma Delta Chi Award

For "distinguished public service in magazine journalism" given to The Reporter for Paul Jacobs' article "Clouds From Nevada" (May 16, 1957).

The citation read in part:

"In a year. . .notable for the number of excellent magazine articles fulfilling important public service functions, Paul Jacobs' report on the AEC's weapons-testing program was outstanding.

"Official secrecy hampered his investigation; the climate of public opinion insured that the questions raised by his disclosures would be unpopular. Yet he dug out a comprehensive set of facts. . .so that Americans were alerted to a real danger and provoked to a discussion of policies that have deep significance for people everywhere."

Sidney Hillman Foundation

To Giorgio de Santillana for his article "Galileo and J. Robert Oppenheimer" (December 26, 1957) for magazine writing. Professor de Santillana examined the climate of the times in Galileo's day, comparing it with today's political climate.

Lincoln University Seventh Annual Award

For "significant contributions to better human relations". The citation read: "For consistently maintaining a high standard of clear and factual reporting of significant events, and interpretative background of movements both at home and abroad; especially for its forward looking treatment of matters pertaining to better race relations and increased civil liberties."

1957

Overseas Press Club Award

To Hal Lehrman for his articles in 1956 on the Middle East in The Reporter and The New York Times Magazine.

1957 (continued)

George Polk Memorial Award (Long Island University)

To Hal Lehrman for foreign reporting in 1956, specifically on the Middle East, in The Reporter, The New York Times Magazine and Commentary.

1956

Benjamin Franklin Magazine Award

To Robert Bendiner for his article "The Engineering of Consent -- A Case Study", (August 11, 1955) in The Reporter. Chosen in the category of "the best article. . .depicting life, culture or institutions in the United States."

The article reported on how lobbyists work -- in this instance, in the battle between railroads and truckers (and their public relations firms) in Pennsylvania.

Benjamin Franklin Magazine Citation

To Milton Mayer for his article "The Case of Roger Touhy" (November 17, 1955) in The Reporter, chosen as an "outstanding presentation."

Mr. Mayer detailed the long struggle by Roger Touhy to win his parole from prison in Illinois.

George Polk Memorial Award

To Milton Mayer for "outstanding national reporting" in his article "The Case of Roger Touhy."

National Brotherhood Certificate

To William Harlan Hale, presented by The National Conference of Christians and Jews, for Mr. Hale's article in The Reporter "Going Down This Street, Lord," (January 13, 1955) an account of a small church group and its work in Harlem.

1955

Benjamin Franklin Magazine Award

To Dwight Macdonald, author of "The Lie-Detector Era" (June 8 and June 22, 1954) in The Reporter. The article reported on the uses and abuses of the lie detector in government agencies.

1955 (continued)

Benjamin Franklin Magazine Citation

To The Reporter for "meritorious contribution in the field of public service" with the article "Victim of Nameless Accusers," (March 2, 1954) by Anthony Lewis, whose newspaper series on the same subject won the Pulitzer Prize.

Mr. Lewis told the story of a government employe suspended from his job because of baseless security-risk rumors. The employe was eventually reinstated.

Heywood Broun Award

To Anthony Lewis for his article "Victim of Nameless Accusers" (March 2, 1954) in The Reporter and his newspaper series on the subject.

Benjamin Franklin Magazine Citation

To Theodore H. White, author of "Texas: Land of Wealth and Fear" (May 25 and June 8, 1954) in The Reporter. Mr. White reported on the political activities of Texas millionaires, including the financing of various pressure groups in the country.

1953

George Polk Magazine Award (Long Island University)

To The Reporter for its series "The Wiretappers," (December 23, 1953 and January 6, 1954) by William Fairfield and Charles Clift.

The awards committee created a special magazine award, giving it first to The Reporter for the series that told how wiretapping was used both in government and industry. The article preceded, by two years, the first newsbreak on the subject.

In voting the award, the judges said of The Reporter that "in many ways, its purpose, its slant, its scope parallel the career of George Polk, for in the quest of the truth it strikes out in a manner seldom equalled by older and more established competitors."

EDWARD R. MURROW
403 MADISON AVENUE
NEW YORK 22, N.Y.

June [illegible], 1958

Dear Mr. Katzender:

I have your letter and wish very much that it were possible for me to meet sometime during the next six weeks and have the discussion you suggest.

Unfortunately, such time as you appear to be available for the next three weeks, I shall be spending much of my time working away from the city and at the end of June, I am going on vacation for several weeks.

Since it is the Reporter's 10th Anniversary that you wish to discuss, I assume it has something to do with a possible appearance on PERSON TO PERSON. If this is the case, permit me to suggest that you address yourself to the producers of the program, Jesse Zousmer and John Aaron, since they are now working on prospects for next season.

Sincerely,

Mr. Isidore Katzender
Director of Promotion

Mr. Jesse Zousmer
Person to Person
Columbia Broadcasting System
485 Madison Avenue
New York, New York

Dear Mr. Zousmer:

As you know, The Reporter will observe its tenth anniversary next April -- and in the three years that have gone by since I spoke with you about the magazine and its founder Max Ascoli, much has happened, both to the publication and to Ascoli himself.

I do feel that Ascoli, not only as editor and publisher of The Reporter, but also as an unusual man, would qualify as a particularly stimulating guest on Person to Person. And, as Mr. Murrow tells me that you are scheduling next year's guests, I'd like to submit this material now for your consideration.

ABOUT MAX ASCOLI

Although Ascoli was born in Italy (Ferrara, in the north) and was a professor of jurisprudence at the University of Rome, he maintains that he was "born" an American.

"Americans are born -- not made," he wrote on becoming a citizen in 1939. "There are people who -- no matter where they come from -- can fully find themselves only when they come over here. At least this has been my case."

Ascoli arrived in the United States in the early 30's under the aegis of a Rockefeller Foundation Fellowship, after having spent some time in Mussolini's jails as an anti-fascist. He traveled widely in the United States, studied at Harvard, Chicago, Wisconsin, and then joined the faculty of the New School for Social Research where he later was named Dean of the Graduate School.

In 1940, he was appointed by Nelson Rockefeller as Associate Director of Cultural Relations in the Office of the Coordinator of Inter-American Affairs.

In April 1949, he founded The Reporter -- and has been its spark ever since.

He has said that the switch from teaching to editing and publishing has been a happy one, although he admits that he has never quite got over the habit of "talking at" his editors and writers, much to their occasional chagrin.

There has been a remarkable change in Ascoli in the last year and a half that I think will be of particular interest to you, apart from his original, and independent, approach to publishing and politics. Ascoli can actually see today, i.e., distinguish things from people, as a result of an operation he had in November 1956.

He was born with an extreme myopia, and from the age of about five was forced to wear thick-lensed spectacles. As he grew older, his sight worsened, and in later years he developed cataracts. Since life was at first academic, then publishing, his task was an arduous one and it finally reached a point where, he said, "it was necessary to have the eye operation or cut off my nose," for he could read only with printed matter pushed against his nose. Since he edits virtually every line in The Reporter, his work became more and more difficult.

The operation was performed, the cataracts removed and a new surgical technique corrected the myopia to such an extent that he now wears ordinary glasses and can actually "see."

The first months were distracting. Where previously he had led a circumscribed social life (for he could recognize people, including old friends, mostly by their voices), today he wants to go everywhere, look at people and places, and do a good bit of his own reporting. He travels, reports, goads his correspondents into working on stories that he "sees" but they don't. "Eople with normal eyes all their lives have a habit of taking things for granted," he comments.

At 60, he feels a man reborn. He window-shops, wanders into art gallerys, goes to the theater, cocktail parties, dinner parties at a great rate. He has, and virtually overnight, added a new dimension to his life.

Ascoli speaks with an accent. He is articulate and is never at a loss for the mot juste. He is a man of considerable temperament, great vitality, somewhat excitable -- but the excitability is frequently part of the show he likes to put on. He, and everyone else, enjoys it. He is, as is obvious, a serious man, a scholar, and a strong-headed editor.

Although he is, of course, thoroughly at home in the English language, he comes up from time to time with some malapropisms -- and we frequently suspect that he does it with some deliberation. He is especially addicted to slang and is fond of saying, for example, that he didn't like a particular article because "it just isn't up to sniffles." The arrival of an additional, and sorely needed, copy editor found him saying, "Thank God, we are no longer underhanded."

He is well known and well respected. He has spoken, for example, on the Atlantic alliance at the Air War College at Maxwell Air Force Base. He gave the keynote address at the 75th anniversary of Marquette University. ("I am very flattered," he said, "and I must remember not to swear in front of the fathers." His love for music has resulted in a huge collection of records. His own taste runs to the early Italians -- Vivaldi, Marcello, Monteverdi, etc. And some of his favorite Christmas music is the medieval music of France.

He has written three books, "The Power of Freedom," "Fascism for Whom?" and "Intelligence in Politics." Before founding The Reporter, he wrote extensively in the Atlantic Monthly, Yale Review, Annals of Social Science, Foreign Affairs, etc.

ABOUT THE ASCOLI FAMILY AND HOUSE

Ascoli married Marion Rosenwald in 1940; they have a 16-year-old son, Peter. Mrs. Ascoli is dark-haired, attractive, articulate. She has never lost her Chicago accent. Peter is a tall, round-faced boy, precocious and articulate. Ascoli is "papa" at home -- and frequently a stern one who is greatly concerned about Pete's application to his homework and to music. Pete plays the clarinet, goes to Collegiate school, is aiming for Harvard.

Mrs. Ascoli is active in philanthropic works; among them, the Citizens Committee for Children of New York City, Inc., in which she is chairman of the Health Section. One of her primary interests, of course, is The Reporter and she is very active on the business side, chairing the monthly business staff meetings. She is widely traveled and very knowledgeable, but with it all, a quite simple and direct person.

The Ascoli house is the pink one on Gramercy Square South. Marble steps lead up to the black door with a brass knocker. To the left is a huge window, virtually the height of the ground floor, that is the south end of the living room. The ground floor consists of the living room, dining room, Mrs. Ascoli's small and feminine study, pantry and kitchen.

The living room is comfortably furnished in various periods, has a number of good paintings, including a Gauguin, a Tintoretto, a Cezanne. The round table in front of the large window always carries a huge bowl of flowers which frequently are sent in from the Ascoli greenhouse at their farm in Croton-on-Hudson. A fireplace is usually alight in the winter. Mrs. Ascoli collects small porcelain objects, kept in a case in the living room. The dining room is large, quite conventional. Mrs. Ascoli's study, which is more of an office, is small and quite charming.

The second floor consists of Ascoli's large study, an office for his secretaries (he has two; one handling his affairs at The Reporter, the other, an Italian, handling his personal affairs); and the Ascoli bedroom.

Ascoli's study is furnished with a huge desk, comfortable chairs, has bookshelves and holds his favorite piece of furniture, a Barca-lounger. He says he can always tell the worth of a manuscript by lying back in the lounger and reading. If he falls asleep, out goes the manuscript.

The third floor holds Pete's room,and guest rooms.

During the summer, the Ascoli's move to Cliffdale Farm in Croton, but I should think you would be more interested in the Gramercy Square establishment.

The Ascoli's entertain frequently with dinner parties and have friends in for drinks. Their friends are all around the world and there is always someone interesting about.

ABOUT THE REPORTER

Ascoli founded The Reporter as an "experiment in adult journalism" in April 1949. The Reporter has long since passed the "experimental" phase and its circulation steadily grows. We now have 130,000 readers across the country -- with about 22 per cent in New York, 19 per cent in California, and the balance scattered among the states. Our appeal is to the urban reader. You might be interested in knowing that in percentage of total circulation, we outcirculate all the news magazines in Washington, D.C.

Why was The Reporter founded? After the Second World War, Ascoli felt that there was a publishing vacuum in news reporting between the dogmatic liberal magazines and the superficial news digests. Much as Fortune magazine filled the vacuum in business journalism in the 1930's, so has The Reporter filled the void in public-affairs reporting that existed immediately after the war.

Ascoli's constant theme is "responsible journalism." He has many times said: "It is not enough to carp and criticize. In offering criticism, one must be able to offer an alternative."

The Reporter's success in following that theme, as well as its desire to find new facts and new ideas about the important issues of the day and to report on them in depth, is well illustrated by its heavy readership among communications people. A recent informal survey showed, for example, that newsmen rate The Reporter, a fortnightly, with the big news weeklies, that they read it, they said, as "homework." And The Reporter's impact on the editorial columns of newspapers across the country, and abroad, is a testimonial to its ability to presnnt new facts and new ideas.

The Reporter, in the past six years, has won 14 journalism awards, the latest being the Sigma Delta Chi Award for "distinguished public service in magazine journalism" for Paul Jacobs' article, "Clouds From Nevada," which first revealed the perils of atomic fallout in the United States. Incidentally, Mr. Murrow twice cited "Clouds From Nevada" in two programs on the subject of radioactive fallout.

The Reporter's line has been consistent. It is liberal, but not doctrinaire. It has supported de Gaulle in the recent crisis; did not condemn out-of-hand the French and British on the Suez invasion, and, initially, supported General Eisenhower in 1952.

In the latter connection, Ascoli felt that Eisenhower, who molded both SHAEF and SHAPE, would be the man who could unite the free countries of the world and win support for the western cause. But as the 1952 campaign went into the summer and Eisenhower's equivocal pronouncements grew more so, he began to back away. As he tells it, "The night Eisenhower joined forces with Senator Jenner, I came down with shingles and came out for Stevenson."

Ascoli is a strong-headed editor who takes no back-talk, but is always open to suggestion. Last winter, as recession news grew gloomier, and the foreign news worsened, he was approached by an editor who urged him to devote more space to domestic economic coverage. "What are people worried about?" Ascoli asked. "Their jobs," the editor replied. "Their jobs!" Ascoli exploded, "I am worried about the existence of the planet."

Nonetheless, The Reporter has covered, in its usual wide and deep fashion, economic news in the United States, and in the past few months has had some of the best coverage on economics.

I could go on and on -- but I doubt that you can, Mr. Zousmer. This will give you an idea of Ascoli and The Reporter.

What do you think? I look forward to hearing from you.

Sincerely,

Shirley Katzander
Director of Promotion

from: Kay Campbell

June 13, 1958

Shirley Katzander is a friend of mine. She told me that she was going to write Mr. Murrow for an appointment because she wanted to discuss the possibility of getting Max Ascoli, Publisher of the Reporter, on PERSON TO PERSON to celebrate the magazine's 10th anniversary next April.

I explained this to Mr. Murrow and he said to pass it along to you. It's all yours.

K.C.

June 13, 1958

Dear Mrs. Katzander:

I have your letter and wish very much that it were possible for us to meet sometime during the next few weeks and have the discussion you suggest.

Unfortunately, such time does not appear to be available. For the next three weeks, I shall be spending much of my time working away from the city and at the end of June, I am going on vacation for several weeks.

Since it is the Reporter's 10th Anniversary that you wish to discuss, I assume it has something to do with a possible appearance on PERSON TO PERSON. If this is the case, permit me to suggest that you address yourself to the producers of the program, Jesse Zousmer and John Aaron since they are now working on prospects for next season.

Sincerely yours,

Mrs. Shirley Katzander
Director of Promotion

Dear Mr. Murrow:

The Reporter will celebrate its 10th anniversary next April.

In this connection, I would very much like to talk with you and hope that you will be able to spare some time in the next few weeks to see me.

I shall call for an appointment, if I may, next week.

Sincerely,

Shirley Katzander

FOR RELEASE
DATE Sunday June 2

How the Explosion Was Set Off in Algeria

HAL LEHRMAN

ALGIERS

I arrived here from Morocco one day before Algeria exploded on May 13. Since then I have seen nearly everything that has occurred on the surface and some of what lay beneath, although large areas are still obscure. I have also received liberal—and I believe accurate—confidences from many high sources. But this account must necessarily be episodic, omitting much that has been generally reported and much that cannot yet be told.

THOSE WHO PLANNED and executed the May 13 uprising in Algeria operated mainly from three locations. One of these was a dressmaking school on the fifth floor of 50 Rue d'Isly, one of Algiers' busiest streets, situated just below the Gouvernement Général—the name that still clings to the huge Ministry of Algeria Building—which was to be the first target. Another was the Moorish villa Dar el Alaou ("House on the Hill") in the El Biar suburb of Algiers. The third, located just a short walk from the villa, was a compound called Antenne Avancée de la Défense Nationale, which was the Paris defense ministry's intelligence and communications liaison with all French troops in North Africa.

Some day a plaque may be put up on Dar el Alaou designating it as a national monument. Since March, its chic blonde chatelaine, Madame Simone Nouvion, wife of a rich *colon*, has been serving as hostess, cook, and sewer-on of buttons for battalions of assorted, ever-changing guests. She has survived a number of varied tavern-keeping crises: when three-hundred-pound Deputy Raymond Dronne (who had been the first French tankman to enter liberated Paris in 1944) arrived hastily from France without pajamas, Madame offered him a roomy lace *chemise de nuit* that she had worn before the birth of her son, now twenty-one.

Most of the guests had business in the nearby Antenne Avancée, where direct telephone wires were available to the minister of defense in Paris and a signal network to all command areas. Aides from the office of the defense minister were constantly arriving for quick briefing sessions before flying back to Paris. One of them, a M. Ribaud,

de Gaulle

became almost a permanent fixture at the Antenne Avancée; he was in effect the communications center of the plot.

Another frequent visitor was Léon Delbecque, assistant mayor of Tourcoing, a textile center in northern France, and secretary-general of the big Motte textile company. Delbecque had a distinguished record in the wartime Resistance, and also spent a six months' stint in 1956 as a volunteer reserve officer fighting the Algerian *Fellagha*. Delbecque's employer, Eugène Motte, had recommended him to his friend Defense Minister Jacques Chaban-Delmas as an experienced underground operative and a devoted patriot with a fiery determination to do everything he could to keep Algeria French. Chaban-Delmas (who was placed under house arrest after the Algerian uprising and is still under close surveillance) gave Delbecque defense ministry credentials and added him to his personal staff as chargé de mission, thereby providing him with important facilities. The fact is that Delbecque, thirty-nine, tall, handsome, and monumentally energetic, became the chief executive officer of the secret organization that staged the May 13 uprising.

CHARLES DE GAULLE apparently became the patron saint of the revolt against the central government of Paris at a very early stage—although his name was not publicly offered to the Algerian populace until Sunday, April 11, when an editorial in the *Echo d'Alger*, the city's largest daily, suddenly announced that he was the nation's only possible savior.

De Gaulle had never been particularly beloved by Algerian politicians or even by the mass of European settlers. For them he had always been "the man from Brazzaville," where he had issued a wartime manifesto proclaiming the ultimate equality of all races in the future French African empire. Even worse, it was de Gaulle who in 1944 gave Algerian Moslems full rights of French citizenship with equal

FINAL PAGE PROOF—MAY 29

access to all military and civilian posts and even—in principle—the right to vote. If this ordinance had been implemented, it might have forestalled the Moslem drive for independence.

But the tall general does stand, symbolically and explicitly, for strong central authority, and this is precisely what the Frenchmen from the mainland who have been masterminding the Algerian "renaissance" wanted. They were soon convinced that it was what Frenchmen in Algeria wanted, too. If Algeria was to be saved, it was felt that the most effective way to save it was by attacking the alleged root of all evil: debility and paralysis in the capital. Long ago de Gaulle had turned his back contemptuously on the parliamentary "system." It was easy enough, then, to transform him into a father image who alone could be trusted to regulate all problems with firmness and wisdom.

Recruiting the Shock Troops

The planners of the movement had an ideology, but they needed shock troops to carry its banners. A group in Paris like the one in Algiers had been recruiting important political personalities and doing missionary work throughout the army, navy, and air force—from the rank of colonel downward, leaving most of the generals in the dark. Even more necessary than shock troops, however, were "spontaneous" demonstrations in the streets of Algiers against the policy of "abandonment" that had already lost Indo-China, Tunisia, and Morocco.

The chief of this operation was Jean l'Hostis, an Algiers importer of construction materials and a representative of Allis-Chalmers and other American firms. He had been awarded the medal of honor with silver palms for his help in the November, 1942, landing on the Algerian coast.

L'Hostis needed cover to justify his political comings and goings. This was arranged by making him a local chief of the Social Republican Party—which is vigorous in France but until then had no membership in Algiers—thus giving him official status. The next step was to organize an over-all *comité de vigilance*.

L'Hostis began by recruiting the leaders of seventeen united veterans' groups and some sixty other independent *anciens combattants* outfits. Most of the half-dozen local political parties were also willing to co-operate. There remained a whole string of assorted organizations, including university professors, students, former parachutists, and victims of *Fellagha* terrorists. They all joined.

Soustelle

THE FIRST TEST for the vigilance committee came with the fall of the Gaillard government on April 15. The veterans, fearing that any successor government would be likely to sell out French Algeria, wanted to hold a demonstration on April 18 as a warning. But the committee leaders argued that it was too soon, and the demonstration was postponed until April 28. The office of the resident minister for Algeria, Socialist Robert Lacoste, thereupon banned it. But the movement had already so infiltrated the administration that Delbecque, conferring with Lacoste's own subordinate, Serge Barrat, was able in effect to reverse the decision. He demanded and received pledges that most of the national gendarmerie would be confined to barracks, that no tear gas would be used, and that the marchers would not be fired on.

The parade went off as planned, impressive and disciplined. During the march there was an eerie silence, but at the end the great crowd was exhorted over loudspeakers to raise their hands and swear that Algeria would remain forever French. "*Nous le jurons!*" they thundered.

Once the apparatus of revolt had been set up, all that was needed was a signal—and a suitable occasion to set it in motion. It was now the fourth week France had been without a government, and Pierre Pflimlin was being invited to try his luck at forming one. The occasion for action seemed to be at hand. As an economist and financier, Pflimlin was not exactly a specialist in either foreign policy or North African affairs, and on the sensitive Algerian problem he had made some imprudent declarations—all of them susceptible of alarming interpretation, if alarm was convenient.

The press of Algiers unanimously found it convenient. Pflimlin, the headlines said, was talking of a cease-fire against the F.L.N.—and "negotiations." Just like Indo-China! Another "abandonment"! Pflimlin must not take office!

On Friday, May 9, Delbecque, who had once again been to Paris, flew in from France and went directly to see Lacoste, who had always advocated a firm policy against the F.L.N. Now he was packing up to go to France—to see which way the political wind was blowing.

The Wooing of Robert Lacoste

Delbecque asked Lacoste to stay. He had letters in his pocket from high personages in Paris to give Lacoste if the minister would take a clear position against the parliamentary "system." Their conversation reportedly lasted nearly two hours. Delbecque pleaded with Lacoste to accept leadership of the movement. He implied that a plan had been set up for a zero hour. If the populace of Algiers rose in a massive demonstration around the Gouvernement Général, would Lacoste receive a delegation and grant its request to form an emergency committee for public safety, which would hold out against any government of "abandonment" in Paris? The minister shook his head. He was too old, he said, to break with his party, but he would go to Paris as he had promised. He would try there "to make some people change their minds."

LACOSTE'S REFUSAL was a setback. As minister for Algeria he could have provided an appearance of

FINAL PAGE PROOF—MAY 29

legality for the movement. Delbecque thought he had shaken Lacoste's resolve somewhat, and asked others to try again. That afternoon the spokesmen of seventeen leading patriotic groups and political parties descended on the minister.

Jean l'Hostis gravely introduced each visitor, emphasizing the scope and importance of the group he represented. In effect, Lacoste was asked to choose between Socialism and France. The "system" must make way for a government of public safety. (Speeches haranguing the April 28 marchers had called for a government of *national* safety; *public* safety—"*salut public*"—was infinitely more sinister, reminiscent of tumbrils and guillotines.) You, Lacoste was notified, are one of the patriots who should stand ready to take the helm. Lacoste had tears in his eyes, but again he pleaded the impossibility of cutting his party ties after so many years.

But he did not definitely say "No." He recommended that vigilance committees be established throughout Algeria. If Algiers rose alone, Paris would scoff and dismiss it as an outbreak of "colonialists and ultras." But if there were mass protests throughout all of Algeria, "Even I would go into the streets," Lacoste is reported to have promised.

Then the callers tried another gambit. If President René Coty could somehow be persuaded to reject Pflimlin and all other potential premiers like him, it would obviate the need for action in the streets of Algiers and the vigilantes could save their powder for stormier days. The visitors laid on Lacoste's desk the text of a telegram urging Coty to proclaim a government of public safety and asked Lacoste to sign it. But the minister drew back cautiously. He promised instead that he himself would take the text to Coty with his own recommendation.

The Substitute: Soustelle

Meanwhile, Delbecque was working on army leaders here with better results. He invited General Paul Allard, commander of the army corps in Algeria, to get authorization from his commander in chief, General Raoul Salan, to wire a warning to Coty that the military could not be counted on to restrain public wrath if a government of "abandonment" were set up. Generals Salan, Allard, Edmond Jouhaud, and Léon Dulac and Admiral Philippe-Marie Auboyneau gingerly considered the proposition for two hours and then sent a telegram to this effect to their commanding officer in Paris, Chief

Massu

of Staff General Paul Ely (who soon afterward resigned in an implied protest against Pflimlin). Ely forwarded the officers' message to President Coty, tacking on an even stronger one of his own.

On Saturday, May 10, Delbecque flew back to Paris to report to his principals concerning Lacoste's unavailability. According to one of my informants, among those principals was Jacques Soustelle, the most prominent of de Gaulle's parliamentary horsemen—the others being Popular Republican Georges Bidault, Radical Socialist André Morice, and Independent Republican Roger Duchet. As a former governor general of Algeria, Soustelle could substitute in a pinch for Lacoste as at least a symbolic legal link between the mainland and a quasi-rebellious Algeria—if he could get there.

In Algiers, "psychological preparation" continued with the assistance of both friends and foes of the movement. Alain de Sérigny, wealthy publisher of the *Echo d'Alger*, in a front-page editorial for Sunday's edition again proclaimed that de Gaulle was Algeria's only possible deliverer, and thousands of pictures of the general—brought in from France by the vigilance committee a fortnight earlier—blossomed forth on every wall. Lacoste, now back in France, made a speech declaring that an Algerian sellout was being prepared, a diplomatic Dienbienphu. The F.L.N. contributed its mite by announcing the execution of three French soldiers who had been captured near the Tunisian border some months ago.

In Paris, Pflimlin was stolidly continuing his efforts to scrape a cabinet together—with every likelihood of success. From the movement's center in the French capital, a coded message flashed to Algiers that "the train should pull out of the station on Tuesday." In other words, May 13.

LACOSTE's normally painstaking censors in Algiers seemed asleep. On Monday morning newspapers carried the following banner announcements for Tuesday: HALF-DAY GENERAL STRIKE COMMENCING ONE P.M.; MASS RALLY THREE P.M. ON THE PLATEAU DES GLIERES [at the foot of the hill dominated by the Gouvernement Général]; CEREMONIES SIX P.M. AT THE WAR MEMORIAL [halfway up the hill]. A strike and rally were to be organized against Pflimlin; a wreath-laying ceremony was to be held at the Monument aux Morts for the three "martyr" soldiers. By this time even Paris knew that big trouble was brewing. Caretaker Premier Gaillard telephoned Prefect Barrat and General Salan to ask why such things were being permitted. They replied, in effect, "That's just the way things are, M. le Président." Gaillard suggested that the strike rally be banned—but he did not order it, since he had resigned a month earlier and was merely waiting for the next man to take over.

On the evening of Monday, May 12, the ministry's chief press officer bestirred himself and indignantly banned an even bigger and louder notice of the strike and rally that the vigilantes had prepared for Tuesday's papers. The committee was preparing to counter this move by running a huge white space along with an announcement of the censors' intervention, when Prefect Barrat—perhaps unwittingly, though that seems doubtful—came to the rescue. When the committee officially notified him of the program, he courteously suggested that the rally be postponed from three to five P.M. so that the crowds wouldn't have so

FINAL PAGE PROOF—MAY 29

long to wait before the wreath-laying ceremony. This gave the committee a valid reason to shout down the censors and get prominent articles back into the papers about the postponement—and the rally.

The Fire Gets Out of Control

The visible events of Tuesday, May 13, when the Gouvernement Général fell to the mob and the Comité de Salut Public (C.S.P.) was born, have been fully reported elsewhere. Ironically, it was not planned quite the way it happened. The general-strike rally and the war-memorial ceremonies went off as if the program had been rehearsed. The mammoth crowd, even larger than the ones that turned out to welcome the Allied liberators in 1942—or de Gaulle in 1943—sincerely believed that it was simply participating in a patriotic demonstration, but in effect it was doing what it was told. Even its size was a tribute to backstage management—sound trucks, youngsters on roaring scooters waving tricolors, fleets of flag-draped automobiles honking a rhythmic three short, two long beats for *"Algérie française,"* leaflets ready for nearly every eventuality, and cheer leaders located at strategic points to encourage the crowd to shout the prescribed slogans. The command post at the Antenne Avancée had set up direct phone lines to a crow's nest in a private apartment opposite the ministry and to a loudspeaker team that was commanded by Reserve Lieutenant Julien Neuwirth, now the C.S.P. press chief. Neuwirth's team was installed in the office of the army newspaper *Le Bled,* which overlooked the rally scene.

But the vigilantes had never intended that the ministry should be stormed and taken over. At the right moment, a delegation was supposed to go through the tunnel leading from the 10th Regional Army Headquarters in the Rue d'Isly up into the bowels of the ministry, march with an escort of paratroopers and uniformed civilian reservists into the office of Pierre Maisonneuve—the absent Lacoste's chief deputy—and demand Maisonneuve's legal approval for the installation of preselected C.S.P. members in his own office.

It didn't happen that way. Someone—it is not known who—threw a tear-gas bomb during the war-memorial solemnities. A zealous colonel in charge of army propaganda disconnected the loudspeakers that might have dissuaded the enraged crowd from battering down the ministry's gates. Army sentries, who had not been informed of the plan, refused to let the vigilance-committee delegates use the tunnel, obliging them to elbow their way through the mob—and arrive too late.

THE FIRST WAVE that broke into the building was a rowdy gang of youngsters having the time of their lives. They smashed furniture, tore up documents, started fires. (This was the only violence in the entire country-wide upheaval that followed—except for an incident in Oran, where a pugnacious prefect who offered resistance was shoved through a window and slightly hurt.) The second wave was the one that should have come first—young men wearing tricolor brassards who purposefully rushed upstairs to the communications room to save the precious Telex network connecting Algiers with the outside world, then raced

Salan

down again to help clear the corridors and occupy the nearby control room of Radio Algérie. But meanwhile, in Maisonneuve's office, pandemonium was producing a C.S.P. that was thrown together from the few members of the original delegation who happened to get there, plus whoever was making the most noise. Most important of all, its leader probably would not have been Brigadier General Jacques Massu, the hero of the 1957 clean-up of the Algiers F.L.N. terrorist ring. He later admitted that he had accepted the position because an unidentified bespectacled teen-age rioter at his elbow loudly insisted that he should.

Softening Up Salan

Soldiers obey their superiors, and Massu's superior was Salan. From Paris, Pflimlin, whose government was ratified in parliament that night, invested Salan with supreme military and civil powers in Algeria. This put Salan and his staff in an extraordinary dilemma. For several days thereafter the top army command talked as if the committee's only objective was the maintenance of law and order.

An even more extraordinary quandary was created for Massu's civilian colleagues among the original organizers of the rising, who could never be sure during this period that Salan would not arrest them on orders from Paris at the next committee meeting. This was why they kept the Unité Territoriale Blindée (armored corps reservists upon whom they knew they could rely) in the corridors outside their offices in the ministry, and why they maintained crowds night and day on the huge esplanade forum outside the ministry windows as a constant reminder of the source of their ultimate power.

They soon discovered that Salan was extremely sensitive to these crowds. When he had been booed by them—thanks to committee agents interspersed around the forum—on the night of May 13, he had flinched noticeably. Then the signal had gone out to cheer him, and he had expanded measurably.

The neatest single operation in the campaign to soften up General Salan came on May 15 after de Gaulle's willingness to take power had been announced to the forum throng. When Salan emerged on the ministry's balcony to make some brief remarks, the crowd chanted *"Vive Salan!"* As he warmed up, they shouted *"Vive Salan!"* again. The general soared into a peroration, concluding *"Vive la France! Vive l'Algérie française!"* Delbecque, who was standing beside him, whispered *"Vive de Gaulle!"* And General Salan—who

FINAL PAGE PROOF—MAY 29

owed his extensive authority to a premier who would have to disappear before de Gaulle could take power—enthusiastically echoed, "*Vive de Gaulle!*"

Soustelle's Arrival

Deibecque stayed up the first forty-eight hours, then slept four hours, then stayed up forty-eight hours more, working all the time to keep his bloodless revolution on the tracks. He couldn't relax until that other master engineer, Jacques Soustelle, arrived on the scene.

Soustelle's presence in Algeria had been the second great objective of the plan—after the demonstration at the Gouvernement Général and the establishment of the C.S.P.—and his failure to appear was its second great mishap. If he had turned up during the night of May 13-14, before Salan had received supreme powers, the committee probably would have "bestowed" those powers on Soustelle; and Salan, because of Soustelle's great personal and popular prestige, would probably have been unable to object. But when the former governor-general of Algeria tried to board a military plane at eleven o'clock on the evening of May 13 at Villacoublay, all aircraft had already been grounded. He returned to Paris and went to the Gare des Invalides in quest of a place on a civilian plane. Soustelle attempted to disguise himself by pulling his hat down over his ears and discarding his eyeglasses, which he is usually never without, but he was quickly recognized by the police. He gave up for the time and drove his car from the Invalides to the National Assembly, which was still in session on the crisis in Algeria.

Soustelle finally eluded the police on Friday, May 16, by the most banal of escape tricks. The police were on watch outside the building where he lives, but it would have been too outrageous to stand guard in the courtyard just outside his ground-floor apartment. First, Madame Soustelle drove out with his and her luggage locked in the trunk. The police peered politely, saw that she was alone, and let her pass. Later, a laundry truck entered the courtyard. Soustelle lay down on the floor at the rear of the vehicle with a blanket tossed over him and made an absurdly easy getaway.

At a rendezvous point east of Paris, he joined his wife. Both entered a third car, headed along the highway toward Switzerland, and shifted to a fourth car with local license plates well before crossing the border. Madame Soustelle remained in Switzerland, while her husband took the first plane from Geneva to Algiers on Saturday morning, May 17.

Conversation at the Airport

But there was still another crisis ahead. Soustelle's friends sensed a fear in the corridors of the Gouvernement Général that his arrival might fortify the C.S.P. at the expense of the army. Shortly before the plane

was due to land at the Maison-Carrée outside Algiers, Delbecque tried to put out an announcement of Soustelle's arrival over Radio Algérie. The station director declined to pass it. Delbecque discovered that his trusted reservists, who had been guarding both the station and the ministry, had suddenly been ordered to return to barracks. He tore up their orders, told them to stay put, sent a demand to the military sections controlling the radio that they permit a broadcast announcement of Soustelle's arrival, and dispatched agents through the town to alert the population. Then he rushed to the airport, convinced that General Salan would try to turn the plane around and sent it back to Switzerland with Soustelle still inside.

Delbecque found Soustelle in the waiting room with several companions, awaiting Salan's arrival. "Don't under any circumstances leave Algerian soil," Delbecque implored. "Our friends will be converging on the airport soon. In an hour all Algiers will know Soustelle has arrived. If you don't appear, the consequences may be very grave." Then Delbecque raced back to town to supervise the alert. On the way his car passed Salan's going to the airport.

Delbecque did not know that just as Salan was leaving the ministry, an aide notified him that the news of the arrival had been broadcast. Reaching the airport, the general nevertheless made an effort to get rid of Soustelle. According to those who were present, Salan, pale and uneasy, said: "Your arrival just now is terribly embarrassing. I am at this moment engaged in final efforts to convince Pflimlin to quit the premiership for France's sake. Your presence here can jeopardize this important effort."

"I shall consult my friends," Soustelle responded, looking the soldier blandly in the eye. "They're on their way. But if you insist at all costs, *mon général*, then I place myself at your orders."

"No, no," Salan replied in hasty retreat, "it's not a question of orders. But will you at least agree to stay incognito until I hear from Paris?"

Soustelle immediately consented. Salan hurried back to his office and his Paris-connected telephone, while Soustelle went off quietly with his own party to the home of a friend.

AN HOUR LATER, Salan phoned to say that Soustelle could now make a public appearance: Pflimlin had refused to budge. By the time Soustelle reached the Gouvernement Général, a huge crowd of perhaps a hundred thousand ecstatic admirers had packed the forum, the great stone stairway to the streets below, and the balconies and rooftops of the buildings above.

Since then, Soustelle has barnstormed the country at Salan's side and shared the spotlight with him. The general soon came to seek and depend on his counsel. The strange alliance of May 13 between town and fortress in Algeria continued to hold firm.

Dear Edward R Murrow

As Mr "Person-to-Person" I address myself to you. I am pioneering in a new type of art gallery. I would like to give representation to artists of so-called backward countries in Asia and Africa. My gallery is open for sincere artists and craftsmen. Can you do something about it? As an artist I want to infuse a new spirit in the private art gallery, strip it of crass commercialism and load the dice in favor of the artist.

As ever

Kavanau, Ted
F

December 18, 1958

Mr. Ted Kavanau
Instructor, R-TV Department
Ithaca College
Ithaca, N.Y.

Dear Mr. Kavanau:

Mr. Murrow has asked me to thank you for your courtesy in sending him a copy of the play written by Dr. Abend. He has not yet had a chance to read it, but hopes to do so over the weekend.

Sincerely yours,

Sheila Hogg
Secretary to Mr. Murrow

Founded 1892

ITHACA COLLEGE

ITHACA · NEW YORK

December 16, 1958

Mr. Edward R. Murrow
CBS-News
485 Madison Avenue
New York 17, N.Y.

Dear Mr. Murrow:

In line with the opinions you recently expressed on the lack of reality, politically, of night-time TV, I am sending you a copy of the script of a TV play that will be seen Thursday, December 18, on Ithaca College Television.

The play was written by Dr, Martin Abend of the Political Science Department. I'm sure that if you get a chance to peruse it you will not be bored.

Sincerely yours,

Ted Kavanau

Ted Kavanau
Instructor, R-TV Dept.

CASE NUMBER 9

THE UNITED STATES VS. OHLENDORF

An Original Drama-Documentary

by

Dr. Martin Abend
Department of Political Science
Ithaca College

Directed for Television: Ted Kavanau
Assistant Director: Arthur Kendall

ANN

1947...Nuremberg, Germany, the Hall of Justice.

World War II has been over for two years. Goering, Hess, Yodl, the major war criminal have been tried here and sentenced. The Military Tribunal is still in session... trials of Lesser War Criminals...

Today is October 16th, 1947, Thursday.

Case Number 9 is in progress...

United States versus Ohlendorf...

(MUSIC UP STRONG)

COURTROOM AUDIO LOW UNDER

MUSIC UNDER AND SLOWLY FADE

The defendent is S.S. General Otto Ohlendorf He is charged with Crimes Against Humanity and War Crimes. The specific charges...the extermination of 90,000 men, women and children.

The trial has been in progress two days...

(COURTROOM AUDIO)

PROS.

During the first nine months of Ohlendorf's year in command his force destroyed more than 90,000 human beings. These included Jews, gypsies, Asiatics and "undesirables". Between November 16, 1941 and December, 1941, his battalion killed an average of 700 human beings a day.

PROSECUTOR

Now, General Ohlendorf, a few more questions on the last gypsy massacre of 1941. This captured document, states that you recieved a special order to execute the entire gypsy population of Simpferopol, men, women and children-- were to be killed for military security, is that correct?

OHLENDORF

Yes, The order came from Supreme headquarters on Dec. 12. The execution happened on Dec. 19.

PROS.

You personally supervised the shottings?

OHL.

As the document indicates, I supervised at Simpferopol during the entire action, except for the dinner hour.

PROS.

Was this action carried out in the same manner as all the others - by shooting?

OHL.

Yes.

PROS.

The document mentions that gas vans were provided for the execution of the women and children.

How did these operate?

OHL.

The gas vans were closed trucks which held about thirty women and children. As the truck was driven the exhaust fumes of the motor came through a secret opening in the floor. I used this method only once.

PROS.

Why only once?

OHL.

It took too long.....it was too demoralizing for my truck-drivers.

PROS.

I see,...then your general method of execution of this gypsy population was the same as for all the others---by shooting. Is that correct?

OHL.

Yes, it was the fastest and least demoralizing method.

PROS.

I see....General Ohlendorf, were these slaughters always kept secret?

OHL.

There was strict secrecy of all executions. No one knew what was going to happen until the last moment, until they actually stood in front of the anti-tank ditches. For this reason we practically never had any panics or hysteria.

JUDGE.

Excuse me. Mr. Prosecutor...Gen. Ohlendorf, what were the people told to get them to move so peacefully and without any suspicion of their fate?

OHL.

The people were told they had to be temporarily moved to another city. They were loaded into trucks in groups of ten and then were taken to the place of execution, one truck at a time. The people behind never knew what happened to those who went before...until the last moment.

JUDGE.

Then tey were shot ten at a time?

OHL.

Yes.

JUDGE.

Were tehy shot on top of the bodies of those that went before?

OHL.

Unfortunately that could not be avoided

JUDGE.

Were these executions secret?

OHL.

There was strict secrecy of all executions in my command. Hysterical scenes were avoided as much as possible.

JUDGE.

Were beatings ever necessary?

OHL.

Practically never. I severely

punished men who mistreated anyone unnecessarily.

PROS.

Now Sir, this document lists the number of execited people at 800 men, women and children--is that approximately correct?

OHL.

Yes.

PROS.

Will you now confirm that your men murdered a sum total of about 90,000 men, women and children in South Russia between June 1941 and July 1942?

OHL.

(SHAKING HIS HEAD) Not murder. I never supervised any murder.

PROS.

Never supervised murder? That isn't murder to you?

OHL.

No, Sir. My men killed on higher order...they never murdered. There were no crimes committed by my command.

PROS.

(INCREDULOUSLY) You didn't murder? You killed? Killing innocent people-women, and children isn't murder if its committed by orders?

OHL.

That is correct, Mr. PROSECUTOR. I cannot call such killings murder. They were orders of military necessity from the chief

 of state in time of war.

PROS.

And so they were not murders?

OHL.

That is correct.

PROS.

General Ohlendorf, I have read the record of your private life with interest. You had a good education in law and philopsophy. You have a clean record as a civilian administrator. You're generally considered to be a cultured man...Now, with that kind of a background, can you seriously maintain that the slaughter of people, of innocent children, isn't murder, just because it was an order from the chief of state?

OHL.

Mr. Prosecutor, even in the way you put the question I can only answer yes.

PROS.

You were not a hired killer, you were not a simple, ignorant soldier...you knew the moral law...you knew you were supposed to protect helpless civilians, civilians in surrendered areas....Instead you directed 800 men in systematic slaughter, town by town, city by city, for a year..... Would you kall it murder if your men had killed without orders?

OHL.

Yes, of course, and I can assure you that such men would have been punished, too!

PROS.

But it's not murder if they have orders?

OHL.

Yes, if a man kills for personal gain then he is a murderer; he acts for himself. But if he kills for the benefit of his state or his people, he cannot be called a murderer. What he does as a private man and what he does as an instrument of his state, as a soldier, are morally separate.

JUDGE

I'd like to ask a question here. Gen. Ohlendorf, you know history and law. You know that men -- only men -- lead the state. Now these leaders can order what amounts to plain murder. Do you agree?

OHL.

Your Honor, the word murder cannot be legally used for actions ordered by the chief of state. His country was struggling for its existence, and he decided, on good evidence, that among these people were many dangerous enemies of his state. Like any leader in an emergency, he took emergency measures.

JUDGE

You haven't answered the question. I ask you as a man, as an intelligent person, to morally evaluate the order to shoot people in surrendered areas, to shoot children. In your private opinion what possible emergency can sanction the execution of little children?

OHL.

Naturally I protested when I first received the order. But then I was reminded that this was an order from the chief of state himself, who considered the measure absolutely necessary for wartime security and a permanent peace. That ended my protest. I was shocked at such an extreme of course, but I never considered it a private moral issue. I was a soldier, not a private individual. I knew that peacetime principles cannot be applied to a wartime crisis. My leader made the necessary decision; he alone is responsible...but only to God and history.

PROS.

General, do you consider these trials legal?

OHL.

Hardly.

PROS.

So you do not believe you should be on trial? Would you please describe the gypsy executions you supervised again.

OHL.

As I said before, the people to be executed were registered, and then taken on trucks....

PROS.

Yes, we've heard all that. I mean please describe what actually happened when these helpless people arrived at the anti-tank ditches?

OHL.

(AFTER A TENSE PAUSE) They were led to one side where their valuables were confiscated and registered. Then they were lined up in front of anti-tank ditches, facing away from us. About twenty riflemen quickly took positions behind them and fired at a signal.

PROS.

They were shot in groups of ten?

OHL.

Yes.

PROS.

Standing or kneeling?

OHL.

They were always standing.

PROS.

Now General Ohlendorf, here is a photo taken from one of your own enlisted men who participated in the executions. Is this a scene from the shootings which you supervised?

OHL.

It is possible.

PROS.

Your Honor, I wish to submit this in evidence.

PROS.

(TO OHLENDORF) Did the victims dig their own common grave?

OHL.

No. As I have said, and as the photo indicates, they were shot into old anti-tank ditches. Everything was prepared; there was no delay or long mental anguish.

PROS.

Now here is another captured photograph of the same scene. Is this the way the ditch looked when the Simpferopol execution of 800 human beings was completed?

OHL.

It is possible.

PROS.

Your Honor.(GIVES PHOTO TO JUDGE) (TO OHLENDORF) Were there children in that ditch, were children shot at Simpferopol?

OHL.

There were no exceptions.

PROS.

Answer the question, were children included?

OHL.

The order included children.

PROS.

Including infants?

OHL.

(SILENCE)

PROS.

(ALMOST SHOUTING) And you don't consider this trial legal? You don't consider that shooting people - down to the infant in arms- constitutes the basis for a trial?

OHL.

I have nothing to add to my previous comments.

JUDGE.

Mr. Prosecutor, the defendent is being tried on the charge of illegal killings, not for his opinions about the legality of the trial. It is irrelevant. (TO OHLENDORF) General Ohlendorf, how were the infants executed, in their mothers' arms?

OHL.

(SILENCE, THEN SPEAKING) They were separated at the last moment.

(SILENCE)

JUDGE.

Then shot separately?

OHL.

Yes.

PROS.

(REGAINING SOME COMPOSURE) General, how do you explain the horror of the world at the massacres you supervised?

OHL.

People are horrified because they think only about the executions. They forget that in a modern total war the object is to destroy all threats to the state as quickly as possible. These civilians were considered enemies: their children were considered potential enemies. It was a drastic measure, but war today is drastic. The fact that we shot people at twenty feet is considered especially gruesome because it was so close. But distance isn't important. The important fact is that people die -- on each side,-- unfortunate victims in the stream of history. The meaning of these things can only be left to the future centuries. The judgement is left to history.

PROS.

You would leave the shootings of babies, of women, to history? You would let it go at that?

OHL.

There's no other way. The terrible fact is even children died on both sides in the name of quick victory.

PROS.

Sir, from what you say I understand that you morally approved the execution orders. It appears you personally approved.

OHL.

I did Not, and still do not, morally

examine the order. I cannot judge. Of course, I felt the shootings as such were inhuman-but unfortunately, they were considered necessary.

PROS.

You felt the order was inhuman?!! What do you mean by 'inhuman'?

OHL.

I mean the order was an inhuman burden on my men,-to shoot defenseless people. There were nervous breakdowns,-even a suicide.

PROS.

(SARCASTICALLY) But there's no record of any strain in you, is there?

JUDGE.

(SHARPLY) Mr. Prosecutor, that type of comment is completely irrelevant.

PROS.

I'm sorry, your honor. Do you consider that it might be an inhuman burden on the victims to know they were going to be shot into a ditch without the faintest idea why they had to die?

OHL.

Of course it was an inhuman burden for them just as it was an inhuman burden on the helpless civilian populations in our cities that were bombed and burned to death by the tens of thousands in daily air raids. I had the same feelings towards those gypsies as the men in the bombers had who dropped mass death

on our cities. I felt the grimness of the terrible drama before me, and watched the scene with sober respect. I felt as your bombers must have felt towards the women and children and old people and sick people they killed under a rain of fire bombs and high explosives. We are the same men but they received medals; and I'm put on trial for my life by the same countries that awarded those medals.

PROS.

All right, now we are getting somewhere. Let's concede that innocent children died by bombs. Now, do you seriously attempt to draw a comparison between men who tried to bomb military targets, and hoped their bombs would not kill children, and your men who deliberately shot children in cold blood at twenty feet?? Is that a fair moral comparison?

OHL.

Mr. Prosecutor, your bombers deliberately bombed civilian centers in order to break the morale of our people. Your own leaders said this was the purpose. It was deliberate, mass destruction,-mass terror by bombings to break our will. Those bombers knew they would destroy innocent people. To me there is no moral difference between shooting people at twenty feet and blowing them up from a distance of five miles. Helpless persons are killed in each case. On each side the purpose was to win the war as quickly as possible.

regardless of the cost in life.

PROS.

Sir, have you ever considered that it was your nation that began the war and invaded peaceful countries? Have you ever considered that the invaded country stands on a higher moral plane than the invaders, no matter what it does to defend itself?

OHL.

I have my own opinion on how the war began!

JUDGE.

This is irrelevant, Mr. Prosecutor. The defendent is not on trial for beginning the wa

PROS.

Pardon me, your honor.

JUDGE.

(TO OHLENDORF) You stated that you considered the order inhuman...doesn't that imply that you considered the order immoral? At least secretly?

OHL.

I considered the order inhuman as such from a personal point of view. But I never thought it was immoral as such because such am execution order was considered necessary fo victory, and as a soldier, I had to accept that fact that even shooting people who had surrendered was to be understood from the military point of view.

JUDGE.

So you consider that military necessity justifies any action whatso-ever?

OHL.

Yes, if it is absolutely necessary from the military standpoint.

JUDGE.

And nothing ordered from the point of view of military necessity could ever be immoral?

OHL.

No, your honor. If military necessity involved morality, then all war would be immoral in itself, since the innocent always suffer. I myself saw thousands of people, helpless civilians, trapped and killed in a section of a city that was being bombed.. People burned and screamed, falling buildings crushed children and hysterical women, but still I cannot call that immoral. It was terrible and inhuman, but not immoral. My sister lost her three children in one night; she herself lost an arm. And still I do not hate, I do not condemn.

JUDGE.

Then morality never enters into the picture here, in your opinion?

OHL.

No, except if one might say that the only morality in war is to do waht is necessary to win the war and protect the nation.

JUDGE.

Is it of any significance to you that the bombings took place two years after your battalion began its execution of civilians?

OHL.

Our cities were bombed before the execution became known to the world. That means we would have been bombed anyhow.

JUDGE.

And the fact that these cities had not yet surrendered,----that there were enemy cities, does that make any difference in your estimation?

OHL.

Your honor, since I consider my life as already lost, I'll be frank. You said your bombers bombed enemy cities---but those fliers knew there were people, innocent people in those cities. They knew many of such people would surely die, still they dropped their bombs. They knew they would surely kill babies who could not be anyone's enemy, who could not help being born in an enemy city and who could not tell the Chief of State to stop the war. Babies who were as innocent as the infants which you asked me about. But still the bombs were dropped and they died. If we are murderers then many, other men are murderers, men of both sides.

JUDGE.

I'm sorry you consider your life as already lost, General. Go on, Mr. Prosecutor.

PROS.

General Ohlendorf, I'd like to clear this point again. Do you believe that the fliers of the bombers would have done what your men did--- do you believe that seriously?

OHL.

I cannot say what they would have done if they were ordered to do so for the nation. However, the question makes me wonder if those fliers would have dropped the bombs if they could have first seen their victims face to face as we did our victims. I think they would have done it. I think they would have dropped their death loads even after they saw the faces and eyes of the little children.

PROS.

Sir, you call yourself a Christian in your own records. How, may I ask, do you relate your Christianity with what has happened?

OHL.

Mr. Prosecutor, there has been no Christian ethic in inter-national relations for many years. As a private man, I was a progressive Christian. As a soldier, I did my duty.

PROS.

And what of the Lord's Commandments? Doesn' that apply to soldiers?

OHL.

One of the Lord's Commandments says not

kill. But that same Lord ordered the ancient Hebrews to exterminate certain peoples to the last child. I don't think God can contradict Himself.

PROS.

(STARING AT OHLENDORF INCREDULOUSLY)

And what of your will, your free will?

OHL.

My free will worked for the preservation of my people in time of emergency...as in all other patriotic men.

PROS.

General Ohlendorf, you speak with such conviction about fate and necessity and eath and you speak of your progressive Christianity. Would you now tell the court how you ~~xxxxxxxd~~ place your own loved ones, your parents, your own family in the picture? You executed women and children-how would you explain that to your own wife and child? How does your personal life enter into this?

OHL.

(STARES AT THE PROSECUTOR AND THROUGH HIM. THE JUDGE IMMEDIATELY INTERVENES)

JUDGE

That question is entirely irrelevant Mr. Prosecutor. I must rather impatiently call ypur attention to the issue of this trial, which is--did the defendent supervise illegal killings $

CONT.

JUDGE (CONTD.)

Did he commit war crimes and crimes against humanity? There is no relation between the question and the charge. You are examining his private life.

PROS.

Your Honor, by that question I was trying to ascertain the defendent's total moral attitude. If you'll examine this document you might agree that his answer could have revealed certain contradictions to his previous testimony....

(VOICE OF PROS. X FADES TO VOICE OF WIFE. DOLLY PAST PROS. IN TIGHT ON OHLENDORF. COME OUT TO FIND WIFE AT WRITING TABLE. PICTURE OF ELEVEN YEAR OLD BOY ON TABLE)

WIFE

My dearest Otto...I have been writing you letters for hours, but every time I finished one I threw it away. It is so difficult to write now. I cannot seem to find the right words, but now there is no more time. This will be the letter that you will receive. By the time you have it in your hands I will be far away...with our son. I deceived you, Otto. I lied to you about our son...Karl is not sick. He <u>was</u> able to come with me when I visited you over the last three weeks, but I could not bring him. Even when you told me that there was practically no chance to escape hanging in a trial by ex-enemies, I could not bring him.

WIFE (CONTD.)

Heaven forgive me for it. Otto, when I first learned what had happened in Russia I felt only a great sadness. I was weak and numb - nothing was important any more. But when I saw your bitterness and heard you say that you wanted to teach Karl your contempt for these people, your judges, and teach him how you were right in everything you had done, I knew I had to make the most important decision of my life. But I could not think clearly. One part of me urged me to go to you with Karl - but I couldn't do it. Those things would be too terrible for a child to believe in as right. Otto, your son is fine and innocent...he loves and he trusts. I know you are wrong even if I can't explain why you are wrong. I am sure of this one thing - you are the most intelligent man I ever knew. I always felt like a simple child when you spoke about the world, but in this I believe in my soul that I am right. I will teach Karl that both sides are wrong and pitiful. I will teach him the only important truth in all this - that neither side had pity, simple Christian pity for their fellow human beings. Otto, I beg you with a broken heart to understand me and forgive me. In my own simple way I know I am right. I often pray and it gives me comfort. I feel a wonderful peace...

WIFE (CONTD.)

I humble my heart. I'm going to teach our son to pray and believe with all his might that only the God in his heart is worthy of his life and work...nothing else. I'm going to teach that what does not give hope is wrong and a lie, and he'll learn that anything that brings suffering to the innocent cannot be right.....We must leave now. My heart breaks for us all Otto, God will surely hear your prayers as he did mine. Goodbye! Forgive me.

(VOICE OF WIFE BEGINS TO FADE AND PROSECUTOR'S TONES COME IN MORE STRONGLY AS HE IS IN FINAL DISCUSSION WITH JUDGE OVER THE DOCUMENT)

PROS.

Yes, Your Honor, this passage here on page two may be cited as a point in kind. The original question pertained to that. (WALKS BACK TO DOCK)

General Ohlendorf...I have only a few more questions and I will be finished. You have stated that the order was inhuman and very unpleasant for you to execute. Now, is it not true that you could have avoided the job? We know of at least one such case where an officer evaded such functions by pretending illness. Isn't it true that you could have pretended to be sick and be relieved of your duty that way?

OHL.

Yes, I suppose I could have played the part of a coward and had myself dismissed. I could have avoided a wartime duty,,and someone else would be standing here now, on trial for his life. I imagine your bombers could have refused to be the executioners of innocent civilians who lived in the enemy cities...but I'm sure they would have been denouned as cowards, even as traitors. Someone has to do the grim business of a war...the duty of a man...

PROS.

Yes, yes, well never mind the bombers now---we've been through all that. Please answer the question directly----could you have evaded the supervision of the mass shootings of 90,000 men, women and children?

OHL.

Yes.

PROS.

Now sir, I'm curious about this item which I found in one of your wartime reports on the executions. It is written here that you forbade your men to shoot insane people. Were insane people executed also?

OHL.

OHL.

It was often done by other commanders. They executed the inmates of asylums so that the asylums could be used as barracks for the army. It also saved food. I did not approve of this policy and such executions never happened in my command.

PROS.

Now that is interesting. Why did you refuse to allow shootings of the insane? Wasn't it ordered? Weren't you a soldier who had to obey all orders, even shooting children?

OHL.

The execution of the insane was not really an order. It was left to the discretion of the commanders. I did not permit it because I knew that it would have had especially terrible effects on my men, who already were under a great strain.

PROS.

I see, you forbade the executions out of consideration for your men alone?

OHL.

And also to save innocent lives.

PROS.

Innocent? Weren't the gypsy children you shot just as innocent as the insane people you did not shoot? In what conceivable way were those children guilty of anything?

OHL.

Mr. Prosecutor, I had no choice with the children. The execution order stated that these children would grow into people who would surely be our enemies. There were to be no exceptions, large or small. With the insane people I had freedom of choice.

Judge.

I believe we have covered the topic of the defendant's moral viewpoints adequately, Mr. Prosecutor.

PROS.

Very well, your honor. (BRIEFLY CHECKS THE DOCUMENT.)

Your honor, I have no more questions to ask the defendant.

JUDGE.

I have several questions to ask before the court is adjourned for the writing of the final judgment. General Ohlendorf, you spared the lives of the insane because you had the power of exercising your private discretion, and in your private

discretion you decided that shooting them would be too hard on your men and that they were innocent anyway. Now can you prove thits court that you ever saved a single life among the tens of thousands of people you had executed? Did you ever spare the life of let's say an old man, a sick woman, a crippled child---anyone at all?

OHL.

Your honor, such a thing wasn't possible. An exception of one would have made the execution of the rest seem like simple murder to my men. The order was absolute, and we obeyed absolutely. To the last moment of my life I'll believe we did the only thing we could have done under those circumstances.

JUDGE.

One last question...and you don't have to answer this.....Did you ever <u>want</u> to save the life of one of your victims? As you watched the spectacle of helpless human beings led to wholesale slaughter did you ever feel the urge to stop the tragedy for at least one person....a person that was especially pathetic?

OHL.

Your honor, to me there is only one useful purpose served by this trial; it will tell the people of the future my side of the case. And I know those people will judge that I was right. In war there can be no morality and there can be no pity. As I watched those lines of people moving to their deaths I didn't see them as individuals but as the objects of an execution order. MY only thought was that this was necessary to win a permanent victory. I acted for the interest of my state, not for myself. I am not guilty of any crime.

JUDGE

General Ohlendorf, the question was--- did you ever feel the <u>urge</u> to save one soul? You never answered that question?

OHL.

I have nothing more to say.

JUDGE

The court is adjourned until next Thursday, when the final decision of this Tribunal will be rendered.

(TRIBUNAL STANDS, BEGINS TO FILE OFF
FADE OUT. FADE IN AS TRIBUNAL RETURNS)

JUDGE

General Otto Ohlendorf, you have been charged with the supervision of the illegal killings of 90,000 helpless human beings. This Tribunal has carefully considered the evidence and your arguments and has come to the following conclusions...

We believe you plainly understood that the deliberate shooting of men, women and children constituted a crime called murder. The execution of civilians in areas which have surrendered is recognized as murder by the entire civilized world. And you, General Ohlendorf, are very much a man who knew our civilization and its beliefs. Yet you directed the slaughter of women and children, whom even savage tribes sometimes spare. You supervised cold-blooded, mass murder. One of your pleas is the comparison of the inhumanity of air-raids with the inhumanity of executions. You maintain there is no true difference between the deaths of civilians by bombs and the shooting of civilians by order. The court disagrees. There is no similarity in the bombings of an enemy target, and the regrettable loss of life that goes with it, to the singling out of human beings, down to the infants, and shooting them. Bombers do <u>not</u> select their victims in cold blood. They bomb targets as such, with a view to

destroying military power; they do not premeditate the death of particular women and children. And when an area has surrendered the bombing ends. The death stops. But your battalion went on with methodical slaughter long after the areas had surrendered. This is the difference between the methods of legal warfare and outright murder. The deliberate slaughter of little children itself proves the case of murder against you, unbelievably horrible murder.

You have pleaded with the Tribunal that you were a soldier under superior orders, that your country was in danger and you as a soldier could not question the wisdom of your leader. The court rejects this plea. You were not a machine. You knew that what is morally wrong cannot be politically right. You knew that the order of your chief of state was a criminal order, not a military order. As an officer you knew very well that slaughtering little babies with their mothers was not a military objective, but a criminal one. What did you do when you received this criminal order? You say you had to obey, regardless of your personal feelings. But your private approval of the order was shown by your ruthless execution of the order. If you disapproved of the

order which you knew was criminal you would have lessened its severity. You would have mitigated its execution. You would have spared lives. But by your own admission you did not save the soul of a single child. You showed your approval of the order by your murderous efficiency. You could have entirely evaded the supervision of such bloody horror by pretending illness. But you held your sense of duty higher than the lives of tens of thousands of innocent, bewildered, human beings. The fact that someone else would have done the job is no excuse. Each man is tried for his own actions.

General Ohlendorf, you are charged as a man, not as a soldier of any particular country. Any civilized society agrees that your acts constituted wilful murder, and the conscience of such societies has summoned you to answer for your crimes.

The charge that you willingly and knowingly participated in illegal killings has been proven beyond any reasonable doubt. You had no pity: you deserve no pity.

Therefore, on the count of the indictment on which you have been convicted this Tribunal sentences you to death by hanging.

Kawin, Irene

June 26, 1959

Dear Miss Kawin:

Many thanks for your nice letter of June 23rd.

Your kind comments about my programs are greatly appreciated. Thanks, too, for your good wishes in connection with my upcoming sabbatical leave. I hope that when I do return to CBS next year, it will be with a program worthy enough to warrant your continued attention.

Again, thank you for writing as you did.

Sincerely,

Miss Irene Kawin

June 23,1959

Mr.Edward Murrow,
CBS Radio & T.V.Station,
New York, N.Y.

Dear Ed Murrow:

It's going to be a drab year for your million friends and admirers. One of the main reasons for having a Radio or a Television is to get your stimulating programs.

I wish you the best of everything during your sabbatical year. You certainly deserve it.

Above all, I look forward to your return . Wherever you may be, over whatever network you speak, your eager audience will greet you with joy.

Best of luck! Come back safe and soon.

Sincerely,

Irene Kawin

May 19, 1959

Mr. Elia Kazan
1545 Broadway
New York, N.Y.

Dear Elia Kazan:

Thank you very much for your note about Ray Swing's play. I wouldn't have bothered you with it but didn't know where else to turn. Thank you again.

Sincerely yours,

ERM:skh

Kazan.

April 29, 1959

Dear Mr. Kazan:

I have no doubt that many of your friends, and even mere acquaintances burden you with this sort of thing, but I am venturing to send you a play written by my colleague, Raymond Swing.

Could you ask someone to render an opinion on it. Many thanks.

Sincerely yours,

Mr. Elia Kazan
212 East 72 Street
New York, New York

Kearns, Frank M.

April 6, 1959

Dear Frank:

I am just back from London, Paris, Berlin and Bonn, and find your gracious letter of March 8, for which I say you my thanks.

Certainly I shall be spending some time in the Middle East, and look forward to a long and leisurely rendezvous with you. So far, I have not made a single plan, aside from one commitment in London in mid-October. I will hoist a signal when things begin to shape up.

As ever yours, and, again, many thanks for your letter,

KRM:skh

Mr. Frank M. Kearns

Flat 44, Badrowi Bldg.
8, Sh. Saleh Ayoub
Zamalek, Cairo, UAR
March 8th, 1959

Dear Ed:

Just a hasty note to congratulate you upon your famous speech, and your decision to take a sabbatical.

The speech --- what more can I add to all the plaudits you've already received? Only, perhaps, to say that as a proud, conscientious and working reporter I was proud of much in that address, and proud to call myself a colleague of yours. And you might be interested to know that many of your remarks in that speech are still the subject of discussion and admiration among working correspondents abroad, as well as non-correspondents.

As for your leave, only those of us in the Business can appreciate the fatigue which brings on such a move. And I hope this coming year of leave produces some rest, as well as quiet thought and study. More than anyone in the profession, you've earned it --- and, well, I just hope you enjoy it!

Needless to add, if you're ever out this way, the welcome-mat is here, the latch-string is always out, waiting.

Best personal wishes,

Frank

Kearns, Frank

February 4, 1958

Dear Frank:

I imagine the fault is more mine than yours, plus perhaps, the fact that your boys haven't produced a Sputnik out there. The combination of space gadgets, Ike's health, NATO, etc., have caused us to neglect the Middle East on the 7:45.

You have certainly done nothing to offend me and even if you had, it wouldn't make any difference. Your stuff on the air has been damned good and I suggest that whenever you have a good story you shoot off a cable and suggest it, or if there isn't time go ahead and order yourself up. If we are too burdened with domestic news, I will have no hesitation in telling you.

As you have probably gathered, there is a big economic squeeze at the moment, but these things have a way of passing fairly rapidly in this business and the general opinion seems to be that things will steadily look up by autumn.

As ever yours,

Mr. Frank M. Kearns

8, Sh. Saleh Ayoub
Zamalek, Cairo, Egypt
January 13th, 1958

Dear Ed:

The holiday week was so jammed-up with news we didn't even get around to sending Christmas cards this season. So, this is to wish you another prosperous, famous and satisfying year in 1958...and all the very best, personally.

Also, I've just been mulling over my 1957 records -- and find, to my shock, that you only used Cairo on your radio show 5 or 6 times during the entire year. Realize I've been On The Road some 5 or 6 months of the year. But, even so, Cairo has hit a lot of frontpages in the past year.

And I'm wondering if, unknowingly, I've done or said anything to offend you, Ed.

If so, I'll be grateful if you'll tell me honestly, so we can clear up whatever it is, if it is.

If not, if it's just a combination of circumstances, or possibly due to my ignorance of your current needs, or to my failure to "offer" more, I'll be equally grateful if you'll have someone give me a rundown on your current format and requirements. More specifically, I'd appreciate a couple of copies of your scripts, of information on exactly what you want and like from abroad, including preferred lengths, and on whether you want suggestion-offers by cable, or prefer to order yourself.

I'd really like to contribute more to your radio show, Ed ...not only for the usual reasons, but also because, naturally, I'd be proud to be a part of it.

With many, many thanks...and best regards from Gwen and I to you, and Fred, and the gang ----

Sincerely,

Frank

Editorial Comment

There Is No Better Way to Start the Year

AS WE BEGIN our routine tasks today on the first business day of 1958, we suggest there is no better way to start the year than with a sincere prayer to Divine Providence for comfort and guidance.

There are grave problems before us. On the internal front we are faced with serious educational and financial and civil-rights problems. Abroad we are threatened by a deadly, godless enemy. Therein we have an advantage, for we are a people who believe in God.

This time may be much akin to the situation when Abraham Lincoln said:

"I have been driven many times to my knees by the overwhelming conviction that I had nowhere else to go. My own wisdom, and that of all about me, seemed insufficient for the day."

In our prayer today we suggest that we ask for strength to put aside petty selfishness and greed; that we may live with our neighbors without prejudice; that we may be generous in thought and in contribution to charities; that we will be considerate of others; that we will try our hardest for 365 days to live up to the Golden Rule; and that we will, above all, not fail to be kind.

To that might be personally added: "Give me the serenity to accept what cannot be changed. Give me the courage to change what can be changed. Give me the wisdom to know one from the other."

There is one thought we anonlmous and the sentiment is not exactly a prayer. But it is good enough to be included in any supplication to our Divine Father. It reads:

"I shall pass through this world but once. Any good, therefore, that I can do or any kindness that I can show to any human being, let me do it now. Let me not defer or neglect it, for I shall not pass this way again."

And in that spirit, may we wish to our friends and readers the best of everything throughout all of this New Year.

Health, Properity and Happiness we hope will come to all.

What of Westchester Realty in 1958?

REAL ESTATE transactions, along with building construction, form one of Westchester's busiest trades. In fact, it has been estimated that building itself represents the county's largest industry. Since building necessarily concerns itself with land, the combination of the two plays a very important role in our county's economy.

What, then, was the 1957 record? And what may we reasonably expect in 1958?

Well, it wasn't too good a year, this 1957, but on the other hand it could have been worse. Money for building was pretty tight all through the year. And it takes money to finance and refinance land purchases and construction thereon.

As in former years, prices stayed in line. That has been a Westchester habit; except in extreme depression periods realty values hold up nicely in our county.

National headquarters construction still featured the large-building industry, but not many apartent houses were erected. There was a sharp decline in the number of one-family homes started, and statistics gathered by the Westchester County Assn. show fewer new homes around $15,000 and considerably more at $30,000 or above.

Estimates for 1958, at this writing, are that we will go along for the first half of the year at pretty much the same rate as during the last half of 1957. Then, as increasing population takes up the slack there will be fewer homeson the market for purchase—there never are many for rental — and construction will again begin to move upward on the charts.

A primary factor in Westchester's realty operations this year will be the availability of mortgage money. It now appears that Washington has given approval to lessening the tight strings on the banks money bags. Realtors tell us that mortgage money is noticeably easier to find.

Too, the steady increase in population throughout all of Westchester will have its effect. And so long as our employment ranks hold firm and our payrolls contribute to community economy, there should be no great worry. Westchester has fortunately not been tied in too closely with government armament contracts, as was the case on Long Island. Consequently, we have not suffered severely insuch contract cancellations because of a change in military strategy.

Altogether, the outlook for Westchester realty at this time is satisfactory. It could be better; it might be worse.

o O o

New Daniels Come to Judgment!

WE WELCOME to respective benches of our courts in Westchester Surrogate John J. Dillon of White Plains and County Judge James D. Hopkins of North Castle. Each has had a prior service record with the county as well as a distinguished career within the legal profession.

Judge Hopkins, as a news article recently mentioned, is the first of our public servants to have held top post in three governmental [illegible] as Chairman of our Board of Supervisors, as County Executive, and now as County Judge.

Judge Dillon served ably as Chief Assistant Distirct Attorney and has been honored by his associates through election in 1957 as President of the Westchester County Bar Assn. Such recognition comes only to those whose integrity and ability are unquestioned.

We welcome these two jurists to the county bench.

At the same time, if we may be permitted, we would like to express appreciation for the public to retiring Surrogate George A. Brenner and retiring County Judge Harold T. Garrity. Serving interim gubernatorial appointments to vacancies, the fortunes of politics prevent their continuation in these posts. But in their months upon the bench they have shown diligence and courtesy to litigants and counsel.

They are to be commended for such effort and kindly consideration. And we trust that in their retirement from [illegible] time they will find the reward of rest and relaxation which their records deserve.

LETTERS TO THE EDITOR

Theory Is Expressed For Missile Setback

The Reporter Dispatch:

The shock to America and American from Russia's scientific triumph with Sputnik and Sputnik II may be beneficial to our country. Truly the military implications of the Sputniks are vast both as a revolutionary advance in weapons and as perhaps the critical factor in a shift of the balance of power from the U.S. to the Soviet Union. While official Washington rumbles and stirs over our guided missile program, many of us ask why has our strong nation fallen behind in this arms race so vital to our national security. I suggest that the reason is our nation's abandonment during the past ten years of one of our greatest principles, namely the principle of the market place of ideas.

Our democracy's basic strength lies in the continuous benefits resulting to it from a free competition of ideas in the many areas of action and effort of our society. On the other hand, by effective discipline of thought and effort, Russia's dictatorship achieves desired objectives. History shows us that the society espousing the free market place principle usually proves superior to the dictatorship. Why? Because the freedom to think and the competition of ideas are greater stimuli to achievement and progress than orders from the state in a one-thought society where scientists think and create pursuant to directives. But beware an naive failure to realize that dictatorship is the way of life for all its people following the first generation. The thinking of one who, native to a one-thought state, has never experienced freedom of ideas, is not hampered by official oppression.

If the foregoing is true, why is the U. S. behind? It is because for the past ten years our nation has abandoned its principle of the free market place of ideas. Specifically we have abandoned it in the area of political though wherein emotional pressures brought about the psendo-security attitude that any political thought not orthodox nor conservative was disloyal. This blackout of freedom of thought has destroyed the market place principle in one area and seriously damaged it in the others. Our scientists and our university people, like the rest of us, have been deprived of a free competition of political ideas. In certain instances, fear of damaging consequences has replaced their freedom of thought. Since our scientific minds were trained to competitive thinking and free debate, this deprivation has meant to them a loss of their essential stimulus, and working and living in an atmosphere not conducive to discussion. Our "half free" scientists have lost their guide and source of strength—the free market place for ideas. The results speak for themselves.

Our nation urgently needs action to rediscover and to establish once again this market place principle, just as it needs an improved guided missile program. For the nation's security we must at once review our psendo-security thinking of the past ten years and jettison all "loyalty programs," "subversive list," "security risk," and "un-American activities" listings having no security value by police, military intelligence, C.I.C., and F.B.I. standards. We must heartily grasp our great lost principle of the free market place for ideas to effect a climate beneficial for basic research, scientific discovery and allied creative achievement. We must provide our scientists their stimulus of freedom of thought. Once provided, the efforts of our scientific community will restore our strength and leadership. If the shock of the Sputniks achieves this, it will have been beneficial.

If We Could Just Shake That Guy — By Morris

Hal Boyle Says

'Dumb Doll,' Shot at Moon Among Predictions for 1958

By HAL BOYLE

NEW YORK (AP)—Once a year we try to be a fortune teller, and once again we must say: "This year is fortunate."

It is a welcome reading in a crystal ball too often cloudy. The usual things in 1958 will disturb the world pattern — things like earthquakes, people, weather and doubt.

The endless changing pattern of change itself will enforce our lives as always, closing doorways on the familiar by a pull, and by a push opening new doors to new and differing days and other ways.

Yes, we must be willing to face fresh adventures in the coming year.

A man will invent a doll which he will guarantee will not weep, close its eyes, walk, or wet its diaper. It will be called "Dumb Doll," and it will sell 12 million copies. Children will cry to own the strange toy, so different from themselves.

The Russians will throw a Sputnik toward the moon and miss it, but won't announce it.

British to Score

The British will hit the moon—and if someone observes this and makes a complaint about it the British Home Office will force the British Foreign Office to come clean.

In the National League it is hard to fault Milwaukee and in the American League after the Yankees it is hard to predict Kansas City less than a close last.

There are other possibilities.

In the year ahead thinking may replace bowling as the national pastime; it must also be considered that people, weary of outside entertainment, will look more into themselves for refreshment. This could build larger stadiums within the heart. Or it could happen in a further year. A gain will be made in 1958.

It will be observed that Khrushchev, somber with responsibility, is drinking less than he was known to drink before. This could be bad or good.

In France, a premier will remain in power longer than any other premier since the end of the last World War. This could be bad or good.

In the Middle East there is no question about what can happen. It is bad or good. These things are certain.

For the rest of it, the pattern of 1958 seems reasonably clear.

Things in Cars

In North Carolina in March a lady driver will hear a strange buzzing in her car. On investigation it will turn out to be a snake. How did it get there?

In Minnesota in June another lady will hear a strange noise in her car, and it will turnout to be a baby alligator, and the question will be: How did it get there?

In California in September a wife will unexpectedly greet her husband returning from a business trip, and there'll be a girl in the front seat.

The big puzzle of 1958 will be not how the snake got aboard a car in North Carolina, or how an alligator achieved it in Minnesota, but how the girl knew the car was going to California. The solution will come in court in 1960.

Long-range 1958 weather forecast: Cloudy, intermittent sunshine, no serious frost. Horsecope: Hopeful.

MY ANSWER

By Billy Graham

Question: Do you think it is right to discipline children? My friends say I will develop inhibitions in them if I do.

K. A. N.

Answer: God teaches us that it [illegible] with love, our children is an evidence of our failure to care for them and also or refusal to fulfill our God-given responsibility as parents. No parent can ever justify a hands-off policy when it

Dear Ed:

I can't tell you how grateful all of us are that you will be able to take time out of your busy schedule and attend the dinner in honor of our esteemed Chairman of the P. Lorillard Company, Mr. Lewis Gruber, at which you will be principal guest speaker. The date is Monday, May 4th, in the Sert Room, Waldorf-Astoria Hotel. You will be expected between 9:00 and 9:45 pm.

The dinner is sponsored by the National Conference of Christians and Jews. Please see the attached fact sheet for "purpose of the NCCJ".

The Chairman of the dinner is Donald Gregg, President of Faber, Coe and Gregg. The presentor of the plaque to Mr. Gruber is Stanley Stacey, President of Cavalla Tobacco Company, last year's recipient of the Brotherhood Award. Mr. Stacey is a close friend of Lewis Gruber and has made a trip in from Milwaukee to make the presentation.

The wording of the plaque is as follows:

"The Brotherhood Award of the National Conference of Christians and Jews is being presented to Lewis Gruber 'for distinguished service in the field of human relations'."

A seat in the center of the dais will be reserved for you and you will be met at the door and personally escorted to the dais when you arrive. I assure you that we will get you on as soon as possible after your arrival to enable you to get back to your other commitments.

I trust you will find the above information to your satisfaction, and, if you should have any further questions please don't hesitate to call me. Meanwhile, we all look forward to seeing you on May 4th.

Sincerely,

LENNEN & NEWELL, INC.

FACT SHEET

THE NATIONAL CONFERENCE OF CHRISTIANS AND JEWS

[redacted]

What is the NCCJ?

The National Conference is a civic organization of individual Protestant, Catholic and Jewish citizens who want to work together against hate, bigotry and discrimination.

It was founded in 1928 by such eminent Americans as Charles Evans Hughes, Newton D. Baker, Dr. S. Parkes Cadman, Carlton J. H. Hayes and Roger W. Straus in reaction to national manifestations of intolerance in America following World War I.

It is wholly supported financially by voluntary contributions from individuals, corporations, foundations, fraternal organizations and religious groups.

Purpose of the NCCJ

"...to promote justice, amity, understanding and cooperation among Protestants, Catholics and Jews, and to analyze, moderate and finally eliminate intergroup prejudices which disfigure and distort religious, business, social and political relations, with a view to the establishment of a social order in which the religious ideals of brotherhood and justice shall become the standards of human relationships." (NCCJ By-Laws)

TO Mr. Murrow

FROM Sheila Hogg April 23

Mr. Nick Keeseley of Lennen & Newell telephoned with regard to the attached. I told him what I had told Mr. Towego's assistant - that you had another engagement that evening. He asked if you could not drop in for ten minutes just to introduce Mr. Gruber. I told him I thought not, but that I would let him know definitely when I had had a chance to ask you.

TO Mr. Murrow

FROM Sheila Hogg April 23

I informed Mr. Towego's assistant that we had not yet received the letter to which he referred (copy attached). In any case, your answer would have to be "no" as you had a previous engagement for May 4.

However, as this invitation came from Lennen & Newell and concerns a sponsor, I thought you might like to see the letter.

dictated over the telephone by Mr. Adolf Towego's assistant Tuesday

April 20, 1959

Dear Mr. Murrow:

Bud Gruber, Chairman of the Board of the Lorillard Company, is being honoured by the National Council of Christians and Jews at their Media Banquet, to be held at the Waldorf-Astoria on the night of May 4. The Council would very much like to have you as the principal speaker on this occasion. In view of the cordiality that you have evinced toward Mr. Gruber, we thought you might like to appear at a function honouring him. If you are available for May 4, I will be pleased to provide you with all the details.

Remembering with pleasure our pleasant luncheon together and looking forward to seeing you presently, I remain,

Adolf Towego (spelling?)
Lennen & Newell.

Have told him I'll do it.

April 20, 1959

Mrs. Edward R. Murrow
Pawling, N.Y.

Dear Mrs. Murrow:

The County Committee on the Hudson-Champlain celebration has decided that a Queen should be selected to reign at some of the many events that will be taking place during this historic occasion. It was decided by the Committee to have each school in the County select a girl from the present senior class to represent the school. Thirteen girls have been selected and a "Tulip Queen" is to be chosen from this group.

Your name has been proposed as one the Committee would like to have act as a judge in the final selection of our Tulip Queen. The judging will take place at the State Armory in Poughkeepsie at 9:15 p.m. on May 9.

Judges are requested to attend a buffet supper as a guest of the committee to be held on Friday, May 8 at 6:30 p.m. at Shirley's, 77 Academy Street, Poughkeepsie, so that the judges will have an opportunity to meet the girls and perhaps be in a better position to select the Queen who we will be proud to have represent our area.

Would you please inform me at your earliest convenience as to whether or not you will be able to accept the invitation extended by our Committee?

Sincerely yours,

E. Joseph Kegan

E. JOSEPH KEGAN

WDCR At Dartmouth College
HANOVER, NEW HAMPSHIRE

February 7, 1959

Mr. Robert E. Kalaidjian, Director
Personnel Relations Services
Columbia Broadcasting System, Inc.
485 Madison Avenue
New York 22, New York

Dear Bob:

Greetings from the Hanover end of the line! I am happy to report that all is thriving here at WDCR. My term of office is rapidly drawing to its end, and I have less than a month behind this desk.

My applications are in at four law schools, and I expect to be spending the next three years studying the law, though I do not yet know what phase of it will finally be my specialty. I have not closed the door to a career in broadcasting, but I intend to get a law background first. So, you won't be processing any job applications from me for a couple of years anyway.

I am enclosing a clipping from the February issue of the Alumni Magazine. Would it be possible for you to get the article "Top Man At WDCR" into Ed Murrow's hands? I have a definite reason for asking this favor.

On Wednesday, March 4, WDCR will celebrates its first anniversary as America's only student-operated AM station. Joe Culligan of NBC will be the major speaker by present plans. At the same time we will present the WDCR Award and install a new Directorate. All this will take place at our celebration banquet here in Hanover.

Could you persuade Mr. Murrow to send us a letter or telegram of congratulations on March 4? We are arranging for similar messages from Robert Sarnoff, H.V. Kaltenborn, Nelson Rockefeller, and even President Eisenhower. Mr. Murrow could add a great deal to the excitement and importance of the occasion for us all.

Bob, I appreciate any help you can give us in this connection. Warmest personal regards.

Cordially,

Ron Kelso

A Special Supplement on "Inflation"

FEBRUARY 1959

"Now"... is <u>always</u> the hardest time to invest

Has there ever been a single day when all of the major factors—business, labor, politics, money rates, Federal budget, international relations—were so predictable that the investor could go about his work with assurance?

Investment decisions are *always* difficult, but always *necessary*.

To meet that necessity, investment judgment must be combined with imagination, as well as understanding of individual requirements.

With these essentials, our Trust Company's specialized work—managing investments—adds immensely to the investor's peace of mind and financial well-being.

UNITED STATES TRUST COMPANY OF NEW YORK

37 Broad Street, New York 4, New York

. . . a hand in things to come

Unlocking the secrets of the universe

Amazing textile fibers spun out of natural gas . . . wonder drugs squeezed from coal . . . shining stainless steel forged from drab, brownish earth. These man-made marvels were born in the minds and hands of research scientists.

Never satisfied with things as they are, the research scientist takes apart the raw materials of nature to capture the basic "building blocks" of the universe. Then he rearranges and combines the pieces into new and better things that help improve our lives.

Research is a living thing to the people of Union Carbide—for it is the foundation upon which their work is built. They have created hundreds of useful products from such basic substances as oil, natural gas, ores, air, and water. And the wonders yet to come, the completely new things of tomorrow, are being sought and found in Union Carbide's laboratories today.

Learn about the exciting work going on now in alloys, carbons, chemicals, gases, plastics, and nuclear energy. Write for "Products and Processes" Booklet A, Union Carbide Corporation, 30 East 42nd St., New York 17, N.Y. In Canada, Union Carbide Canada Limited, Toronto.

UNION CARBIDE

...a hand in things to come

Bennett Cerf, President of Random House, Inc., world-famous publishers of fine books including The Modern Library and The American College Dictionary; Henry Moyer, Jr., of New England Life.

Bennett Cerf and Henry Moyer, Jr. collaborate on a Profit Sharing Plan for Random House

Meeting and working with interesting men like Bennett Cerf is one of the most satisfying things about his career with New England Life, according to Henry Moyer, Jr. (Dartmouth '51).

Recently, he presented to Mr. Cerf his proposal for a revised Profit Sharing Plan for the staff of Random House. They went over the details together and developed a program which will benefit employees in every salary bracket — providing more life insurance protection for less money than was previously possible.

Henry will, of course, work closely with company officials in servicing this plan through the years. And he'll continue the personal programming for a number of the executives at Random House. This one report of Henry's activity is just a part of the outstanding job he's been doing for New England Life, ever since he joined us in 1952.

If a career of this sort appeals to you, investigate the opportunities with New England Life. You get a regular income from the start. You can work anywhere in the U. S. A. Your future is full of substantial rewards.

For more information, write to Vice President L. M. Huppeler, 501 Boylston Street, Boston 17, Massachusetts.

CONTRIBUTORS

to this month's *Faculty Forum* supplement, dealing with the subject of Inflation, are three of Dartmouth's economics professors.

George E. Lent, Visiting Professor of Business Economics at Tuck School, came to Dartmouth in 1957. Graduate of R.P.I. in 1934, he took his M.B.A. there in 1935, and his Ph.D. at Columbia in 1947. He has taught at R.P.I., Vermont and North Carolina, and has also served in Washington, on the Treasury Department's tax advisory staff and in the comptroller's office of the Department of Defense. At Tuck School, he is Director of Research as well as economics professor.

Colin D. Campbell, Assistant Professor of Economics, graduated from Harvard in 1938, and took his M.A. at Iowa and his Ph.D. at the University of Chicago in 1950. Before joining the Dartmouth faculty in 1956 he was with the Central Intelligence Agency, 1952-54, and was an economist with the Federal Reserve System, 1954-56. His special studies of inflation in China and South Korea are cited in his *Faculty Forum* article.

Martin Segal, Assistant Professor of Economics, taught at Harvard (Ph.D. '53), Columbia and Williams before coming to Dartmouth. He was consultant to the Senate Sub-Committee on Anti-Trust and Monopoly, and after full-time work as staff economist for the New York Metropolitan Region Study, under the Ford Foundation and Rockefeller Brothers Fund, he is now a part-time associate. His book on the New York labor market will be published by the Harvard University Press this spring.

DARTMOUTH AUTHORS

MRS. BRIDGE. By Evan S. Connell Jr. '45. New York: Viking Press, 1958. 254pp. $3.75.

Author Evan Connell (*The Anatomy Lesson* and other stories) has skillfully dissected Mrs. Bridge into a sort of literary jigsaw puzzle with each of the more than one hundred pieces or episodes fitting together within the framework of the novel to form the completed portrait of Mrs. Bridge and her world. However, as is frequently the case with jigsaw puzzles, the final result is a trifle disappointing with the completed portrait lacking the brilliance promised by some of the individual pieces.

Despite this limitation there can be no doubt of Mr. Connell's perception and appreciation of those daily and routine incidents which so often make up the sum and substance of any woman's life. India Bridge, in the author's words, "was not certain what she wanted from life, or what to expect from it, for she had seen so little of it, but she was sure that in some way — because she willed it to be so — her wants and her expectations were the same."

This statement, appearing in the opening pages of the book, could just as well be reiterated in the concluding pages, for the recorded experiences do not, as the phrase goes, alter or illuminate Mrs. Bridge's life in any appreciable manner, perhaps because, like a jigsaw puzzle, the pieces were all there to start with.

There is remarkable, often brilliant, writing here — the awareness and feeling, perhaps recollection, of those everyday events that are woven into the warp and woof of any family's life. The experiences of Mrs. Bridge with her husband, children, friends, and world span a period of some forty years, but there is an underlying tragic timelessness to the book which leads the reader to sense that the failures of Mrs. Bridge to respond to the challenges of her family and her world are indeed the failures of many women.

If this be so, it becomes understandable why the portrait of Mrs. Bridge is incomplete. But read *Mrs. Bridge* yourself. It is a fascinating book. You may be amused, saddened, frustrated, possibly frightened, but you will not be bored and, as with all good books, you will take part of it with you into your own world.

Faculty Book

SOVIET POLICY AND THE CHINESE COMMUNISTS 1931-1946. By Charles B. McLane '41. New York: Columbia University Press, 1958. 310pp. $5.50.

It has often been assumed that Communist Parties abroad are mere puppets of Moscow and that their actions are always determined by the Kremlin puppeteer. It is also often assumed, somewhat contradictorarily, that the Chinese Communist Party is likely at some point to break with the Soviet Party and follow an independent course.

By examining carefully the nature of the relationship between the Soviet and Chinese Communists in the period 1931 to 1946 (that is, prior to the coming to power of Chinese Communism) Charles McLane contributes to our understanding of these crucial problems and of the nature of Sino-Soviet alliance. This study reaches two extraordinarily interesting conclusions: 1, that the Communist Party of China remained largely free of Soviet control during this period (Mao's rise to leadership was for instance not the result of Moscow interference in internal party affairs); 2, that, nonetheless, the Communist Party of China in most important respects followed the line of Moscow in Chinese and international affairs.

Often the policies followed by the two parties were parallel rather than coordinated, and differences of emphasis and interpretation were evident. Contrary to popular impression, however, McLane finds no serious diversity of view, even on matters of ideology, in which Mao is often regarded as an exponent of an independent Chinese Marxist doctrine.

These and other conclusions are based on a prodigious amount of research, mainly in Russian materials, but also in sources available in English, including translations of Chinese Communist documents. As well as using libraries in the United States from Stanford to the east coast, the author even conducted several interviews in Tokyo and Hong Kong to fill in crevices in his study. Taking nothing for granted, McLane has investigated every scrap of evidence available in languages known to him, and has engaged in sober, cautious speculation about some of the more confusing and ambiguous aspects of this complicated history. Where things still remain obscure, he is not afraid to say so. It is his belief that examination of Chinese sources would not alter the conclusions fundamentally, a belief that can only be verified when some other scholar produces an equally careful study of these sources.

The study also throws considerable light on the nature of Soviet policy in China during this period and on the process of Soviet foreign policy formulation. Russian attitudes towards the Chinese Soviets after 1930, the United Front after 1935, the war against Japan, the evacuation of Manchuria, and the negotiations between Chiang Kai-shek and the Communists down to their breakdown in 1946, are all examined and interpreted. From this analysis, it appears that even in so important a matter as the question of support for a Chinese Communist revolution, Soviet Russian policy was not as inflexible and predetermined, nor as

foresighted and consistent, as is usually assumed. Soviet policy, in this case as elsewhere, seems not to be a mere reflection of ideological preconceptions but to take into account Soviet practical interests under changing conditions.

In one important episode McLane describes an apparent conflict of policies between different departments of the Soviet administration. He also indicates that Soviet attitudes were sometimes reactions to American policies rather than unchanging policies laid down on the basis of permanent Soviet objectives.

The author does not himself draw any conclusions concerning American policies toward Soviet and Chinese Communism. His case study does, however, indicate the necessity of a flexible American policy, not a rigid attitude dictated by our own ideological preferences and false assumptions concerning Soviet ideological preferences.

Although the study suggests the strength of Soviet-Chinese bonds of unity, and the unlikelihood of serious splits in the alliance, it may also be concluded that Chinese Communist policy is in part also a reaction to American policy, and may shift in accordance with changes in our own attitudes.

WDCR Award

STATION WDCR will establish a semi-annual award for "that Dartmouth student who does most to promote the constructive discussion of campus issues," it was announced last month by General Manager Ronald F. Kehoe '59.

"We want to see healthier, more vigorous discussion of the issues on campus," Kehoe said. "We want to do our part to encourage debate and to reward men with the insights and courage to speak out."

The award, to be given in the fall and spring each year, consists of an engraved plaque and a $25.00 cash prize. The selection committee includes Dean of the College Joseph L. McDonald; Prof. Herbert F. West '22, faculty chairman of the Council on Student Organizations; and WDCR General Manager Kehoe.

The committee will accept nominations from all students and faculty members, up to February 15.

The Civil War First-Hand

By LEWIS D. STILWELL, PROFESSOR OF HISTORY

A famous Dartmouth teacher of military history recommends some personal narratives of the great conflict, which is approaching its centennial and is attracting fresh interest in its events and personalities.

WATCH OUT for these Civil War books. They will keep you at home nights, but away from your family. No other sector of our history takes hold as does this time when we fought ourselves right through to three hundred thousand deaths.

The best way, I think, is to take this history straight — from the pens of the men who were there. Old soldiers never lie, or at least they have to try to tell the truth, without any New York City tricks.

U. S. Grant wrote his *Memoirs* to pay his debts when he was dying. Those two volumes are blunt, serious and revealing. Grant captured three Confederate armies, despite all his stumbling.

Horace Porter was on Grant's staff. His picture *(Campaigning with Grant)* of the stubby, silent general sitting on a tree stump whittling while the bullets whiz is hard to forget.

Sherman's *Memoirs* are even better than Grant's. His two volumes were "Written by Himself." No ghost-writer could have manicured Sherman's forthright coverage. "Uncle Billy" was a thinking general and fundamentally a merciful man. The surrender terms he offered to "Joe" Johnston show that Sherman was nothing like the ogre still denounced in Georgia.

"Joe" Johnston wrote his own *Narrative of Military Operations,* a rather stiff-styled book defending his own record. But "Joe" Johnston really needed no defense. He was a masterful tactician — almost as great a general as his friend and classmate, R. E. Lee.

Don't miss Longstreet's *From Manassas to Appomattox.* James Longstreet was a mulish but wise leader. He balked whenever General Lee grew rash. But "Old Pete" joined the Republicans after the war. That one act ostracized him in the South. Southern authors are still prone to put the blame on Longstreet for other men's mistakes.

Among all the Rebel generals, Jubal A. Early *(Autobiographical Sketch and Narrative of the War Between the States)* was the boldest and the roughest. He led his boys — in 1864 — "up to the very walls of the Federal Capital" and saw "no reason to regret" his cold-blooded burning of Chambersburg. Read "Old Jubilee."

Better yet, have a look at Gen. Richard Taylor's *Destruction and Reconstruction.* Taylor was Zachary Taylor's son. He fought in Virginia; he fought in the West. He was always observant, colorful, sensing the meaning of it all. You can trust "Dick" Taylor.

Or would you ride fast thoroughbreds with the Confederate cavalry? Turn to Basil W. Duke's *Morgan's Cavalry* or W. W. Blackford's *War Years with Jeb Stuart.* These were the great raiders that every boy of forty loves.

That driving fanatic, "Stonewall" Jackson, will never really die. Henry Kyd Douglas was a youngster on Jackson's staff. In his *I Rode with Stonewall* you can see how men could love and follow that great Puritan whose only vice was sucking lemons.

Then Gen. John B. Gordon takes a bow. In his *Reminiscences* he tells you, truthfully, how he took five wounds at Sharpsburg in September '62 and was back among the bullets at Chancellorsville in May of '63. General Gordon was a gallant Georgia gentleman, and he certainly could write.

Prof. Lewis D. Stilwell, a member of the Dartmouth faculty since 1916, teaches a course in the military history of the United States, in which battles and campaigns of the Civil War receive detailed study.

There was a Union Gordon also: George H. of Boston. This colonel of the Second Massachusetts Infantry was in the war from start to finish. He wrote three intriguing books *(Brook Farm to Cedar Mountain, History of the Campaign of the Army of Virginia,* and *War Diary).* Any Yankee would feel proud to march with George H. Gordon.

Gen. W. B. Hazen was another smart, brave, skillful Yankee, born across the river from Hanover. In his *Narrative of Military Service* you can see just what it was that Northern soldiers had and Southern soldiers lacked.

Charles A. Dana, from New Hampshire, was a civilian reporter. He went right with the Union armies as the representative of the War Department. In his *Recollections* Dana spotted every blunder that the generals made and some they did not make. This was the same Dana whose acid editorials made the *New York Sun* famous for the next thirty years.

Joshua L. Chamberlain of Maine wrote the war's closing scenes in *The Passing of the Armies.* His memories start tears. There were courtesies and kindness when silence came at Appomattox.

Dartmouth's own F. A. Haskell, Class of 1854, made perhaps the finest of all the recordings. His *Battle of Gettysburg* is just a long letter to his brother. But as you read you are right there with Haskell on Cemetery Ridge.

The summit joy of all who want their Civil War first-hand is *Battles and Leaders.* Four heavy volumes, covering every major fight on land or sea. Actual participants — from both sides — tell you how their battle went and why. And the final grace of this majestic compilation is in the interspersed remarks of Private Warren Lee Goss. Private Goss felt what enlisted men in every war have felt about colonels, generals and the omniscient, omnipotent and omnipresent Regulations.

Long before a man gets this far in his

after-dinner reading a private thought will grab him: "How well would I, myself, have stood against those guns?" The question is unanswerable but it nonetheless lies underneath the mounting, spreading interest in our Civil War.

Write in if you want the names of other books. My special thanks to Don Lindell '44 for help in these selections.

LETTERS

"Let's Go Back"

TO THE EDITOR:

I have no idea why I chose to comment on such a small point, but in my declining years I seem to become more uninhibited.

I concur heartily with those who may be complaining about the new cover. Really, it doesn't measure up at all. Let's go back to the old one. If Camel cigarettes can decide against a change, so can the DARTMOUTH ALUMNI MAGAZINE.

About every ten years I write in and tell you what a fine magazine we Dartmouth alumni have. It's a fine publication.

Brice Disque '25

TO THE EDITOR:

Perhaps you will find space to let me pay a deserved tribute to Brice Disque Jr. '25, who died this week.

Having known Bri for 34 years, I could write a great deal about his career as an actor, as a radio and television producer, and as a friend. Those at the Dartmouth Club in New York are well aware of all this.

What few people are aware of is that Bri had been battling ill health for ten years, and had not been able to work. Yet his last letter to me, just before Christmas, was full of hope for the future. He never gave up trying. I think that is a good enough epitaph.

ROBERT ARMSTRONG ANDREWS '28

TO CORPORATE OFFICERS:

Quality, a word too often built up, is built into both the Gulfstream and its Rolls-Royce Dart engines. This modern aircraft, with fail-safe construction, typifies the reliability inherent in Grumman products for 29 years; while the engines have already been proved by millions of hours of airline operation. The achievements by these two leaders in their respective fields assure you of quality and safety in a true sense of the word.

The new Grumman Gulfstream, the optimum in executive transportation, features high air speed, pressurization and short field characteristics designed specifically to meet your corporate flying requirements.

Leroy R. Grumman
Chairman of the Board
Grumman Aircraft Engineering Corporation
Bethpage · Long Island · New York

Grumman Gulfstream: 10-12 seat executive transport. Cruise: 350 mph. Power: two Rolls-Royce Dart (R.Da.7/2), take-off rating 2105 ESHP. Range: 2,200 miles plus reserve. Pressurized: 5,500 feet at 25,000. Operates from 4000 ft. runways and within existing and future Air Traffic Control.

***DISTRIBUTED BY:** Atlantic Aviation, Wilmington, Delaware; Southwest Airmotive, Dallas; Pacific Airmotive, Los Angeles; Timmins Aviation, Montreal. They have the experience and facilities to provide sales and service, the best available communication and electronic equipment, and interiors to your specifications. They will also make arrangements for you to inspect the Gulfstream.*

A Senior Talks About Dartmouth

The following talk was given by Thomas C. Seawell '59 of Denver, Colo., at the annual Christmas luncheon of the Dartmouth Association of the Great Divide, held in Denver on December 20 and attended by some 180 alumni, undergraduates, Dartmouth fathers, and prospective students from the area's secondary schools. The club officers thought it so fine that they persuaded Seawell to write out his talk, given from notes, and then submitted it to the ALUMNI MAGAZINE, which is happy to print such an outstanding undergraduate statement.

FIRST of all, I would like to say how honored I am to be given the opportunity to speak before this group. When Paul Clarkin asked me to speak, he said he'd like to have me talk for five or ten minutes on what Dartmouth means to me, as a senior, and I felt quite inadequate to that task. I remembered the men who had spoken before me as I sat in this same room — Monte Pascoe, two years ago, and last year, my good friend Joe Blake, who is in the audience today — and I knew that filling their shoes would be no small job. With these thoughts in mind, I turned to Dartmouth for help, as I have done so many times in the past; and as usual, I found the help I needed.

As I looked over the Dartmouth seal, I noticed the motto that appears on every Dartmouth crest: "Vox clamantis in deserto," a voice crying in the wilderness. It occurred to me that perhaps never before has this motto had such tremendous significance as it has today, for I believe that we are now living in a terrifying wilderness. The wilderness of which I speak is a wilderness of microscopes, test tubes, intercontinental missiles and the like; in short, it is the wilderness of science.

I am well aware of the advantages of science and the many wonderful products and inventions it has given us: products without which most of us could hardly get along. To mention a few, it has given us the automobile and many other forms of transportation, and it has given us the ability to unleash previously unknown sources of nuclear energy; for these gifts any man should be truly grateful. Yet never before in our history have several hundred Americans died in a single weekend on our nation's highways; and never in the history of the world have over 45,000 human beings met their death in a matter of minutes in a single city as they did in the early days of August 1945. If these are the results of a scientific age then I am skeptical as to the real value of science.

In his book, *Brave New World,* the novelist Aldous Huxley portrayed a world in which the mind and body of every man was completely controlled by scientific methods and discoveries. It was, I believe, a horrifying picture indeed. As I'm sure you know, Mr. Huxley has recently finished a new book called *Brave New World Revisited,* and in this work he sees the world which he prophesied some twenty years ago even closer than he had previously thought it would be. I personally cannot take this artistic foreshadowing too lightly; I believe Mr. Huxley's predictions are distressingly accurate.

As I drove home from Boulder a few days ago — as some of you know, I have certain ties in Boulder which have kept me on the road quite a bit this last week — the radio program to which I was listening was interrupted by a special news bulletin announcing the successful launching of an Atlas missile weighing over four tons. At the end of the bulletin, the disc jockey broke out with some words which I shall never forget: "Did you hear that, Mom? We finally beat those Russians!" The only thought that came to me was, "What kind of a victory is that?" Just who are these Russians that any sort of a victory over them is the most important thing in our lives? It seems to me that a victory over such vulgar materialism — at least a victory which is itself materialistic — is hardly a victory at all. Gentlemen, if we commit ourselves to these ideals we are selling out, and at such a cheap, cheap price indeed. I am not convinced that a dishonorable victory is better than an honorable defeat, if such defeat is necessary.

This, then, is the wilderness in which I believe the voice of the Dartmouth man is crying: a world in which each man's mind is dominated by science. I firmly believe that science can and should be an extremely fruitful means to certain proper ends, but it must never be considered an end in itself.

But Dartmouth offered more help to me while I was trying to decide what to say today. I remembered the lone pine tree which now stands symbolically on the top of Baker Tower and which every Dartmouth man carries in his heart. The pine tree, I believe, is one of Dartmouth's most meaningful symbols, and I would like to explain what it symbolizes to me.

As you know, the pine tree is a unique tree in many ways. It is the only tree in the forest that remains firm and stately over the passage of time. It does not lose its leaves with the changing seasons as do the other trees. It is not torn or rent by the icy blasts of winter, its limbs are not broken by the heavy snows, and its roots are not washed away by the rains of spring and summer. No, throughout all these hardships the pine retains its unchanging majesty and beauty. And it is towards building men with the same qualities as those of the pine tree that Dartmouth is dedicated. The Dartmouth man, educated in the liberal arts, is a man who will not be buffeted about by the harsh winds of ill fortune, who will not be broken by the snows of propaganda and whose roots are much too deep to be washed away by the rains of gold and silver which come and go. He is a man who is close to Nature and who is intimately acquainted with the Arts. A liberal arts education could hardly be called pragmatic or practical, for in itself it will not make a single dollar for you. Rather, it's an intangible quality which each Dartmouth man pulls into himself with the most passionate inwardness.

I recently had the pleasure of reading something written some thirty years ago by a man who is today probably better known for his legal abilities than his literary activities. He is a man with whom I've had the closest and most intimate of all relationships for the past twenty-one, almost twenty-two years, and I would like to quote a brief passage from his work because he expresses far better than I can the real value of a liberal arts education:

"The man educated in the liberal arts appreciates the beauty of friendship and confidence, and binds his friends to himself with hoops of steel, and they are to him his most priceless possessions. And perhaps greatest of all, he has the perfect repose of a mind which lives in itself while it lives in the

world, and which has ample resources of its own for happiness at home, when it cannot go abroad; and he has an inherent gift, without which good fortune is vulgar, and with which, failure and disappointment meet a charm."

This, the liberal arts education, is what Dartmouth offers you, and it is the education which every man not only deserves but needs so much.

At Dartmouth you will become a part of an active and energetic community, a community made up of men who will be your equals in every respect. You will learn the value of friendship based on integrity and common pursuits and interests in life. When you graduate, you will cherish the memories you will take with you, and you will become a man deeply immersed in the sea of humanity. Mere pity and sympathy will give way to that almost divine quality of deep and true understanding of the problems of your fellow creatures, and you will realize the full meaning of John Donne's immortal words, "No man is an island, entire unto itself."

There undoubtedly are quite a few of you who are planning on scientific vocations, and perhaps I've given you the impression that Dartmouth's doors are closed to you; but on the contrary, I believe just the reverse is true. We have a large number of men who are headed toward careers in the field of science, and of them we are truly proud. Yet, Dartmouth takes care of these men; she makes sure that they are not isolated in the laboratory, but are given a thorough insight into the Arts, Philosophy and Religion. These men gain the full benefit of Dartmouth, and I know that they feel so much better prepared to enter into their futures with the broad perspective of life which only the liberal arts education can give.

I hope I have not been overbearingly serious today, because this luncheon is a happy time toward which we undergraduates all look forward. After the fall term we've just spent in Hanover, it's a wonderful feeling to have a few weeks of rest and relaxation at home. There are a lot of things which we anxiously anticipate during the fall, and the opportunity which this luncheon affords to see alumni, friends and prospective Dartmouth men is a highly valued one.

To conclude, I would like to sum up what I've tried to say by borrowing the words of one of Dartmouth's immortal sons, Daniel Webster. In the famous Dartmouth College Case, Webster rested his case with the following sentence, which, in my opinion, captures the real essence of every Dartmouth man's feelings: "It's a small college, but there are those who love it."

DARTMOUTH ALUMNI MAGAZINE

PUBLISHED FOR THE ALUMNI OF DARTMOUTH COLLEGE

THE COLLEGE

DARTMOUTH'S Capital Gifts Campaign last month reached the grand total of $12,335,000 in gifts and pledges, as regional activity was stepped up in the general gifts phase of the campaign. The January total is 72 per cent of the goal of $17,000,000 that the College expects to reach by June 30.

Local campaigns have been conducted in some forty sections of the country during the fall and early winter, and regional activity is now being extended to fifty other areas, in accordance with the timetable worked out when the fund drive began in the fall of 1957. The Boston area, one of the biggest concentrations of Dartmouth alumni, will open its general solicitation in February. With heavy campaign activity in the metropolitan New York area now virtually completed, the Region III program has swung to Connecticut, including Hartford, New Haven, Fairfield County, Waterbury, Bridgeport and New London.

In Region IV, Philadelphia, Baltimore, Washington, Wilmington and Harrisburg have joined in the general alumni campaign, and later area campaigns will be conducted in Pittsburgh, Scranton, Richmond, Raleigh, Chapel Hill, and Charleston. Region V activity is taking place in Miami, St. Petersburg and Jacksonville; Region VI activity in Detroit, Grand Rapids, and Toledo; and Region VII campaigning in Indianapolis, Des Moines, Omaha, Milwaukee, Minneapolis, Duluth, Madison and Appleton. Work still continues in Oklahoma, Texas, Colorado and Utah; and late spring campaigns are scheduled for the West Coast.

The Dartmouth class agents and assistant agents will become active participants in a special Capital Gifts mail campaign this spring, thus resuming their traditional role in alumni fund-raising, even though there is no formal Alumni Fund this year. When the area work is completed in late spring, a very high percentage of all Dartmouth men will have been reached personally by members of volunteer committees.

The $12,335,000 reported last month represents gifts and pledges from approximately 8,000 persons, mostly alumni but including many parents, corporations, foundations, and other friends of the College. The campaign's total to date is one of the largest sums ever raised by a college or university in an 18-month period, according to Trustee Charles J. Zimmerman '23, national chairman of Dartmouth's fund effort. In addition to expressing gratification over the success the campaign has had up to now, he expressed confidence that the goal of $17,000,000 would be attained by June 30. More large gifts are essential if this is to be realized, and this phase of the campaign is being continued along with the area work. Another $2,000,000 in big gifts has been established as a subsidiary goal before June 30.

Alumni Council Meets

THE status of the Capital Gifts Campaign was one of the major topics discussed by the Dartmouth Alumni Council when it held its 97th meeting in Hanover on the weekend of January 16 and 17. John L. Sullivan '21, Trustee of the College and chairman of the campaign's leadership gifts committee, led this discussion, in which Vice President Orton H. Hicks '21 and Development Director George H. Colton '35 also participated. It was disclosed that the goal for the Alumni Council is 100 per cent participation and a gift total of $100,000, of which $87,000 has been contributed.

Progress in another development program was reported to the Alumni Council by Prof. Donald H. Morrison, Provost of the College, in his talk about the Dartmouth Medical School. He described the studies which led to the Trustees' decision to continue, and expand, the two-year medical program at Dartmouth. So far, he said, $4,500,000 has been received, mostly from foundations, in the College's effort to raise $4,000,000 for a new Medical School building and $6,000,000 for endowment to develop personnel.

Dr. S. Marsh Tenney '44, director of medical sciences at Dartmouth, and Prof. Manuel F. Morales, head of the new Bio-Chemistry Department at the Medical School, were other speakers. Dr. Tenney discussed the new educational program which will permit the student to take

electives — almost unheard of in medical education — and to do some basic research. Professor Morales spoke about the coordinated research program being carried on in his department by a staff of eight young men, averaging 36.6 years of age.

The Council heard a talk about the now-famous trip to England, from Richard P. Liesching '59, president of the Dartmouth Rugby Club, and learned how greatly Dartmouth's stock has risen in the eyes of the British. Turning back to educational matters, the Council then heard from Prof. Edmund H. Booth '18 of the English Department, faculty representative on the Council, who reported that the new three-term, three-course program has begun well. He expressed the view that students are studying harder; are learning more, or seemingly are learning more, with only three courses; and are making much better use of the month of January, with first-term examinations all behind them when they return from Christmas vacation. He also spoke of the new emphasis on independent learning and advised Council members to take back to the secondary schools in their areas the word that independent learning is a necessary part of future college education.

Other topics and speakers presenting them were: public relations, Milburn McCarty '35; Alumni Fund plans, Donald F. Sawyer '21; class gifts, Charles E. Rauch '30; enrollment and admissions, Louis V. Wilcox '23 and Director of Admissions Edward T. Chamberlain '36; secondary school awards, Franklin J. Cornwell '35; and alumni organization and relations, George B. Redding '29, who reminded the Council that the CAR proposal of a revised Alumni Council membership, providing enlarged alumni representation, would be coming up for future action. The Council referred the CAR proposal to its Committee on Alumni Organization and Relations for consideration and for the preparation of necessary constitutional amendments to be included in a report at the annual June meeting, scheduled to be held in Hanover on June 17-19.

In another formal action, the Alumni Council voted to present to the Dartmouth Board of Trustees the name of Thomas B. Curtis '32 of St. Louis for reelection as a Trustee for a second term of five years. Mr. Curtis is U. S. Congressman from the Second Missouri District, and as a Republican was reelected to a fifth term in the November elections.

Friday night the Alumni Council gave a dinner for Dartmouth's Ivy League championship football team, as reported elsewhere in this issue; and on Saturday morning a new wrinkle was added to the weekend program when Council members and their wives attended a wide variety of regular Dartmouth classes, ranging from art to the sciences. In a Shakespeare class, one of the wives had the fun of playing the part of Juliet.

A Wah Hoo Wah for —

FLETCHER CLARK JR. '12, elected President of the Massachusetts Moderators Association.

ROY J. DEFERRARI '12, awarded a Knighthood in the Order of St. Sylvester by Pope John XXIII, in honor of his published works and achievements in Catholic education.

DR. STANLEY B. WELD '12, elected President of the Hartford (Conn.) Medical Society.

RICHARD PARKHURST '16, named by President Eisenhower as U. S. Delegate to the Assembly of the UN's Intergovernmental Maritime Consultative Organization.

EDWARD F. MCLAUGHLIN JR. '42, elected President of the Boston City Council.

HOWARD D. BRUNDAGE '45, elected President of the *New York Herald Tribune*.

WILLIAM F. PILLSBURY '46, named Dean of Students at Knox College, Galesburg, Ill.

Menshikov to Lecture

MIKHAIL A. MENSHIKOV, the Soviet Union's ambassador to the United States, will come to Dartmouth in April to address seniors in the Great Issues Course. His topic on the evening of April 20 will be "Is Coexistence Possible?" and on the following morning he will take part in the regular question-and-answer period that is a traditional part of the course.

Ambassador Menshikov, who speaks fluent English, was named to his present post in Washington in February 1957. He is one of the 120 members of the Communist Central Committee, and is former Russian ambassador to India, where he negotiated a five-year trade agreement and stage-managed the visit of Khrushchev and Bulganin.

This month, on February 16, the Great Issues Course will hear Earl Attlee, former Prime Minister of Great Britain, who will speak on "World Government or World Chaos." His Hanover appearance will be sponsored jointly by Great Issues and the Dartmouth College Lecture Series, which will permit public attendance of his lecture.

The College Lecture Series for the winter term was opened on January 21 by Comdr. James Calvert, captain of the atomic submarine *Skate*, which made the second journey under the polar ice pack. Other lecturers this year, in addition to Earl Attlee, will be Robert Oppenheimer, director of the Institute for Advanced Study at Princeton; Charles E. Wilson, former Secretary of Defense; and three specialists of the American Universities Field Staff — Robert Burton, K. H. Silvert, and E. A. Bayne — who will speak, respectively, on Communist China, Argentina, and the Middle East.

In Brief . . .

PRESIDENT DICKEY met with the Alumni Council on January 16 and spoke briefly that evening at the football dinner, which marked his first public appearance since his operation for phlebitis a month earlier. Although still lame, he has been recovering satisfactorily from his operation and has gradually been resuming work, occasionally at the office but mostly

at home. Unfortunately, he faces another operation, probably this month, for a bad knee that troubled him some years ago and has flared up as a result of the phlebitis condition.

The Tucker Foundation will sponsor a Dartmouth conference, February 27 and 28, on the subject of "The Individual and the Organization." Dr. Margaret Mead, distinguished anthropologist, and Irwin Miller, industrial leader who previously lectured in the Great Issues Course, will be guest participants in the discussions.

In connection with the conference, the Tucker Foundation is conducting a student essay contest on the subject, "Individuality in the College Community." A prize of $50 will be awarded for the best essay in each of the four undergraduate classes, and an additional $50 will go to the grand winner, who will be asked to present his essay for discussion at the February conference.

First-term grades of the freshman class are higher than the first-semester averages of the three preceding freshman classes, it was announced last month by Dean Albert I. Dickerson '30. The mean average for '62 men was 3.0, compared with 2.8 for '61 and 2.85 for '59. Thirteen freshmen scored a perfect 5.0, compared with only one '61 man who did so last year; and 114 freshmen had better than 4.0 for the fall term, whereas 74 men did that well last year, and 79 three years ago. Only 13 freshmen in a class of 770 were placed on academic probation at the end of the first term, while 20 members of the Class of 1961, 38 '60s, and 29 '59s were put on probation at the end of their first semesters.

Dean Dickerson pointed out that the better scholastic performance by 1962 may be due to the new three-course plan rather than to any real academic superiority over these other recent entering classes. For example, the probability of getting three A's and a 5.0 average is much higher than for getting five A's, and this applies to B's and C's as well. Just the same, the present freshman class is doing all right scholastically.

The January report of Mrs. Charlotte Ford Morrison, alumni recorder, gives the grand total of living Dartmouth alumni as 29,078. For the College proper the figures are 20,618 living graduates and 7,314 living non-graduates, for a total of 27,932. The central point of the alumni body falls in the Class of 1938.

THE HANOVER SCENE

We have long been skeptical of the economic wisdom of advertising, just as we have questioned rain insurance, and herewith we protest the flood of bulk mailings that passes across the far edge of our desk: for charities, for gimmicks, for the alleviation of all known diseases, and for books on economic theory. The latest example was from the "Sleep-learning Research Association," which promised us the possibility of "learning, while asleep, foreign languages, vocabulary, poetry, prose, speeches, mathematics, business facts and figures, Morse Code, and even train schedules." We have still to investigate the possibilities of a treatise received today on "liquid scintillation counting."

The personal approach, however, and the persuasive tongue, are a different matter, as the Fuller Brush Company well knows; and our resident undergraduates are exposed to it in full measure despite the regulation (*Information for Undergraduates:* II, 6) that permission is required to solicit or peddle in College buildings or to use rooms as salesrooms or storerooms. Permission is granted to fifty or sixty students each year, for such services or sales as laundry, newspapers, magazines, sandwiches, corsages (rarely), calendars, and hot dogs.

In addition, we suspect that a considerable trade goes on in chino pants, chain letters, sports cars, banners, radiators, white bucks, beer mugs, personalized stationery, and various other items without which life would presumably be insupportable. Years ago we had regular service in chocolate eclairs; and both within the dorms at night, and on the steps of Webster Hall by day, John Spaghett would dispense innumerable plaster casts of fraternity shields, Indians, busts of Dante, and flappers — all fabricated on his Tuscan farm during the summer and scattered over the eastern academic seaboard in the winter. Other street sales, especially in the fall season, are solicited for blankets, derby hats, and pennants reading "I Hate Football." And there is a considerable unmarketed residue of canvas-covered kapok life preservers, designed as seat cushions, and known in DCAC precincts as "McCarter's Folly."

There is apparently no limit to the ingenuity of entrepreneurs. We recall that once in our shady past, when we were trying to eke out a living as a student in Paris by teaching lower-middle-class American to several *jeunes filles, bien élévees,* a fellow expatriate alumnus picked up quite a few handfulls of francs by dyeing a lot of goose feathers and parading in front of the *Dôme* and *Rotonde* during the tourist season with the exhortation: "Buy your winning colors."

As one well removed from dormitory life and its irritations and explosions and blown fuses, we now have scant contact with hawkers. Of course, as a parent, we are solicited for subscriptions to *The Dartmouth,* for the purchase of scarves, and for funds for the support of children of non-graduates. One of the most enticing appeals we have received lately came from the Student Birthday Cake Agency. A postcard arrived in late November, stating: "Final exams begin the 8th of Dec.; save your son with Food for Thought. Give him a SURVIVAL KIT—delivered to his room at the beginning of exams. STANDARD KIT: 1 doz. peanut butter cookies; 1 doz. chocolate chip cookies . . ." to the extent of four dozen. And for only one dollar more: "DESPERATION KIT . . ." a 66-piece assortment beginning with "½ doz. tarts," which raised our parental eyebrows.

But we think the most effective direct advertisement we ever received was the one-copy edition of a document laboriously typed out by the ten-year-old daughter of a colleague in his gymnasium office where we were spending a relaxed Saturday morning. It consisted, in more or less accurate duplication, of a series of twenty-five statements: "Phooey on Dartmouth. Princeton will win." Funny thing is, it turned out to be true, but that was not in 1958.

BILL MCCARTER '19

"The Nastiest

By COREY FORD '21h

Some muddy action in the London-Shanghai Bank game.

Jon Stockholm tossing the ball to Al Krutsch (r).

Corey Ford's article was written originally for *Sports Illustrated* and appeared, in somewhat shorter form, in the January 19 issue of that magazine. It is through the kindness of *Sports Illustrated* that Mr. Ford's article is also printed here.

When one of the American forwards missed a flying tackle and plunged headlong into the sidelines, during the Old Millhillians match at Headstone Lane, he knocked the dignified ex-president of the English Rugby Union off his shooting-stick perch and deposited him unceremoniously in the mud. This, spectators agreed resignedly, was just another example of what had been going on here lately. Ever since these touring Dartmouth College ruggers had burst almost unheralded onto the British rugby scene, they had been bowling over the best opposition and leaving their victims sprawled on their hunkers on the soggy English turf, dazed and still a little incredulous.

In the beginning the London sportswriters had been inclined to smile tolerantly at this brash Yankee team ("side" one calls it over here, you know) which had arrived to beard the British lion in his own den. The crew-cut collegians from Hanover, N. H., won their opening game ("fixture", that is to say, old chap), and the startled *Daily Sketch* admitted: "Tough, these Americans." Two victories later, when the visitors defeated the favored Harlequins by 20-8, the *Daily Mail* warned its readers that "their tackling was deadly, they fell on the ball fearlessly, and their three-quarters ran straight and hard." When the novices from the States shellacked the highly-touted London-Scottish Richmond side 16-3, the *Daily Telegraph* threw its hands in the air: "The British are not unused to rude reverses, but this victory of an American Rugby XV must be considered one of the nastiest upsets since Bunker Hill."

There'll always be an England, of course, but it may never be quite the same again after the historic invasion of these nineteen husky stalwarts from Dartmouth – the first American rugby team to visit Jolly Old since the game originated here 135 years ago. The team represented another first: they were the initial athletic unit to travel abroad under the banner of President Eisenhower's People to People Sports Program. What they lacked in finesse, they more than made up for in tackling power, in conditioning, in sheer do-or-die. They wound up their two-weeks tour with five wins out of seven games; and the British loved it.

"I have just bought a round of best bitter for Al, Jake and the other 'guys'," wrote John Bromley in the *Daily Herald*, "to celebrate beating our leading Old Boys' sides at England's traditional sport." "Even with no bands headed by high-stepping drum majorettes to lead them forth," the *London Times* reported, "no cavorting cheer-leaders to exhort wildly partisan and well-fortified alumni in their support, Dartmouth played with immense zest and determination." The Communist *Daily Worker* conceded grudgingly that the Americans "demonstrated above-average competence in most phases of the contest" and the *Daily Express* summed it up: "Now British Rugby knows the worst – Americans *can* play our game."

More to the point was the plaintive comment of a mud-caked and battered member of the Hongkong-Shanghai Bank side, which had just absorbed an 11-3 beating at the hands of the Yanks. Victors and vanquished alike were sharing a twenty-foot-square bathtub in the locker-room at New Beckenham, soaping each other's backs and steaming out their

Upset Since Bunker Hill"

mutual aches in the murky water. One of the defeated ruggers peered through the steam at his American opponent seated across the tub. "I mean to say, old chap," he sighed, "why didn't you give us some sort of warning?"

WELL, the Dartmouth ruggers can answer that. They didn't have any warning, either. The trip was confirmed on such short notice, in fact, that the team left from final exams direct to the airport, minus two suitcases and one player (he caught up with his teammates later by police escort), and they were still inflating their rugby balls as they drove to Boston to board the Pan American Clipper for London. Just in case you happen to be planning to forward a rugby team to England sometime, here's the inside story of how it all happened.

Not that the English trip was any sudden decision. Ever since the game of rugby had started at Dartmouth, back in 1953, we had been dreaming of an overseas tour. I use the word "we" advisedly: for my house adjoins the Dartmouth campus, and in the course of time it has become the unofficial Rugby Club headquarters. The playing field is only a block or so away, and after each game the Green team and their opponents clatter down the street to my house, festooning my lilac bushes with cleated shoes and wandering onto the lawn to enjoy barbecued hot dogs and the traditional keg of victory. My own rugby experience is limited to a few scrums conducted in the New York subways at rush hour; and my value to the team lies in the fact that I know so little about the finer points of the game that I never bother them with advice. So it was in my living-room that the plans for the trip to England were hatched.

This was the year for it, we all agreed. Our fall season had been completed with a total score of 89-0, giving Dartmouth the mythical Eastern title, and now, with the end of football, the team had been augmented by four star members of the Big Green's Ivy League champion squad. As an added incentive, Eddie Eagan, chairman of the People to People Sports Committee, had invited the Dartmouth ruggers to initiate his new program which, in President Eisenhower's own conception, is "dedicated to the promotion of international sports exchange on the premise that when good sportsmen get together mutual understanding and friendship are broadened and the prospects for peace are enhanced." The problem was how to raise the money.

The Dartmouth Rugby Club, like most American rugby groups, is self-coached, and self-financed. Many of the players are on scholarship, and working their way through school. The College's limited athletic budget could not be tapped. Bit by bit, nevertheless, donations began to come in. Loyal Dartmouth alumni and rugby enthusiasts sent in personal checks to help defray expenses. Pan American helped out; so did Eddie Eagan's Committee; the editors of *Sports Illustrated* agreed to turn over the proceeds of this article to swell the kitty. Team-members pawned watches and rings in order to make their contributions to the cause.

A general view of the "fixture" with the Richmond and London-Scottish team, played at Richmond.

Customary after a rugby match in England is entertainment of the visiting team in the host team's clubhouse. Here the Dartmouth ruggers are guests at a tea given by members of the Hong Kong-Shanghai Bank team, which was defeated by the Green.

Darts and English ale provided additional post-game entertainment.

Still we were far short of the required total, and time was running out. Dick Liesching '59, a scholarship student from England and president of the Dartmouth Rugby Club, had cabled to his father, R. R. de L. Liesching of Surrey, to arrange a tentative series of fixtures with English clubs; and the team had secured their State Department passports, just in case. On a gloomy Saturday night – little more than a week before the first scheduled game in England – the team met in my living-room and decided we could not keep our British hosts dangling any longer. Tomorrow would have to be the deadline. Cables and trans-Atlantic phone calls went on all night, and the deadline was advanced to Monday, and then to Tuesday. Orton Hicks '21, vice-president of the College and a devoted friend of the ruggers, was working feverishly to find some last-minute solution. Wednesday noon was set as the positively last moment.

At eleven-thirty that morning, Dartmouth alumnus Sigurd Larmon '14, chairman of Young & Rubicam, agreed to make up the financial difference; and the long-awaited bulletin was posted on the door of the Beta house for all the players to see: "We're on our way to England. Get your smallpox shots." Long-distance phone calls broke the news to parents that their sons wouldn't be with them this Christmas; several players who had already started home for the holidays were hauled back to Hanover in frantic haste; dates converged on the Dartmouth campus for tearful farewells. Dick Liesching woke his father in Surrey at three a.m. with the good news. "Of course," Dick added, a little afraid that after all the team might not be up to British expectations, "we're really not world-beaters, you know, father."

"Just so long as you know the basic rules," Mr. Liesching senior consoled him, "we should have a lot of fun."

They knew the rules. Twenty-four hours after they landed in London, they took on their first opponents, an experienced Haslemere side. Score: Dartmouth 12, Haslemere 0.

THEY made their entrance," reported the *London Times,* "with all the bounce and, at the same time, the endearing humility of Pooh's great friend Tigger." When they stepped from the Clipper in London, groggy and still shaky after their abrupt departure, Captain John Hessler of the Green Rugby Team made a modest statement to the press. "We have come here to increase our knowledge of the game," he assured them.

John Edwards '61 waves the London bowler he adopted as his headgear upon arrival.

Captain John Hessler '59.

In contrast to the Edwards derby, a Sherlock Holmes hat was Jon Stockholm's choice.

"We have more to learn than to give." The press remembered it. When the tour was over, a sportswriter observed pointedly: "The 'learners' have become the 'professors'."

For the first night the team was quartered with Mr. Liesching and other English friends in the Surrey countryside; and Jake Crouthamel, all-Ivy League star halfback from the football squad, had his first taste of British hospitality when he was served a brimming stein of beer in the bathtub. Charles Goldsmith, Dartmouth '29 and now an MGM executive in London, enlisted support among other alumni overseas, and the team moved to comfortable diggings in the heart of London. After their first appearance at Haslemere, British rugby enthusiasts rallied to their aid. Dr. P. S. d'Cabot, co-founder of the Eastern U.S.A. Rugby Union and now its British representative, became their English sponsor, and Jerry Jenkins, a former Cambridge Blue, volunteered to help as coach. "That's one example of British sportsmanship we'll never forget," John Hessler said. "They weren't so much interested in winning over us as they were in helping us to be a better rugby team."

Now under expert tutelage the technique of the Yankee invaders began to improve fast. The Americans learned to conserve their strength, not to run themselves out. They learned to play a position-type game, instead of their former style of hustling and wide-open pursuit. They learned to bind lower in the scrum. They learned to slip the ball from the line-out.

They were learning other things about British rugger customs. When an opposing

Dartmouth alumni in the London area were hosts to the Rugby Club at a dinner.

player was felled by a hard tackle, and had to be assisted off the field, Dartmouth prop forward Mike Mooney generously applauded the downed player. He was reminded severely that one doesn't do that over here, old boy; only when a player recovers and returns to the game is he applauded. "They thought I was cheering because the other team had lost a player," Mooney sighed later. "It was really very trying."

The British were learning about American customs, too. Particularly were they startled when the Dartmouth team indulged in warm-up calisthenics before a game, football fashion, doing knee-bends and pushups and breaking from a huddle with a loud Yankee cheer. The *London Telegraph* reported to its readers about these strange American tribal rites: "Their impressive preliminaries comprised a series of exercises, performed in a circle and ranging from press-ups to a painful contortion which the military would be pleased to call 'alternate toe-touching.' These completed, a short conference was held, the group eventually breaking up with a fierce war-cry."

Equally baffling to the British hosts were the exhortations of the American partisans in the sidelines, including such Yankee words of encouragement as "How to go, gang!" or "Heads up, Green!" or

"Come on, baby, let's *go!*" These shouts, ringing out above the occasional discreet "Well played indeed!" from the other side, produced some frowns among British spectators. Even more distressing was the frequent American yell of "Hit 'em!", which was interpreted as an open incitation to mayhem. "Not quite our regular procedure, I mean to say," a tight-lipped Briton remarked to me.

London was growing used to strange sights. Nursemaids with perambulators and Englishmen with folded umbrellas paused to stare in frank disbelief at the daily workouts in Hyde Park, where a score of bulky figures in green Dartmouth jerseys and sweatpants were practicing scrumdowns on the hallowed site of political oratory. Pedestrians gazed open-mouthed as a chartered bus rolled down Piccadilly, filled with Dartmouth ruggers, while Jake Crouthamel perched atop a pile of gear in the front of the bus and taped the shaved ankles of his team-mates on the way to the next game. Even the size of the players was a source of considerable consternation. The *Express* commented that "they range from large to very large", and Al Krutsch, Dartmouth football captain and all-Ivy guard, was described by one sportswriter as "a caterpillar tractor, only more mobile." The close-cropped American skulls seemed to fascinate the journalists, and the press referred to Tony Denton, a British-born student at Dartmouth and the Green's scrum-half, as "a solitary and comparatively long-haired Englishman among the crew-cuts."

But inevitably these first startled impressions gave way to a deeper understanding. Ambassador Jock Whitney, after receiving the Dartmouth team, wrote them: "This venture you have undertaken is, in itself, an excellent contribution to the growing ties between British and American people. And your fine showing is a credit to your college and your country. Looking at the results of your efforts here, you are painting the town green." Prince Philip sent a warm telegram of congratulations and good wishes. The Earl of Dartmouth, for whose family the College was named, appeared in person to offer his greetings to his New Hampshire namesakes. And Field Marshal Montgomery, shaking hands with the American players after a match, was asked how he felt about seeing a Yankee team beat the British at their own game. "Jolly good," he said. "Makes us sit up, you know, keeps us from getting too complacent. Jolly good indeed."

You could see the change all over London, as the tour went on. Passersby, recognizing the crew-cuts, shouted "Good luck Yanks!" or "I see you rubbed the Old Boys in the mud!" Shopkeepers offered special rates for the visitors, and one Dartmouth rugger spent the better part of an evening trying in vain to be allowed to pay for his own beer in the neighborhood pubs. At the Savile Club an elderly member, informed that rugby was also played at such Ivy League schools as Yale and Harvard, pondered thoughtfully: "Harvard? Harvard? Oh, yes, isn't that somewhere near Dartmouth?" Children stopped team-members on the sidewalk for autographs; and when they appeared at Richmond for their final game, the louder shouts were for the American side: "Well played indeed, Daht-*muth!*" Even the U. S. Air Force band, which had arrived from a nearby American Air Base to shatter English tradition by serenading their countrymen, was invited to march out onto the field between halves, where they rendered "Has Anybody Seen My Gal" amid enthusiastic cheers.

Corey Ford, the nationally known author, whose article about the rugby trip makes such good reading in this issue, is the father confessor and patron of the Dartmouth Rugby Club in multifarious ways. Among other things, his large Hanover home is hardly his own any more. And a sizable part of the funds raised for the trip to England came from his *Sports Illustrated* article fee, which was turned over entirely to the Rugby Club.

Mr. Ford, an adopted member of the Class of 1921, set up bachelor quarters in Hanover in 1952. He serves as adviser to student writers and publications, and has befriended Dartmouth's boxers and wrestlers as well as the ruggers. What was once a squash court in his home at 1 North Balch Street (originally owned by architect J. F. Larsen) has been converted into a small gymnasium, off which showers and a locker room have been installed.

And when the visitors upset all the experts by taking Richmond 16-3, the losing side, following British rugby tradition, formed a double line and applauded the mud-smeared Yankees as they walked to the lockerrooms; and then walked through a double line of Yanks, who applauded the losers in turn. You felt that a lot more had been learned than rugby, in a couple of short weeks. "We learned about sportsmanship over here," Al Krutsch said solemnly, "and we learned humility." You felt the experience would not be forgotten by either side.

So that night the weary Dartmouths boarded the Pan Am Clipper for the States, wearing English club-ties which they had exchanged with their hosts, sporting black bowler hats, even carrying a huge guitar purchased (at a discount) in Soho. When the airplane stewardess started her usual explanation about how to put on a Mae West, the team solemnly chanted an English rugby song they had learned from the Millhillians:

"Why was she born so beautiful, why was she born at all?
She's no bloody use to anyone, no bloody use at all."

Sam Bowlby glanced at his team-mates in disgust. "Still trying to improve Anglo-animal relations," he commented, and closed his eyes.

The tour was over. They had successfully carried the banner of the President's People to People Program, as its first emissaries abroad. They had won an impressive victory; they had won an even more lasting friendship. Now the nineteen American ambassadors settled down in their seats, to catch a little shut-eye on the way back across the ocean. Classes would be starting in Hanover tomorrow.

SPRING vacation, March 20 to April 1, will find the Dartmouth Rugby Club in California for a series of matches. The trip to the West Coast will replace the annual jaunt to Bermuda for the College Week matches, in which the Green ruggers have been outstanding for several years. The California itinerary is not complete, but matches with the strong U.C.L.A. and Pomona teams are definitely scheduled.

Having realized one dream with the trip to England, the Dartmouth Rugby Club is now working up another: a clubhouse of its own where it can have its headquarters and play host to visiting rugby teams, in the British fashion. Such a clubhouse is envisaged as making the ruggers a sort of athletic society.

THE FACULTY

In reporting some of the interesting changes in course offerings by the various departments of the College under the new curriculum, I should like this month to turn to the Department of Philosophy. Both majors and non-majors have a wide variety of subjects to choose from among the twenty courses offered by the Department. In addition to the introductory course, Problems in Philosophy, which remains essentially the same in the new program, students may elect from among five courses in the history of philosophy, nine courses in the various systems of the discipline, four advanced seminars, and, with special permission, a course in research in philosophy.

Among the historical courses are Philosophy 10, Greek Philosophy, which gives primary consideration to the thought of Plato and Aristotle; Philosophy 11, Medieval Philosophy, which takes up the thinkers and movements of major significance in the period; and Philosophy 12, Modern Philosophy from the Renaissance through Kant. Both Philosophy 10 and 12 must be elected by regular majors in partial fulfillment of a requirement of three courses in the history of philosophy. Other historical courses are Philosophy 13, Nineteenth Century Philosophy, which considers important philosophers from Kant to the beginning of the twentieth century; and Philosophy 14, Twentieth-Century Philosophy. Philosophy 14 is a major feature of the new curriculum, and it combines lectures by visiting authorities, briefing talks by members of the staff on the subject of the lectures, and small precepts of twelve to fifteen students for informal discussion of the material.

Of particular importance to non-majors are the nine systematic courses, some of which may be elected without prerequisite. Philosophy 20, Logic and Language, is offered by Dr. Duggan who emphasizes that "the course is not a study of pure theoretical logic but an attempt to relate the principles of inductive and deductive logic to practical problems." Philosophy of Human Nature, Philosophy 25, taught by Professor Gramlich, considers such topics as the essential character of the self, the philosophical implications of depth psychology, the place of the individual in society, and the basis of human values. Philosophy 28, Ethics and Social Philosophy, is a systematic and critical consideration of representative answers to philosophical problems concerning values.

Philosophy 29, Symbolic Logic, uses the mathematical, as opposed to the linguistic, approach to logic. Taught by Professor Kemeny, chairman of the Mathematics Department, the course is a joint offering of the two departments. Philosophy 36, The Philosophy of Science, is also taught by Professor Kemeny. This course considers topics such as the scientific method, the relation of mathematics to science, and the relation of science to values.

The Philosophy of Religion, Philosophy 41, taught by Professor Scott-Craig, is an investigation of the nature of religion and of its place in human society and in the life of the self, with special attention given to the claims of the Judaeo-Christian tradition. Other systematic courses offered by the Department are Philosophy of Art (45) and Philosophy of History (48). Philosophy 53, Political Theory, is offered in conjunction with the Government Department and is taught by Professor Arthur Wilson. This course is a second illustration of an increasing tendency in higher learning today to cut across the lines of the older disciplines.

Professor Arthur M. Wilson of the Government Department was awarded the Herbert Baxter Adams Prize of the American Historical Association on December 29, 1958, in Washington, D. C. Awarded biennially for the best book in the field of European history published during the two-year interim, the prize was given to Professor Wilson for his work *Diderot: The Testing Years,* published by the Oxford University Press in May 1957. The book is the first of two volumes which when completed will be a comprehensive account of the life of the French philosopher and writer Denis Diderot from 1713 to 1784.

In 1953 the unpublished manuscript of Professor Wilson's book was given a $1,000 prize by the Modern Language Association of America and promise of publication by the Oxford University Press. The book will appear in an Italian edition this August. Friends and former students of Professor Wilson will be interested to know that the Modern Language Association prize was also awarded on December 29, a day which seems to be lucky for him. Twenty years ago, again on December 29, his *French Foreign Policy Under the Administration of Cardinal Fleury* won the Herbert Baxter Adams Prize which he has now won for the second time.

Paul R. Shafer, Associate Professor of Chemistry, has been awarded a faculty fellowship by the National Science Foundation for a year's study at the California Institute of Technology. Professor Shafer, a member of the faculty since 1952, will be on leave from the College starting in September. He plans to study the applications of nuclear magnetic resonance spectroscopy to problems in organic chemistry at the California Institute. Professor Shafer won a competitive chemistry scholarship as an undergraduate at Oberlin College, and was a research assistant for the U. S. Rubber Company on a predoctoral fellowship at Wisconsin.

Robert W. Decker, Assistant Professor of Geology, is on an eighteen-month leave from the College to teach at the University of Indonesia in Bandung. He is instructing undergraduate and graduate students in structural geology and sedimentation. According to colleagues, Professor Decker went to Indonesia because he is interested in the geology and geophysics of a youthful and growing mountain belt. While there he plans to work with seismographs, studying gravity anomalies and mountain belting.

During the between-term holidays a large number of faculty members attended meetings of learned societies, such as the meetings of the Modern Language Association in New York and the American Historical Association in Washington, D. C. Among those professors reading papers at these meetings was Professor Henry B. Williams, whose paper on "The History of the Theatre" was presented to the American Educational Theatre Association meeting in Chicago. Professor of Spanish Francisco Ugarte read his own poem, "Romance del pedagogo," to members of the American Association of Teachers of Spanish and Portuguese meeting with the Modern Language Association in New York. "The Ballad of the Pedagogue" will be published in *Hispania,* the journal of the association.

Harold L. Bond '42

L to r: Col. Bernt Balchen; Prof. A. Lincoln Washburn '35; Dr. Wallace W. Atwood Jr., National Academy of Sciences; Dr. Laurence M. Gould, President of Carleton College; Provost Donald H. Morrison, conference chairman; and Dr. Max Britton, Geography Branch, Office of Naval Research.

Polar Conference

Thirty-eight of the nation's leading experts on the Arctic and the Antarctic gathered at Dartmouth on December 18 and 19, under the joint auspices of The New World Foundation and the College, to discuss the need for establishing U. S. polar research centers to carry forward studies launched during the International Geophysical Year. The conference, presided over by Provost Donald H. Morrison, was held in conjunction with the Hanover meeting of the Committee on Polar Research of the National Academy of Sciences, of which President Laurence M. Gould of Carleton College is chairman. Four members of the Dartmouth faculty were conference participants and twenty-five more sat in on the discussions as observers.

Enjoying a light moment are Dr. Hugh Odishaw, executive director of the U. S. National Committee for IGY; Col. Walter H. Parsons Jr., director of the U. S. Army Snow, Ice and Permafrost Research Establishment; and Dr. Ernest N. Patty, President of the University of Alaska. Behind them, center, are Thomas O. Jones, antarctic program director, National Science Foundation, and John Jones, polar research program officer, National Academy of Sciences; and, far right, Prof. Richard P. Goldthwait '33 of Ohio State.

Dartmouth's famous arctic consultant, Dr. Vilhjalmur Stefansson, and Fred Armstrong of the U. S. Steel Foundation were also participants.

THE UNDERGRADUATE CHAIR

"It was a dilly," said Captain Gaudreau, speaking of the riot which broke out in Thayer Hall the night Dartmouth triumphed over Princeton for the Ivy League football championship.

Whether as responsible authorities or as part of the uncouth, howling mob of undergraduates, all concerned agree that the riot was a beautiful thing, as riots go. It sprang from a mood of jubilant hysteria; Dartmouth's last championship was won long ago, time out of mind for most of us at the College now. And not only was it generated from an achievement to be proud of, but this riot's start could not be traced to any of the more common collegiate ills which undergraduates usually protest against, such as poor food or Saturday classes. Its growth seemed entirely spontaneous, and before very long, all kinds and consistencies of food were being tossed through the air with wild abandon. However, a tinge of disrespect for those in charge of Thayer Hall could be discerned in the general fervor as the riot reached its peak, and soon all control over the boys was lost for a short time.

To tell the truth, the College authorities did not seem to anticipate what the student body's reaction would be if the football team won. Some unkind upperclassmen have gone so far as to suggest that the College did not even take the possibility of winning into account. But, all in all, probably it is fairest to say simply that the Campus Police were understaffed that Saturday evening, and that they could do only so much and no more. Of course, their duties were somewhat complicated: they couldn't really be expected to come to Thayer Hall immediately, since they first had to cope with a fire right in the middle of the street at the Inn Corner. What's more, before the night was over they had had to look after great paper streamers and other litter strewn all the way down Main Street, as well as some $700 damage to the town.

In Thayer Hall itself, approximately $1800 worth of damage was done before the riot was finally quelled. Such a costly exuberance of school spirit might be forgivable, perhaps, depending on one's age and attitude toward the property of others. But, though some might try to shrug or laugh it off, most undergraduates realize that the damage was unnecessary.

The riot was not the quiet, more gentlemanly conduct the College expects from its students, but who could feel guilty at the time? No one, I think, was truly ashamed of overstepping the bounds of seemingly justifiable elation. It was not as if in carping against some College policy, the boys had done malicious wrong. And when the administration asked Palaeopitus to recommend a penalty, and it had called for College warnings to be given to those more prominently involved, 96 were handed out and, we may assume, taken willingly, since the only way to determine fairly who had rioted was to ask the boys to come forward of their own accord. Doubtless many felt it had been worth it.

At present, that large bill still exists and restitution remains to be made. On January 5 Palaeopitus met to discuss ways of paying for the damage, and its chairman, Kurt Wehbring '59, scotched the best idea at that date, a student tax, as "impractical" since so many undergraduates had been out of town at the time.

James A. Herbert '60 (l) and John R. Orcutt '59 put the finishing touches on their winning Carnival poster, "The Good Old Days."

Voluntary donation may be the only fair way: it would call upon school spirit, to be sure, but of a less riotous kind — the willingness to assume the responsibilities which go hand in hand with the privileges of cheering for and belonging to Dartmouth. This sort of spirit is nothing less than a mature evaluation of one's own particular relationship to the College — an individual moral judgment for each student — and the desire to fulfill the obligations involved.

Surely it would be a rare group of freshmen who could in a body actually feel responsibility to the degree of acting upon it. In fact, I'm sure, as a senior, that many of us even after four years at Dartmouth will not truly recognize our self-defined duties to others until we've spent more than a few years in "the wide, wide world."

If such a lack of this important kind of spirit is the case, as it seems to be, then perhaps it is in order to ask if its inculcation is somehow deficient.

This question was precisely the one posed by the Academic Committee of the Undergraduate Council as it reviewed the Freshman Orientation program.

The committee was concerned about the state of apathy and ignorance most freshmen go through, and found it could be partly attributed to certain defects in their intellectual and social orientation. The committee members believe that even under the present program using the Sophomore Orientation Committee, many freshmen do not come to understand what is expected of them and consequently suffer throughout many of their first-term courses. They also feel that dormitory living as it now stands provides freshmen only its schoolboy limitations for raising cain and does not give them the opportunities for a full social education which living in a group can offer. Many freshmen, the members think, are not really exposed to the fact that they are social beings until they join fraternities in their sophomore year.

So the committee is in the process of recommending several changes. The first, arrived at by working with Mike Miller '59, head of Freshman Orientation, and David Blake '61, Chairman of the Sophomore Orientation Committee, is the elimination of that latter committee, in spite of its good record so far. If this recommendation is passed by the Undergraduate Council, the Academic Committee will

consider several proposed improvements to replace the Sophomore Orientation Committee. Instead of the inter-class strife fostered by the present system — glorious, perhaps, but not educational — they have suggested that orientation toward Dartmouth's intellectual atmosphere be the responsibility of a carefully chosen group of seniors. These men would work individually with the faculty advisers of the freshmen, and the extent of their function would be left entirely to the discretion of each professor. Advisory meetings held in the faculty members' homes and offices could then be scheduled during freshman week, instead of being put off until the weeks following, which has been the method in the past.

The committee's second recommendation is less individualized, more a matter of procedure; in short, replacing the Sophomore Orientation Committee with a different kind of student organization built around each dormitory. This suggested organization would include the seniors working with the faculty advisers. And in each dormitory the social activities such as rallies would be taken over by the Interdormitory Council; all three upper classes would be on each dormitory committee and would always be present to help the freshmen right in the place where they lived. The Academic Committee believes this program would result in improved responsibility and discipline in the dormitories, especially since the proposed organization would be a continuing body, not one re-chosen annually. And because it would have some kind of continuing existence, it might also become a channel up which student leaders would rise.

Though still only ideas, both such a dormitory organization and the plan for senior advisers would take advantage of a persistent reality at the College, the dormitory bull-session. Men may cut classes and profess all kinds of apathy toward books and learning, but there are very few who do not seek friends and understanding, and some place to voice their own ideas. Here, quite possibly, is the opportunity to inculcate whatever one Dartmouth man can in another, especially concerning what one owes Dartmouth, and what the College owes each student as well.

For a long time now many members of the College, students and faculty alike, have felt the need for freer and more lively talk, and certainly dormitory sessions won't serve everybody's purposes.

Many of the seniors were greatly im-

Top Man at WDCR

Ron Kehoe '59

As Dartmouth College Radio (WDCR) resumed broadcasting, with the opening of College last year, residents of the Hanover environs were startled to hear what seemed to be the familiar heavy voice of Edward R. Murrow, bringing in the 6 p.m. newscast. On a college network one can expect strange interludes, inadvertent comedy and such, but hardly this sort of thing. For everyone the recognition was instantaneous, and when it continued night after night, the locals were buzzing about the student who sounded just like Ed Murrow.

Murrow might introduce his voice prodigy something like this: "Ronald Francis Kehoe, Dartmouth '59, lives in this modest home in Medford, Mass. A graduate of Medford High School, he was a member of the National Honor Society, valedictorian of his class, and editor of the school magazine. Ron has gone on to a brilliant career as an honor student at Dartmouth College in New Hampshire where he now serves as General Manager for Dartmouth College Radio. Good evening, Ron."

The story behind the Murrow imitation began last summer when Ron worked as an announcer for WEZE, the NBC station in Boston. There is nothing like a brush with the professional world to put the amateur on his toes and fill him full of vital enthusiasm. Consequently Ron returned to the college station with the idea of sounding bigger and better than ever. With him came the Murrow gimmick.

For the first six weeks of school, Ron was the voice of Edward R. Murrow. On Election Day evening, with a whole night of broadcasting ahead, "Murrow" left the air. Ron's tongue-in-cheek comment was that he had "grown out of it."

The Kehoe family has been well represented in Hanover in the past. Brother William Francis was a member of the Class of '55 and headed the *Quarterly* during his senior year. Bill had talked Dartmouth so much that by the time Ron was finished at Medford, there wasn't much question about where he'd go to college. If there was, Phil Evans '17, a neighbor and close friend of the Kehoe family, added the extra impetus.

Ron has worked for the *Quarterly* to keep big brother happy, but his main extracurricular activity is WDCR. He says he just "drifted" into this field. Surprising as it seems, Ron has decided against a career in radio. He has been fortunate enough to have had a fairly thorough exposure to the field through summer work and contacts with Dartmouth men in the business. The realistic picture has not pleased him. It is, rather, a career in law that he seeks, and currently his application is in at Harvard Law School.

Student-wise, Kehoe is a Rufus Choate Scholar, an Alfred P. Sloan National Scholar, and a potential Phi Beta Kappa. When not busy at WDCR studios in Robinson Hall, his slender figure heads toward Sanborn House Library with a large pile of books in tow. His English honors work accounts for most of his waking hours.

A natural talker, Ron likes nothing better than a chat about the general campus issues. (His pet project at WDCR has been the Public Issues programs, a documentary series on pertinent current college issues for which the station won a $1500 H. V. Kaltenborn Award.) He displays a splendid sense of humor and is a sharp, quick thinker. Because of his entertaining personality, Kehoe is in demand. From time to time he has spoken before local groups such as the Rotary Club. When the new college film on the Anglo-Canadian-American Convocation was in the works, the directors called on Ron to do the narration. More recently, the Canadian Broadcasting Company had Kehoe do an interview for a coast-to-coast broadcast with Dartmouth polar greats Vilhjalmur Stefansson and Trevor Lloyd at the time of Sir Hubert Wilkins' death.

So Ron has his hands full and his voice going full-steam most of the time. Therefore it is now easier on the throat to be Ron Kehoe and not Edward R. Murrow.

Ted Bremble '56

pressed by their most controversial speaker in the Great Issues course during the fall term, William F. Buckley, editor of the *National Review*. In contrast to most of the other speakers, his personal beliefs seemed incorrect to many of his questioners, and the arguments ensuing were the most spirited, intelligently informed, and probably the most educational of the whole term.

This highly rewarding experience made several men reflect that a series of public debates between a speaker or speakers and the undergraduate body, as opposed to just a Forensic Union or a lecture series, might do more to advance the intellectual spirit of the College than any other single activity. They claim that a certain magical ferment gets started inside a student when he commits himself to saying what he believes and why he believes it in front of a large, sympathetic, but also critical audience of his contemporaries.

Had a debate such as Mr. Buckley inspired been conducted on Dartmouth spirit or on the individual's responsibility, more students might have been prompted to act intelligently during the riot.

If this notion has any merit at all, it might be worth the Tucker Foundation's consideration. As one of the College's endowed operations, avowedly concerned with the moral well-being of the undergraduates, the Foundation could foster the free interchange of ideas and the necessity every student faces for logical, honest thought about his actions in relation to others by simply doing the following: First, it could bring in an authority to speak on current events or, in fact, any of those old issues which are always burning for undergraduates — sex, money, politics, religion, heredity and environment, the College for or against the individual, responsibility, spirit, if you like — the list is endless. The speaker would only talk for, say, twenty minutes in defense of his particular point, and then five minutes apiece could be allotted to two undergraduates selected to present the opposite view. After something like a two-minute rebuttal from the speaker, the discussion could be thrown open to defense and attack from the floor. There are many men on the faculty, notably in the humanities, whose ability to direct class discussions is much admired, and they might be asked to serve as moderators, or more as inciters to what might be termed educational polemics.

Today we bemoan the lost art of conversation, and intelligent argument seems equally obscured. However, such debates would be fairly inexpensive and easy to organize for the Tucker Foundation. And in contrast to academic performance, sports, other extracurricular events, or "goofing off" in the dormitories, they could easily turn into one of the most positive means of letting undergraduates come to their own realization of what they are and can become at Dartmouth.

HOWELL D. CHICKERING '59

Alumni Council Dinner Honors Football Team

THE Dartmouth Alumni Council came to Hanover for its annual winter meeting on the weekend of January 16-17, and discussed the Capital Gifts Campaign, the expanding Medical School program, and other aspects of Dartmouth's daily work; but the big focus of the weekend was the gala football dinner given by the Alumni Council to honor Dartmouth's Ivy League football champions.

The old Freshman Commons in College Hall, scene of Friday night's dinner, was decorated to the hilt with colorful shields, footballs, play diagrams, gridiron symbols, and plenty of green ivy. The dinner was attended by nearly 400 persons, including the entire varsity squad, the parents of many of the players, the Alumni Council and their wives, DCAC officials, faculty and administration representatives, and alumni guests. The freshman football squad and the Glee Club attended after the buffet dinner, served by the Hanover Inn.

Clarence V. Opper '18, Council president, was toastmaster, and speakers included President Dickey, Director of Athletics "Red" Rolfe, Coach Bob Blackman, Captain Al Krutsch '59, and Captain-elect Bill Gundy '60. Mervin Hyman, football editor of *Sports Illustrated*, was present to give certificates to Krutsch and Gundy, who during the 1958 season were honored respectively as lineman of the week and back of the week.

Each letterman on Dartmouth's championship team (including all the seniors) and each coach received a special plaque, engraved with his name and position, to commemorate the 1958 season; and smaller plaques were given to the other members of the varsity squad. Awards and praise flew thick and fast, and so did six of the actual game footballs, thrown from the head table by Bill Gundy to the seniors to whom they had been voted for outstanding play. There were no fumbles.

Topping off the dinner embellishments was an illustrated souvenir program containing facts about the squad, the season, and post-season awards; messages of congratulation; the dinner program; and the dinner menu (sample item: Chef's Salad Bowlby).

With Council President Clarence V. Opper '18 (c) are Trustee John L. Sullivan '21 (r) and Development Director George H. Colton '35 who led the Capital Gifts Campaign discussion.

Mr. Opper makes formal presentation of the Ivy League football trophy to Head Coach Bob Blackman and Captain Al Krutsch '59.

The large crowd at the dinner filled both the main Commons in College Hall and the south annex which was thrown open for the occasion. The photograph gives some idea of the festive look the old Commons had.

Captain-elect Bill Gundy showed his passing skill, and broke no dishes, when he threw six game footballs to the seniors to whom they had been voted for outstanding play in those particular Big Green victories.

Captain Krutsch presents the "Manners Makyth Man" award to End Scott Palmer '59 for his exemplary actions as a team member.

The morning after found Alumni Council members and wives attending Dartmouth classes, as a new weekend feature. L to r, front row, are Mr. and Mrs. John R. Willetts '40, Mr. and Mrs. Lewis K. Johnstone '41, Mr. and Mrs. George B. Redding '29, and Mr. and Mrs. Daniel B. Ruggles '21. In the rear are Milburn McCarty '35 and H. Sheridan Baketel '20.

The first center-of-campus snow statue was designed for the 1930 Winter Carnival by H. Pennington Haile '24.

The Central Idea

This year's Winter Carnival theme is "The Good Old Days" and symbolizing the nostalgic atmosphere for this festive weekend will be the traditional center-of-campus snow statue. The first of these elaborate creations was built for the 1930 Winter Carnival, though fraternities and dormitories had started erecting their own snow sculptures a few years earlier. Pictured here are some of the well-remembered statues that have graced the center of the campus in the latter years of "The Good Old Days."

That Other Dartmouth Carnival

By FREDERICK L. BACON '59

THE green and white sign across the front of the railway station said "Welcome to Dartmouth Carnival." Normally this would be taken in stride by any Dartmouth man. What was amazing about it was that I was in England when I spotted it and it was July.

I experienced this surprise after I had left my two Colgate traveling companions in the resort town of Torquay, eight miles away, and had gone on to see what the town of Dartmouth, England, was like. Seeing the Dartmouth Carnival sign upon arrival started an equally amazing chain of events for me – the next day I was back in the town, with my two friends, and when we left we were honorably escorted to the railway station by a lively procession of citizens, headed by the town councilmen and the Carnival president, who by then had heard quite a lot about the famous Dartmouth Carnival on the other side of the Atlantic.

The town of Dartmouth is a quiet and beautiful place at the mouth of the River Dart, on the southern shore of the county of Devon, and is widely know of course as the location of the Royal Naval College. It was, we discovered, pretty much the same as its description in the guidebook: "This is a town as individual as an old sea-dog; blue-jerseyed, with a cocky tilt to its cap, and long memory in its glance. No mere pleasure resort this. No characterless parade of shops and houses, all primped and frilled for the holiday trade. Rather it is a wind-burned, sunburned individual which moves to meet you with a handshake. And which will remember you when you come back."

Dartmouth sits across the river from Kingswear, tucked into a beautiful, rolling green hill. Overlooking it from an adjacent hill is the imposing, red-brick Naval College, the Annapolis of England and inaccessible to tourists.

To get back to the chain of events I mentioned, it was while walking through this delightful town, inspecting the back streets and little alleyways almost untouched by time, and enjoying the sights of the neat shops, cobblestone streets, and men bowling on the green, that I decided that the Dartmouth Carnival coincidence justified a call on the Mayor, to whom I should extend a hands-across-the-sea greeting and all that sort of thing. My route took me back toward the railway station, and there by chance I encountered not the Mayor but the whole Carnival Committee which had gathered with the Carnival Queen for a special reception.

All that a Yankee tourist with a tale about another Dartmouth Carnival, also in green and white, and a famed Carnival Queen could evoke were exclamations of "By Jove!" But one young and outgoing man, Mr. Lloyd Attree, the Carnival president, did get beyond this to extend an enthusiastic welcome. The idea of an American counterpart of the Dartmouth Carnival was surprising and exciting to him as well as to me. Immediately plans were made for my return to Dartmouth the next day, not as an average, camera-toting tourist but as a Carnival judge and a special guest of the town.

It was already the fifth day of the Carnival, which lasted from June 28 to July 5. From the Carnival program it was clear that the maze of events, exhibitions, parades, dances, refreshments, and sports resembled closely an American winter carnival. There had been four dances in the first four evenings, with the Carnival Committee cleverly providing free late ferries to Kingswear "for those who could have danced all night." The first two days featured such events as bowling for a leg of pork, car decorating, and a skiffle group competition (whatever skiffle is). Wednesday, July 2, turned out to be a big day for Miss Marilyn Breeze, for her ticket sales made her children's Carnival Queen, to reign alongside the adult Queen. And Wednesday evening the whole Carnival Committee must have forsaken the variety show, "Carnival Revels," for it was then that I discovered them waiting at the railway station.

Thursday morning we three Americans arrived on the scene, and were put up at the Ivy Guest Home, run by a little Englishman and his attractive French wife. This was to be a big Carnival day. An afternoon event was the Carnival Baby Show, with the "Edith Pook Cup" for the best baby in the show. Luckily we man-

The author, in the left-hand corner, points to the green and white sign that astounded him when he arrived in Dartmouth, England, last summer while on a vacation tour.

aged to skirt this event by having Mr. Attree arrange for us a meeting with the Mayor and Mayoress at the Guild Hall.

While Mrs. Attree labored away at the thankless task of judging one baby better than another, under the eyes of glowing mothers, we were treated to a quick and fascinating lesson in Dartmouth tradition by the Mayor. A most dignified man, he explained the town jewels, mace, and bracelets of state; and then he started on the town history, not mechanically, but with a real gusto and pride. A few of the things he mentioned were particularly interesting.

In 1341 Edward III gave the town its charter, permitting self-government under a mayor and corporation. From this town, nearly 300 years later, the Mayflower departed originally for America. The Mayor was a bit indignant that a storm forced the boat to put in at Plymouth, just a few miles away, before proceeding on to the new lands and carrying the name of Plymouth, instead of Dartmouth, to the Massachusetts colony.

It was like a tale spun for youth when he spoke of the days of Drake and Raleigh, and of piracy in Dartmouth — of drunken sailors fleeing through the unlit back alleys from the authorities. On the Mayor's advice, we visited Dartmouth Castle, built into the rock, guarding the straits where the River Dart meets the English Channel. It was through this beautiful and quiet harbor entrance that 485 ships and thousands of troops set out, in 1944, to spearhead the "D" day landings at Normandy, just across the Channel.

Before the main Carnival event of the day, a farcical version of the "Crossing of the Line" ceremony was staged by the members of the *H. M. S. Jewel*, berthed at Dartmouth for maneuvers at the time. Dressed in our best, the three of us sat in the reserved section with the other officials to witness the antics of King Neptune and his Court. After a few of the spectators had been sacrificed to the King by being dumped into the water, we joined the Committee at a wonderful local pub before leaving to judge the decorated boat competition. This pub is worthy of mention, for here we were introduced to a drink especially popular in Dartmouth: beer with a bit of lime juice in it to enliven the taste. Try it!

After testing several of these Dartmouth Specials, our party assembled on the judges' motor launch and set out on the River Dart, amidst a weird array of fantastically decorated rowing boats and motor craft. The three of us, equipped with pencils and official tallying pads, were placed in the bow of the craft; in

In the role of Carnival judge, Bacon (r) studies his tally sheet. He also called on his forensic talents (and Dartmouth Specials) while he was guest of the town.

our Ivy League suits, we posed with great dignity, as the Naval College students who skippered the boat dashed a little too playfully between the odd assortment of decorated vessels. This seemed a watery Macy's parade; and we were up to it, being three sheets to the wind anyway.

In the decorated rowing boat competition, a massive and elaborately constructed slave galley, holding over twenty oarsmen and numerous "slaves," took top honors with ease. Between the Kon Tiki and the pirate floats there was close competition for second place, until the first sank at the prompting of the second and so was awarded the prize by default. This buccaneer tactic of drowning the Kon Tiki was followed, in the motor boat competition, by the drenching of a Viking ship by a spouting whale, and the stage was set for a sea battle.

The battle began when the Vikings decided to chastise the offending whale with water extinguishers. And when the slave galley joined the fray, with ten men manning a large hose and the other ten tossing buckets of water in all directions, the ruckus drew more participants. The well-dressed judges on the official launch (that was us) had the best view, of course, being in the center of the festivities.

Waterlogged and a little disillusioned, we repaired to the Castle pub, with the rest of the Committee, for a few more lime refreshments before the formal presentation of prizes at the Bandstand. Here, in the middle of the Royal Botanical Gardens, with the whole town gathered around, Mr. Attree took the people — and us — by surprise by introducing us as three special guests. He insisted that we unleash our "Yankee drawls" and speak to the town. Perked up by several Dartmouth Specials, we made the panicky decision that I should speak, being the one from Dartmouth College.

The speech began with an accusation that it was they, not I, who had the accent. Somehow, this turnabout seemed to go over in fine fashion. Laughter and cheers warranted ending the speech, I decided. But my closing remarks, aimed at complimenting the beauty of the town, somehow became an extended description of the countryside of Hanover, New Hampshire, as an approximation of this lovely English Dartmouth. Platitudes poured down from heaven at the appropriate moments, and with some added remarks about Dartmouth College and its Winter Carnival, I managed to get through my "address."

The next evening, our last in Dartmouth, was the occasion for yet another speech to the town. We had spent a wonderful day swimming and sunning near the Castle. When evening came, the highlight was the children's grand fancy dress procession. We took our places in the center of the outdoor dancing floor, in the Royal Gardens, to judge the wildly decorated groups of children. The parents were gathered around, three deep, and closing in. After the awards we were asked again — this time with less surprise — to speak to the townspeople.

I told them that the three of us had been the perfect judges that evening, for we were leaving town in an hour to catch a plane for Paris in the morning. This struck the right note and once again, with the encouragement of my listeners, a two-minute speech stretched into a long

Dartmouth Castle guards the straits where the River Dart meets the English Channel.

dissertation. This time, I covered the details of our Dartmouth Carnival, the Outdoor Evening, snow statues, and Carnival Queen. A few more compliments flowed with the platitudes, and at the end of the speech the people were cheering loudly.

Mr. Attree closed the evening by presenting us "Yankee celebrities" with a scroll, beautifully engraved in gold, green, and white, reading: "Greetings and all best wishes to the Carnival of Dartmouth, America, from the Carnival Committee of Dartmouth, England." Signed Lloyd Attree, President, and F. J. Tremlett, Chairman. This was presented subsequently to President Dickey. This called for a short speech of thanks and then, the ceremony over, the dancing began. Little girls who had participated in the contests insisted that we autograph their prize placards and reporters interviewed us for the town newspaper. Finally we broke away for a last visit to the pub with the Committee members, before the ferry left for the train at Kingswear. Our send-off was warm and memorable.

Unfortunately we had to miss the biggest day of the Carnival. Saturday featured another Macy-like parade, this time on dry land. It was to proceed through the streets and to be led by the Mayor, decked out in his ceremonial robes of office. The famed City of Wellington (New Zealand) Highland Pipe Band was to be the special attraction.

The hospitality of the people of Dartmouth was overwhelming, their town ideal for beauty, sport and relaxation. The excitement of the Carnival augmented for us an adventurous stay. Yet, it is interesting that the Carnival is not even the most important event of the summer for the townspeople. The Dartmouth Regatta, lasting several days in late summer (August 27 to 30 this year), is famed throughout England as the biggest river event in the South-West. It is a special and lavish event that bears visiting.

The guide book tells us that the fishing at Dartmouth is superb (river fish are bass, pollock, whiting, skate, mackerel, conger, eel, and smelt; sea fish are bass, pollock, skate, tope, mackerel, wrasse, and bull huss) and it urges all to "Come where the sky is blue and the sea is blue in rivalry. Come where history walks in the shadow of today. And where you know there is a bigger fish to be caught than ever you have caught before." The guide book also says, "Come to meet a friendly town. There's a hand out-stretched in welcome." The fabulous experience of three minor American tourists bears out that no statement could be more true.

WITH THE BIG GREEN TEAMS

THE past month (mid-December through mid-January) was a brilliant and exciting period for Dartmouth athletics. It began appropriately with the Big Green rugby team leaving for a Christmas holiday trip to England, to meet seven British opponents under President Eisenhower's "People to People" sports program, and ended with a stirring testimonial dinner given by the Dartmouth Alumni Council to honor the Big Green's Ivy League championship football squad. More complete reports on both the rugby team's trip and the football dinner will be found elsewhere in this issue.

Despite a longer-than-usual Christmas recess, other Dartmouth teams saw plenty of action with the basketball team playing in the mid-west, returning east to win the Queen City Tournament, and then making a strong bid to retain its Ivy League championship by winning over four Ivy opponents in a row. The Big Green hockey team headed for Minnesota over Christmas, then returned to play some outstanding hockey to defeat Army and win its first league game of the season over Princeton. A new indoor world's record in the high jump by a Boston University freshman was the highlight of an early January dual meet won by the Indians, while the squash team found itself blanked by a blizzard in attempting to reach Montreal for a match against McGill. Several new track and swimming records were set in January in Hanover contests and Dartmouth skiers gave promise of another good year by performing well in early season individual meets in the east.

For the records, the Dartmouth basketball team has chalked up nine wins against four defeats, with four wins and no losses in Ivy League play; the hockey team has posted four wins against five defeats, with one win in Ivy competition; the swimming team has three wins and one defeat; the track squad has split even, winning one and losing one in dual competition; the squash team has two victories and no defeats; and the wrestling team has one win and no defeats. Varsity totals through January 17 show 19 wins against 11 losses.

Dartmouth freshman teams launched their schedules for the most part in early January. The '62 basketball squad has three wins against two losses, the hockey team has won three and lost one, the freshman swimmers have a one-one record in dual competition, the track team also has a one-one mark, while the squash team has lost its only match to date. Eight wins and six losses for freshman teams coupled with the 19-11 varsity record total 27 wins and 17 losses to date for the Dartmouth winter squads.

Basketball

Carefully lettered signs in the Hanover Inn lobby during the January 16-18 weekend and spot announcements over the WDCR student radio station told Alumni Council members, visitors, townspeople and students that "Saturday, January 17 is 'Be Kind to Doggie Day'." Apparently the visiting Manhattan basketball team did not pay much attention to the signs as it went all out to try to beat the Big Green at Alumni Gymnasium, and it took a long set shot by guard Dave Gavitt with three seconds left in the second overtime period to give the Indians their ninth victory of the season by a 63-61 score.

It was the fifth straight win for Dartmouth, following an early January loss to Holy Cross in Worcester by an 83-66 count. Prior to the Holy Cross contest the Big Green played Butler, Vanderbilt and Bradley before Christmas, losing to all three by rather narrow margins, and then picked up to win the Queen City Tournament in Buffalo by downing 12th-ranked Brigham Young in the opener, 88-75, and edging Canisius, 72-62. Guard Chuck Kaufman was voted the most valuable player at that tournament.

With Kaufman out of action, the Indians had difficulty defeating Yale in their first Ivy League encounter by a 52-51 score. It was at this point that *The Dartmouth* reported team morale was low and that the squad was having trouble with "petty jealousies and disputes." There are too many players gunning for scoring honors, complained *The Dartmouth*.

Admittedly Coach Julian was having difficulty putting together a combination that would be most effective. Tom Aley,

a letterman and center, had withdrawn from the team early because of his studies, as did Bob Hoagland, a strong forward candidate. Chuck Kaufman's loss at Yale hurt and later, against Cornell, sophomore center George Ramming, who had been playing brilliantly, tore some ligaments in his ankle and is out indefinitely.

But despite the need to juggle the lineup for almost every game, the Indians went on from the Yale encounter to wallop Columbia, 69-40, thump Cornell, 77-58, defeat Harvard, 74-56, and then edge a powerful Manhattan team, 63-61, in double-overtime.

Whether, with Ramming out of action, the Indians can keep up this torrid pace is questionable, but on the basis of continually improving performances, and the way some of the sophomores and reserves are helping out the regulars, the odds are still with the Big Green to retain the Ivy title.

Statistically the Big Green is doing well with the team hitting a .404 average on field goals and a .655 free-throw percentage while garnering 67.9 points per game. Captain and forward Rudy LaRusso is the team's leading scorer, averaging 15.8 points per game, with guard Chuck Kaufman second with a 13.8 average and guard Walt Sosnowski third with 9.0. Forward Gary Vanderweghe and center George Ramming are hitting at about 8 points per game, with guard Dave Gavitt, forward Bryant Barnes and center Dave Farnsworth getting about four points per game in limited action. LaRusso is by all odds the team's top rebounder; of the nearly 700 recorded by Dartmouth he has 200 to his credit.

Hockey

Following December victories over Norwich and Colby, the Big Green hockey team took to the road during Christmas vacation to play the University of Minnesota twice and the Duluth Branch of the University of Minnesota in two contests. The Indians dropped all four of these games, losing to Minnesota by 8-1 and 6-1 scores and to Duluth by 9-5 and 3-2 scores.

However, Coach Eddie Jeremiah felt the team had played well against very stiff opposition and that the trip was worthwhile from many aspects. Goal tender Dirk Frankenberg was outstanding despite the losses, as was defenseman Rusty Ingersoll. For these four contests Jeremiah had shifted former goalie Tom Wahman to third-line center and Wahman proved a strong skater and excellent center, scoring his first goal of his career against Duluth.

In the first game in Hanover following this trip Wahman moved up to the first line and was instrumental in Dartmouth's 5-3 win over Army as he tallied two goals. Captain Rod Anderson and defenseman Rusty Ingersoll also scored as the Indians played a standout game to defeat a hard-playing West Point club.

A few days later a heads-up Middlebury squad hit hard to collect four goals in the first eight minutes of play and then held on to defeat the Indians 9-5. Both Wahman and Captain Anderson notched two goals each in this contest, but the Big Green was sluggish in the first period and never could quite recover.

Against Princeton, in the most recent contest, the team got back on the winning side as it stopped the Tigers 5-1 to register Dartmouth's first Ivy League victory of the season. Sophomore Jake Haertl scored for the Big Green early in the first period, but Princeton battled back and it was late in the second stanza before Rusty Ingersoll got a second tally on a long shot. In the third period the Indians scored three to wrap up the game, with Tom Wahman and Rod Anderson teaming up to score one each, while Chuck Ritchie got the fifth counter.

With nine Ivy contests ahead during the next six weeks (Cornell has been added to the league this year), the Big Green has its work cut out, but Coach Jeremiah is confident that his skaters will make a strong bid for League honors this winter.

Swimming

Although the Dartmouth swimming team is rated somewhat weaker this winter (see "Coaches Corner"), it has done well since losing the opener to Colgate by edging past Army 45-41, drowning Amherst 64-22, and most recently defeating Syracuse 71-15.

Against West Point Dartmouth's Pete Anderson set a new Indian record in the 200-yard backstroke with a time of 2:18.4, to best Rip Coffin's 1955 mark. Captain Jack Daniels and sophomore Charlie Brown were both double winners in this meet, with Daniels copping the 220-yard freestyle and the 440-yard race, while Brown annexed the 50- and 100-yard freestyle events. John Prior was second for the Big Green in the 50-yard freestyle, while Don Baker took first in the 200-yard butterfly event.

In the Amherst meet the Indians won eight of ten first places handily with Pete Anderson, Scott Piper, Whitey Dunphy and Don Baker teaming up to win the opening event — the 400-yard medley relay. Daniels took the 220-yard freestyle and Dave Cook won the 440, while Charlie Brown captured the 50-yard freestyle and Tom Travis took the 100. Pete Anderson won the backstroke and Dick Prior, Cleve Carney, Max Grumbacher and Charlie Brown added the 400-yard relay race to Dartmouth's totals.

Completely dominating all but one event, Dartmouth swamped Syracuse by a 71-15 count in the most recent meet. Big Green swimmers took first and second place in all events except in the 400-yard freestyle relay. Daniels was outstanding in the 440-yard freestyle, while Stu Summers and Glen Gemelli placed one-two in the dive. It was strictly no contest in this meet, but the picnic is over as Dartmouth swimmers next face Princeton, Harvard,

Dartmouth's first line of Tom Wahman (23), Captain Rod Anderson (20) and John Wadman (6) storm in on the Army goalie in the Hanover game won by the Big Green, 5 to 3.

Yale, Penn and Cornell in the next five weeks, and all are strong league foes.

Track

Dartmouth's winter track squad, under Coach Ellie Noyes, opened its winter season in early January with a 59-45 win over Boston University, but lost its second dual meet of the season to a strong Manhattan team, 74 1/3 to 34 2/3.

The Boston University meet was highlighted by the establishment of four new records — one of them a world's record. A 19-year-old Boston University freshman, John Thomas, set a new world's indoor high jump mark by leaping 6′ 11″. Actually, the cross bar was thought to have been set at 6′ 10″ but it was carefully measured after Thomas had cleared the bar and the new world's record was announced to enthusiastic applause. Thomas has since jumped even higher.

John Lawler of B.U. broke the Alumni Gymnasium cage record in the 35-pound weight toss with a heave of 60′ 4½″, and Larry Cafarella set a shot-put record with a 52′ 7 2/8″ toss. The Dartmouth runner who set a record was the Indians' freshman sensation, Tom Laris, who ran the two-mile race in 9:17.1, bettering Doug Brew's former time of 9:45.1 by a wide margin.

In the varsity meet Captain Mike Kistler won the mile and two-mile race, with Tom Lennox and Pete Jaquith finishing third in the mile and two-mile event respectively. Gregg Millett annexed the pole vault for Dartmouth, while Fred Daley took first place in the 600, John Ebers won the 45-yard high hurdles, Bill Zeilman the 50-yard dash and Norm Page tied for first place in the high jump.

Against Manhattan, Dartmouth was clearly outclassed. John Ebers won the 45-yard high hurdles, Gregg Millett the pole vault, and Bill Zeilman the 50-yard dash to account for most of Dartmouth's scoring. The Jaspers dominated the distance and relay events and most of the field events to sweep the meet.

Four league meets with Harvard, Cornell, Brown and Yale, plus the I.C.4.A. and Heptagonal meets, remain on the schedule.

Squash

After an early December win over M.I.T., five members of the Dartmouth varsity squash team competed during the Christmas holidays in the New York University Club's invitational tournament. Dartmouth's Dick Hoehn confirmed his ranking as the top-seeded collegiate player by defeating Princeton's sophomore star, Steve Venslage, 11-15, 15-8, 15-11, and 16-15, in the final round of play to win the tournament for the second straight year. The other Big Green entries — Jack McDonough, Marty Zipser, Don Bartlett, Dave Lowry and Dick Skolnik — did not fare so well and were all stopped in either the first or second round of play.

In early January the team was scheduled to travel to Montreal to play McGill, but a blizzard stopped two of the three cars. Captain Hoehn along with seventh-ranked Phil Langley, Sam French, ranked eighth, and Opie Jones, rated ninth, did get through and played an informal match with everyone winning except French.

In the most recent match against Penn, the Indians had an easy time shutting out the Quakers 9-0. All players won easily except for John Horan, playing second, who had to go five games before downing Carl Huggins.

Skiing

Coach Al Merrill, now in his second year at the helm, admits he faces a major rebuilding task this winter (see "Coaches Corner"), and Dartmouth is expected to have some difficulty in defending its Eastern and National Ski Championships.

The first real test will come at the Dartmouth Winter Carnival (Feb. 7-8), but meanwhile the Dartmouth skiers are competing individually in a series of eastern races. In the Franconia Ski Club's preseason Giant Slalom Race, Dartmouth's alpine and now U. S. Olympic Team alpine coach, Bill Beck, won first place and because this was his third consecutive winning of the event he retains the Joel S. Coffin III Memorial Trophy. Brooks Dodge had retired the other Coffin Trophy back in 1955. Other Dartmouth skiers were Dave Britton, who finished sixth, Dave Harwood in ninth place, and Frank Noel tenth.

In the January invitational cross-country race at Jackson, Captain Dick Taylor came in third, with Frank Noel seventh and Pete Ryland eleventh. On the same weekend, at the Mt. Whittier Giant Slalom, Dave Britton finished sixth, with Jim DeLong, Rog Hackley and Pat Hartley close behind.

In the most recent weekend of action, Dartmouth's four-man relay team of Captain Dick Taylor, Pete Ryland, Frank Noel and John Capper won the Hanover invitational cross-country relay race over thirteen other teams. In the invitational jump on Sunday, Bookstrom, Taylor, Noel and Don Peterson placed third through sixth, in that order, in the Class B competition.

With Harwood, Smith, Gebhardt and Ceely graduated and Dave Vorse training for the Olympics, Coach Merrill must rely on a small nucleus of veterans and some sophomores and reserves.

Captain Dick Taylor, Don Peterson and John Capper are top Nordic competitors, Dave Britton is outstanding in downhill and slalom, and Frank Noel is a strong four-way contestant. Sophomores Art Bookstrom, Jim DeLong and Dick Nordhaus are all likely four-event candidates, with John Stowell rated highly in the alpine events and Skip Bean as an excellent Nordic contender.

Wrestling

Coach Bill Craver, who also serves as freshman line coach in football, faces a rebuilding job this year, as the Big Green varsity wrestling team lost by graduation such outstanding veterans as Captain Fred Pitzner at 167 pounds, Bob Bickell at 177, John Mehl at 123, and Jim Sniderman at 137. In the opening contest with Albany State Teachers College, Ed Lau started in the 123-pound class, and Dick Keith at 130. Both are newcomers to the team and both lost to their Albany opponents. Ron Heineman, wrestling at 137 pounds, won by a close decision, while sophomore Jerry Cantril, wrestling at 147 pounds, won by a fall to give the Indians hope. Captain John Chilson at 157, one of the few veterans, added another fall for the Big Green, while Fred Graybeal, also a letterman, lost by decision. Jay Crane, at 177 pounds, and heavyweight Hank Gerfen both won their matches by decisions to give the Indians a close 19-15 win for their first victory of the season.

Coach Craver feels that the team is making progress, but he is concerned about lack of experience and depth in the 123 and 137-pound classes, particularly with teams like Harvard, M.I.T., Amherst and Brown on the schedule.

Freshman Teams

Dartmouth's freshman teams are also moving along in fine fashion. The basketball team won the opener from University of Vermont, but then was upset in a return game with the Catamounts. It defeated the Williams 1962 aggregation, 64-57, lost to Harvard, and in its most recent encounter overcame a 28-25 halftime deficit to thump Norwich 71-47. Guard Ed Goldstein, forward Bill Shanahan, and Paul Brown have been Dartmouth's top scorers, with guard Bob Brower also looking good. Other top freshman players include center Bob Gimby, Barry Strauch and Bob Meyer.

The Little Green hockey team went undefeated in its first three contests by defeating the Norwich freshmen, Hope High School and Kimball Union Academy, but lost the most recent contest to a strong Northwood School club by a 7-3 score. Bill Blees, Tom Cranna, Mike Parish, Pat Gorman, Stu Johnson, Warren Loomis and Derek Buntain are the top freshman hockey players thus far. Coach Jeremiah expects some help up front from this team but bemoans the lack of a goal tender and defensive depth.

After an opening loss to Colgate, the freshman swimming team rebounded to defeat Andover 52-34. Terry Bentley broke the Andover Pool record to win the 100-yard butterfly for Dartmouth, while Steve Lasser and Charlie Balch teamed up for a one-two punch in the breaststroke event. Jay Pierson and Jeff Urstadt did well in the backstroke and freestyle races, while Chuck Hegeman looked impressive in taking second place in the dive.

In mid-January the freshman squash team opened its season with a disappointing 6-0 loss to a strong Andover team. Phil Meyer, Jim Biggs, Doug Walgren, Bob Eder, Tad Cantril, and John Ryder — playing in that order for Dartmouth — all went down to defeat. Coach Hoehn expected to lose to the more experienced Andover club but admits his disappointment with lack of depth on the current freshman squad.

In the only freshman track meet of the season to date the '62 Dartmouth squad defeated Boston University, 58-44, with Tom Laris setting a new record in the two-mile race (see varsity report). Dan Tompkins finished second behind Laris for the Indians while Dud Hallagan won the 660-yard race and anchored the winning relay team. Nick Jennison captured the mile race, Colin Harley the 50-yard dash, John Holland the pole vault, and Dave Guenther took a first place in the broad jump to account for the majority of Dartmouth points.

Green Jottings

Seven Dartmouth soccer players were named to the 1958 All-Ivy League soccer teams in early December on the basis of fall play. Dave Blake, Dartmouth's right fullback, and inside right Jim Kennedy were picked for the first team, while goalie Randy Malin, halfbacks Fred Arens and Jack Zipes, and center half Mitch Engle were selected for the second team, with John Wardman receiving honorable mention.

A local, amateur hockey club called the Hanover Storm Kings has been organized in the community. The group is composed of undergraduate and alumni players plus some faculty members. The Storm Kings were organized by Jack Hodgson '60 and Jack Patterson '60 and are supported by local Hanover business firms. The team won its first game over Wesleyan, 5-4, and expects to play small college teams and local amateur clubs during the winter.

CLIFF JORDAN '45

Coaches' Corner

AL MERRILL: Faced with the loss of four key men by graduation in June (Harwood, Smith, Ceely, and Gebhardt) along with the recent withdrawal from college by another (Vorse), it is evident that we have pretty much a complete rebuilding job to do.

Heading up the returning men from last year's team is Dick Taylor, a Nordic man, Frank Noel, four-event, and Don Peterson, a jumper. Needless to say, this year's team will be pretty much a complete revision, as the Alpine team is all gone and the Nordic strength split up by graduation losses. It will be a much younger team, in experience as well as age.

We are currently carrying a squad of 35 upperclassmen, from which we hope to fill the gaps. The fine spirit that was a most significant characteristic of last year's team still prevails, and the results of the open competitions the men have been in to date have been quite satisfying. There appears to be fairly good depth in all events.

In general, I would say that we should have a well-balanced team, but we face the problem now of further development in order to get a winning combination.

KARL MICHAEL: Having lost six seniors by graduation, including Captain John Graf, Bill Bahrenburg, Ernie Drosdick and Dave Beattie, four of our best middle-distance swimmers ever, as well as diver Bob Michael and backstroker Don McCree, we looked forward to a mediocre season. After our loss to Colgate, prospects were positively dim when a total of eight varsity lettermen failed to stay out for swimming for one reason or another.

However, I did not reckon with the drive, determination and spirit of the ten sophomores who were responsible last year for the first undefeated freshman swimming team in ten years. For the first time in memory, our varsity team now is composed of more sophomores than juniors and seniors combined. Captain Jack Daniels has given up breaststroke and butterfly swimming in favor of middle-distance freestyle swimming — a happy change for him and a fortuitous one. Junior Cai Raber is right behind Jack in the 220 and a fine sprinter on his performances of a year ago. Stu Summers, senior diver, is developing into the steady performer that we expected of him a year ago, while Pete Anderson has lived up to his earlier promise by establishing a new Dartmouth 200-yard backstroke record in his second dual meet of the season.

In addition to Raber, juniors Tom Travis and John Prior will be consistent point-winners in the sprint events as well as the relay, while Bill McClung, recently returned to the team, will add welcome strength in the breaststroke.

The talented group of sophomores is headed by Charlie Brown, the finest sprinter at Dartmouth since the immortal John Glover, and includes Bill Dunphy, Cleve Carney and Max Grumbacher; distance men Dave Cook, Al Hale and Max Ramenofsky; breaststroker Scott Piper, who established a new Dartmouth 200-yard breaststroke record against Colgate in his first varsity dual meet; backstroker John Benepe; butterflyer Don Baker; and diver Glenn Gemilli.

The freshman team, while generally weak in the freestyle events, boasts the fastest butterfly swimmer in Dartmouth history in the person of Terry Bentley, as well as a most promising backstroker in Jay Pierson. At present the leading freestylers are Bruce McCollum, younger brother of the 1957 captain, and Bob Rogers. Having lost the opening meet to the Colgate freshmen with a finger-tip loss in the final relay, the 1962 team is eagerly looking forward to prove itself.

Prospects look better than they did in November!

NEWS FROM THE CLUBS

Maine

Secretary, REYNOLDS E. MOULTON '35
Bradish-Young, Inc.,
417 Congress St., Portland, Me.

On Thursday, December 18, a sizable group of Dartmouth alumni, wives, and undergraduates turned out to greet Professor Thaddeus Seymour and his charming wife, Polly. The new Dean of the College certainly is an excellent speaker and the type you would be proud to have as your son's advisor.

At the short business meeting Dr. **E. Allan McLean '31** reported for the nominating committee. Elected to run the Dartmouth Alumni Association of Maine for the year 1959 were **Herbert W. Nolan '43,** President; **D. Kilton Andrew Jr. '55,** Vice-President; **Arthur W. Peabody '44,** Treasurer; **Reynolds E. Moulton '35,** Secretary. Elected to the new executive committee formed to help the president were John Pierce '54, past president William Poole '46, Bernard Lewis '52 and Alvin Morrison '57.

William Poole did his usual excellent insurance job as presiding officer and is to be commended for a wonderful year of activity. A spring meeting is planned and announcements will be mailed out in February.

Southern California

Secretary, GEORGE R. PURVIS '49
c/o Merrill Lynch
454 N. Camden Drive, Beverly Hills, Calif.

The Association was honored by a visit with **Eddie Chamberlain '36,** Director of Admissions, the first week in January. He was rushed into meeting after meeting with high school principals and advisors by Enrollment Chairman **Dick Milliken '50,** and Dick reports that he feels the visit and personal contact of the Admissions Director will pay off handsomely when the time to send our next group to Hanover rolls around.

The evening of January 6, the Association held a dinner in the Terrace Room of the Sheraton West in honor of Mr. Chamberlain and a wonderful turn-out was in evidence in spite of inclement weather. Following the dinner, the film, "Football Highlights of 1958" was shown, with the cooperation of **Cap Palmer '23,** who furnished the projector and screen and projectionist. The group was overwhelmed with the tenacity, drive and sparkling offense displayed by the '58 squad and feel that the loss of a game through a missed field goal run-back can only be laid to the breaks on the gridiron. The team looked great and the Southern California Association to a man knows that the coach from Southern California is going to have a big season next year.

Pete Reich '50 announced that the Dartmouth Rugby team will be out here in March to play UCLA and the boys deserve the whole-hearted backing of everyone in the Association. It was fine having a good showing at the Chamberlain dinner and some of the busier people who were able to attend the function included, Dr. Dana Howe '31, Dr. Elmer Crehan '41, Dr. Bill Dignam '41, Charley Schaaf '37, Frank Danzig '37, Leon Rothschild '24, Vince Burke '47, Stu Durkee '33, Howie Almon '22, John Lyman '28, Ken Lieber '36, Bill Adams '34, Rudy Pacht '35, Bob Jackson '51, Marty Ullman '48, Ed Seward '19, Dick Terzian '56, Bob Danziger '56, and last but not least, President Dick Hefler '36. Many more who are just as busy turned out but inasmuch as I lost the list of attendees and haven't the space or inclination to add any more, must close with, "Pay your dues and support the Rugbies."

Chicago

Secretary, HUGH K. BROWER
Harris Trust and Savings Bank
115 W. Monroe St., Chicago 3, Ill.

La Salle Street alumni turned out 47 strong on Wednesday, January 7, to hear **Gaylord A. Freeman Jr. '31,** Vice president of the First National Bank of Chicago, discuss the business and economic outlook for 1959. Although forewarned that such economic symposiums are the type of thing that "you wouldn't walk across the street to hear but would fly across the country to give," the program was timely as well as stimulating. Mr. Freeman envisions a continued upward trend during 1959 in all major components of the economy. One month earlier the S.R.O. sign was out when Coach Bob Blackman was in town to sum up the recently concluded football campaign.

On February 4, **Henry L. Parker '26** and **Tig Lyon '25** will report on the current situation at the College following attendance at official meetings in Hanover. At this meeting, if **Tom Rowe '50** can withstand pressure from Blair Watson, we shall also have films covering the past football season. **John Loveland's** ('49) Luncheon Committee along with the Speakers' Arrangement Group, composed of **Al Louer '26, Gene Hotchkiss '22** and **Dick Mayberry '44,** all deserve a lot of applause for their efforts on behalf of the Association this year.

HANOVER HOLIDAY

Our social arm, under **Jim Stevens '50, Drew Waitley '52, Dick Lowenthal '53, Herb Ray '50, Dick Frey '50,** and **Bob Bowler '51,** is winding up arrangements for the annual Hanover Holiday meeting to be held on Friday, February 20, at the University Club. Because of his recent operation, President Dickey will not be able to participate as planned. Prof. Allen R. Foley '20 and Dean-elect Thaddeus Seymour will be the guest speakers for the occasion.

The only item of business will be the report of the nominating committee under the chairmanship of **Modie Spiegel '22** who will present the following slate: President, **Thomas H. Rowe '50;** Secretary, **Hugh K. Brower '50;** Treasurer, **Simon J. Morand III '50.** Directors (for terms expiring 1962) **Andrew J. Oberlander '26** and **James W. Stevens III '50.**

Philadelphia

Secretary, RUSSELL C. DILKS '51
Morgan, Lewis and Bockius
2107 Fidelity-Philadelphia Trust Bldg.
Philadelphia 9, Pa.

William Walker, Executive Vice-President of the First Pennsylvania Banking and Trust Company, was the featured speaker at our annual Dutch Treat Luncheon held Monday, December 29 at the Sylvania Hotel. Present were 26 alumni, 15 undergraduates, 8 fathers of undergraduates, and 2 guests. This was the best undergraduate turnout that we have had at any function other than the Annual Picnic for some years. It is to be regretted that there were not more alumni present.

The last-Monday-of-the-month special luncheons inaugurated in September will continue into 1959. Interesting speakers are being lined up, and notices will be sent by mail to all dues-paying members in advance of each such luncheon. At the same time, the loyal members of the tribe continue to gather at the Dartmouth-Princeton Club for luncheon on other Mondays.

As of the time of writing, plans for our Club Annual Dinner are being finalized. It appears that this gala event for alumni and their wives will be scheduled during the second or third week of March. Notices for the Annual Dinner will be sent to all alumni on our mailing list this month.

By the time you read this, the general Capital Gifts Campaign for the College will be in full swing in the Philadelphia area. We hope that all of our readers will open their hearts and checkbooks and give generously so that Dartmouth will be even stronger as it enters upon its third century a few years hence.

New York

Secretary, JOHN R. VINCENS '39
Metropolitan Life Ins. Co.
1 Madison Ave., New York 10, N. Y.

We remain in business at the same old stand. Luncheon daily, except Saturdays, Sundays and certain Holy Days of Obligation. Always something doing at the bar in Wheelock Tavern, 11:00 to 11:00. Pink Ladies for the ladies in the beautiful Ivory Room (named for Eleazar's wife). Cards played, rooms rented, checks cashed, theatre tickets scrounged, everything for the Dartmouth man. Drop in when you're in town. (Why not take out a non-resident membership first? Only ten bucks. A bargain.)

The Perspectives in Business series continues under the guidance of handsome **Mutt Ray '37.** On the first Wednesday in December, **Josh Davis '26,** President of William Blair & Co., investment bankers, talked to a capacity audience in the Webster Room on the ins and outs and ups and downs of The Markets. You might have heard a pin drop on the first Wednesday in January as **Courtney Brown '26,** Dean of Columbia University's School of Business addressed another

capacity house on, "Major Influences within Business during the Next Decade."

Future speakers, on the first Wednesdays of the months to come: **Roswell Magill '16,** authority among authorities on Federal taxation, — Wednesday, February 4. **George Champion '26,** President, The Chase-Manhattan Bank of New York, — Wednesday, March 4. **Orvil Dryfoos '34,** President, The New York Times, — Wednesday, April 1 (a courageous man!).

Other coming events: A Calypso Party, complete with incense and the haunting beat of the Talbot Bros'. 400 octane gasoline drums, on a Sunday afternoon in February — which Sunday still to be determined by Entertainment Chairman **Nels Ehinger '52** (Drat these young fellers!). A gala reception for former officers and governors of the Club, on Wednesday, March 4, following George Champion's talk, at which you can ward off the cold while meeting the men who built up the surplus that allows us to have the best club in town at less than wholesale prices. An exhibition of paintings, to be hung all over the place by the Downtown Galleries, at an early date still to be determined by Activities Chairman **Dek Davidson '52** (Drat these young fellers!).

The squash teams, under captain **Howie Sargeant '32,** continue to win in the Metropolitan Squash Racquets League, and the bridge team, comprised of twelve co-eds from good old U. of Peru and playing captain **Perry Davis '54,** continues to win in the College Clubs Bridge League. I think.

Of this I am sure: The bar is open daily, except Sundays.

Washington

Secretary, BRADFORD D. COLE '43
1706 Myrtle Rd., Forest Grove Park
Silver Spring, Md.

On the day after Christmas the local alumni held their annual luncheon for undergraduates. Nearly one hundred were in attendance to hear Judge **Clarence Opper '18,** recently elected President of the Alumni Council, discuss the operation of the council and its relationship to the College as well as to the various alumni groups. Of course, the undergrads had a turn, with Bob Weston Jr. '59 and Tom Goodridge '61, giving excellent talks about current happenings at the College.

At this meeting, **Will Fitch '17,** was nominated as representative of this area on the Alumni Council and was elected unanimously. Congratulations, Will, it's an honor you deserve and we know you'll serve well.

Merrimack County

Secretary, JOHN BARTO '52
95 N. Main St., Concord, N. H.

Philip D. McInnis '36 was elected president of alumni association of Merrimack County at the annual dinner meeting held in Concord, N. H., December 29. Other officers elected were **James C. Bingham '18,** vice president; **John Barto '52,** secretary-treasurer. Alan Hall '47, Earle Reingold '40, Paul Richter '20 and Guy Swenson Jr. '42 were named to the executive committee. Donald Rainie '40 was elected to the trustees of Scholarships and Vincent Dahlfred '38 was made the new member of the Interviewing Committee.

George O'Connell, Director of the College News Service, guest speaker, outlined the general developments of the college during the past year. Movies of the 1958 football season were shown to the large-sized group of alumni and prospective students.

Club Calendar

All are weekly luncheons unless otherwise listed. Dinners are marked (D).

ALBANY, Wednesday, Farnam's Restaurant
BALTIMORE (D), third Wednesday, Blackstone Apts.
CHARLOTTE, third Friday, Charlotte City Club
CHICAGO, first Wednesday, Chicago Real Estate Board, 105 W. Madison St.
CINCINNATI, Tuesday, Florentine Room, Hotel Gibson
CLEVELAND, Friday, Mid-Day Club, Union Commerce Bldg.
COLUMBUS, Friday, University Club
DALLAS, second Wednesday, Dallas Athletic Club
DAYTON, third Saturday, Van Cleve Hotel
DENVER, last Friday, University Club
DETROIT, Monday, Yeamans Restaurant, 516 Howard
FT. LAUDERDALE, third Friday, Pal's Restaurant, North Federal Highway
GRAND RAPIDS, first Monday, University Club
HARRISBURG, Friday, 12:15, Harrisburger Hotel
HARTFORD, second Thursday, Ryan's, 33 Pearl St.
HONOLULU, first Wednesday, 12:00, Christian's Hut, Ala Moana Blvd.
HOUSTON, first Tuesday, Petroleum Club, Rice Hotel
KANSAS CITY, second Tuesday, University Club
LOS ANGELES, last Thursday, The Dales, Wilshire at Alexandria, Chapman Park Hotel
LOUISVILLE, third Monday, 12:15, Old House Restaurant, 432 So. Fifth St.
MIAMI, second Tuesday, 12:15, Betty's Restaurant, 1440 Biscayne Blvd.
MILWAUKEE, Wednesday, Cudworth Post, 1756 N. Prospect Ave.
MINNEAPOLIS-ST. PAUL, Monday, Nankin Cafe, 15 So. 7th St.
NEW HAVEN, first Thursday, Hof Brau
NEW YORK CITY, daily, Dartmouth Club, 37 East 39th St.

ST. PETERSBURG, third Friday, 12:00, St. Petersburg Yacht Club.
SAN FRANCISCO, Thursday, Fly Trap Restaurant, 73 Sutter St.
SCHENECTADY, middle or second Friday, Hotel VanDyck
SPOKANE, second Monday, Crescent Tea Room
TOKYO (D), third Friday, Phone Yokosuka 4313
TRENTON (D), third Friday
UTICA, first Tuesday, Fort Schuyler Club
WASHINGTON, D. C., Thursday, 12:15, Touchdown Club, 1414 Eye St., N.W.
WATERBURY, Tuesday, Hotel Elton
WILMINGTON, Hunter Tack Room, Delaware Trust Bldg.

Trenton Ivy League Club

The Ivy League Club of Trenton has scheduled its fifth annual dinner for the evening of February 19 at the Washington Crossing Inn, Washington Crossing, Penna. The event is open to all Ivy alumni in central New Jersey and Bucks County, Penna.

A feature of the evening's program will be the presentation of the club's fourth annual silver tray award to the captain of the team winning the Ivy League Football Championship. Dartmouth's 1958 leader, Alvin Krutch, will be present to receive his award.

Dr. John L. Kennedy of the Psychology Department at Princeton will be this year's speaker.

Dartmouth alumni on the planning committee include **Richard J. S. Barlow Jr. '48** and **Kester Pierson '53.**

Central New York

Secretary, RUSSELL C. CARLSON '48
Onondaga County Savings Bank
101 S. Salina St., Syracuse, N. Y.

The big event of the year for the Dartmouth Club of Central New York took place on Saturday, December 27, when more than thirty local undergraduates were honored at its annual Christmas luncheon. **Joseph S. Caldwell III '51** hosted the event in his first official act as newly-elected President of the Dartmouth Club of Central New York.

The party was a smashing success with more than 150 alumni, undergraduates and fathers, and friends of Dartmouth jamming the Onondaga Golf & Country Club in Fayetteville, N. Y. A new aspect of this year's get-together was a singularly professional performance by the "Dartmouth Dixies," a jazz combo made up of undergrads and alumni. Credit for the organizing of the group and giving it leadership goes to Charles P. Darrow '60 and John B. Folmer '59.

With the Big Green having gone all the way to their first Ivy League championship in twenty years much of our program centered on football. Naturally, we were particularly proud of the trio of varsity players representing Central New York this year; halfback Bill "Moose" Morton '59 of Syracuse and ends Seth Strickland '60 of Oneida and Roger Hanlon '60 of Skaneateles. Each performed admirably on the gridiron all year but the high point for them and us was Princeton. As the result of touchdowns and a two-point conversion by Strickland and Morton plus the fine defensive play by Hanlon we think of the final score as Central New York 14 — Princeton 12.

Speakers included **Powell W. Holbein '40** who gave an excellent account of the club's enrollment activity and admissions procedure directed principally to the secondary school students in our audience. Roger Hanlon '60 spoke on the football season and optimistically viewed 1959 prospects. Carter Strickland Jr. '62 gave the audience a freshman's impression of Hanover and also discussed the College's freshman football team on which he distinguished himself as the club's first string center. The College's new film, "1958 Football Highlights," was premiered in Syracuse and concluded Central New York's greatest Dartmouth Day in '58.

Other area alumni involved in organizing this event were: James P. Scott '40 and Frank K. Welch '31 — co-chairmen; Russell C. Carlson '48, Powell W. Holbein '40 and John C. Durkin Jr. '58 — attendance; John Martino '51 — hospitality; Charles E. Smith '41 — treasurer; Robert C. Hosmer '32 — chairman of the local interviewing committee; Norman L. Simpson '44 and John Y. Andrews '29 — facilities and decorations.

NEWS FROM THE CLASSES

'89

Secretary, Treasurer and Bequest Chairman, RALPH S. BARTLETT
108 Mt. Vernon St., Boston 8, Mass.

The beautiful old town of Harwichport on Cape Cod, where '89's late member, **Ralph Waldo Doane** lived, has been the home of the Doane family for generations. The Doane homestead there is now occupied by his daughter, Silvia Gladys Doane, the only surviving near relative. Since her father's death two years ago she has been collecting and carefully preserving all records of interest pertaining to the Doane family, the old homestead and the town of Harwichport. Certain records she has given to the town's Historical Society, other records to the Pilgrim Congregational Church, of which her grandfather, Capt. Abiathar Doane, was a founder. To this scribe, Miss Doane has given much information regarding this old Cape Cod family, some of which it is hoped will be of interest to readers of '89's Class Notes.

Capt. Doane, father of Ralph Waldo Doane, was born in Harwichport in 1820. He was the youngest son of Nathaniel and Mary (Paine) Doane, and one of their nine children, Nathaniel Doane, was a direct descendant of Deacon John Doane, who lived and died in Eastham in 1686 at age of 96. Capt. Doane was a highly esteemed sea captain following the seafaring life of his forebears, for which Cape Cod long ago became famous. After attending the town public schools he went to sea. The year he attained his majority he became master in full command of a vessel sailing to South America. He afterwards commanded vessels in which he owned a part interest, and for 25 years continued in foreign voyages without accident — never calling upon an underwriter for a dollar's damage. In the Civil War he was assigned to many important commissions entrusted to him. He had charge of transporting in his schooner J. W. Allen, towed by the steamship Fulton, the Swamp Angel from New York to Fort Sumter, S. C. — a determining factor in the war. The Swamp Angel was an eight-inch, 200 pound Parrott rifle gun, mounted by the federal troops in a morass on Morris Island, Charleston Harbor. In 1863 the city of Charleston, five and a half miles distant, was shelled, the gun bursting at the 36th shot. After the war the gun was sold as old metal and conveyed to Trenton, N. J., but having been identified, it was set up on a granite pedestal at Perry and Clinton Streets in that city.

In later life Capt. Doane carried on his cranberry culture, introducing new methods, and the "Early Black," which became his specialty of cultivation, resulted in his being ranked among leading cranberry growers of his day. Interested in Masonic affairs, for twelve years he was Worshipful Master of the Sylvester Baxter Royal Arch Chapter of Masons. He was elected to the Massachusetts Legislature in 1866-67 and had a lifelong interest in town affairs; was a member as well as founder of the Pilgrim Congregational Church, where his name still appears on the pew which was used by his family — and in those days purchased. Furthermore he saw to it that members of his family held various offices in the Church. On one of his European voyages he acquired in Belgium the bell which still hangs in the Church Tower and tolls to call parishioners to worship.

In 1847 he purchased land on Doane Road diagonally across from his boyhood home, and, as he reared his family, he added to the original Cape Cod house so that now it is a two-and-one-half story sea captain's home of 14 rooms, connected at right angles with woodshed, carriage shed and barn, and a two-car garage, which sort of encloses a heartshaped driveway. The house is painted white and still affords an unobstructed view of adjacent fields and meadows. One used to be able to see schooners at anchor from the south side of the house. The orchards have gone with the years, but there are two grapevines he brought from Marseilles, France, which still yield grapes. Capt. Doane was a great student of the Bible and of Shakespeare. He often quoted freely from each in his conversation.

The mother of Ralph Waldo Doane, whose maiden name was Josephine Higgins, was born in Brookline, Mass., August 9, 1839, the daughter of Paul and Silvia (Snow) Higgins. She was a descendant of Elder Brewster and Nicholas Snow of the Mayflower, and of Governors Prence and Hinckley of the Plymouth Colony. Highly educated in music, Ralph Waldo Emerson, for whom her son was named, introduced her into Concord and Lexington circles. Jenny Lind, the Swedish nightingale, sang in the drawing room of an uncle in Boston — the musical director at Tremont Temple. Throughout her lifetime Ralph Waldo Doane's mother was a student of the classics, religion and various kindred subjects. Such was the background of Ralph Waldo Doane of the Class of 1889 at Dartmouth.

'94

Secretary, REV. CHARLES C. MERRILL
74 Kirkland St.
Cambridge 38, Mass.

Treasurer, WILLIAM M. AMES
60 Maple St., Somersworth, N. H.

Bequest Chairman, PHILIP S. MARDEN

For the most important event in current '94 history members of the class will turn to the obituary section of this MAGAZINE. In next month's column further reference will be made to our loss in the passing of **"B.Smalley"** (as he liked to call himself). Thank you again, **Phil Marden,** for your incalculable cooperation in the work of this secretary.

Mrs. Billy Mann, as long as her husband lived (he died in 1930 after a perfect record of attendance at class Reunions) was right alongside him in class devotion; since then she has been constantly with us, her last appearance being at the fall Round-up of 1958. Her death took place at St. Petersburg, Fla., which of late years has been her winter quarters. The funeral was at Woodstock, Vt., on January 2, at which **Arthur** and **Ann Stone** expected to represent the class. She leaves three Dartmouth sons, to all of whom was given her maiden name as their middle name: William Dewey '22, Richard Dewey '26, Thomas Dewey '33.

Since 1926 **Eddie Grover** has been blessed in his home by the presence of his sister Eulalie who at the age of 85 died on Christmas Day. Miss Grover was the author of 27 books, the last five of which are still in print after 20 to 40 years of publication. Her last book, "Benjamin Franklin, The Story of Poor Richard," was published just before her 80th birthday. Her books have sold more than 4,000,000 copies. As a friend remarks, "For a woman to capture the spirit of childhood as she did, and never a mother, is unbelievable."

Extracts from letters read at the fall Round-Up:

Mrs. Bud Lyon: "We had a wonderful summer with ten grandchildren and great-grandchildren here to break up the monotony. Seven at one time! The countryside is beginning to glow with autumn color and nearly every day someone drops in on their way somewhere else, on a foliage tour."

Mrs. Curly Bartlett: "I am sure it will be a gala occasion and I wish I could be with you — but on that date my sister and I shall be in the State of Utah to visit Bryce Canyon, Zion Nat'l Park & then on to the Grand Canyon and all 'way stations' (as Rolla would say) meaning other points of grandeur and interest incident to the trip."

Mrs. Irving Read: "I hope you will have a goodly crowd and have a wonderful time."

Mrs. Gene Grow: "Warmest greetings to you, and the Boys and Girls of '94. Eugene could seldom join you, and only once was I privileged to meet the class. That year Mr. and Mrs. Stone gave a delightful garden party, which I shall never forget."

Mrs. Henry Hurd: "It would be very pleasant to again greet the old friends, but I will have to forego the pleasure this time."

Mrs. Aubrey Lewis (from South Carolina): "We have been watching the path of Helene anxiously for twenty-four hours. Last night it seemed we would get dangerous winds and rain. It is still cloudy and humid, but I believe we are out of danger. I hope she goes out to sea.... Frances and family have moved to Raleigh.... The two youngest girls spent two weeks with me this summer. The teenagers are too much for me."

Mrs. Harry Amey: ... "As for me, I could not be better.... I am still busy with my fancy work. It takes up a lot of spare time and lonely hours."

Sixty-Fifth Notes: Arthur Stone is our "frater in urbe" that is, he is the member of the committee who handles local arrangements. Alfred F. Bremble Jr. ("Ted") '56, assistant to the Secretary of the College, is our liasion man with the College, and will see to it that we have good beds to sleep on and plenty to eat!

'97 Memories

(See Class Notes)

(1) Dr. Bartlett lecturing in the course known as "Godology" which presented the unadulterated Fundamentalist point of view.

(2) Professor "Gabe" Campbell and his bike were a familiar sight on Hanover's roads.

(3) Well-dressed students of 60 years ago.

(4) The height of feminine fashion, which had the added value of sweeping the streets.

(5) Poddy Parker and Bun Morrill of '97 were style-setters in knickers and fancy socks.

(6) Hanover's first recorded ski jump?

'97

Secretary, Treasurer and Bequest Chairman, WILLIAM H. HAM
114 State St., Bridgeport 3, Conn.

These six snapshots taken at the College over sixty years ago give us a jog to our memories.

(1) Dr. Bartlett, who taught us by lecture in a course we called Godology, told us the earth and the firmament were created in six days, just like our days with sixty seconds to the minute, sixty minutes to the hour and 24 hours a day, and a seven-day week. Then God rested on the seventh day. The firmament as he described it included the sky, sun, moon and the stars. In his talks he was full of vigor in defending the meticulous accuracy of the Biblical account of the Creation.

He had been questioned in clerical circles about the light from some of the far-away stars reaching the earth in such a short time as six days. He was positive in his answer which was that when the Lord created the sun and the stars, He created them with the light streaming all the way.

We students took such an interest in his vigorous explanation that we not only applauded with our feet by "wooding up" but also every one stood up and gave the college yell in class. Dr. Bartlett accepted our applause as our approval and he threw back his head and laughed with us. We took the Jonah and the whale episode with some show of interest but not so explosive in our activities, only a small tapping of the feet.

I think we all felt that the fight Dr. Bartlett was waging against any questioning of the veracity of Bible was like the boy with his finger plugging the leak in the dike. In this picture the cast iron stove with its long smoke pipe shows our classroom heating system.

(2) The second picture is a snapshot of Prof. "Gabe" Campbell riding a bike in Hanover, wearing a Derby hat, a sawed-off Prince Albert coat with trousers rolled up, and a bow tie — quite a stylish get-up.

(3) The third picture shows a group of students wearing the most up-to-date style of nearly skin-tight pants, one with a formal derby, others with less formal caps.

(4) The fourth picture is a style-plus shot of two girls wearing long street-sweeping skirts, modest bustles and dashing hats. Every eye on campus turned to stare at this spectacle, and there was some whistling by the students. The girls expected this as they were showing off.

(5) The fifth picture is a style-plus pacesetter when **"Poddy" Parker** and **"Bun" Morrill** brought Scotch knickers to the campus along with decorative stockings.

(6) The sixth picture is a history-making record of the first recorded ski jump at the College. **Holt** is jumping over **Weld (Pa) Rollins** who brought seven pairs of skis to Hanover, which was the start of skiing at Dartmouth.

These snapshots record some of the memories that our classmates have of our college days.

'98

Secretary and Treasurer
CHESTER F. WILLIAMS
234 Main St., Milford, Mass.

Bequest Chairman, JAMES R. CHANDLER

I am satisfied that the space age has hit old '98. Telephones are out of commission, telegraph lines are down, the mail does not come through, and the breaking of the sound barrier has caused all of you to disregard my entreaties for news. Anyway, it allows me to save on ink and the MAGAZINE has more space to devote to others.

Fred Lord notified me of the death of **"Archie" Kendall.** See "In Memoriam."

Nothing direct from **John Eckstrom,** but through the Grapevine I learn he is well and busy, in fact, so busy that he cannot find time to write.

You asked for it. How do you like such a brief report? You can expect more of the same until each and every one of you come out of your comatose condition and furnish me with some material.

Secretary, KENNETH BEAL
Newbury Rd., Bradford, N. H.

Treasurer, EDWARD R. SKINNER
11 Park View Drive, Worcester 5, Mass.

Bequest Chairman, JOSEPH W. GANNON

"K" and May Beal want to thank all the '99ers for the many Holiday greetings received up to the hour when copy for this column had to leave for Hanover — just as 1959 was coming in at the side door, and the Rose Bowl Parade was rolling across the TV screen in the living room.

Within two weeks of your reading this column, another newsletter is planned which will be seen by all '99ers, and not merely by our MAGAZINE subscribers. For this reason most current news items will be deferred until that time. But, regretfully, we do have to report that **Eddie Skinner** has been sick at home since December 14; Sadie, however, is giving him the best of care, and wrote three weeks later that he was making real progress towards recovery.

Among the holiday greetings mentioned above are some unusual, illustrated ones that

we really must share with you. There is the 4-page card from the Jack and Eleanor **(Maurice Dickey)** Drysdales in Randolph, Vt., with all the family, including young Maurice, Isabel and Ellen, depicted at work and at play; also the annual pictorial report of Jack and Phoebe **(Dave Storrs)** Stebbins's Ann, Martha, David and John; and there's a view of the big farmhouse in Foxboro, Mass., new home of Bob and Marie **(Elmer Barstow)** Sharp; and a changed home address for Dick and Genevieve **(Louis and Genevieve Benezet)** Butterfield, now at 199 Garden St., Farmington, Conn. In business, however, Dick is still head of the West Hartford firm of Nichols and Butterfield. Last December he was elected president of the Connecticut Chapter of the American Institute of Architects. He has previously served as chairman of the national competition Committee of the A.I.A.

From Rutland, Vt., came a picture of Barbara and Howard Douglass's son Walter (grandson of **Clarence and Lena Joy**), now a freshman at Johns Hopkins; and from Grosse Pointe, Mich. a group of three boys in front of the Arthur and Lois Batten fireplace (John, Frederick, James, — 3 of the 13 grandsons of **Tom and Elisabeth Whittier**). Then two other views of genuine interest: **Montie and Martha Fuller** standing on the stone steps of their Thomaston, Conn., home; and the fine old mansion in Pembroke, Mass., as restored by **Sam Smith,** sent by his sisters, Florence and Stella.

And finally, prize of them all, a complete book of 201 mounted snapshots under the caption, "How we looked fifteen years after." This priceless oblation on the altar of the Goddess of Memory has been donated by its creator, **Paul M. Osgood.** Those days of June 20-24, 1914, will bring nostalgic thoughts to all surviving Ninety-Niners who gather on next June 12, 13, 14 for our SIXTIETH in Hanover. Paul's book will be there, and Paul himself, we hope, to identify the well-loved characters at that early reunion.

Before, or by, the end of this month (February) everybody will receive a newsletter; it will report recent important news items, and also will outline the events of our June celebration. Then by mid-March everybody will also receive his first opportunity to "Sign Up!" And a few weeks thereafter the handsome '99 Reunion Flag will fly again as it did in 1914 over the portal of Middle Massachusetts.

Treasurer, WALTER P. RANKIN
34 Carruth St., Dorchester, Mass.

Bequest Chairman, H. LEBARON SAMPSON

Paul Redington's wife, Betty, had a mishap some months ago which kept her "holed up" for quite a time. She fell on a perfectly good sidewalk and had the misfortune to break a small bone near the knee which necessitated a cast and then forced her to hobble around on crutches and cane for some weeks. Fortunately she is now back in the pink of condition and finds she can walk eight blocks at a time without discomfort. She is, and so are we all, grateful that the accident was not more serious. Betty is still living with her bachelor son, Jackie, in Waukegan, Ill., and having a very congenial and happy experience. However, she is looking forward to the day when her daughter, Mary, wife of Col. Church, returns to the states from several years spent in France where Col. Church has been on an extended tour of duty. Betty writes that the Churches may return in the spring and settle in Southern California, in which case Betty hopes to move back to California where she and Paul spent some very

Robert F. Leavens '01 on his 80th birthday was guest of honor at the annual Christmas luncheon of Dartmouth alumni in San Francisco. With him are Guy Wallick '21 (left) and Jack Slattery '38 (right).

happy years. She is quite anticipating the time when she can rent a little apartment, perhaps in La Jolla, and have her own possessions together and around her. If this plan works out Betty and most of her family (her son Edward now lives in San Diego), will be near each other after a long period of living far apart. All this would spell out a deal of comfort and happiness for her.

The Stuart **Richardsons, L.B.'s** youngest son, have adopted two fine children; a small girl of 7 and a little boy of 9. Stuart is teaching in the Brunswick, N. J., public school system.

Charles Proctor's son, John, lives in North Weymouth, Mass., and is connected in an administrative capacity with Lincoln Laboratories. The work is very much "hush-hush" as presumably it involves processes which are closely allied to national defense and are therefore top-drawer secrets. People working at the Laboratories are about as non-committal as the proverbial native Vermonter.

Everett, son of **Jim Woodman,** who has been out in India for a number of years, spent a brief vacation this last fall with his mother in Franklin, N. H. He is now back in New Delhi where he is working for the Ford Foundation.

From the publisher of the Laconia Evening Citizen comes an interesting anecdote of our robust classmate **Henry Teague.** Mr. Gallagher writes:

In 1949 I spent some time with Henry Teague developing a story for my newspaper about the Cog Railway which was then having its 80th anniversary. Henry's enthusiasm for the railway knew no bounds. He was a great promoter, and believed in bringing tourists to New Hampshire by advertising, sometimes quite original advertising. On his annual journeys to Florida he made many stops, would leave folders in hotel dining rooms, on desks and shelves.

And so that there would be no mistaking who he was, or where he came from, or the Cog Railway that he was extolling, it was not unusual for him to present a $20 tip as he entered the dining room of one of the best hotels. The ensuing excitement was something to behold. Shortly, about everybody in the room would get into the act, guests, waiters and bus boys would have the Cog Railway literature in their hands, their pockets, on their tables and trays. No one could get more mileage out of a twenty dollar bill than Col. Teague.

Arthur Wallace quite belatedly reports the birth last January of another great-grandchild, No. 13. According to the superstitious 13 is a number to avoid. We hope for Arthur's peace of mind there are no unfortunate repercussions in this case. This great-grandchild is a young lady by name of Noreen Jeanne, the daughter and sixth child of Robert and Ruth Renshaw. It may be remembered that Ruth is the daughter of our class baby, Ruth Bean.

On account of illness **Nat Emerson's** son, John, has been obliged to give up temporarily his position as Principal of Peacham Academy in Peacham, Vt. He is currently recuperating at the home of his brother Bill in California.

Mrs. Bertha Hadley, widow of **Gus Hadley,** reports that her son, Charles, who took his Ph.D. degree in physics at M.I.T., is employed by the Radio Corporation of America. He and his wife make their home in Lancaster, Pa. Charles does considerable traveling for the company as technical expert. He attends and reports on meetings held in various sections of the country. Her daughter Mary and husband, who travels for the Thatcher Glass Co. of New York, live with their three children in Bolton, Mass. Both are busy with church work, in furnishing their home, and bringing up their children.

George Tong, after spending Christmas with his daughter and grandchildren in Libertyville, Ill., took off right speedily for the sunlit, balmy clime of southern California. He is now presumably joyously relaxing in Santa Barbara.

Secretary and Treasurer
EVERETT M. STEVENS
42 Bridge St., Deep River, Conn.

Bequest Chairman, THEODORE N. WOOD

Howard Hall's son "Kim" '34 has been at Princeton for the past two years, serving as a consultant and advisor to graduate students working on rockets and guided missiles. This follows his research work in California at the Jet Propulsion Laboratory.

Bob Leavens writes he and Anne are very well, and that he is concentrating more closely than ever before on his writing every day, hoping to complete his book on Dr. Tucker before next June. It was interesting to note in a recent account of alumni activities in California, that Bob was presented as "Mr. Dartmouth," a most appropriate honor we all agree.

Recently **Gardy Cobb** slipped on some ice at his home in Strafford and broke his arm. **Gertrude and Ned Warren** have been in touch with him over the phone and they report he is coming along nicely.

Bill Sykes writes most interestingly of the changes that have taken place in Puerto Rico since he went there 54 years ago. Then there was a population of about one million people, with a $7,000,000 budget, a 40% death rate, and about 94% sickness. Most of the people were sick with malaria, hookworm and tuberculosis. Now last year the budget was $369,000,000, and the death rate had dropped to seven in a thousand (the lowest ever recorded in the world). Only 30 in a 1000 died of tuberculosis, so that the Government has closed most of the T. B. hospitals for lack of patients. Malaria and hookworm have practically disappeared. Industrially Puerto Rico is growing very fast and most every town has one or more factories in operation. Bill thinks that the greatest asset a country can have is a healthy, educated and industrious people.

Inflation: Retrospect and Prospect

By GEORGE E. LENT, VISITING PROFESSOR OF BUSINESS ECONOMICS, TUCK SCHOOL

"The real trouble with this world of ours is not that it is an unreasonable world, nor even that it is a reasonable one. The commonest kind of trouble is that it is nearly reasonable, but not quite. Life is not an illogicality; yet it is a trap for logicians. It looks just a little more mathematical and regular than it is; its exactitude is obvious, but its inexactitude is hidden; its wildness lies in wait."

— G. K. CHESTERTON

OVER the last two decades no economic event has had a greater impact on the daily lives of people than the dollar's shrinking purchasing power. (Professor Campbell discusses the psychology of inflation below). More than two-thirds of the period since 1940 has been marked by rising prices, which have more than doubled the cost of living. While prices have been stable since mid-1958, many believe this is only a temporary lull in a long-run inflationary trend.

About three-fourths of the price rise has been the inevitable accompaniment of World War II and its aftermath, including Korea. But since 1956 the price rise has taken a more subtle form of "creeping inflation," even in the face of recession. There is little agreement on the causes of this recent inflationary experience, and even less agreement on the prospects for holding the price line for the future.

Better perspective on the inflation problem can be gained by a brief review of the major contributing factors over the last two decades. We shall then examine the price prospects for the current year and the possibilities of curbing inflationary tendencies over the long run.

Inflation has been described simply as the condition of "too much money chasing too few goods." (This oversimplified explanation ignores the complexity of the inflationary process, described more fully below by Professor Segal.) In accounting for the price effects of aggregate demand on the limited supply of goods it is convenient to distinguish among "dollars" spent by: (1) individuals, (2) business and (3) government. In the current "cold-war" economy, consumers' expenditures typically account for roughly 65 per cent of total demand; government, 20 per cent; and business investment expenditures, 15 per cent. While we are interested principally in prices of consumers' goods and services, the expenditures of government and business obviously affect the prices of the limited resources available for their supply.

From the consumers' point of view the most useful measure of prices is the Consumer Price Index, compiled by the Bureau of Labor Statistics. This is a monthly average of prices of about 300 goods and services ranging from home permanents and razor blades to automobiles and kitchen sinks. The price of each item is weighted by its relative importance in a typical family budget of urban wage-earners. For example, food, liquor and tobacco account for about one-third of the weights; services, 14.4 per cent; housing, 12.7 per cent; clothing, 8.8 per cent; metal products, 10.9 per cent; and public utilities, 5.0 per cent. The index is currently related to average prices during the 1947-49 base period.

During World War II government purchases for national defense swelled to about 40 per cent of total national expenditures. Private consumption was curbed by high taxes and rigid rationing of goods, and after March 1943 price controls were imposed to curb rising prices. But by 1945 the consumer price index increased 28 per cent above its 1938-40 average. Much of the wartime inflation, of course, was not reflected in the price index but was concealed in "black-market" prices and quality deterioration.

Diversion of resources to military requirements left huge postponed civilian demands and a tremendous accumulation of liquid funds to fulfill them. While government expenditures contracted, industry expenditures for new plant capacity greatly expanded. Price and wage controls were abandoned long before goods could be made available in sufficient supply, with the result that by 1948 consumer prices rose sharply to 70 per cent above the pre-war level.

After two years of relative price stability the Korean outbreak, in mid-1950, precipitated another upsurge. By mid-1952 military demands and speculative influences raised consumer prices another 12 percentage points. This spurt was followed by four years of stable prices, when the monthly consumer price index varied no more than 1 per cent from its mid-1952 level.

The rapid business recovery from the 1953-54 recession was followed by a price upturn in the spring of 1956. Under pressure of one of the greatest investment booms in recent history, prices continued to rise for a year after business reached its peak in July 1957. Between March 1956 and July 1958, consumer prices rose 8 per cent, at an average annual rate of about 3.5 per cent. By the end of 1958 the consumer price index stood at 124 per cent of the 1947-1949 average and more than double the 1940 index of 60.

Creeping Inflation, 1956-1958

Because of its implications for the future, the price creep since March 1956 has been the source of great concern. Analysis of this price rise, through mid-1958, may therefore provide a better understanding of the course of future prices.

Since the spring of 1956, price increases were registered in virtually every category. But most notable was the persistent

rise in the price of services, which has been almost uninterrupted since the end of the war. Significant advances, averaging 17 per cent, were made in the cost of finance and insurance, largely because of higher casualty and fire losses; amusement admissions rose about 12 per cent; and hospital care about 14 per cent. On the other hand, the postwar rise in rents had slowed down to a crawl — 5 per cent; and the prices of electricity and gas rose about 5 per cent.

Rising food prices have also contributed greatly to the higher cost of living. Prices of all foods increased about 12 per cent over the period; fruits and vegetables rose 17 per cent. Since July, however, food prices have drifted lower.

Durable goods have had diverse price trends. While automobile prices rose about 10 per cent, prices of various appliances such as refrigerators declined.

The upward pressures of an expanding economy generated the wage-price spiral since early 1956. All sectors of the economy contributed: The boom in business capital investment; rising Federal as well as state and local government expenditures; expanding export markets; and, fed by liberal doses of consumer and mortgage credit, consumer expenditures for houses, automobiles and other goods and services. Price adjustments served their historic function of rationing these unusual demands among scarce resources.

Many have been puzzled by the persistence of rising prices following the business downturn in the fall of 1957. While such price lags have accompanied the early stages of other recessions, the strength of the recent rise was unusual. Government payments for unemployment insurance and other benefits sustained a high level of purchasing power, and retail sales, except for durables, actually continued to rise throughout the recession. During this time the prices of services continued to catch up with rising costs. But one of the big factors was the sharp rise in food prices, due principally to lower supplies of fruits and vegetables and meats. While prices of many goods declined, they were more than offset by price rises of other goods and services.

The Outlook for 1959

There is some apprehension that prices will turn up again with the upturn of business. While this has been the historical tendency — subject to some lag — there is little reason to expect more than modest price rises before the end of 1959, despite indications of a strong business recovery. Food prices appear to have reached their peak and are trending downward with bumper crops and increased supplies of cattle and especially hogs. While prices of some services will continue up, they have largely been adjusted to higher costs and should generally level off. Prices of many durable and semi-durable goods should reflect the considerable cost savings resulting from improved productivity — unless these savings are offset by higher wage and other costs. A critical test will be seen this summer when labor contracts in the steel industry are reopened. But barring a crisis in the cold war, consumer prices generally are expected to hold steady through 1959.

Long-run Trends

Recent price history appears to reflect a built-in inflationary bias in the economy. Whereas in an earlier era the rising prices of a boom tended to be deflated in a recession, prices now seem to be only flexible upward. Persistence of this "ratchet" effect would lead inevitably to long-run inflation.

However, economic expansion is indispensable to full employment and the wage-price spiral that characterizes the inflationary process. Although this necessary condition is usually taken for granted in current proposals for the control of inflation, it is by no means assured. Some believe that industrial capacity has substantially caught up with postwar requirements and that the economy has lost its strong upward thrust. The factors essential to an expanding economy include: A growing population and rising rate of family formation; steadily increasing research and development of new products and improved technology; preservation of business incentives through a favorable governmental climate; expanding government services; labor mobility, as well as other things. If these conditions are not favorable, the danger is rather underemployment and instability than full employment and rising prices.

In principle, long-run price stability is not incompatible with sustained economic growth. But because of uncertainty over the future, broad questions of national economic policy tend to be resolved in favor of full employment and production, rather than control of prices. Moreover, national programs, such as the farm price supports and tariffs, tend to place a floor under prices, with ceiling unlimited.

The Congressional Joint Economic Committee has been conducting an exhaustive analysis of the inflationary process and measures to control it. And the President recently established a Cabinet committee to study governmental and private policies affecting prices and economic growth. Among other measures, the President asked the Congress to amend the Employment Act of 1946 to make it clear the "Government intends to use all appropriate means to protect the buying power of the dollar."

Monetary and Fiscal Controls

As indicated above, inflationary pressures are rooted in an excess of purchasing power in the hands of the public over the availability of goods. Since the monetary and banking system plays a crucial role in expanding money demand, control of the money supply offers the most hopeful prospect for controlling an inflationary threat. This is one of the important functions of the Federal Reserve System. Through their control over member bank reserves used as a basis for business loans and investment, the federal reserve banks can restrict the expansion of bank credit. This control is accomplished through changes in legal reserve requirements and holdings of government securities, together with appropriate adjustments in bank rediscount rates.

Without firm monetary controls the task of controlling inflation would be hopeless. Yet the limitations of monetary policy have been painfully evident since the end of the war. Until 1951, the federal reserve banks subordinated their stabilization function to the support of the Treasury bond market. And since regaining independence from the Treasury their record has not been encouraging. This is partly because of the long lag between changes in the quantity of money and the time they take to become effective.

The federal reserve banks oppose the threat of inflation by restraints on the expansion of bank credit. This is generally accomplished by reducing their holdings of U. S. securities, thereby restricting member bank reserves, and by raising the rediscount rate, or the cost of member bank borrowing. Member bank reserve requirements may also be increased.

Delayed reactions, however, seriously limit the effectiveness of such "leaning against the wind." Uncertainties over business conditions delay the initiation of such moves; and it takes time to transmit these impulses throughout the system. Business generally is not responsive to small changes in interest cost and, moreover, is not entirely dependent on the commercial banking system for its capital needs. But the considerable elasticity in the *use* of money most seriously limits control over its supply. Between the end of 1954 and 1957, for example, the total amount of currency and bank

deposits increased only 3 per cent: The increased volume of business was facilitated by steadily rising velocity in its circulation, outside the control of the monetary authorities.

The long-run stabilization objectives of the Federal Reserve System also tend to be thwarted by cyclical adjustments, in meeting the demands of Treasury financing, and by concessions to political pressures. Although the System attempts to limit the growth of bank deposits to the growth needs of the economy, excessive reserves may be created in meeting emergency requirements during a recession, thereby limiting control over future expansion.

To be effective, monetary policies need to be supported by appropriate Federal fiscal policies. This entails a countercyclical budgetary policy according to which inflationary excess purchasing power would be absorbed by a budgetary surplus. This was the situation between January 1955 and June 1957, when the Federal cash surplus was about $13 billion. However, governmental budgetary policies are generally dictated by political and social considerations other than price stabilization. While Federal expenditures respond quickly to recession needs, they are less readily contracted during a business recovery. Also, higher taxes appropriate to a business boom are politically unpopular, and have yet to be enacted under peacetime inflationary conditions. Continuation of the sharp rise in Federal expenditures of recent years would appear to call for heavier Federal taxes, rather than tax reductions, if further inflation is to be averted.

Future Uncertainties

Inflation is a response of the price system to the operation of the economic "laws" of supply and demand. Unlike the physical laws of nature, these "laws" are economic tendencies whose control is limited principally by our knowledge of human behavior and predictability of the future. This large area of uncertainty has deterred the effective application of monetary and fiscal instruments of control already developed. By perfecting our knowledge of human behavior this uncertainty can be reduced, and the future can be better shaped by more rational plans and objectives, not simply awaited.

It is by no means agreed, however, that inflation is a clear and present danger, or more to be feared than its possible alternative of underemployment. Held to a creep, inflation is a small price to pay for full employment and economic growth if the risks of attaining price stability are too great. This is particularly true if real incomes continue to rise with economic growth and improved productivity. If this is the dilemma that confronts us, it is at least a happier prospect than the stagnation hypothesis that haunted the last generation, during the Great Depression.

Should We Blame the Unions?

By MARTIN SEGAL, ASSISTANT PROFESSOR OF ECONOMICS

As every beginning student of economics knows, one of the fundamental truisms of our discipline is that everything depends on everything else. And so it is also with the problem at hand. The question whether unions have been responsible for "creeping" inflation cannot be discussed meaningfully without considering some key developments in the economy of post-World War II America.

We begin with what has been the most pervasive, and is likely to be the most enduring, characteristic of the postwar economic environment — the high sensitivity of the American society to the cost of unemployment. The reasons for this sensitivity cannot occupy us here. But it is apparent that the prevailing public opinion has been that unemployment, even if affecting only six per cent of the work force, is a calamity which must not be tolerated. The community has generally accepted the view that the government is responsible for the maintenance of full employment. What is more, a significant body of public opinion has grown to believe that governmental policies can effectively combat downturns in economic activity.

As a result of this climate of public opinion, the pursuit of fiscal and monetary policies designed to maintain a full-employment level of national income has been embodied into the actual program of any administration — whether Democratic or Republican. For all practical purposes the United States has thus become a country committed to a standard of full-employment economy — or at least to a standard of economy with no more than about four per cent of the labor force unemployed.

This development has left its impact on the course of economic activity in the postwar period. For one thing the fiscal and monetary authorities felt obligated to take immediate steps which would reduce the severity of recessions. To be sure, there was considerable criticism of some of these policies, particularly during the recent downturn. But there seems no doubt that the actions of the authorities contributed to the recovery of the economy. Secondly, the apprehension that restrictive monetary policies may be overdone and may lead to some downturn undoubtedly prevented monetary authorities, in some periods at least, from pursuing more vigorous anti-inflationary policies. Finally, and most importantly perhaps, the very conviction that the government will intervene actively to bring a recovery has fostered a general feeling of optimism and confidence in the long-run prospects of the economy.

Yet, though deliberate fiscal and monetary policies, or expectation of such policies, contributed to the postwar prosperity, the main force of expansion was provided by the private sector of the economy. The initial impetus was imparted by the release of idle cash balances created in wartime. But as it continued, the expansion of the economy was reinforced by other factors — expansion of credit and increased velocity of money, inventory accumulation during the Korean war, rising demand for housing, a boom in the producer-goods industry. True, the cumulative process of spending and respending was interrupted by recessions. Yet these were only short-lived interruptions. And the very shortness of the downturns increased the optimism of businessmen and added force to the subsequent recoveries.

It is not necessary for our purpose to give a full story of the postwar prosperity, or to analyze the role of such additional expansionary factors as government spending for foreign aid and defense, or the farm price support program. What counts here is the fact that the postwar period has witnessed a vast expansion of aggregate demand for goods

and services, an expansion which produced considerable strain on the productive capacity of the nation.

During most of the years of this period the nation's resources — labor and capital — were fully utilized. At the same time there was also unsatisfied demand for consumer and capital goods. What is more, this demand was reinforced by expansion of credit and increased velocity of money supply. In these circumstances some degree of inflation was virtually inevitable.

The simplified mechanics of such an inflationary trend can be described very briefly. As business firms and consumers in an already fully employed economy kept bidding for goods, they generated an upward trend in prices. Rising demand and rising prices caused many producers to accumulate inventories, hire new employees and expand output. But as these developments were taking place, workers in general, whether unionized or not, were placed in a highly advantageous bargaining position. To some employers this advantageous position of workers appeared in the form of increased turnover, grumbling in the plant, or actual difficulties in recruiting new labor. But employers in plants covered by collective bargaining saw this advantage in aggressive union demands for steep wage increases.

Expanding demand and high prices made employers highly sensitive to any interruptions in the flow of output, whether in the form of strikes, production "holdbacks" or lower productivity in the plant. In these circumstances, and particularly since cost increases could generally be more than recouped by charging higher prices, employers were willing to grant wage increases which in many cases exceeded productivity gains.

As full employment and a relatively tight labor market continued, these increases spread throughout the economy. Even employers who did not find their markets rapidly expanding or who did not previously raise prices had to follow suit to keep up with the rising wages in their communities. And since the wage increases raised their costs, they too were compelled to make upward price adjustments. Not surprisingly, in view of rising incomes, these employers found that they could generally maintain or even increase their sales at higher prices. Yet, judging from their own experience, they frequently concluded that the basic cause of the inflationary trend was an upward push of wages and a rise in labor costs.

In the absence of restrictive monetary policies, the process described above repeated itself several times during the postwar period. Compensation of employees, i.e. wages and benefits, increased in every year, rising from 1947 to 1957 by about 70 per cent. Because productivity gains offset a large part of this rise, unit labor costs increased in the same period only by about 33 per cent. And prices rose by about the same percentage. In some years the rise in prices preceded labor cost increases; in other years labor cost rises were catching up and exceeding (in percentage terms) price increases.

Thus, over a period of eleven years the result of the creeping inflation was a significant rise in prices and costs. But it is worth emphasizing that for an overwhelming majority of people, a majority which unfortunately did not include college professors, the inflationary period brought also considerable improvement in their real incomes. The reason lies, of course, in the fact that both wages and profits rose much more than prices.

II.

WHAT we sketched above abstracts from many complexities of the actual course of inflation. For one thing, not all industries experienced tight labor markets and steeply rising wages. In the garment and related industries, for example, competition of shops located in rural areas, as well as a high degree of price competition among the producers, kept prices and wages down. Secondly, even excepting the periods of recessions, not all the years of the postwar period witnessed expansion of expenditures which strained the supply of resources in the community. Thus, during the year preceding the last recession we experienced hardly any expansion of real output, and the rising price level was, partly at least, caused by postponed catching up of prices of shelter and services.

Yet even this oversimplified sketch indicates that collective bargaining cannot be singled out as the chief culprit in the inflationary trend. To be sure, union-negotiated wage increases generally exceeded productivity gains and raised labor costs. But this must not be interpreted as being mainly the result of the bargaining power of unions. With a continuous flow of expenditures reflecting demand which could not be satisfied by the productive capacity of the economy, one must expect that costs will rise, whether there are any unions or not. And one must especially expect such cost increases if businessmen and the public believe that both demand for goods and future incomes will continue to rise, and that fiscal and monetary policies will "bail" the economy out of any serious recession. In such circumstances the buying public will not offer much resistance to higher prices. Furthermore, businessmen competing for labor in tight-supply markets will not hesitate to grant wage increases which raise costs and lead to further price increases.

Unquestionably, then, much of the postwar wage rise must be viewed as a product rather than a cause of inflationary pressures. What to many businessmen, and some editorial writers, appeared as the constant wage push of collective bargaining was in a large measure a reflection of the pull of the community's demands for goods and services. But this is certainly not the whole story of the upward trend of prices and wages. In a complex economy one is more likely to encounter interactions rather than one-way causal relationships. The unions must not be singled out for special blame. But, considering their numerical strength and heavy concentration in manufacturing, construction and transportation, it would be surprising if they were merely a passive agent in the mechanics of creeping inflation. And indeed, there are good reasons to believe that, given the highly favorable economic environment of the postwar period, collective bargaining has been a contributing factor to the inflationary trend.

(a) Under conditions of slowly rising prices collective bargaining speeds up the adjustment of wages to the rising price level. Perhaps this would not have happened if inflation had been very drastic and current wages would quickly lose their purchasing power. Under such conditions, union contracts setting wage terms for a fixed period of time might actually slow down the adjustment. But this has not been the situation in this country. When prices rise slowly, unorganized workers are not likely to be as alert to the phenomenon as professional union officials whose reputation and position depend partly on their ability to make gains for the members. Accordingly, collective bargaining contracts, covering four million workers, have incorporated wage escalator clauses which tie wage rates to the consumer price index; other contracts have included wage reopening clauses. Wage adjustments resulting from these arrangements usually spread to the unorganized sector as employers attempt to ward off unionization or reduce turnover in their plants.

Union officials consider it their task to protect the economic position of the members. And they would not deny that their goal is to eliminate the potential lag between wages and

prices. But though their position may have considerable merit on ethical or other grounds, the fact remains that the rapid adjustment of wages to prices contributes to the inflationary trend. On the one hand it increases the purchasing power of the public; on the other hand, it gives more stimulus to further price increases under conditions of continuing high demand.

(b) Unions will also generally behave differently from unorganized workers in periods of continuous prosperity, which is still not strong enough to exert an upward pull on prices. Over a period of years union members have become accustomed to yearly wage increases; union officials are always under some degree of pressure to "deliver." If the businessmen feel confident that prosperity will continue, either because of governmental action or for other reasons, unions can in many cases negotiate wage increases which lead to higher prices.

This is particularly likely to happen in the strongly unionized, mass-production industries — steel, aluminum, automobiles — in which price competition is very limited. Prices in such industries can be set without regard to short-run market conditions. To protect what is considered the accepted rate of return, increases in cost can be passed on to the buyers. If there are no prospects of a prolonged economic downturn, relatively little resistance will be offered to union demands. Indeed, wage changes may be used as a rationalization for upward price adjustments which exceed increase in costs resulting from new contracts.

Again we must emphasize that if prosperity continues unrestricted by monetary or fiscal measures, such wage and price changes will spread throughout both the union and non-union sectors of the economy.

(c) Collective bargaining makes its most significant contribution to the continuation of an inflationary trend during periods of economic downturn. As a rule union wages are very rigid downward. Wage rates and benefits negotiated during prosperity are not likely to be reduced during recession, unless the unionized employer is willing to risk a prolonged shutdown of operations. While this characteristic of union wages is not a new phenomenon, it has gained in importance with the widespread coverage of collective bargaining and the increased sensitivity of non-union employers to the trends of union wages. Prior to World War II virtually every downturn in the economy witnessed some drop in workers' earnings. But this has not happened during the postwar period. In fact, hourly employee compensation rose during every one of the three recessions since the end of the war.

This phenomenon must be attributed to the influence of collective bargaining. In some union establishments workers merely held on to the previously negotiated wage rates. But in many establishments they actually gained in wages, benefits or both. To some extent the wage increases were a result of multi-year contracts which prescribed yearly wage raises. In a great many cases, however, they were part of new contracts negotiated during the recession. For example, during the recent downturn an overwhelming majority of new contracts provided for a wage hike. Significantly, these wage changes spread also to the unorganized sector of the economy.

The wage increases that took place during recessions indicate, of course, the strength of American unionism. But they also reflect the essential fact that the business community has considered recession only a temporary phenomenon. It was clear, particularly during the recent downturn, that if the recession continued, strong fiscal measures would be taken to restore full employment.

The behavior of wages during the recessions has contributed to the long-run inflationary tendency of the economy. The least that wage increases in recession periods do is to limit the possibility of price reductions. To be sure, in the basic manufacturing industries, in which price competition is very limited, such reduction would never come anyway, unless public pressure increased more markedly. But wage increases — even when they only match productivity advances — give management a justification for maintaining stable prices in the face of reduced demand and production cutbacks. And as the steel firms demonstrated, wage hikes can be also used to rationalize uniform price increases in an industry which utilized less than 60 per cent of its capacity.

The impact of these various forces — business confidence in the upturn, limited price competition, union-induced wage increases — was reflected in the behavior of prices. During the 1953-54 recession prices were stable; during the recent downturn they actually went up. This experience suggests that in the present economic environment recessions cannot be counted on to reverse the upward trend of price. And since some price increases are likely to take place during expansions, every upturn in the economy will start at a higher price level than that of the previous recovery. This means, of course, at least some degree of inflation. Thus, in so far as collective bargaining contributes to price stability in recessions it constitutes also a force contributing to a long-run inflationary trend.

III.

We must conclude then that the influence of collective bargaining has been an active force in price inflation. But it is worth reemphasizing that this influence could have been exerted only through interaction with other forces which created an inflationary bias in the economy — the postwar expansion of aggregate demand, stimulated and facilitated by expansion of credit; government monetary and fiscal policies related to the maintenance of full employment; the ability of

management in the key unionized industries to disregard short-run market conditions and to pass on the cost of wage increases to the buyers. These factors provided an environment in which unions have been able to push for higher wages against relatively limited resistance of employers, and without incurring serious risk of unemployment among their members. Under such conditions, individual labor organizations — no matter how socially responsible — must be expected to try and to succeed in winning wage concessions which contribute to an inflationary trend.

Our experience with the creeping upward trend of prices has probably been too short to permit firm conclusions about future prospects of the economy. The period has been too much affected both by results of World War II and the Korean war boom to represent what may be thought of as the "wave of the future." But even so, as we examine the postwar mechanics of price- and wage-setting under conditions of high prosperity, one conclusion suggests itself strongly: If the monetary and fiscal measures keep the economy in a virtually constant state of full employment, an "administered inflation" is a possibility that must be reckoned with.

Some Consequences of Inflation Psychology

By COLIN D. CAMPBELL, ASSISTANT PROFESSOR OF ECONOMICS

A RECENT development in the American economy is the general acceptance of the belief that inflation is inevitable. Just as the long depression in the 1930's resulted in a generally pessimistic outlook and the fear that our economy would again be faced with mass unemployment, so the experience with steadily rising prices during the past two decades has led the majority of the people to believe that prices will continue to rise. From 1939 to 1958 prices in the United States have more than doubled. The experience with inflation has been an extended one, and the public seemingly has become resigned to price increases as a long-term tendency. Chairman William McChesney Martin of the Board of Governors of the Federal Reserve System has frequently expressed concern over this prevailing notion that creeping inflation is inevitable.

Some persons regard continuous inflation — even if it is gradual — as a force that may undermine the economy. Others consider gradual inflation as a necessity if unemployment is to be kept low and the growth of output is to be maintained at high levels. Probably the three most common misconceptions about continuous inflation are: (1) the tendency to exaggerate the redistribution of income from creditors to debtors and from wage earners to entrepreneurs caused by inflation; (2) the fear that continuous inflation will lead to monetary collapse and the resort to barter trade; and (3) the belief that rapid inflation results eventually in the inconvenience of having to use large quantities of currency to make small transactions — for instance, a basketful of paper money for a loaf of bread. But these claims about inflation cannot be substantiated by recent experience in China, in South Korea, and in many other countries. The very rapid inflations in China between 1937 and 1949 and in South Korea from 1945 to the present provide us with some useful experience with conditions of anticipated inflation continuing over more than a decade in each country. An analysis of events there shows that these countries did adjust to continuous and rapid inflation, but that there were many real problems in making the adjustment.

Common Misconceptions

The dangers usually attributed to inflation are based on the assumption that the rise in prices is unexpected or that persons are unable to adjust to it. It is only under such conditions that debtors gain in comparison with creditors, and entrepreneurs in comparison with wage-earners. If inflation is expected and persons are able to adjust to it, the incomes of wage-earners, owners of rental property, and creditors usually lag only a little behind the rise in prices, and entrepreneurs, stockholders and debtors do not receive unexpected gains.

When inflation is expected, financial institutions and persons who lend money typically protect themselves by charging higher rates of interest. If prices are expected to rise 3 per cent per year, for example, a 6 per cent interest rate on a money loan is equivalent to a 3 per cent rate when prices are stable. During South Korea's rapid inflation that started in 1945, unregulated interest rates have been as high as 20 per cent per month; and Korean borrowers have been willing to pay such high rates because they expect that inflation will enable them to do so. In the United States interest rates of all types have risen since World War II. The maximum rate of interest that commercial banks are allowed to pay on savings accounts was raised from 2½ to 3 per cent in January 1957. While some series of United States Savings Bonds yielded only 2½ per cent during World War II, all series now yield 3¼ per cent. An important reason for this rise has been the heavy demand for loanable funds, but anticipated inflation is also involved.

A common method used by wage-earners to protect themselves against inflation is to include in the wage contract a provision that wage rates vary automatically with the government's cost-of-living index. Because it takes some time to gather statistical data on the cost of living, workers will usually still lose a little, but the loss may be small. In Nationalist China between 1937 and 1949 the annual rise in prices was for some years as much as 200 per cent, and wages of all government employees were adjusted *daily* to a cost-of-living index. In the United States many labor unions have recently included escalator wage clauses in collective bargaining contracts. Under such clauses, wage rates are increased when the monthly consumer price index rises. In 1952, 3½ million out of 15 million union members were covered by contracts of this type. The number of persons under such contracts declined between 1952 and 1955 when prices in general were stable, but it has increased again during the past few years.

These attempts by individuals to protect themselves from the effects of inflation tend to eliminate the stimulating effect of slowly rising prices on economic output and growth. When costs lag behind prices, rising prices will raise profit margins, giving enterprises both (1) a bigger incentive to raise output and to add to capital and (2) the means to finance the capital

needed. When interest and wage costs do not lag, gradual inflation no longer has these stimulating effects.

A common error is the belief that continuous inflation eventually develops into a flight from money with inevitable monetary collapse. American economic advisers were shocked by the rapidity of inflation in South Korea following World War II and usually predicted such a breakdown. Despite these fears, the monetary system in South Korea has not yet collapsed, and there has been a remarkably small increase in barter trade. In South Korea and in many other countries in which the public has expected inflation, people have used their depreciating money rather than trade by barter because of barter's extreme cumbersomeness. The reason for the use of barter during the German inflation after World War II was that price controls that suppressed inflation made barter an effective — although illegal — way of evading price controls. During the South Korean and Chinese inflations inducements to use barter as a method of evading general controls over prices did not exist because there were few effective controls of this type. In the United States today there is little danger of a breakdown in the monetary system. The disadvantages of barter would far outweigh the disadvantages of using a gradually depreciating medium of exchange.

In countries in which rapid inflation is anticipated, the velocity of money (the number of times each dollar, pound, or franc is spent per year) is usually very rapid. The normal pattern is for velocity to *increase sharply* when the public first begins to expect continuous inflation and then to *continue* at a high level. In the United States during the past decade there has been a significant increase in the velocity of money even though no sudden rise in velocity has occurred. From 1948 to 1958 the annual rate of turnover of demand deposits rose over 80 per cent in New York City banks and approximately 40 per cent in other cities. Also, the ratio of the national income to the total volume of currency plus demand and time deposits — income velocity — has risen, even though for many decades prior to World War II the long-run trend of this ratio was downward.

Another common error is the belief that continuous inflation results in an excessive bulkiness of the money supply. During the Chinese inflation, reports of the use of wheelbarrows for carrying money were common. Although the use of the old small-denomination bills would be cumbersome as inflation progresses, in Nationalist China the use of such bills was usually unnecessary because the government continuously issued notes in larger denominations. As prices rose, the public exchanged the old small-denomination bills for the new larger-denomination bills. In South Korea, although the quantity of money increased almost 130 times from 1945 to 1952, the number of paper notes in circulation only tripled.

Some Problems of Adjusting to Inflation

There are disadvantages to the economy as a whole, to businesses, and to individuals caused by conditions of continuous inflation. Not all these disadvantages are found in an inflation as slow as is expected in the United States.

In countries in which the public anticipates rapid inflation, people usually hoard goods, coins, and foreign currency. When money does not keep its real value, these assets may become preferable to money as a source of protection in time of emergency. Hoarding of commodities has the disadvantage of causing such goods to be held in reserves instead of being used in production. Also, in the Chinese inflation, production costs were often increased by careless buying because it was the normal practice of businessmen when they sold something and acquired currency to rush out to lay in more stock. When a loan was repaid unexpectedly, even a bank would purchase commodities to avoid holding an excessive amount of currency. In countries in which no more than a gradual rise in prices is expected, the unavoidable risks and storage costs of hoarding commodities would undoubtedly be greater than the loss in the real value of money, and little, if any, hoarding would occur. It is hard to find goods that offer perfect protection because prices of hoarded goods do not always fluctuate exactly as prices in general. During 1956-57, for example, when prices in general in the United States were rising, prices of many metals — which are frequently used as hoarded commodities — declined, and hoarding of metals would have offered less protection than money.

Although persons and business firms can to a certain extent adjust to conditions of expected inflation, the widespread belief that inflation is inevitable creates several sources of instability in the economy. Particularly disturbing results occur when the rate of inflation turns out to be *less* than expected. Because the Federal Reserve System and the Federal government cannot control the rate of inflation precisely, the danger of a lower rate of inflation than expected is always present. Under such conditions a sharp decline in stock prices or farm land values could occur if investors who bid up prices to high levels based on anticipated inflation are disappointed. A stock market crash contributed to the severity of business depressions in 1884, 1893, 1907 and 1929, and the stock market is today a large enough influence in our economy to be of considerable concern. The effect is not only psychological, but the fall in stock values may have a generally depressing effect on spending. A sharp decline in farm land values would also aggravate a general business contraction by creating problems in agriculture.

Then too, if inflation is less than expected, persons and business firms that have incurred debts at high rates of interest discounting inflation will find the debts more burdensome than expected, and some of them may be forced to default. Some business firms miscalculate their ability to meet debt commitments even when prices are stable. But the risks due to a lower rate of inflation than expected are an additional source of uncertainty, and a slowing up of the rate of inflation would probably affect a large number of debtors simultaneously. The increased uncertainty would also probably discourage capital investment financed with borrowed funds.

An example of extreme instability caused by changes in the rate of inflation occurred in Communist China following the defeat of the Nationalists in 1949. Although such disastrous effects would not occur with gradual inflation, this illustration helps to show the risks to lenders and borrowers created by changes in the rapidity of inflation. Between 1937 and 1949, the Chinese Communists, the Japanese in China, and the Chinese Nationalists financed their government operations primarily by printing money. The Communists had thus learned from experience, and partly by recalling their own propaganda about the Nationalists and the Japanese, that price stability required limiting the quantity of money. They were unaware of the difficulty of administering a smooth transition from an economy adjusted to continuous inflation to one based on price stability. In 1949 the Communists twice tried unsuccessfully to stop increasing the money supply. Both attempts stabilized prices for a short time, but then were followed by explosive inflations as soon as the populace realized that the money supply was again expanding rapidly. Communist statisticians estimated that in 1949 prices rose more than 7,000 per cent. These attempts at stabilization were more upsetting to the business community than the steady depreciation to which the Chinese had become accustomed during the previous decade. Lenders lost heavily when

they lent money at low rates assuming erroneously that prices were going to be stabilized. Borrowers were ruined when they borrowed money at high rates assuming erroneously that prices were going to rise rapidly. The monetary policies of the Communist government during its first year in control of mainland China wiped out so many lenders, bankrupted so many businesses, and resulted in such extreme uncertainty that they were a major factor in breaking the power of the business groups.

If the rate of inflation is very rapid, business accounts must be adjusted in some manner. A device used by the Chinese Communists was to require all businesses to keep their accounts in terms of units of corn flour. Their newspapers published the current price of corn flour, and all wages, debts, taxes, and other costs were then paid in Communist currency at a price determined by multiplying the cost in units of corn flour by the current price of corn flour. Even gradual inflation has significant implications for certain established accounting practices and tax policies in the United States — particularly the carrying of assets at their historical cost rather than at current replacement cost and reckoning depreciation on this basis. Present policies based on assets valued at historical cost may result in exaggerated profits and larger corporate income taxes than would otherwise occur.

Anticipated inflation usually means that individuals must find suitable "hedges against inflation." Activity in the stock markets of the large Chinese cities expanded rapidly between 1937 and 1949, even though the precarious political condition of the Nationalist Chinese government was well understood by the Chinese public, and it was known that the Chinese Communists would expropriate private corporations if they took over. During much of this period, prices of corporation stock in China rose as fast as prices in general. In the United States stock prices, as measured by Standard and Poor's index of 500 common stocks, increased more than three times between 1949 and 1958. Part of this increase reflects a substantial rise in corporate dividends and earnings, but since the average dividend-price ratios of these stocks have fallen from 7 per cent to less than 4 per cent, increased earnings do not account for all of the rise. Even though the Federal Reserve System has raised margin requirements, which are now 90 per cent, these moves have not had any apparent effect on the level of stock prices. Although the demands of political leaders to have a Congressional investigation frequently imply manipulation of some kind, increases in stock prices relative to bond prices have probably been the natural result of the search for protection against inflation.

Between 1948 and 1958 prices of farm land in the United States have doubled even though net farm income declined over 30 per cent from its peak in 1948 to the present. Although such a divergence between current farm income and farm land values is frequently described as "puzzling," a sharp rise in farm land values is what one would expect from the development of a public consciousness of rising prices. There are many reasons for the rise in farm land values including the growing demand for farm land for non-agricultural uses and the trend to enlarge farms, but the desire for an inflation hedge is also one of them.

Another problem created by gradual inflation is the insecurity of the small saver. Similar problems are created for persons with large savings, but such persons are more able to take risks because of the size of their savings. Our financial institutions — insurance companies, savings banks, and the debt policy of the U. S. Treasury — are based almost completely on the assumption that the normal situation is price stability. Under present conditions the small saver is provided a choice between corporation stocks and fixed money claims in the form of insurance policies, savings deposits, and various types of bonds. If he selects the former — including most mutual funds — he runs the risk of receiving no dividends and having to sell his shares for practically nothing if his choice turns out badly or if there is a serious depression. On the other hand, if he selects an insurance policy, savings deposit, or bonds, he runs the risk of having the real value of his savings decline through gradual inflation even though he is assured a fixed rate of return.

There is probably a need in our economy for an insurance policy, bond, or savings deposit which would be repayable in a variable number of dollars, but in a constant amount of purchasing power. For example, if the price level doubles during the life of the bond, insurance policy, or savings deposit, the owner would get back twice the number of dollars he originally loaned or contracted for. The interest payments on such a bond or savings deposit might also vary with the price level, but because of the greater security provided, the rate of return would probably be considerably less than currently available. Although the Prudential Insurance Company of America has attempted to sell "variable annuities," there are many restrictions in both federal and state laws impeding their efforts, and other insurance companies and the New York Stock Exchange actively support the legal restrictions against the sale of such annuities. The U. S. Government also has done nothing to provide savers with a constant-purchasing-power Government bond, although such bonds have recently been issued and sold in France and Finland. Under present conditions, many small savers in the United States have no way of protecting themselves against insecurity. In periods of depression this loss of individual security would probably be destabilizing.

About the Authors

PROFESSOR CAMPBELL (Harvard '38, Ph.D. Chicago '50) was with the Central Intelligence Agency, 1952-54, and was an economist with the Federal Reserve System, 1954-56, before coming to Dartmouth. He has made special studies of inflation in China and South Korea.

PROFESSOR LENT (R.P.I. '34, Ph.D. Columbia '47) is Director of Research at Dartmouth's Tuck School of Business Administration, as well as Visiting Professor of Business Economics. He formerly was on the tax advisory staff of the Treasury Department in Washington, and also served in the comptroller's office of the Department of Defense.

PROFESSOR SEGAL (Queens '48, Ph.D. Harvard '53) has taught at Harvard, Columbia and Williams and has been consultant to the Senate Sub-Committee on Anti-Trust and Monopoly. He was formerly full-time and is now part-time staff economist with the New York Metropolitan Region Study. His book on the New York labor market is to be published by the Harvard University Press this spring.

December their younger son and his wife spent a couple of weeks with them.

Last fall **Jim Huntington** had some fine publicity for the "Haunted Huntington House" in Hadley. The Associated Press sent out an illustrated story which appeared in over 400 papers. Jim is still wearing a beard so to quote him "one might almost say that my beard swept the country."

Just before I left home I received the sad news of the death of **Bob Estabrook** in a Plymouth, Mass., hospital. The service was held on Tuesday, December 30, at the Church of Our Savior in Brookline, Mass.

Camp Hill, Penn.

Treasurer, HAROLD M. HESS
4A Rivermere Apts., Bronxville 8, N. Y.

Bequest Chairman, EDWARD H. KENERSON

It's a couple of days to closing date and no start on class notes. May be it's the holiday season, but that would be stretching it — might as well admit that Mañana has caught up with me.

First I want to thank those who sent along Xmas greetings. They were encouraging and I hope more will come each month as the year advances. When one is of our vintage we need a "shot" regularly, so says my medical advisor.

Spent a couple of evenings recently reading old news clippings from Boston and Manchester papers — the burning of Old Dartmouth — Dedication of Harvard Stadium — Commencements and other items, sent along by **Frank Perham** to be included in class archives. Frank is as trusting as your "sec" was when he accepted this job. When **Kid Cohen** told your "sec" of his appointment and to arrange to have the class records transferred to him he had visions of a mass of records-clippings-photos-copies of early ALUMNI MAGS, etc. He has always enjoyed digging into the past and he at once began to think of the fun playing with such material. Where would he put it — was there room in his den, something would have to give — would it come by freight, truck or express and when? And then one day they arrived by mail, regular delivery, and in a box, 2-lb. Page & Shaw (1903) size with room for paper stuffing to keep from swashing around.

Perham has started something to think about. Said he thought the clippings might be of interest to the class and others and might be destroyed in case of a move or other eventuality. If others have similar thoughts why not attempt even at this late date to build up a class memorabilia? Your "sec" will gladly act as custodian. He has already begun a collection of all the material and letters which he has received since he has been on the job.

Those who may be near Carmel, Calif., during March will find it of interest to look up the local Artists Guild and view there an exhibition by E. Cashion MacLennan, wife of our **Billy MacLennan.** It will include oils-water colors and lithographs. Mrs. MacLennan's (Eunice) work entitles her to be listed in Who's Who in Art and in Who's Who of American Women.

The **Horace Kidger's** winter address is P.O. Box 23, Anna Maria, Fla.

Chester Hadley, 26 Dunklee St., Concord, N. H., turned octogenarian, Sept. 29, 1958, writes of the happiness which he and his wife share in their two sons and two daughters and eight grandchildren. Hadley is another of Mrs. Clancy's gang. All are good correspondents and loyal classmates. Many of the alumni and all undergraduates have missed much in not having experienced the interest and almost parental care which others like Mrs. Clancy took in their boarders, sometimes straight to the point but always kindly. Bill McCarter in Hanover Scene recently paid tribute to Mrs. Smalley. There is seldom a man of the "eating club" era who does not recall with respect mingled with jocularity the club where he dined at $3.50 plus. Mrs. Smalley, Mrs. Clancy, Sally (Prex) Smith, Miss McMurphy and many others come to mind. They all contributed to creating the traditions and the spirit of Dartmouth.

'04

Secretary, HARRY B. JOHNSON
100 North St., Pittsfield, Mass.

Treasurer, THOMAS W. STREETER
Box 406, Morristown, N. J.

Bequest Chairman, D. SIDNEY ROLLINS

One of the most gratifying rewards of being a Class Secretary, especially of such a Class as 1904 of Dartmouth College, is to receive from classmates, and the families of classmates, who have passed on, so many fine messages of good wishes and expressions of appreciation which have come to your Secretary during the past holiday season.

To each of you he sends his sincere thanks. His most earnest wish is to keep fresh in the minds and hearts of each of you the memory of friendship we formed 59 years ago; friendships which have enriched the lives of all of us, and which have become more precious with the passing years.

On June 12-13-14, when we gather for our 55th reunion in Hanover, we hope many will be present. From hopes expressed by classmates far and wide a goodly number will show up. So, good wives, take good care of "The Boys"!!!

One of my prize letters received came from **Kid Vail** from St. Petersburg, Fla., where that gentleman, with his lovely wife, resides. He kidded me about running the mile in shorts in February, temperature zero, on the board track outside the old gymnasium. No thanks, Kid, no more running for Old Man Johnson. I wonder — does he — or any of you remember returning to Hanover after the Christmas Vacation in 1904 — when the thermometer registered 42° below zero? The Secretary remembers seeing the Kid, Dr. Jack, Squid, Jimmie Brotherhood and Don Logan going up to bed on the third floor of the Dragon House, no heat, wrapped in everything but the hall rugs. It was great to hear from you, Kid. Bask in the sun and keep well. Letters too, came from **Bernie Boyle,** the **Sandersons,** Carrie Drew and Harriet Muchemore, all from Florida. Sally and the Secretary hope to see some of them this winter.

Another letter received, came from Connie Pratt, the daughter of Don Logan. How well the Secretary remembers Don coming to Paris, Christmas time, in 1918, to tell him of the birth of little Connie. Word had just come by cable. Connie, we went to the Cafe de la Paix and drank many toasts to you and your dear mother, Marie.

Other letters came from California. **Perk** had his eye operation, and is coming along slowly. **Lester Gibson** and Ida wrote from their new home in Palo Alto. They celebrated their 50th wedding anniversary last August. **Reddy Hatch, the Hills,** Eddie, **Max Lennan,** Mrs. Favour, Mrs. Fiske and **Roscoe and Margaret Smith** all sent notes from California. Great to hear from you. Keep well! May you all be blessed with warmth and sunshine.

From south of the Mason Dixon Line came greetings from the **Fords** from North Carolina. They plan to come to Hanover in June as do the **Fletchers** from Tennessee. A note came from Mrs. Mike Dailey from Baltimore.

George Scales from Michigan writes he is grounded because of health — perhaps his Sally may drive him to Hanover.

From the far West came notes from **Bascom Brayton** from Idaho and **Child Lewis** from Montana. All these good folks, far away from New England, deeply appreciate news from the North and to know that "The Still North remembers them, The Hill Winds Know their Names."

Your Secretary must stop here because of limited space allotted. To all he wishes he might drop in and say Hello — and express his deep appreciation for the letters and cards. It's not too late to say to you again — Happy New Year and a sincere wish for your good health, comfort and cheer.

See you in June on the 12th-13th-14th at our 55th in Hanover, N. H. Take good care and you'll be there.

'05

Secretary, GEORGE W. PUTNAM
358 North Fullerton Ave.
Upper Montclair, N. J.

Treasurer, ROGER W. BROWN
Box 91, Cambridge 40, Mass.

Bequest Chairman, FREDERICK CHASE

A letter dated early in December from **Royal Parkinson** told of the pleasant visit he and Ida had had with Bertha, widow of **Bill Clough,** together with Rhoda, wife of their son Dr. Joseph Clough '31. The latter is an eye specialist in Boston.

From another source I received a clipping from the Boston Herald of a letter to the editor written by Royal. It is on the subject of compulsory union membership. He asks whether it is fair, democratic or Christian to compel employees to pay union dues against their wills or surrender their jobs. "Compulsory unionism," he writes, "is not a favor to union members. Its favor is to a union's officers and to the union treasury." After a clear and logical statement of the disadvantages of such compulsion, he concludes: "Being neither employer nor employee, I have no personal advantage in the elimination of compulsory union membership, and I don't approve of employers being a party to strengthening opposition to themselves." I'm sure many of us are in sympathy with Royal's views.

I regret to have to report that mid-December news of Royal was that he had been taken suddenly ill at his office and had had to be taken directly to the Massachusetts General Hospital. A late report from Ida gives the encouraging news that, after three weeks in the hospital, Royal was home and gaining strength. He had even taken two or three walks.

From his somewhat remote abode in New Mexico, **Shirley Cunningham** keeps an eye on our local scene. It was he who sent me that clipping from the Herald. He also forwarded me interesting notes that he had received from **Stanley Besse** and **Henry Norton,** in response to birthday cards. Further, he sent me a booklet announcing Nat Leverone's '04 book, "We Believe in Prayer," and containing Nat's own thoughtful statement. I trust Shirley will not object to my quoting his closing sentence, to which I heartily subscribe: "As the journey's end approaches, the men of '05 grow decidedly nearer and dearer to me."

Generally well and able to carry on my different activities with reasonable vigor, I mention my own three illnesses this year, none serious, only because of the rather odd coincidence that in each case they interfered with plans for some celebration: first, of my 75th birthday last February, then of Thanksgiving Day, and finally of Christmas. Mildred shared the doubtful honor of being ill at the same time these last two occasions.

An interesting note from **Chet Lawrence** gives the information that he and Jane drove to Oregon by the southern route in the fall

of '57 and arrived at Tillamook two days before Christmas. The following May 5 they left, after attending the first piano recital of their oldest granddaughter, Margaret, aged 15. Experienced drivers both, — the trip back made their seventh by car across the continent — they left Portland, Ore., at 2:30 P.M. on one Monday, and, taking turns in relieving each other at the wheel, they reached home in Woodstock, Vt., at 3:00 P.M. on the following Monday, a distance of 3496 miles.

On January 3, **Walter May** died at the Concord (N. H.) Hospital, after a few weeks' illness. Some years ago he had served as secretary and treasurer of our class and had steadfastly maintained an active interest in the class. Ruth, his wife, had died last April. The sympathy of the class goes to his daughter, Judith, and the other surviving members of his family. **Roger and Jane Brown** attended the funeral service on January 5.

'06

Secretary, EDWARD B. REDMAN
30 Harrison Ave.
New Canaan, Conn.

Treasurer, NORMAN RUSSELL
9 Pond St., Newburyport, Mass.

Bequest Chairman, HERBERT W. RAINIE

Con Chellis writes from Florida that he is a great-grandfather. It does not seem possible that a man out of college only fifty years could be so old. How many more great-grandfathers are there in the class?

The class will be interested to learn that Alma Milham is publishing a book which **Charlie** wrote when they were living in Williamsburg. The title is "Gallant Pelham, American Extraordinary." It is a biography of John Pelham of Alabama, the brilliant young commander of Jeb Stuart's Horse Artillery, who was killed in action in March, 1863 at the age of twenty-four. The publisher is Public Affairs Press, Washington, D. C., and the publication date was January 5, 1959.

Warner White is back on the mainland after having spent many years as an outlander on the island of Nantucket. He is working for North Allison and Ettinger, 52 Richmond Terrace, Staten Island, N. Y.

"Henniker in a Nutshell," a talk by **Francis Childs** at the Community Day Convention in Henniker last fall has been printed by New England College in booklet form and can be purchased at the New Hampshire League of Arts, Concord, N. H. Proceeds will be used to purchase new books for the college library.

Katharine and **Eric Kelly** are back in Marinette, Youngtown, Ariz., enjoying the warm air of that state.

Just before Christmas **Cap Pierce** sent me a copy of his 1958 Christmas Hymn, "Come, My Soul," the words and music of which he wrote.

'07

Secretary, H. RICHARDSON LANE
8 West Hill Place
Boston 14, Mass.

Treasurer, SAMUEL C. BARTLETT
25 Broad St., New York 4, N. Y.

Bequest Chairman, JOHN R. MCLANE

The death of **Joe Coburn** in Lynn, Mass., on December 24, 1958, was reported in the Boston Herald. "Cobe" had been in poor health for several years and was confined in the Veterans' Hospital in Bedford, Mass., for an extended period. It was a severe blow to him that he was unable to be present at '07's 50th reunion. Your secretary visited him shortly after the reunion and found him in an oxygen tent obviously very ill, but keenly interested in a report of the class gathering.

After an extended illness, **Harry Storrs'** wife died in Hanover shortly before Christmas. His many friends and classmates will sympathize with Harry and his sons.

Waldo Pickett suffered a stroke in early November. He was hospitalized in the Portsmouth, N. H., Hospital for a little more than two weeks. Mrs. Pickett writes that he is making progress, though, from his point of view, slow progress. She is confident that he will recover normal use of his affected limbs, in time. Classmate **Julius Dutton** was confined in the same hospital at the same time, for surgery. **Sam Hale** has also been in touch with Mrs. Pickett during Waldo's illness. Their address is Newcastle, N. H.

A note to **Walter Nesmith,** congratulating him on being the senior member of '07 in age, and inquiring about a possible relationship to a George W. Nesmith, of the Class of 1820, has brought an interesting reply. George W. is Walter's ancestor, but only one of several. A George B. was a member of 1854, a Frank Nesmith Parsons was a member of the Class of 1874, and a Chief Justice of New Hampshire; Edward was a '79 man; and our classmate is the latest representative of an illustrious Dartmouth family. The ancestor who is responsible for this interesting record was James Nesmith, who moved from Ireland to Londonderry, N. H., presumably early in the 18th century. (It might be interesting to know how many fathers of '07 sons were in college with Walter's father, Edward. — Mine was a graduate in '81. —H. R. L.)

The time has come to disclose the identity of the three classmates pictured in the November ALUMNI MAGAZINE. Few submitted their views, and none made a correct answer — until finally, a classmate reported that he had a copy of the photograph in his Memo book, was in the picture himself, and could positively identify the other two in spite of the fifty-plus years elapsed since the snapshot was taken. **Leon Sprague** writes: "I guess I am the only one who would know for I was there. George Dalrymple took the shot; L. A. Sprague, Sid George, and Deke Leighton looking over the sign." Leon wins in a walk. He is not spending the winter in Florida this year, because his wife is not well.

Sid George, recently a resident of Rye Beach, N. H., has reported a new address, perhaps temporary: Route A, Box 801, Tucson, Ariz.

Jim O'Neill is still very much on the go. He has had a six weeks' lecture trip to the West Coast this autumn. For a young man who has just enjoyed his 77th birthday — more power to him!

Dick and Lucy Lane are leaving Boston early in January and do not plan to return home until mid-April. During Dick's absence **George Grebenstein** has agreed to take over the secretarial duties, and will welcome and appreciate news about classmates from any and all sources.

'08

Notes Editor, GEORGE E. SQUIER
16 Clovelly Rd.
Wellesley Hills 81, Mass.

Secretary, LAURENCE M. SYMMES
115 Broadway, New York 6, N. Y.

Treasurer, ARTHUR B. BARNES
17 Harland Place, Norwich, Conn.

Bequest Chairman, WARREN CURRIER

A note from **Allan Perkins** states that he and Kate are spending the winter at La Jolla, Calif. Californians please take notice.

DARTMOUTH STANDS OUT

An interesting study at the close of the last college year should be a matter of great pride to Dartmouth alumni. It concerns the amount of voluntary financial support given to their alma maters by the alumni of 65 of the leading private universities of the country during the last college year. Here are the figures.

"In seven categories concerned with alumni giving Dartmouth is among the top leaders, ranking tenth in alumni trustee support, seventh in number of living donors to alumni funds, sixth in amount received from alumni bequests, fifth in alumni dollar giving (exclusive of trustee giving and of bequest and estate planning giving), fifth in grand total alumni support, third in amount received from alumni estate planning, and first in per cent effectiveness in alumni fund giving (participation)."

Remembering that 65 leading universities are compared and that Harvard, Yale and Cornell, for instance, have alumni bodies two and a half to four times the size of Dartmouth's, our dollar support from alumni is most impressive of the well-known Dartmouth spirit.

"It is, Sirs, as I have said, a small college but there are those who love it."

The next canto will come from Vero Beach where I trust more news may be available than from this corner.

Word has been received of the passing of another classmate and another cause for sorrow. **Arthur D. Weston** died at his home in Edgartown, Mass., December 19. He was a former deputy Health Commissioner for the state of Massachusetts and served on other important state commissions. Further details will appear later.

'09

Class Notes Editor, JACK CHILDS
141 Pioneer Trail, Aurora, Ohio

Secretary and Treasurer, BERTRAND C. FRENCH
Sandwich, Mass.

Bequest Chairman, LEON B. FARLEY

"It's Hanover for Mine in Fifty-nine"
Stay Alive, '09ers, and
Be with us for our Golden Anniversary
Next June 12, 13, and 14

Just after the turn of the century, before Hockey Coach Eddie Jeremiah '30 was even thought of as a candidate for the human race, hockey got its start at Dartmouth. The first squad was organized during the winter of 1904-05. The arena was on Faculty Pond. Play consisted of scrub games, something like the old game of "Shinny." Remember the expression "Shinny on your own side"?

The next winter, 1905-06, when the glorious class of '09 entered as freshmen (and we use the term advisedly), hockey became an official sport. From that time forward it took on stature. Play continued on Faculty Pond, and games depended on old Mother Nature, the avid players hoping she'd give 'em the cold shoulder. It was not until years later that a regular rink with artificial ice was provided.

'09 was active in hockey, apparently adding spark to keep the game moving along. Our sophomore team won the interclass championship series by defeating '07, 10 to 1; '08, 5 to 3, and '10, 2 to 1. On this team were **Chet Perry,** captain, **Dinny Marston, Heinie Stucklen, Al Newton, Russ Pettengill, Pod Johnson, Johnnie Lawson,** and **Fat Dillingham.** Varsity hockey, by that time, had made considerable progress. In the 1907-08 season it had a schedule lined up that included Princeton, Yale, Columbia, Harvard and M.I.T. Crick Crocker '07 was captain that season, Cleve (Moonface) Foote '08 was manager, and Larry Treadway '08 was assistant manager. The next year Foote was captain, Treadway moved to the manager spot and **Sam King** was named assistant manager.

When King took over as manager our senior year, he was probably the most conscientious manager that ever existed. He'd

A look at Dartmouth hockey in 1905-06 when it first became an official sport at the College. For the identification of the group see the 1909 class column.

get up in the small hours of the morning to flood the rink and was more solicitous of his hockey brood than a mother hen with her chicks.

With the help of **Al Newton,** who gave me the old-time shot of the first official hockey squad, and a big assist from Cully Pierce '07, who helped identify the members pictured, here are the pioneers: Front row: **Johnnie Lawson** (left), Gene Brooks '07, **Chett Brett,** Kid Richardson '08, Cleve Foote '08, **Plum Leighton,** and Bob Wallace '06, manager. Rear row: Norman Cushman '07, **Emile Erhard,** Crick Crocker '07, **Al Newton,** Charlie DeAngelis '08, **Russ Pettengill, Art Doe, Wiley Peck,** Wink Fisk '08, **Dinny Marston, Heinie Stucklen,** Cully Pierce '07, and **Chet Perry.** On the squad, also, but not in the photo, were **Pod Johnson,** Bob Blanpied '08, and Judge McLane '07.

There you are, Eddie Jeremiah. Don't say that '09, with an assist from '07, never gave you any dope on the early hockey days.

A Salute to Joe Worthen

When **Joe Worthen,** illustrious '09 president, was back to Hanover on a visit, one of the undergrads asked him if he could direct him to Crosby Hall. "I ought to be able to," answered Joe, "that's where I was born."

So Joe is a native son of Hanover. His father was the famous and admired "Tute" Worthen, Cheney professor of Mathematics, a graduate of Dartmouth in the class of '72 and a member of the Tri Kap fraternity. That's how-come Joe and his older brother, Thatcher '07, happened to join up with the same frat.

When a guy rubs elbows with various and sundry classmates during his undergraduate days, a lot of times he doesn't realize what some of his classmates are accomplishing. I'll have to confess that I didn't realize that Joe had made such a name for himself during his four years at Dartmouth, although he and I belonged to the Sphinx senior society. Joe was never one to air his triumphs. Joe was early tagged as a leader in our class, showing his executive ability as manager of freshman hockey and sophomore football, and his senior year as manager of varsity football. He was on the freshman and sophomore debating teams; both the glee and mandolin clubs; ranked second in the Class of 1866 prize speaking, and was a member of Palaeopitus. To top it all, he was a Rufus Choate scholar, a Rhodes scholar, and a member of Phi Beta Kappa.

After graduation, Joe attended Harvard Law School for a year, then the next three years he was a Rhodes scholar at Oxford University in England where he completed his law studies. He has been a practicing attorney in Boston since that time.

Take a gander at Joe's other activities and you'll wonder how much can be rolled into one guy. It's all in the record that he was president of the Dartmouth Secretaries Association; president of the Dartmouth Alumni Association of Boston; member of the Alumni Council; president of American Club of Oxford University; 25-year membership on committees for selection of Rhodes scholars in New England; member, Middlesex, Mass., and American Bar Association; chairman, Winchester (Mass.) Finance committee; chairman, Board of Selectmen; Town Moderator for six years. Then he has present hobbies of fly fishing, golf, and curling, and past hobbies of tennis, skiing, and mountain climbing.

Joe did find time to get married to his gracious wife, the former Dorothy Bullard, and he did find time to become the father of four children: Mary, Thomas '42, Joanne, and Palmer '49 who's a law partner with his old man.

As a raconteur, Joe has earned a reputation in his own right, frequently regaling listeners with droll bits of humor. One of his favorites is about the drunk who was staggering up the railroad track on all fours, his hands on the two rails. He complained, "This is a hell of a long stairway." That's the guy who leads '09 to bigger and better heights and who will address the Commencement group when '09 has its 50th reunion. Can you wait?

* * *

And here it's appropriate to quote a poem that came from **Sid Hazelton,** who was featured a few months ago in one of these profiles:

I would rather have a rosebud,
While I am here to see,
Than have the costliest flowers
On my coffin placed for me.

I would rather have a friendly smile
From hearts forever true,
Than tears shed 'round my lifeless form
When earth I've bid adieu.

I would rather have the kindliest words
That can be said to me,
Than flattered when my heart is still,
And life has ceased to be.

Then give me a rosebud now,
A rosebud pink or red;
I'd rather have just one today,
Than a million when I'm dead.

In telling about Sid's accomplishments in the field of aquatics, it was not mentioned that he was Varsity and Freshman swimming coach at Dartmouth, so I apologize, Sid, while you can still read about it.

'10

Secretary, RUSSELL D. MEREDITH
501 Cannon Pl., Troy, N. Y.

Treasurer, JESSE S. WILSON
1332 Woodbine St., Clearwater, Fla.

Bequest Chairman, HERBERT A. WOLFF

"Good until 1960". That's what the words on my new 1959 auto license mean in everyday English. And that means that that faraway goal—"Our Fiftieth in '60"—is no longer just gradually drawing nearer; it is picking up speed. Any of you **Tenners** who have been indifferent to the passing of time, and have not definitely figured on returning to Hanover at that time (a little over one year from now), grab hold of yourselves and begin to figure "from now on."

It is between Christmas and New Year's when this Tenner news is being compiled. It is a time for counting one's blessings and one which we rate very high comes to us at this period each year. It is the blessing of friends and is emphasized by the receipt from so many Tenners and their wives of Greetings and Good Wishes. We look forward to these with a great deal of pleasure of anticipation. We are truly grateful to all who help to make it easier to carry on the chores of this class officer job.

Just before the Holiday Season, an unexpected business trip took me again to Wyoming. That meant time for a few phone calls in Chicago. I was able to contact **Paul Albert, Don Bryant** and **Lew Williams** and pleased to find that all three seem to be on the ball, all right, and looking forward to Hanover "by jiminy, by '60." **Mac Kendall** had left for Florida, I was told when I called his home.

Not every Tenner has had or will have his 70th milestone publicly acknowledged and acclaimed as did **Maurice Blake.** As previously told, Maurice was elected president of the Dorchester (Mass.) Historical Society. When the regular meeting of the group was held in November, the president was given a surprise birthday party. Said the news account, "Mr. Blake, who is a direct descendant of the early Blakes who first settled in Dorchester about 1630, was pleasantly surprised and his enthusiasm belied his three score and ten years. He is today one of the tireless workers for the Historical Society and can point to a full life of activity in many fields." Maurice presented the Society with a water color painting of the 1648 Blake House.

Several of our Tenners send out Christmas letters which review the activities of themselves, their children and grandchildren. Then some use their letters to pass on to their friends, their comments on current events and trends. The letter from **Charlie Noone** is of this latter type. It contains some matter we feel should be passed along. After outlining the old, old story of the events of the "Silent Night," the author says:

> Does it not seem strange that with the rich knowledge of successive generations we cannot accept the teachings of Jesus Christ? Christ's teachings, however, are not intended to make pacifists out of us. We must not forget that the same Good Book which teaches us to work for peace, and reminds us that the Prince of Peace said, "Blessed are the peacemakers, for they shall be called the children of God," is the same book which quotes from Christ: "When the strong man, fully armed, guards his courtyard, his property is not disturbed, but if the stronger than he attacks and overcomes him, he will take away his whole armour upon which he has been depending and will divide his spoils." (Luke 11:21)

On November 4, this year, politicians with the aid of millions of dollars contributed by labor leaders, deprived citizens in five out of six states of their inalienable right to join or not to join a labor union. The freedom of choice has been taken away. Do you intend to permit labor to take over our country? Senators Kennedy and Ives, after many months of personal publicity, introduced an amendment to the Taft-Hartley Act, which proposed nothing for the employer.

Are we going to sit prostrate because we want national peace, and let Reuther, Hoffa, and many others of the same ilk, take over? Monopolistic unions are a far greater threat to American freedom than business monopolies. These unions should be made subject to the Sherman Antitrust and Monopoly laws of the United States.... Hoffa has proposed a giant union of all workers in all kinds of transportation... thus, Hoffa could paralyze the nation in an instant, which is more than Khrushchev could do.... The combination of unprincipled politicians and labor chiefs, through economic monopoly and political power, is laying groundwork for a communism more effectively than the communists themselves are doing.... We want peace, but do we want it at this price? Should we not become militant and let our state and national politicians know how we feel? We should arouse our friends and acquaintances to the danger to which our quiescent attitude is contributing. If we present a unified front we probably can bring about that peace which a strong country can maintain, and thus enjoy for ourselves and our posterity.

A letter from **Jess Wilson** and a newspaper clipping from **Ralph VanZant** brought the sad news about the deaths of two Tenners, **Hal Benjamin** and **Fred Brooks.** Fred passed away at his home in Denver. Hal suffered a heart attack while on the golf links, was rushed home and then to the hospital where he died shortly after arrival. Hal had been living for less than two months in his recently completed home in Largo, Florida. He had sold his home in Pipestone, Minn., intending to become a permanent resident of Florida. Our deep sympathy goes out to these bereaved families of two loyal Tenners.

The 1910 group in Clearwater at last report, was just about complete as a duplicate of last season. They had Christmas Eve dinner at "Old Denmark," a Madeira Beach restaurant and a really Yankee Christmas dinner cooperatively cooked and served in splendid style at the Bankart home. Present: the Bankarts, the Kendalls, the Scarletts and the Wilsons of 1910 plus the Burleighs '11 and the Englishes '12.

That retired Missionary to China, Rev. **Harold Robinson** of whom 1910 is so proud, is less than retired nowadays in and around San Mateo, Calif. In the Robinson Christmas letter-review of activities, Harold's wife, Mary, lists extracurricular activities for Harold of meetings of Northern California Council of Churches, the Peninsula Council, various meetings on Civil Rights issues, participation in a Mental Health Organization and a part in a forum in 'Frisco on "A New Foreign Policy for the U. S." These are in addition to his regular work as minister of pastoral services in the church. Well, Harold is carrying on as most Tenners do upon retirement—working harder and putting in a longer day than before retirement.

'11

Secretary, NATHANIEL G. BURLEIGH
218 West Rogers St.
Clearwater, Fla.

Treasurer, ERNEST H. GRISWOLD
Seaside Ave., Saco, Me.

Bequest Chairman, SAMUEL ARONOWITZ

Each month it is the hope of this secretary, as probably of all others, to present a blank space in the necrology section. This time the sad news is about **Aubrey Butler** and **Bill Curtis.** Bill was a stalwart Dartmouth Eleven, quiet and unassuming but always for everything that was for Dartmouth. His wife, Betty, can vouch for it in these words, "Bill's love for Dartmouth was great and undying. I appreciate your sending the word about the contribution to the Memorial Fund. I should like to continue to receive the ALUMNI MAGAZINE and I will continue giving to the Alumni Fund as Bill always did. I love Dartmouth too."

Aubrey's death only a few days after Bill's and the sixth within a period of not much over a month was about all the bad news we can take for awhile. Because the names Butler and Burleigh brought the two together in adjoining seats in many classes, a warm and lasting friendship developed. It was always a pleasure to stop off and say "Hello" whenever driving through Northampton. Many classmates did the same. He never changed, his sterling character was never marred. Many reunions and class gatherings were graced by his beautiful roses that he gave for the girls. His chair whenever 1911 meets will seem empty indeed.

If you want more testimony as to the loyal interest of 1911 wives here is a message from **Betridge Stucklen: "Carl** would have been pleased with your expression of regard for him and I appreciate deeply the fact that there is to be a contribution to the Class Memorial Fund in his memory. He would have been very gratified to be honored in that way. He loved Dartmouth and all you people and maintained an interest to the end in reading the ALUMNI MAGAZINE and following the football games, hockey and other activities. Owing to the nature of his illness we were not able to attend as many reunions as we had hoped to but always interested to know what went on, so as you suggest I should like to consider myself Carl's representative and keep up his contacts. I should feel lost without the ALUMNI MAGAZINE and would appreciate receiving it."

Clearwater is proving to be a great migratory center for our generation of Dartmouth grads. In 1910 there are the Bankarts, Kendalls, Wilsons, Scarletts and until a few days ago the Benjamins. Add to this list Jim English and Sarah of 1912 and from 1911 the **Dick Chases, Eben Holdens** and the **Burleighs.** Harold Benjamin's death was a blow to us all regardless of class but we are delighted that Vera is to stay on in the handsome new home that she and Ben had just moved into. The Holdens are at present in Delray but will be moving over shortly.

At last account **Bolivar Sherwin** was still in Fitchburg, Mass., 107 South St. But there are some other shiftings about. **T. Franklin Dudley** may be addressed at Apt. 14, 436 Leesburg Pike, Falls Church, Va. So far **Bill Maynard** and his wife have been unsuccessful in changing the French statute which forbids ejection of tenants so that they have remained in Hanover until their apartment in Paris is available to them. Upon retirement **Ted O'Leary** changed his residence to Pleasant St., Bass River, Mass.

Jim Irwin '11 with one of his backyard tomato plants that is taller than he is.

Larry Odlin says he and Dorothy have again been messing up the "O" page of their friends' address books. He got to the MOWW convention at San Juan in October where he was reelected regional commander. Until January 15 they will be headquartered at his sister's, 3214 Riverside Ave., Jacksonville, Fla. Their next move will be back to Pasadena, Calif., where they have engaged an apartment at 2475 Vista Laguna Terrace.

Both **Jim Malley** and **Dan Porter** were reelected to the New Hampshire legislature for the next two years. In the last session Jim was on the ways and means committee and Dan on the Public Health Committee. Because Jim was hospitalized for a time during the session a resolution was unanimously adopted hoping for his early return and containing such phrases as "value and rely upon his great knowledge, constructive criticism and high integrity... consistently placed the welfare of the people of New Hampshire above all other considerations."

Jim Irwin has been having a wonderful time heading up the Asheville American Field Service International Scholarship. This includes the responsibility of finding homes for the foreign students and raising funds to support them. He has already arranged for a wonderful young girl and was preparing the way for a boy. In July he looked out for 65 of these foreign students from 17 different nations, while they stopped over on a sightseeing trip. Jim adds these comforting words, "You have no idea the inspiration I get from dealing with these high school kids in working up ways to raise money, find host families and do all the odd things necessary to bring a foreign kid over here for senior year in H. S. With all these grim tales of gang warfare between teen-agers it is refreshing to work with these kids and know that they are 98% solid citizens with brains and high moral standards and abilities that (to me) put our generation to shame."

From a July edition of the Boston Herald "To be a 'self starter,' understand human nature—these are the traits needed to succeed in real estate, says **Mahlon Hill,** veteran Wellesley Hills realtor." The interview with him is then continued after these words: "Through his aggressive, skilled selling, Hill has built up a reputation for competency in the trade and among clients. He has also built up a business employing six persons; sales between 65 and 100 houses a year costing anywhere from $16,000 to $75,000, plus rentals."

Cap Hedges was Dartmouth's official representative at the inauguration of Dr. Joseph E. McCabe, Coe College's new president. There was much excitement during the ceremony when the police received word that a bomb had been secreted in the auditorium. All filed quietly out of the building while the place was searched. When it was found to be a hoax the ceremonies were resumed. Excerpts from Cap's letter tell of their moving from Eastland Acres which is ten miles distant from the city to a new ranch-type house within the city limits. The new address is 3224 Terry Drive, S.E. There is solace for the pangs of sorrow in abandoning their charming hill-top home in that it was bought by Ed Williams, a Tuck School grad and a grand guy. Coleen is fine and she and Cap are by this time again at their favorite southern hide-out spot in New Iberia, La. Cap's closing words: "With Dartmouth winning the

Ivy League championship, and Iowa, the Big Ten champs, I have had a perfect football fall."

P.S. Writing this letter must have been too much for Cap as just as the above was included in these notes a letter from Coleen said that on that same Sunday Cap had a slight stroke and the following Tuesday he was taken to the hospital where the doctor said he seemed to be improving.

Late word from the **Walter Morgans** is that they are now living at 282 Summer St., Lynnfield Center, Mass.

'12

Secretary, WYCKOFF L. GARRISON
612 Embree Crescent Ave.
Westfield, N. J.

Treasurer, FLETCHER CLARK JR.
4 Bank Building, Middleboro, Mass.

Bequest Chairman, HENRY B. VAN DYNE

Sydney A. Clark is reported to be authoring a new book (no title just yet) but it will cover all the sun and sea-washed shores from Bermuda down the Antilles to Trinidad, Surinam and Venezuela.

Our sincere sympathy is extended to **Dr. Henry R. Viets** on the recent loss of his mother, Mrs. Annie Rebecca (Tufts) Viets, 98, wife of the late Henry R. Viets of 57 Burditt Avenue, Hingham, Mass. Mrs. Viets was believed to be the town's oldest resident, remembered the Civil War clearly and was very active in the Daughters of the American Revolution in Hingham.

Art and Grace Burnham, Roy and Florence Lewis and **Quechee and Bertha French** had dinner at the Norwich Inn the evening of Dec. 8 to lay plans for our "Informal" 47th Reunion this June. **Art Burnham** is heading up the plans which are evidently well under way, more details later.

Arthur E. "Art" French phoned from Mountainside, N. J., where he and Mrs. French had stopped off, on their way to Washington, D. C., to spend a short time with their son, Charles D. (class of '42) and his family who make their home at 1217 Wyoming Ave. in Mountainside.

Frances and "Stan" Weld used the Cornell game at Ithaca this fall to visit their daughter, Barbara, and her family; they also saw the proprietor of Tree Top Lodge, **Henry Van Dyne,** and his guests from 1912 at the game. While in Minneapolis as a delegate to the American Medical Association in Dec., Stan spotted **Bill Middlebrook** in the hotel lobby there "after 46 years no see," says Stan. Needless to say he enjoyed a grand dinner with Bill and his good wife, Margaret, that evening.

Sam Hobbs reports he has retired but is busier than ever planning a National Convention and acting as Secretary-Treasurer for the first chapter of the American Concrete Institute. He is also doing some consulting engineering work. Marion and Sam now can boast of their seventh grandchild, James Charles, who is the fourth child of their son, Sam and Arlene of Alhambra, Calif. If early plans will do the trick we can count on seeing Marion and Sam at the 50th in 1962.

Heinie Urion is feeling fine and reports his arm has healed so that he can punch the typewriter again. He and Irma are taking an apartment in New York for a few weeks and planning on taking a trip to Florida this winter.

Change of address; **Horace E. Allen,** 22 Brittany Road, Longmeadow, Mass.

Dr. Royal J. Haskell, "Roy" to his classmates, died at his home in Rochester, Mass., Dec. 4 after a long illness. Roy retired Nov. 1 last year as chief of the plant industry branch, Federal Extension Service, U.S. Department of Agriculture, returning to his home in Rochester last February. During World War II he helped develop the victory garden and food production programs. He conducted many field trips for the Dept. of Agriculture including recent ones to Alaska and Hawaii. Last year he was honored with the department's Superior Service Award and was cited for outstanding contributions to the Nation's plant pathology and horticulture programs.

The Class has lost a steadfast member and the sincere sympathy of all his classmates is extended to his wife, Myrta, his son, Royal Jr., and his sister, Ethel.

Ralph Twitchell whose death was reported in the last news letter has received a warm accolade in the Town Crier, a column by Mark Beltaire, in the Detroit Free Press of Sat. Nov. 22. The lead paragraph in Beltaire's column follows:

"One of the real pillars of education in Detroit died recently in Bethel, Vt. He was Ralph Twitchell who retired last June as head of the mathematics department of Cooly High. He was one of the most colorful teachers in the Detroit system, brought a robust sense of humor to what is ordinarily considered a very dry subject. He was so well liked by his students that they gave him an Oscar not long before his retirement."

'13

Secretary, WARDE WILKINS
Box 2057, Boston 6, Mass.

Treasurer, ROBERT O. CONANT
Hanover, N. H.

Bequest Chairman, WILLIAM B. GUMBART

Barbara and Chuck Riley are at Englewood, Fla., again this winter, Sabal Lane, R.R. 1, 30 miles south of Sarasota. A dip in the Gulf every day.... **Eddie Sides** has a new address at 10474-118th Place North, Largo, Fla. They are most enthusiastic about the climate and the lack of creaking joints, arthritis or what have you and to be free of ice and snow, sleet and slippery driving on the West Coast.

Ralph and Florence Samuel were in Europe again last summer but Ralph succumbed to the Asian flu in Brussels. All three sons are married and as he says "we boast 10 grandchildren ranging from not quite three to fourteen."

Jeannette Adams from Holyoke reports that Ruth, Rocky and their two children and Dave Senior's sister, head of the Circulation Dept. in the Dartmouth Library, visited her in November.

Martha Hugus in Wheeling, West Va., has a kindergarten started in September. She was a teacher before she and Judge were married and now one of the children is a 4-year-old grandchild of a former pupil.

Harry French's son Arthur and Peg have a new daughter, making ten grandchildren. Another ten strike.

General **Harry H. Semmes** was the lecturer on November 25 in 13 Carpenter Hall on "Post Stalin Russia" presented by the Dartmouth Lecture Series. Harry has been directly concerned for several years with intelligence work on the Soviet Union. As you will remember he has served as the Vice Chairman of the National Security Committee.

The secretary following his annual Thanksgiving flight to Dallas, Texas, returned via Miami and West Palm Beach. In June **George and Hattie Davidson** urged a visit to their Flower Ranch, Route 1, Box 204, West Palm Beach, and advised **Cap and Emmy Avery** in Boynton Beach, P. O. Box 11832, I was to arrive Saturday the 29th. We all had dinner at the Davidson's Saturday night and at the Avery's Sunday. You who live in Florida and able to see your next door neighbors, sometimes they are even closer, would be interested in George and Hattie's five acres of gardens and fruit and flowering trees. They are raising, or will when finished, everything that will grow in Florida. It will be and is now a show place and they welcome visitors. You never saw such a variety of palms, flowering shrubs and trees, fruits of all varieties, some most unusual. We will not attempt a list. Perhaps we'll dare try in the News Letter.

Steve and Mary Jewett in Laconia have a third daughter, Samantha Mary born December 13; 7 lbs. 10 ozs. **T. D. and Marian Jewett** both doing well.

Earle Bidwell and Marge spent the holidays in Mexico. Bruce and Liese went down from Fort Bliss to join them at Mexico City and go on to Acapulco.

Edmund Freeman, who retires December 31, reported that **Don Gilchrist's** son was in Buck's Library in December. He went to Princeton, did graduate work at Harvard and is now at Johns Hopkins for his Ph.D. in History. He is a very personable young man and a diligent worker.

Howard Stoughton and Grace are living in a little cottage on a private estate up in Newfoundland, N. J., a little cottage elevation 1400 ft. and a magnificent view of four mountain ranges, with the use of a large swimming pool, greenhouse and 155 acres of fields and woods.

The **Wallace McCoys** sent their annual Christmas letter and report of family conditions. Since last year Wallace's mother passed away as she neared 90, on March 9. Ruth and Ronald Forrest presented them with a second son. Clark is a unit manager in Production Design, Computer Dept. for General Electric Company. On a July trip he drove from Los Angeles to Boston in a Ford Thunderbird, 10 days, via Grand Canyon and Salt Lake City.

'14

Secretary, JOHN F. CONNERS
Box 83, Candlewood Isle, Conn.

Treasurer, CHARLES S. BATCHELDER
165 Marlboro St., Wollaston 70, Mass.

Bequest Chairman, MARTIN J. REMSEN

Our two dependables, **Aborn** and **Batcheldor,** plus word from **Brown, Humphrey, Drake, Remsen, Maddalena, Larmon, Palmer, Hands, Hinman, Westcott, Sisson,** and **Knight** proved more holiday spirit than class news. It is inconceivable that we have gone so much out of character, so that we are all just sitting, but so it would seem.

A call from **Rosie Hinman** was pleasant. He reports having had all of his teeth out, and the big problem concerned his inability to whistle. I had visited our old bailiwick at New Britain and it was nice to be able to tell him that **Dick Pritchard** was now in the pink. Rosie is planning on Florida again in late January. This is the type of news that **Ducky Drake** had in mind when he suggested a check on winter migrations.

Mart and Kathleen Remsen are leaving soon after the holidays for Scottsdale, Ariz., then to California, and back to watch the Red Sox make another start.

Harold and Martha Brown report on **Lize Wheelock's** activities. Lize and Polly are at Avon Park for about six months, and as guest minister at Vero Beach, there resulted a very pleasant gathering of the clan.

Bob and Anne Noble live at the family home at Bethel, Vt. Bob has been retired for two years, and enjoys being near his two sons, one a lawyer and Vermont Commissioner of Taxes, and the other the high school principal.

And **Bino Knight** bemoans that Hanover Plain seems so far, far away.

Now back to Ducky again. How many have planned on Sno Bird? It would be fun to have a good representation at the Inn over Washington's birthday. Do come.

Change of Address: Roscoe DeWitt, 4657 Mockingbird Lane, Dallas 9, Texas; Richard

Mayovox

On a visit to the Mayo Clinic in Rochester, Minn., Dr. John P. Bowler '15 of Hanover (seated) got together with Dr. Stephen D. Mills '27 (center) and Dr. Waltman Walters '17. Dr. Bowler, a former Fellow, was president of the Mayo Foundation Alumni Association in 1933-34.

C. McAllaster, Bungalows "Bellavista," Playa Azul, Manzanillo, Col., Mexico; Howard H. Potter, 1410 West Glenn Drive, Phoenix, Ariz.

'15

Secretary, PHILIP K. MURDOCK
Apt. 7-G, 245 Ave. C
New York 9, N. Y.

Treasurer, RUSSELL J. RICE
60 Stevens Rd., Needham 92, Mass.

I feel somewhat like the harassed housewife whose voice comes over the air occasionally (in a commercial): "What'll I get for dinner!" With a scarcity of news, what'll I put in this column (written just before New Years) for reading in February!

To put us all in the right mood, here's a random quote lifted from the Rotary Club Scandal Sheet: "Pappy says an optimist is a man who whistles at a girl through false teeth." Hey, what am I bragging about?

The **Ralph Browns** certainly have an attractive looking home up in Maine where he has retired and it would appear their first winter up there is a real snowy one. Ralph and Esther are sailing from New York in February for a couple months' trip that will take them East to Greece and home via Ireland.

Kay Mason's home in Woodstock is quite inviting seen through the trees in the distance.

John Healy writes that he and his sister enjoy their new home down in Kissimmee, Fla. — more house and less land and nearer to town. No need for a power mower now, John?

Shorty Gray says there is still no news from the Pentagon except what you see in the papers. (In case you didn't know, Shorty, we haven't seen a newspaper here in New York for 20 days!)

Charlie and Susan Griffith strike a familiar and nostalgic musical pose in their Christmas picture. Can you fiddle in Spanish, Charlie?

The Potters down in El Paso write: "Hooray for the Ivy League Champs."

All our hearts are filled with sorrow at the passing of **Kell Rose.** Never was a classmate more universally loved, admired and respected. His activities in behalf of College and Class were many and varied and carried on with the same highmindedness that became characteristic of his accomplishments out in his chosen field. The heritage he leaves us is one to be cherished. Our heartfelt feelings go out to Helen and the family.

Paul Gibson sends thanks for being remembered on his birthday even though he's out of touch down there in Richmond, Va. Says he hasn't seen a '15er down his way since World War I, although some probably go through on their way to Florida. They have a Dartmouth Club of 25 members and he was chairman of a luncheon held during the holidays for local schoolboy prospects and undergrads home for the occasion. He and his wife were in New York in October to see some shows, et cetera, but time went too fast to look anybody up. Paul is still in real estate but is toying with the idea of retiring.

Pete Pray pays tribute to "the tickler file and extra effort you must have to use" and says it's appreciated by many like himself who see classmates all too infrequently. Pete says **Johnnie and Jean Mullin,** with Jean's attractive daughter Bobby and her Dartmouth husband, Dick Olmstead, were at their house for cocktails the day before Thanksgiving. Johnnie and Jean were in fine fettle on the start of their 6-month trip around the world — "why wouldn't they be?" Both were so enthusiastic about the Interim that Pete was all the more regretful he didn't make it. Pete saw the Dartmouth-Princeton game and was particularly gleeful as he sat on the Princeton side with two Princeton men.

George Martin says he too hated to miss the Interim but that things were just too hectic in his business to get away that early in the fall. He and Mae had their daughter Eileen down from Portland for the Harvard game, though more for **Kike Richardson's** party than for the game — they all look forward to that famous party! Marty says they also enjoyed the **Chan Fosters'** hospitality at its finest — "enough food to feed an army." After the Princeton game they stayed over in New York for the Giants pro-game. When they quizzed Bob Blackman about some of the penalty-calling, he flashed that big smile and said: "You know, we were lucky to win some of the earlier games!"

Rumor has it that **String Downing** did a swell job promoting the North Shore Dartmouth Club dinner at the Hawthorne in Salem, for there were over a hundred there.

The Patten Chowder gang in Boston scrambled 'round at a pre-Holiday luncheon and sent a box of goodies to **Stick Parnell** via S. S. Pierce Co.

It seems to be the consensus that New York Dartmouthers are responsible for putting Nelson Rockefeller in the Governor's chair. Be that as it may, we all wish him well!

Marv Frederick advises that he and Marian were scheduled to fly from New York on January 5 for a two-month trip to Hawaii.

I still say: "New York's a great place to live, but I wouldn't want to visit there!" After piloting a couple youngsters over the sight-seeing roads of the Empire State Bldg., Macy's, 5th Avenue's shops, United Nations, Rockefeller Center, Radio City, Times Square and the Statue of Liberty, I'm sure they slept blissfully all the way back to Maine. Once in a lifetime is enough! P.S. — I quit on the last two spirals up Miss Liberty!

And so — on to next month — with its spring around the corner!

'16

Class Notes Editor,
WILLIAM L. CLEAVES
7 Swarthmore Pl., Swarthmore, Pa.

Secretary, F. STIRLING WILSON
Box 1998, Ormond Beach, Fla.

Treasurer, RODERIQUE F. SOULE
15 Ravenna Rd., Boston 31, Mass.

Bequest Chairman, CHARLES E. BRUNDAGE

The Class expresses its deepest sympathy to **Burt Lowe** in the death of his wife, Kathryn, who died November 17, after a long illness, at their home in Dover Plains, N. Y.

It also records with regret the death of Ed Kiley's mother, Mrs. John Payton, who died September 25 in Wellesley, at the age of 95 years. Many of the Class knew her and she lived with **Stirling and Betty Wilson** one winter after Ed's death. Stirling described her as a most remarkable woman. And speaking of Stirling, how did you like his recent travelogue? I dropped "Doctor Zhivago" like a hot potato and read through the Newsletter once, . . . then got out the atlas and had a re-

run of their journey. I would consider a trip abroad most worthwhile if I could be as observant as Stirling and get as much out of it as he and Betty did. At any rate we are glad to have them home all in one piece after their bloodcurdling bus and taxi rides along the Grande Corniche and such other places.

By the time you are reading this your reporter, if he is lucky, will have had a nice visit from **Gil and Mabel Tapley.** Gil, as perhaps you have heard, is now feeling much better than for a long time. Their daughter, Ruth Axon, who lived in this vicinity some years ago, moved to Atlanta. Her husband has now been transferred to Wilmington, Del., and the old folks are just itching to get their hands on those grandchildren. So Gil and Mabel's good luck in having them that much nearer Winchester may also prove to be my family's good fortune as well.

Stew Paul was re-elected president of the Retired Officers Association at its biennial convention held in Washington in November. When Congress passed the recent Career Compensation Act, raising pay for most of those on active duty, it refused to apply the increases to retired officers, though it did approve a 6 per cent cost-of-living increase in retirement pay for some 130,000 former officers.

Dick Parkhurst was one of six delegates President Eisenhower recently appointed to a new United Nations organization dealing with the Merchant Marine. The delegates were named to the first session of the Assembly of the Intergovernmental Maritime Consultative Organization which opened in London in January. As you may know, Dick is a former member of the Federal Maritime Commission. It doesn't look as if time would hang heavily on the hands of this partially retired gentleman.

Our good-will ambassador extraordinary, **Gran Fuller,** has been out in the hinterland (that is, hinterland from Washington) and has run across numerous 16ers. At Buffalo he had dinner with **Ernie Frey** and **Dave Shumway.** In Chicago he was also entertained royally by **Ken Henderson, Joe Larimer** and **Hugo Gumbart.** Although Ken has retired as president of Ditto, Inc., he is kept busy with a job of teaching in business policy at Northwestern. Ken says that he has to spend a lot of time preparing for classes, but that it is good fun and he thoroughly enjoys the association with a fine group of students. Joe looks fine and still serves as secretary of the Chicago Bar Association. Hugo had planned to attend our Fabulous Fortieth, but his company, Bethlehem Steel, had other plans for him. He has been with the company thirty years and is Western sales manager, with headquarters in Chicago and territory covering eight states. Gran did not see Hugo's wife, Virginia, because she was called away to Indiana by the birth of a grandchild. However, they can be firmly counted upon for our Forty Fifth. At Williamsburg at Thanksgiving Gran and Ruth saw **Irving Wolff,** his wife and daughter, Peggy, and had dinner with them. A few days later Gran lunched with **Bill Brett,** Director of the Mint, in Washington. Incidentally Gran's son, Howard '51, is minister of Old Salem Church in the center of Buffalo. Gran recently had the pleasure for the first time of hearing him preach. Gran's parting shot: Why don't more of you fellows look him up (as Dick Parkhurst does) when you come to Washington? He is listed in the phone book.

Alec and Estelle Jardine spent Thanksgiving with their daughter, Marion, and her big family in Alexandria, on their way to Tucson, where they are spending the winter.

This item is being written just before New Year's, and it voices a wish which is perhaps entirely impossible of accomplishment, but which would be most wonderful if it could be achieved. It would be to have, in 1959, at least a word, direct or otherwise, from every member of the Class. There are dozens of men whose names never appear in these columns, and it is about time they did. Think what pleasure it would give the Class to hear from the likes of **Gus Emery, Howard Buffington, Herb Stiegler, Joe Cheyney, Charley Everett, Roly Wass, Bob Dana, Lew Murphy** and **Warren Tapley,** to pick just a few names at random. In the words of our old pal, the Bard: " 'Tis a consummation devoutly to be wished" (and I have some plans in mind to bring it about).

Next month look for a report on **Hobey Marble,** which lack of space does not permit your correspondent to make at this time.

'17

Secretary, DONALD BROOKS
South Pomfret Rd.
Woodstock, Vt.

Treasurer, VICTOR C. SMITH

Bequest Chairman, GILBERT N. SWETT

Here's another Florida address which should have been included in my original list: **Harry Hawkes,** 204 12th Avenue, No., Jacksonville Beach. (Permanent).

When last heard from, **Ralph Sanborn** was looking forward to another busy session of the New Hampshire legislature which will require his presence in Concord for a good part of each week. Incidentally, another of Ralph's gorgeous color photographs was published in the December issue of "Horticulture," illustrating an article on the culture of episcias, otherwise known as "flame" or "trailing" violets.

While in Washington recently **Duke Howe** contacted **Harold** (Friday) **Bean** by phone and reported that he found Harold to be in good health and still working for the Geodetic Survey. Eventually, he intends to settle in New Hampshire where he now has a summer home at Lancaster.

Word has been received that **Heinie Wacker** still is engaged in the construction business and at present is working on a major project in one of the Massachusetts State Forests.

Howard and Dorothy Stockwell are enjoying another winter at their favorite spot at Ellinor Village, Ormond Beach. In a recent letter Howard told about a trip they had taken with **Bob and Anita Scott.** The Stockwells drove to Fort Lauderdale and stayed there with Bob and Anita from Monday to Friday and while there, the four of them drove to Key West for what Howard described as a "most delightful and lovely ride." They stopped off at Islamorada in the hope of seeing **Norm and Mary McCulloch,** but they had not yet arrived. Returning to Fort Lauderdale, they all visited aboard **Charlie Wolff's** yacht and to celebrate the occasion, toasted their Dartmouth days.

Early in December **Gene Towler** made a quick trip to Atlanta and while there had an hour with **Hen Sturgess.** Gene reports that in spite of the very serious and almost fatal illness Hen experienced during the summer of 1955, he looks wonderfully and is feeling fine. During 1958, Hen closed up his own real estate office, joined forces with an old friend in another concern, and today heads up the company which is engaged in real estate developments and also has a large rental and sales business. Hen Jr. is with him, building up the commercial business.

Mott Brown, my roving reporter, writes that he and Fran recently spent a very interesting evening with Vic Smith Jr. '45, and his wife, Vesta. Vic Jr. is connected with the Turner Construction Company and presently is engaged in a large construction operation in Columbus.

At this point, in sheer desperation, I am turning the writing of this column over to Helen, so here is HFB. "With the hi-fi in the background and a peaceful Saturday evening ahead of us, I am glad to add my two cents worth. (I know that some of the good 17'ers think that I have had more than two fingers in this column off and on, but on a stack of Bibles, I have done little more than check the punctuation for the past five years.) But I suggested that some might like to know how we like the north country and why some prefer the south. A really good letter from **Gil** (Demon Handyman of Sarasota) and **Marie Swett** tells of their arrival and settling in Florida. For years the New Jersey 17'ers have kicked around this business of retirement and some have chosen to go north and others south. The Swetts chose the south and have lush gardens, swimming every day, no heating problems that can't be licked by a hat box of a heater, many friends who enjoy a benign climate and a multiplicity of interests in their town of Sarasota. The Brookses chose the north and have snow, temperatures of 25 below on occasion, a heating plant that copes adequately, lovely pine-covered hills, skating, skiing and innumerable activities at Dartmouth to enjoy. Incidentally, Don has a Vermont car license, DB 17, and one of the natives asked, "What's that stand for — Dartmouth Boy 17?" To sum it up, the Swetts are happy in Florida and the Brookses in Vermont, but we are each hoping to take seasonal advantage of the other's location. The back door is always open here (everyone uses the kitchen door in Vermont) so come see us on your way to Florida, or any other time."

Speaking of the Swetts, Gil says that they see a lot of **Angus and Belle Black** who have taken an apartment in Sarasota for at least a year.

One final word — **Bob and Gail Boynton** left for Florida just as the old year was ending and they had high hopes of seeing many of you Floridians.

Here are two new addresses for you to note:

Robert E. Adams, 793 Palmer Rd., Apt. 2-B, Bronxville, N. Y.; Leonard A. Shea, The Talmadge, Suite 101-102, 3278 Wilshire Blvd., Los Angeles 5, Calif.

'18

Secretary, THOMAS E. SHIRLEY
67 Annawam Rd., Waban, Mass.

Treasurer, W. CURTIS GLOVER
Write Inc.
420 Lexington Ave., New York 17, N. Y.

Bequest Chairman, RICHARD P. WHITE

Please remember 1918's Florida luncheon, Tues., March 31, 2 days after the long vacation weekend of Good Friday, Sat., Easter Sunday. Sitting comfortably in rockers, looking out over lovely Biscayne Bay, or sampling the attractive bar in **Bill Bemis's** Flamingo Hotel, Miami Beach, about 13th St. Our guess as to those who might be there quite probably are **Bemis, Earley, Gottschaldt, Fat Hardie, Paul Miner, Syl Morey, Dan Shea, Ev Young** and many more — of course with wives. Plans are to send a double postcard to the whole class and hope for a good turnout.

... **Johnny Cunningham** says — "expect to go to Nassau April 15, then to Jacksonville, about the 20th so can't make it." **Dan Shea,** as usual, enjoyed the holiday season in Miami; Dan's Christmas card was very worthwhile and unique, in that what he normally spends for Christmas cards he sent to the Divine Providence Shelter of Franciscan Missionaries.

Helen and Paul Miner had a nice visit with **Edythe and Cap Hanley,** and Cap, al-

though he's had a couple of heart upsets since his gall bladder operation, is, as Edythe says, "with God's help, is improving. I feel that this New Year will be better than the last — keep rooting for it, we need good friends." (J. L. Hanley, 2474 Boulevard, Jersey City 4, N. J.) From **Les Granger:** "left in Nov. with Lefty, for attendance in Tokyo at International Conference of Social Work (I'm V.P.), thence around the world via Philippines, Thailand, Burma, India, N.E. and West Africa, returning in the spring." Respond to the banshee howl of '18ers for a new, simple, small, compact up-to-date directory of '18ers — so when you get the call from **Phil Sanderson's** Newsletter, give him a fast comeback on your up-to-date addresses, etc.

Golden Gloves, New Hampshire heavyweight champion, Bob, son of **Tom and Priscilla Shirley,** medic at Harvard, had the great bout of his life in Dec. at his wedding that was really a big Dartmouth affair. Mr. Hershey (father of the bride) and his son Elliott are both Dartmouth people and there were many Dartmouth guests. In the midst of it all charming daughter Betty announced her engagement to a Colgate man who was an usher at daughter Patsy's wedding a few years ago. Priscilla and Tom will be rattling around in that homey big house at Waban. Says Tom, "I got out of my hospital job in Dec., so am as prepared as I ever will be to take over the Feb. 5 deadline of class notes for the ALUMNI MAGAZINE.

The great Dane, **Al Sib,** still does as well spreading manure on his Nebraska farm as he does when he's having tea at the Plaza in N.Y.C. — and there he draws no little attention. Commenting to **Stan Jones** about inflation, Sib says "out here it's really very mild, we don't have to buy their industrial goods." Sib, you know, is a Director of the Immense Union Stockyards in Omaha.

Betty and Herm Smith of Keene, N. H., jaunted out to a bank convention in California, and spent 3 days at Yosemite and 2 weeks with son Leonard at Santa Clara. Says Herm "my legislative duty began Jan. 6; it was a tough campaign, no Democrats running." "Thrown off the sled," was our **Col. Florimond Duke** (World War I fighter pilot; in World War II, for 5 yrs. Asst. Military Attaché, Cairo, paratrooper and German prisoner 13 months) so F. D. and Ellen bolted the town for 3 weeks and enjoyed the warm sunshine in Phoenix, Ariz.; before going back to Hanover, zero weather and snow. Good to know that Duke has agreed to serve as a consultant for the Regional Airport Commission, and will work to explain the need for airport legislation to the Legislature.

Sad news came from **Al Piper,** that his wife Lucy passed away Dec. 13 after an apparently successful operation for cancer in Oct. Lucy was a great leader, who led the women's team to victory over the men in a huge fund raising program for their Elliot Hospital — also she was one of six to receive the 10-year service award, from the N. H. Cancer Society. The class extends their sympathy to the family. '18 lost a very fine member on Christmas Day when **Charlie McCarthy** passed away after a happy day with his family. **Chris and Tom Shirley** on behalf of the class sent flowers and letters of sympathy to sons Dan and Charlie Jr. '48.

'Twas the night of the Imperial Ball at the Astor Hotel, when some oaf stepped on Princess Grace's white slipper, that '18 at the Dartmouth Club was having one of its greatest class dinners — a tribute to **Paul Miner,** one of Dartmouth's great track men; president of the '18 class, sophomore and junior years; a staunch prodder for '18 gatherings for many years. It was sort of a farewell party to the man who wrote us saying "We hope to be in our new house late March or perhaps April and hope we will have many

Richard A. Aishton '18, senior vice president of the Continental Illinois National Bank and Trust Co. of Chicago since 1954, has been elected president of that bank.

visits from you all. Our address will be 3020 Pinehurst Drive, Largo (Clearwater), Fla. Bring your wives and children and don't hesitate to stay with us for a week or a month."

Attending was **Francis Clahane,** the only '18 Phi Beta Kappa there — and **Dave Skinner,** who paid a wonderful tribute to Paul. Phi Doodles turned out to a man. Old crocodile **George Dockstader,** who took 400 ft. of beautiful colored film on his 30,000 mile trek around the world, — India, Pakistan, a couple of years ago, enjoyed it immensely. Old roommate of **John Dessau, George Cavis,** and **Bill Mudgett,** ordained to the Priesthood of the Protestant Episcopal Church, the foundation stone of New Rochelle, N. Y., was '18's **George M. Davis,** and it was a treat indeed to see **Eddie Felt** from Buffalo, the old roomie of **Bob Morrison, Al Gottschaldt,** and **Otto Kubin,** fresh from a Phi Psi Convocation at Mackinac.

Never ever missing an '18 gathering, if he can help it, is **Johnny Johnston,** executive V.P. of the far flung Belding Corticelli Co., who in '49 was put in charge of their entire production. Christmastime Ann and Johnny flew to Texas and Tennessee, to enjoy the holidays with their grandchildren and sons; Gordon (U. of Maine; then Georgia Tech), engineer for Nat. Biscuit Co. in Houston, and son Doug, top salesman for Belding H. After 3 yrs. at Norwood, Mass., H.S., 2 yrs. as postgrad., the then Gov. of Mass. told Johnny to come to him when ready and he would give him money whenever he needed. With an occasional check Johnny got from him, taking shorthand from 8 profs at Hanover, waiting on tables, the KKK'er with roommates **Cliff Daniels** and **Amos Blandin,** worked his way through college. Some one said **Rat Pelton** wanted a connoisseur to look at his son's paintings, and quickly **Steve Mahoney** and **Stan Jones** offered to get him intelligent critics to review his work. **Wart McElwain** (without his pal **Spud Richmond,** whom we all miss) formally congratulated Paul Miner on his retirement. Paul occupied many pages of the house organ of the Underwood Co. in the 1950s, showing him in his many different phases of work, which put him to the top of their organization, as one of the great salesmen of his time.

Syl Morey (Drive with care — drive with Sinclair — use Power X gasoline) is the chairman of the board of Geyer, Morey, Madden and Ballard, Adv. Agency, doing a $30 million business. And to our Syl the highest tribute possible was paid, when the press said of him "soft-spoken and pleasant, Mr. Morey has been called by one former associate, the most gentlemanly agency President in New York."

Tagged for the door prize that evening of '18's dinner was **Howard Park,** who recommended organizing the Park Parking Plan. Each '18er would have in his home a fully equipped efficiency apartment and '18ers all over the country would do the same. The system would work this way: **Helen and Lou Cousens** would occupy the **Amos Blandin** apartment for a couple of weeks at Hanover with their grandchildren, then move on to **Ray Smith's,** then on to **Dick Aishton's** in Chicago, then to **Lymie Black's** on the coast. This is the man, Howie Park, who has built up the huge real estate department of Socony Mobil Co. and roams the Americas for their interests. Also at the dinner, the man who worked from the bottom up, then married the boss's daughter, was **Shamus Shea.** Loyal Phi Doodle **Andy Ross,** 2nd V.P. Chase Manhattan Bank, Naval Aviator, World War I, and Asst. Biz Mgr. Dramatics on the campus was also present.

One of the treats of the class dinner was to see the genial **Bill Ryan,** who with Margaret were enjoyed so much at Reunion. Look at his family — William, Jeffrey, Christopher, Peter, and Mary Elizabeth — they live in the art colony of Silvermine, Conn. Many of us think of the days when Bill and Dave Skinner and Ray DeVoe '16 were selling bonds for the National City and the bank couldn't have got along without them. After his fine tribute to Paul Miner, Dave Skinner stoutly maintained that Elizabeth and he will retire in Hanover. Rugged, fit and weatherbeaten, **George Stoddard** had been out to Wyoming near Kill Pecker Creek, where Rosie Weed killed her six husbands. The old Mgr. of the Jacko made little comments about the tribute paid to him when the Bangall Art Guild, Stanford, N. Y., gave an exhibition of his paintings last October 11-12. To see Pat and George's charming home with paintings not only of their own but other distinguished painters, one might feel that they were in a wing of the Metropolitan Museum.

In the next listing of attendance of '18 gatherings the alphabet will be reversed and then Red Wilson, Pres. of Tricontinental Financial Corp., formerly V.P. of Union Securities Corp., will lead the list. Red, the old roomey of Doc McBride, Johnny Cunningham and **Chuck Hilliker,** was thoughtful to read the warm letter from **Walter Ross** who had been recovering from a hernia operation and '18 looks forward to seeing more of Walter's beautiful colored slides. And so winds up $21^5/_9$ years of writing class notes. — No — let's all keep passing news on to Tom Shirley.

'19

Secretary, GEORGE W. RAND
1273 North Avenue
New Rochelle, N. Y.

Treasurer, F. RAY ADAMS
184 Summer St., Springfield, Vt.

Bequest Chairman, HOWARD W. COLE

First of all, many thanks for the Christmas, New Year's and birthday greetings; they are greatly appreciated. Your Secretary doesn't seem to find time to send them out but sure likes to get them, selfish? yes. Acknowledgment is hereby made to the following Dartmouth classmates and friends — Larry Eastman, Hattie and Bob Paisley, Paula and Jim Stone, Betty and Jack Clark, Pat Leonhard, Jessie and Eddie Fiske, Lou Stone, Dick Kelley, Sally and Herb Fleming, Hal Parsons, Marie Drane, Bea and Ed Martin, Marj and Ken Huntington, Claire and Tom Bresnahan, Anne and Bob Lewis,

Sylvia and Jack Taylor '22, Adele and Briard Greeley, Dot and Stu Russell, Catherine and Paul Halloran, Jane and San Treat, Charlie Widmayer, able editor of the ALUMNI MAGAZINE, Lilian and Harry Colwell, Dorothy and Nick Sandoe, Red Murphy, Hester and Jack McCrillis, John Chipman, Lisa and George Bingham, Edna and Dick Werfelman from Florida (where we all should be at this time of the year), Edna and Bill McMahon, Mary and Larry McCutcheon, likewise from Florida, Jane and Lou Cody, Ruth and Norm Jeavons, Gertrude and Fred Daley, other Floridians, Jim Wilson, Mary and Jim Robertson '20, now of Centerville, on Cape Cod, Hon and Fat Jackson, Adele Ives, who takes such good care of '19ers when in Hanover, and everyone else for that matter (**Special Note** — our annual fall Woodstock-Hanover party this year will come on the weekend of October 9-11, same program as last year with luncheon at the Ski Hut on Saturday the 10th. The game this year is Brown, the only October game in Hanover). More acknowledgments — Virginia and Chet Demond, Kathleen and Dick Dudensing, Mary and Sam Ewart, who promise to be on hand for the relaxing 40th reunion in Hanover June 15-17, Florence and Ray Legg, Chuck Eaton of the Cohasset, Mass., Eatons, Adelaide and Paul Clements, Alice Earle and Rock Hayes, Harriet and Win Batchelder, Leonora and Budd Welsh, Elisabeth and Norm Sterling, Doris and Jack Ross who likewise promise to be on hand June 15-17, Bill Stedman, Fran Little, Casey and Toni Bevan, Harriet and Lou Munro, and Elmer Phelps, who conveyed the sad news of Bill White's sudden death.

Sam Ewart notes: "Still with Hornes (Pittsburgh). My branch is coming along O.K. The 'rag' business, as you know, is no rosy bed. Mary and I plan to be at our 40th." To **Ray Adams** from **Ken Gilchrist** of North Haven, Conn.: "All well, Ray, but still working on my first million, so can't be classed as prosperous. Good to hear from you and hope you are well and have Vermont under control." Also to **Ray** from **Bill Goldberg:** "It is cheering to get a personal note from you — you are good to take the trouble to write it. I have not been in close touch with the class except in my thoughts and I look forward to renewing acquaintances at our next reunion." Bill, in common with many '19ers did a lot of work on the Special Gifts Campaign in Manhattan.

Another note from **Dr. Bob Loring** of Springfield, Mass.: "Have been ill for nearly five months but on the mend now, and returning to practice shortly. Had an operation which was O.K. but then had every complication in the book." **Eddie Seward** of Pasadena, Calif., writes: "It gives me a good feeling each year to receive a card from you and the class when my birthday rolls around. Being so far away, I do appreciate being remembered. I am definitely planning on being in Hanover next June."

Budd Welsh of Morristown, N. J., in a letter to your secretary says:

> It was a surprise to hear your voice on the phone ten days ago and I regret that you conveyed a message of sorrow. I had lost track of Bill Hooven until 1945 when we met unexpectedly along the Jersey shore. Since then, we have exchanged greetings at New Jersey Bankers meetings and last June, we were both in attendance at a session in Princeton. At that time, he appeared to be in perfect health. It is fortunate that none of us know exactly what our span of life is. Your annual birthday greeting arrived on schedule and I appreciate it even though it is a reminder that the time is passing. The card was very much in keeping with our training of our college days. Chug Sears has already been advised that we plan to be on hand for our 40th and will arrive probably on Sunday, June 14.

The demon editor of 1909's class notes, Jack Childs, of Aurora, Ohio, comes up with a good story of our undergraduate days as told to him by **Norm Jeavons:**

During your sophomore year, Phil Goettel, who gained quite a reputation as a promoter of sundry ideas, learned that by shipping a pig via the Boston & Maine Railroad, he could get the use of a cattle car cheap. This sparked the idea of organizing a peerade to the Amherst game. He made a package deal with a bunch of his classmates for transportation to Amherst (via the cattle car) plus tickets to the game for six bucks or so. By fast talk he got a sufficient number of classmates to go along with the idea. The freight train was supposed to leave the Junc. at around 9 in the morning, the day of the game, and was supposed to arrive in Amherst by game time. The schedule was set without reckoning on the Boston & Maine. The train did not pull out until after 10, and, after numerous stops along the way did not arrive in Amherst until after the game was over. The gang was cold, dirty, and disappointed. They hopped off the cattle car in the freight yards, leaving the pig to an uncertain fate and returned to the Junc. on day coaches. Phil, who was with your class for two years, has since passed into the Great Beyond. Maybe he's organizing safaris the other side of the Styx. I hope you guys have a big 40th. The week preceding your reunion we'll be having our 50th. As I expect to be in Hanover the week after our reunion, I may have the pleasure of seeing you.

Dr. Denis Sullivan of Lansdowne, Pa., says: "Taking first things first, please let me thank you for the card which you, as the representative of the class have sent me. I am deeply appreciative of this honor, and I am quite sure that nobody appreciates it more than my family and myself. As to news, there is nothing to mention except that I have six college graduates among my own children, and only one has made Dartmouth — Ned 1952. We are now concentrating upon our grandchildren, all eighteen of them." (Secretary's note — Denny is hereby nominated, and sure to be elected, as the champion grandfather of the class).

Once again, two big dates for 1919 in '59 — our 40th reunion in Hanover June 15-17 and our annual Woodstock-Hanover get-together at the time of the Brown game, October 9-11.

'20

Secretary, CHARLES F. MCGOUGHRAN
350 East 57th St.
New York 22, N. Y.

Treasurer, PROF. ALBERT W. FREY
Tuck School, Hanover, N. H.

Bequest Chairman, H. SHERIDAN BAKETEL JR.

It's Christmas Eve as I ready up these notes so it doesn't make much sense to send Christmas greetings that will reach you in February, but nonetheless I do just that and I hope each and all of you and your families will have enjoyed the best of everything at Christmas time and that you are all off to a good start in 1959.

In the Christmas mail came a striking color photograph of the spanking new home recently completed by **Stan and Grace Newcomer** at Monroe, Mich. The house itself is a thing of beauty and the setting, a large plot facing Lake Erie, is really something to see.

Our Florida correspondent, **Dorothy Hamm,** who receives this man's nomination for President of the Pen Pal Club, sends the cheering news that **Freddie** is somewhat better. The **Rayner Hutchinsons** stopped in on a recent Florida trip and that, of course, called for a get-together of the Dartmouth-Florida East Coast Clan.

I reported on **Jim Robertson** and his son-in-law, Kim Kimball, as having set up shop a few months ago at Cape Cod. In the mails recently there arrived a catalog setting forth the wares purveyed by the Country Store which they operate. If you didn't receive a copy I am sure Jim would be glad to mail one to you. His address is The Country Store at Centerville, Cape Cod, Mass. A very interesting color postcard of the Country Store bears out the fact that Jim is really in business. One of the joys of operating the store, according to Mary, is that their daughter and grandchildren live just next door. We certainly plan to stop in should our travels take us anywhere near Cape Cod.

With a heavy heart I record here the tragic passing of **Frances Stone, Jerry's** much loved wife. Frances had been in failing health for some time but her passing came with shocking suddenness. It was our good fortune to have known Frances all through the years and in her passing the Class has lost one of its loveliest and most charming ladies. Frances came from the deep south, Atlanta, in fact, and brought with her the radiance, vivacity and personal charm traditional in the old south. With all these gentle and graceful qualities she was endowed with a ready wit and sense of humor that endeared her to all who were privileged to enjoy the warmth of her personality. The services at the Scarsdale Congregational Church on December 18 were fittingly and touchingly beautiful. I know that I speak for all in the Class when I extend to Jerry sincere and heartfelt sympathy.

We also are sorry indeed to report the recent deaths of two members of our Class.... **Elliott Ward Cheney** on November 24, 1958, and **William E. Tracy** on December 19, 1958. To their respective families I take this opportunity to express the sincere sympathy of all members of our Class.

Spence Snedecor reports belatedly on his trip to Hanover for the Columbia game. Mary and he, with their son and his wife, made the trip and got together with **Rog Pope, Ken Spalding, Wade Smith** and **Frank Moulton.** I was sorry I had to miss that one! By the way, Spence, who is President of the New Jersey Chapter of the American College of Surgeons, recently presided at its Annual Meeting in Asbury Park, N. J. This boy Snedecor is quite a guy! You will recall that I mentioned some time ago that he and Mary spent two months early in 1958 in Africa where Spence worked in ten mission hospitals. One of these days we are going to get a look at his collection of color pictures of life in Africa including wild animals, Pygmies and all that sort of thing.

The old fire buff **Cy Rounseville,** checking in from South Swansea, Mass., recently took over as Executive Vice President of the Union Savings Bank, Fall River, Mass. A dangerous man with a firehose, this Rounseville! And the same goes for **Bung Roland!**

Al Palmer has joined the rapidly growing ranks of the retired and may now be reached at 726 South Center Street, Eustis, Fla. Take it easy, Al!

Jack Allenberg, who lived formerly in Des Moines, Iowa, has pulled up stakes and moved to the West Coast where he may now be reached at 434 West 27 Avenue, Spokane 41, Wash.

John Beranek reports in from Seattle, Wash., that he is getting along all right despite a serious operation last April. Good luck, John.

Paul Johnson, now living in Sioux City, Iowa, promises to make the 40th reunion in 1960. Do so by all means, Paul. It will be good to see you.

Paul Richter registers a peeve concerning Dartmouth athletic public relations. He says that week after week he picks up the Sunday Boston Herald and finds no mention of Dartmouth or any other Ivy League football scores, but apparently the western and southern colleges are given the full treatment. When last heard from Paul was writing out a complaint to the editor of the Boston Herald.

All the way from the West Coast, where he is Professor of Modern Languages at California Institute of Technology, came **Paul Bowerman** whom I last saw in 1920. He is still the dignified amiable guy whom we all knew as an undergraduate. When pressed for news of our classmates on the West Coast he reported seeing very few of them and

then on rare occasions. He did say that he had seen **Ralph Roberts** quite some time ago which leads me to suggest to Ralph that he take pen in hand and let us know how he and Dorothy and the children are getting along in far-off California. Paul was in New York for a meeting of the Modern Language Association and stopped in for what proved to be a very pleasant and interesting visit.

Maury Dewey's daughter Judith will graduate at Smith College in June. That will give Maury the incentive to make the loop up to Hanover and have a look at the old stand.

Len Davis' boy Harry is ploughing a straight furrow at Tuck School. **Howard Pullen's** boy David is getting along fine in the sophomore class and his parents are hoping that he'll come under the benign influence of **Al Frey** in one of his classes.

By the time you read these notes the Twenties here in New York will have ganged up with the Classes of 1919 and 1921 for a stag dinner at the Dartmouth Club. The "piece de resistance" is the full length color movie of highlights of the 1958 Dartmouth football season that brought to Dartmouth the Ivy League title. The occasion promises to be quite an evening.

'21

Secretary, JOHN HURD
33 East Wheelock St.
Hanover, N. H.

Treasurer, LINCOLN H. WELD
Rm. 1200, 195 Broadway, New York 7, N. Y.

This is the true and almost tragic story about Mrs. Willis McDuffee when in her home town of Rochester, N. H., she ventured forth on a rainy night in October to mail a letter of thanks to a 1921 class officer. You recall that she, the mother of **Franklin McDuffee,** and Maud Wheelwright, his sister, were honored guests in Baker Library during the Holy Cross weekend when Franklin as man and poet was remembered by the presentation of "Dartmouth Undying" with comments by **Harry Chamberlaine, George Frost, Ellis Briggs,** and Edward Connery Lathem, Assistant Librarian. Let Mrs. McDuffee, that charming, witty, and spritely woman well along in her eighties, tell the story:

> The mail box was so close to my home that I left my front door open. Suddenly a reckless driver, who had lost control of his speeding car, swerved on two wheels and left me no choice but to run backwards on an icy crossing or to lose my life. I chose to run but slipped and fell backwards with a terrible thud. Prostrate on the icy concrete walk, the rain pouring down on me, I blacked out from the shock but suddenly heard a voice, "Is there anything we can do for you?" "Oh yes," I groaned, "Please mail my letter to 1921. Don't let it get wet." Whereupon I released my precious burden into unseen hands. The next thing I knew I was in an ambulance heading for the hospital where I remained six weeks.

Still in North Africa, **Bob Wilson** continues to earn his living by selling rugs, fruit dates, copperware, blankets, and olive oil. A fascinating new sideline is 100 locomotives priced at $500,000 apiece, but as Tunisia is now all Diesel Bob might make a deal with a 1921 man providing good bank references to let him have one at $350,000. Bob sold off 15 airplanes in 1952, but locomotives are tougher to move. He plans to stay indefinitely in Tunis, Paris, or Marseilles. "I have often thought," he writes, "that ripe old age would solidify me, make me more wise, more contented, but nothing like that has happened. If anything, the driving mechanism is more discontented than when I left a sleepy New England town and started via Dartmouth to roam the world. I never wanted to be a sailor, but here at 60 I am even more of a roamer than a sailor."

St. Vincent's Hospital likes **Abe Weld.** Welcoming him back in December, it promised him as entertainment another operation with festivities to last over December 25 and January 1, but Abe managed to get home for Christmas and New Year's. Here is how. The new operation, for nothing malignant, thank God, which was to be done with fantastic delicacy of touch, required, alas, two cleavages. Number one was performed December 17. It seems that Abe has very aristocratic blood, it's nitrogen 35 instead of a bourgeois 15, and it refuses to be hoipolloied even if the surgeon promises Houdini subtleties. After recuperation in Jackson Heights for some weeks, his blood appeased by royal treatment, Abe will bow in again for Number Two, Operation Excision, to be followed by complete recovery and squash games with **Ort Hicks.**

Bob Mayo has a talented daughter Phyllis, who not only gets around but stimulates her father and mother to do likewise. On the stage in New York for over a year, she signed on for production work with CBS and then with the Army Special Services as a civilian entertainment specialist. As such, she spent five years in Europe, and thus Bob and Polly found a perfect excuse to plan a ten-week journey about the Continent. When Phyl sojourned for a year in Arizona, her parents dropped down to see her, and they included a swing around Mexico. During the past year she has been gracing Fort Ord, Calif., and you can hardly register surprise that Bob and Polly shot off to the West Coast.

Like Bob Mayo, **Doc Fleming** has quit private flying but for a different reason: the Idaho countryside is too rugged for single-engine planes.

Ellwood Fisher had a good winter vacation visiting his son Woody at Fort Knox, Ky., where he celebrated his 21st birthday. Elwood found him in an excellent frame of mind, glad to be getting his military service behind him, alert as ever, taking his tough existence in stride, and hoping for an assignment in the Food Supply Branch of the QMC. It is no wonder that Woody longs to return in April to Dartmouth; he is a popular and respected member of the class of 1960.

The Christmas card from **Sandy Sanders** welcoming a 1921 man for golf in Texas in 70 degree temperature arrived in Hanover just after the mercury had dropped to 20 below zero.

Perhaps the warmth in the South will do some good to **Joe Folger,** now on sabbatical leave from Dartmouth where he teaches Spanish, and to Marian, both of them dogged by physical disabilities in the past year or two.

Frank Livermore has no regrets at having put up for sale his beautiful home in New Canaan, Conn., and settling at 124 Dartmouth St., West Newton 65, for now he and Barbara are back among old friends, and old friends are best. Frank's work is unusually interesting and challenging. He prepares Home Economics educational programs teaching teen-agers, future homemakers, the merits of food products. He not only creates the text material but also effects distribution of the educational unit to every school and college of the country teaching Home Economics and to every student in these classes. Frank is deliberately finding more time for gardening, bridge, canasta, domestic repair jobs, and social activities at the Brae Burn Country Club just down the road. Frank sees something of **Tom Cleveland,** who lives around the corner; and Betty Cleveland is one of Barbara's best friends.

Connie Keyes reports that Jimmy in addition to running a paper route is President of the Student Co-Operative Association in his Washington school. He played on a Little League baseball team which came in first. Connie tends to say Dartmouth when you say Jimmy.

With an accounting background and with her own law office, Pearl, the wife of Newc **Newcomb,** has been handling estates and trusts, drawing wills and other legal documents, and handling sales of real property. She does not care about trial work but in court she has been very effective. She reformed one bad man who refused to pay his wife alimony and made himself generally a nuisance. She put him in the cooler where he did some cold thinking about his and his ex-wife's dignity and honor. Because she has made a study of Parliamentary Law, women's organizations call on her to serve in one capacity or another.

Hal Braman and Doris spent the Christmas holidays with Marcia in Florida.

Here are what the three sons of **Dick Hill** are doing: Dick Jr. '47 is now manager and stockholder of WNOW, York, Pa.; John, UNH '56, is covering Maine for Aetna Life; and Arthur, a junior at Dartmouth, is doing well in his studies this year.

The reason why **Kent McKinley** was recently awarded the Citizen of the Year Scroll and Medal from the American Legion in Florida is that the Legion looks on him as an outstanding fighter against the menace of World Communism.

To honor her husband, **John Gordon Ives,** an engineer by profession and a sculptor by avocation, who died Jan. 3, 1944, Roma E. Ives of 65 North Fullerton Ave., Montclair, N. J., has sent a check to Baker Library to be used for the purchase of a volume to be added to the 1921 Memorial Library.

'22

Secretary, LEONARD E. MORRISSEY
46 Myrtle St.
West Newton 65, Mass.

Treasurer, CARROLL DWIGHT
111 Laurel Rd., Chestnut Hill 67, Mass.

Bequest Chairman, EUGENE HOTCHKISS

As regional activities progress in the Capital Gifts Campaign several classmates in New York's metropolitan area are working with diligence and distinction for Dartmouth. In northern New Jersey, **Jack Dodd** is chairman of the campaign for Essex county where 500 good Dartmouth men live. Similarly in the Essex area, **Harry Bruckner** gives his able assistance as a division chairman. **Stan Miner,** another of our loyal Jerseyites, is chairman of the area including Bergen-Passaic counties. Over in New York, **Rog Eastman** as a division chairman is leading a group in the central Westchester area. Let's have an Indian Yell for these Twoters and make them hear it!

The College's current roster of alumni officers shows many Twoters around the world loyally serving in alumni club activities. **Don Donavanik** in Bangkok, our dean of Dartmouth men in Siam (dates one, doesn't it?), is president of the Dartmouth Club of Thailand. **Modie Spiegel** is president of the vigorous Alumni Association of Chicago. In Wellesley, **Dick Litchfield,** honored by the College as Club Officer of the year, is secretary of the energetic Charles River Club which Dick has developed over the years. **Hal Clark** is secretary of the Holyoke club. **Wally Mountcastle** similarly serves the Greater Miami club and **Russ Putney** does likewise in Keene. And **Frank Hutchins** in Hanover serves on the advisory board of undoubtedly your favorite periodical, this ALUMNI MAGAZINE. How about a Wah-Hoo-Wah for all of them!

More honor for the clan in the North country—our **Dr. Dick Wood,** Director of the Vermont Historical Society, has been chosen chairman of the governor's committee for the Civil War Centennial. Dick is also on the committee for the 100th birthday of the Vermont State House which (pardon your scribe's opinionated reporting) is unsurpassed in beauty and historic interest.

All of us will sadly appreciate an excerpt of a letter received from Edith, wife of our departed **Cecil Goldbeck:** "I am especially touched by the card telling of the Class Memorial Gift to the Library—nothing could

be more appropriate and thank you one and all. I shall always be interested in Dartmouth and the Class of '22."

Despite toothaches and toupees we Twoters are still quite a young clan. Believe it or not — young enough to have twelve sons currently attending Dartmouth. We have four freshmen, three sophomores, one junior, three seniors and one post grad. Our pea green freshmen and their parents are: Charles F. Henderson — Larry and Mary Alice; Alden James Jr. — Jim and Barbara; John E. Mann — Bill and Betty; Joseph F. Sackett — our Dr. George. The gay young sophomores are: Louis B. Fauver — King and Annie; Anthony H. Horan — Frank and Betty; David W. Zuckerman — our departed Harvie and Mary. Our only junior is Harry Bruckner Jr. — Harry and Margaret. And we proudly claim three grand old seniors: John R. Horan — Frank and Betty; Robert G. Sands — Walt and Doris; Thomas C. Waterman — Sterry and Frances. Our post grad John F. Blunt '58 — Jack and Barbara — is working for his master's in the Tuck-Thayer program. The clan is naturally proud of its sons and their parents. May their joys be many and their heartaches zero.

Among pre-Christmas pleasures were chance meetings with two of the prominent A's in our clan — **Jack Aborn** in Providence and **Elmer Ardiff** in Boston, both in fine fettle, hale and happy.

All Twoters including, of course, wives and families now hear this: Our annual little reunion this year will be in Hanover as usual but at much more favorable dates — April 24, 25, 26. Previously held in March, when Hanover weather could occasionally be capricious, this year — thanks to **Carroll Dwight** — arrangements for the get-together have been made with the Hanover Inn for the new dates — the last weekend in April. That means Hanover in the springtime. If you want to know how relaxing such an occasion can be and how welcome any Twoter is, ask any classmate who has been back to Hanover for one of these completely do as you please, informal little reunions. Mark your calendar now for April 24, 25, 26 and while you're at it send your reservations to the Hanover Inn.

'23

Secretary, CHESTER T. BIXBY
170 Washington St.
Haverhill, Mass.

Treasurer, CHARLES H. JONES
Commonwealth Shoe and Leather Co.
Whitman, Mass.

Bequest Chairman, TRUMAN T. METZEL

Sammy Sammis releases the following plans for our June 15-16-17 reunion.

1. We should arrive in Hanover Sunday afternoon, June 14.
2. We will be residing in North Massachusetts and Hitchcock halls.
3. The class cocktail party and dinner will be Monday evening.
4. Class meeting, picture and Alumni luncheon, Tuesday.
5. Top feature is scheduled for Tuesday afternoon when we rendezvous at the Lake Morey Inn for an afternoon of golf, swimming, tennis for the young and frisky, and shuffleboard, croquet and elbow bending for the old crocks. Prizes will be given all winners and then comes a delicious outdoor buffet.

Sammy wants to hear from you at once with a personal letter, containing name of spouse, sex and ages of children, addressed to: Howard D. Sammis, 195 Mountain Rd., Pittsfield, Mass. He wants suggestions and new ideas that will make this "Thirty-Sixth" one of the best.

Sammy scheduled the first meeting of his reunion planning committee at **Charlie Zimmerman's** home in Hartford on Saturday, January 17. Watch for further announcements in **Irish Flanigan's** "Skiddoo" and in the 1923 section of the March issue of the ALUMNI MAGAZINE.

Stuart L. Robinson's name is a very welcome one in this column. It has never appeared before. Stuart and Agnes live in Akron, Ohio. They have one son, Stuart, who has three children and another, Russell, who is single. Stuart operates the Robinson Clay Products Company in Akron.

Johnny Harkins has really co-operated in his efforts to fill in the last thirty years since the name Harkins was mentioned in this MAGAZINE. His letter, too long for this column, will appear soon in Skiddoo. Briefly he drove west in 1923 in **Sum Sollitt's** patched up Ford with Don Moore and Ev Baker. John and Don spent a very enjoyable month at Sum's farm at South Haven, Mich.; then went to work briefly as a reporter on the Baltimore News. From 1924-1927 it was work on the New York Journal, Morning Telegram and American. In between newspaper jobs John toured North Africa and the Mediterranean for a shipping company and spent a hectic spell as press agent for Billy Rose. In 1937 came his shift to the movies, doing publicity first for Warner Bros. and then for David O. Selznick and United Artists. In 1947 John lost his health and since then he has devoted his time getting back on his feet physically. Two years on the Mojave Desert, sixty miles from the town of Mojave and the past ten years at San Clemente, Calif., in an apartment across from the beach there. Here John does free lance writing, doing a couple for Marford, the T.V. subsidiary of the Mary Pickford Company.

Roy Hayes is connected with Hershey Chocolate Company and lives, with wife Marion and their two daughters Lois and Karen, in Kenmore, N. Y.

Ted Swartzbaugh is now foot loose and fancy free having gained his divorce last June 6. He now has his five-and-a-half-acre property back in his name after a sizable settlement, is thirty pounds lighter and is in excellent health.

Doug Curry's whereabouts was last noted March 1930. After graduation he went three years to Harvard Law, graduating in 1926. Doug has his own law office in Harrodsburg, Ky. His wife's name is Kathleen and they have two sons, Frank D. Jr. and William D.

Thomas P. Durivan lives in New London where he has a dental office at 302 State Street. His wife is Lorraine, they have a son Donald and a daughter Nan.

Bill Evans represents the Baker Furniture Company in the South. **Pete Jones** met him in a New Orleans restaurant in 1934 when he took his first swing through the South for this Grand Rapids Company. Since then Bill and his wife Clifford have raised two children in Columbia, S. C. Fran is a Junior at U. of Carolina and George entered Proctor Academy last September. With a son in a New England prep school Bill, at long last, may be expected to bob up at the reunion in June.

Warren Gladstone, for many years in the mortgage business on Lexington Avenue, New York, has for the past two years been a patient at Central Islip State Hospital, Central Islip, Long Island, N. Y. He would deeply appreciate a visit from a classmate.

John H. Keenan and wife Virginia live at 41 Hillside Ave., South Portland, Me. John is head of the Economics and Sociology Departments of the University of Maine, in Portland. They have three children, Stuart, Ann and Martha. We are all pleased to hear about John's activities after 26 years.

Clint Raynor and **Hollis Riddle** were ushers in each other's weddings in 1926. Since then Holly moved away from his native New England to Akron, Ohio, and has been associated in many capacities with Goodyear Tire and Rubber Company. In its foreign department he journeyed to South America in 1932; India, Sumatra, China, etc. in 1936, and then to Africa. In 1942 Holly was transferred to the Goodyear Aircraft Corp. and is now assistant controller of the company. There are three sons and one daughter in the Riddle entourage.

Clint Raynor lives in Westmoreland Hills, Washington, D. C. He has been in department store work since graduation with Jordan Marsh Co., Boston; and Lord and Taylor, New York City; Wolf and Dressauser, Fort Wayne, Ind.; Broadway Department Stores, Los Angeles; and since 1936 Woodward & Lothrop, Washington, D. C., where he is now one of their vice presidents. Clint and Dorothy have two sons, Clinton Stuart Jr. and Donald.

Frank Roby breaks a long silence when he writes that he has found a fun and sports-like place to live in Battle Creek, Mich., where he fishes off his front porch daily but catches few fish. He is an accountant for Michigan Carton Company. Frank and wife Ione Ardell think time is drawing near when they can fly every fall to their California home as continuous winter is too much for their advanced ages.

Our super analyst, **Jim Broe** furnishes us with the following interesting statistics. There are 133 sons of 1923 who followed their father's footsteps to Dartmouth. Of the 121 fathers 83 were graduates and 29 non graduates. One father, namely Art Little had four sons, '51, '53, '55 and '57. Two had three sons; namely Lew Putnam, '50, '54 and '59; and Colin Stewart, '48, '52 and '55. Fourteen had two sons, namely Thomas Burch, '47 and '49; Frederic P. Clark, '51 and '54; Sherman Clough, '50 and '57; George Ferguson, '50 and '51; John Foster, '44 and '58; Walter Gates, '50 and '54; Frederick Haigh, '49 and '53; Kerchival R. Holt, '51 and '56; William Kimball, '47 and '50; Leon Sargent, '51 and '53; Sumner Sollitt, '48 and '55; Louis Van Orden, '46 and '51; William H. Wallace, '50 and '55, and George F. Weston, '53 and '54.

In the March issue we will print the fathers with one son.

'24

Secretary, CHAUNCEY N. ALLEN
2 Brewster Rd., Hanover, N. H.

Treasurer, WALDON B. HERSEY
29 Woodside Rd., Winchester, Mass.

Bequest Chairman, JOHN R. WHEATLEY

Before time gets too far out of hand: Christmas greetings, in various forms and shapes, were received from you-uns to the Allens, and for all such our warm thanks. Of them all, the one from the **Bevo Beerses** was tops with its picture of the beach and invitation to come for a look-see, as the **Spud Spauldings** did (as reported earlier). Thanks again, and a good 1959 for you all.

Hank Hartshorn made a very good recovery from gastric surgery and convalescence in Dick's House — with President Dickey a patient next door. We enjoyed seeing him occasionally, and also wife Pauline on her visits.

We regretted having to go to press last time with little about the passing of **Dick Leonard,** and thank his brother Eugene, '21, for the following: After prepping at Shattuck Schools and Mercersburg, he came to Dartmouth, was a member of Psi Upsilon fraternity; he did not graduate. Prior to his retirement, because of ill health, he was in the Security and Insurance businesses in Minneapolis. He died last June after a long illness. He is survived by his mother, Mrs. C. B. Little and by his wife, Clara Pearson Leonard, and by his brother Eugene.

It has been encouraging to have a few more replies from you to my invitations on your birthday cards — which I enjoy writing after Margaret has addressed the envelopes

for me. Thanks Frank — and others. **Van** will tell you, as he has to some who've seen him or written him, that he was also warmed by the card many of you signed at **Dick Morin's** party after the Penn game. The word is that Van is recovering nicely from his aching back.

We have our first application for quarters at the 35th reunion, and all the more welcome because it comes from one who is about to have his first such privilege and pleasure: **Dutch Diehl.** I'll find out how to give him the #1 priority he deserves; and let this be an inspiration to many more of you. **Fred** and **Mary,** you're in. And delighted to hear that your second son may be a freshman here next fall. We wish him and you both well.

Reports from distant climes, other than from **Bevo: Jerry Sutton** with Warner Brothers in Johannesburg (as previously noted); and **Fat Daum** from Australia with General Motors. There are many more of you out a far piece from here; letters would be very welcome.

Cryptic note: **Bernie Toland** writes from the Boston area saying he is no longer on a "set schedule"; wonder what that would be like? How about some details?

Fellow West Hartfordite, **Rolly Taylor,** sends a clipping — for which tremendous thanks — about the testimonial dinner given by some 400 of his friends to **Art Watson** on the occasion of his retirement as committeeman on the Republican State Central Committee as noted last issue. (There were even Democrats there.) I won't repeat the many nice things that were said about Art, but they all sounded right from this listening ear. Rolly sells real estate; reports one son engaged. Fuller report when the big day comes around. That day came for the **Brad Hersey's** daughter Althea on December 20. She is now Mrs. Robert L. Shirley. He graduated from Dartmouth and is now doing graduate work at Harvard. Sorry we couldn't be there; we wanted to.

Joe Butler, whose Art Institute is in Youngstown, Ohio, passes on the good word about **Mike Watkins,** Vice President (sales) for Youngstown Sheet & Tube Co., speaking optimistically about the future for his business and telling a drooling group of purchasing agents about a 50-million-dollar "improvement program" being set up by his firm. A very good picture shown in the company Bulletin. Two visitors at the Butler Institute were **Joe Egolf** (with whom I occasionally played the drums in jazz outfits our freshman year) and **Charlie Boss.** The **Joe Butlers** are in Antigua as you read this, after shoveling the path as I did just before writing these notes. Hog John Bay, if you'll believe there can be such a place.

I can't pass up the opportunity to again doff my hat to the growing list of 1924s who are on the Roll of Honor — prominently: Read the figures as published and note with pride where 1924 stands. And so an orchid to **Van Huyck** and his helpers, not to overlook Lou.

Jimmy Reid, whom I never could beat in handball, has been made a member of the Ridgefield (Conn.) Board of Education; on the democratic sweep, perhaps? He's editor-in-chief of the Textbook Department of Harcourt Brace, despite which fact I rarely see him on the campus. Better correct that, in June, Jimmy. The Reids have two children in school and a son who graduated from Cornell. No comment. You can lead....

We have reported the fact that **Sumner Robinson** had moved to become President of Loomweave (business in Lawrence, Mass., but living in Andover). If you see his firm's ads you'll see our boy, and the copy is signed by him informally and in person. Good likenesses. Many thanks to my spy for passing same on.

Al Brown, who ought to know (if he doesn't) that history repeats itself here in Hanover. We now have a student advertising agency again. Al talked the kind of language I like to hear (and use) when he addressed the Assn. of National Advertisers in mid-November at their annual convention at Hot Springs. His theme was centered about the need for better and constant exchange of information (communications) between clients and the creative agency people; and less talking about the need for more creativity. (Applause from here, and he'll be quoted in my classes in Advertising along about in March.)

'25

Secretary, EDWIN B. PEASE
225 Wyman St., Waltham 54, Mass.

Treasurer, EDWARD W. ROESSLER
R.D., Old Mill Rd., Chester, N. J.

Bequest Chairman, FORD H. WHELDEN

Just a reminder for those who intended to make a note on their calendars last month and forgot to do so. The 35th Roundup of '25ers will take place at Hanover on June 15, 16 and 17. Incidentally, it is expected that the distaff side of the family will be included in your plans.

A small reunion of '25ers occurred at a recent stag sports night dinner sponsored by the North Shore Dartmouth Club at Salem, Mass., when **Bill Sleigh, Whitey White, Ben Bowden, Bob Bishop, Frank Wallis** and yours truly met with a large group from other classes to view movies of "The Dartmouth Ski Way," featuring Ralph Miller '55, after a few preliminary remarks from Howard Chivers '39, and of the Cornell and Princeton football games with comment from Wilbur Wolz, head backfield coach.

At the last meeting of the class executive committee, it was voted to purchase as a memorial for the Dartmouth College Art Collection, a **Wendell Jones** painting, "The Blue Door," at a price substantially reduced through the gracious benevolence of Wendell's widow, Jean Jones. In acknowledging our check Churchill Lathrop, Director of the Carpenter Art Galleries, wrote as follows:

On behalf of the College and especially of the Carpenter Hall Art Galleries I wish to thank the Class of 1925 most deeply and warmly for this very generous gift that both honors a creative member of your Class and enriches the cultural resources of the College. We are very happy to add this outstanding example of Wendell Jones' work to the group of paintings by other Dartmouth men who have been professional artists.

I hope very much that when the Class of 1925 has its next reunion in Hanover many of Wendell's classmates will enjoy seeing this valuable gift on exhibition in Carpenter Hall or, when the happy opening day arrives, in the new Hopkins Center.

Again thanks to each and every member of the Class for this very desirable and important addition to the artistic resources of Dartmouth.

People continue on the move. Here are the latest address changes: Linc Price, 163 Wiltshire Avenue, Louisville 7, Ky.; Harlan Statzell Jr., Delta Apt., 1670 Penn Ave., Wyomissing, Pa.; Charles M. Annis, 434 South 11th St., New Castle, Ind.; Richard K. Pierce, 2412 Northview Road, Rocky River 16, Ohio; Carl Smith, Arlington Towers, Arlington 9, Va. **Al Perkins** wrote recently "I took a long, long chance and retired from business at age 53, preferring to do it while broke but alive, rather than well-to-do and dead." His address appears as "The Cork Tree," Somerset Bridge, Bermuda.

Jim Andrews, former State Senator from Adams, Mass., is reported to have submitted his name to Governor Foster Furcolo for appointment to the labor and industries conciliation board vacancy created by the death of former Governor James M. Curley. **Ralph Jameson** apparently has gained some political influence since moving to Wayland, Mass., in 1953. He was recently named by the selectmen to fill a vacancy on the town's finance committee. The newspaper article announcing this appointment indicated also that Ralph has a son, Craig, at Dartmouth.

Edward W. Roessler

We are extremely fortunate in having a man of the character, ability and resourcefulness of Eddie Roessler to serve as our class treasurer. He is among the foremost of those who should get unlimited credit in this column for unselfish devotion to affairs of the class. And it gives us great pleasure to present a "profile" on him this month.

Eddie was born in Washington, D. C., and prepared for Dartmouth at Taft School, Watertown, Conn. While at Hanover he earned a Phi Beta Kappa key. After graduation Eddie obtained a B.S. degree in electrical engineering at M.I.T. in 1928. While there he roomed one part of a year with **Sky Foster** and another year in the same house with law school contingents from '26 and '27. During this period he served as secretary of the Dartmouth Club of M.I.T. In the fall of 1928 he went to work for General Electric in Schenectady, becoming active in the air conditioning department when it was formed in 1932. Meanwhile he had taken an advanced course in engineering during which he recalls having been introduced (!) to **Bill Jenkins.** Three years later he was transferred to Bloomfield, N. J., where he remained until his retirement in 1953.

In 1937 Eddie married Miss Susan O. Olmsted of Yonkers, N. Y. They lived in Caldwell and Essex Falls, N. J., where they remained until 1949. By that time the noise of trucks and buses drove them out to the country and they settled in Mendham Township about ten miles west of Morristown, to the great confusion of all with their Chester mail address. Driving 60 miles a day to work proved too great a chore and finally Eddie retired to a more leisurely life after having earned his 25-year service pin with G.E.

Shortly after moving to Mendham Township Eddie joined the local volunteer fire company, serving as engineer and later as chief. His experience in driving a piece of apparatus into the city are a proper subject for Puck. He also served on the local election board and apparently exercised enough influence and respect to be elected to the Township Committee in 1956 and to become chairman (mayor to any outsider) in 1958.

While Eddie and Susan have no children, they do have four nephews, three grandnieces and one grandnephew, together with four dogs, five cats and a "sufficiency" of chickens, which together with the duties he performs as class treasurer and other activities not listed here give them plenty to do. In addition to the fire trucks which are available to them on occasion, they also ride around in a foreign "bug," Eddie having adopted a virulent resolution against the modern, "overexpensive, overdecorated, overgadgeted" American automobile.

'26

Secretary, ROBERT L. MAY
9301 Hamlin Ave., Evanston, Ill.

Treasurer, EDWARD J. HANLON
6 Stanwich Rd., Greenwich, Conn.

Bequest Chairman, BRUCE W. EAKEN

In this great-white-cold season ... post-football, post-holidays ... news is scarce, and letters, clippings, even tiny tidbits, are extra welcome.

Particularly *LETTERS*... like this welcome word from that colorful comedian, dancer, and man-about-mid-New-England, **"Red" Boyce.** From Houston, Texas, on the letterhead of "Trevor Boyce Associates, Manufacturers Representatives, Corrosion Resistant Storage & Handling Equipment", "Red" writes: —

"I act as a Manufacturers Representative for three nationally known firms selling to the oil and chemical industry in the Southwest. I also am manager of a firm which fabricates equipment for the pulp and paper and chemical industry.

Trevor "Red" Boyce '26 of Houston, Tex. is manufacturer's representative for three big companies selling to oil and chemical industries in the southwest and also manager of a firm making industrial equipment.

We have a plant in Houston, and primarily we fabricate rubber lined tanks, piping components, rubber covered rolls for protection of the corrosive materials handled by these industries. Some large paper mills, headed by Dartmouth people such as International Paper Company and Champion Paper and Fibre Company have been very kind to me.

I am married to a girl from New York State, and we came to Houston after being in the South Pacific and in the European Theater during World War II. I had no particular reason to enlist, other than an innate desire to learn the hard way.

After leaving Dartmouth, I attended the University of Buffalo and U.C.L.A. and majored in Petroleum Chemistry and went to work for Union Carbide Chemicals Company. I was one of the original few technical men employed in their very first plant. This work and that which I am now performing is a far cry from being in show business. After hearing Elvis and other so-called performers today, I believe the whole bunch of them would have gotten the hook in a Green Key Show.

Pictures I see from time to time of you and some of our other classmates show you looking like young men — about the way you looked in College. On the other hand, during the action in the South Pacific, my red hair suddenly turned snow-white, it makes me look at least 75.

And this letter-of-correction from Allen MacDuffie: —

"The Class Notes in the November issue refer to the Springfield (Mass.) Republican report of an interview with me. The reporter was in error when he used the phrase "former lawyer" as I continue in the profession, being associated with Gordon, Brady, Caffrey & Keller, 120 Broadway, New York.

At the time of the interview I was working on a program of the private mortgage lending institutions to bring about a more equitable distribution of home mortgage credit — to help people in small communities and minority groups everywhere obtain home mortgage loans. This program, known as the Voluntary Home Mortgage Credit Program, was run by committees of lenders, builders, retail lumber dealers and realtors. Bob Morgan '24 of the Boston Five served on the National Committee and Reg Miner '21 of John Hancock was on my Regional Committee which served the area — Maine to New Jersey and Puerto Rico."

CLIPPINGS, Too. A news-release from New York reports that: —

Dr. Richard M. Haywood, associate professor of classics at New York University, has been named the new instructor for Classics H1, the Legacy of Greece and Rome, one of the University's four "Sunrise Semester" Courses given via television, on Station WCBS-TV. He has previously appeared several times on NYU's "University" television series, and has also participated in radio programs.

A native of Lynn, Mass., Professor Haywood received a bachelor of arts degree in 1926 from Dartmouth College, and a doctor of philosophy degree in 1932 from Johns Hopkins. Before joining the NYU faculty in 1950, he taught at the Hotchkiss School and at Johns Hopkins. He and his wife, the former Margaret Rider Mobray, have a son and two daughters. They live at 16 E. 8th Street, in Manhattan.

The Newark (N. J.) "News" reports that: —

The Horticulture Society of New York, Inc., have announced their plans to establish one of the country's finest botanical gardens, on the Duke estate, near Somerville. Charles D. Webster, society president, visualizes the New Jersey project as the society's greatest challenge. At 51, after a successful business career, Webster retired to become the society's unpaid president. Born in Iowa, his deepest interest is in broad-leafed plants and shrubs.

And *TIDBITS:* —

Bill Hughes, Director of Employee Relations for Socony of the Middle East, at Istanbul, Turkey, is now serving as Professor of Employee Relations at Istanbul University. Bill will be returning to the U.S. on sabbatical leave, late this spring. **Ken Johnston** is now the proprietor of The Mobile Kitchens of College Park, College Park, Md. **Fred Wenck,** as president of Chicago's Agate Club, oldest advertising club in America, had the honor of introducing guest speaker Richard Daley, Mayor of Chicago. When we asked for a picture, for use in this publication, Fred replied: — "None were taken; I had the photographers thrown out. After all, where I live (Wilmette) there are three political parties: Republican, More Republican and Most Republican. So just imagine what the neighbors would say, if I had my picture taken with a DEMOCRAT!"

Tidbits in both solid and liquid form were consumed in generous quantities when **Tubber and Mary Weymouth** threw a Welcome-West party for visitors **Bob and Pensé Cleary.** The consumer group included: — **Carle and Betsy Blunt, Warren and Dot Fellingham, Dick Gunthorp** (and sax), **Al and Ellen Louer, Mod Moderwell, Tom and Grace Murdough, Jim and Madeline Oberlander, Hank and Jane Parker, Art and Elaine Seibold, Fred and Ginny Wenck,** and **Del and Billie Worthington.**

Ed Hanlon, our hard-working Class Treasurer, reports Class dues payments running slightly behind a year ago. If YOU are one of those who have let it slide, please write a $6 check to Dartmouth 1926 (NOW, while you're thinking of it) and mail it to Ed, at 6 Stanwich Road, Greenwich, Conn.

'27

Secretary, CARLETON G. BROER
West River Rd., M.R. 1
Perrysburg, Ohio

Treasurer, HARRY B. CUMMINGS
Apt. 10C, 3908 N. Charles St.
Baltimore 18, Md.

Bequest Chairman, LEON C. GREENEBAUM

According to a bulletin from **Cug Daley,** chairman of our Father and Son weekend, otherwise known as the spring get-together, this event will be held either on the weekend of February 20, or that of April 17. Since the choice depended on a vote of those interested in attending, and since the result of that vote hasn't yet been announced, it isn't known at this time whether the devotees of skiing or the golfers won out. As it will probably be late in February before this reaches you, if the winter weekend is chosen, you will have to depend on other sources for your news. If the vote is in favor of April, you will read more about it in this column. In any event, those of you who make the trek to Hanover will be rewarded by a weekend of good fellowship with your classmates, and the opportunity to meet the sons of 1927 currently in college.

Cliff Randall returned recently from a trip around the world, during the course of which, as president of Rotary International, he visited Japan, Formosa, Ceylon, the Philippines, Thailand, Burma, India and Pakistan, and returned home by way of Egypt and France. Cliff was accompanied on the trip by his wife, Renate, and his daughter, Judy. He feels that the people of southeast Asia will not willingly adopt the Communist system, but that they may be forced to by the tremendous economic and military power of Soviet Russia and Communist China. To quote Cliff:

At a dinner for the rugby team given by Dartmouth alumni from the London area Bob Breyfogle '26 hosts Art Cockburn '60.

The peoples in Southeast Asia are individualistic, and want to find their own destiny, but in order to succeed, they have to make great economic progress. They fear the economic power of Red China and the ability of the Chinese to ruin their economies by underselling and flooding the market. Most of these countries have only one or two items to export and if there is no market for them, they are in real trouble. The Chinese already are disrupting the economies of Burma and India by dumping large quantities of wool and rice on the market. With the exception of India, the governments of the countries in that area are unstable and uneasy. They are fearful of the rise of China as an economic and military world power.

The peoples of southeast Asia want to build up the industry and agriculture of their countries, and although the philosophy of Communism doesn't appeal to them, they are greatly impressed by the rapidity with which Soviet Russia and Red China have moved up in the world through their collective system. If India, with its democratic approach, matches the progress that Red China makes through its communistic system, the southeast Asia countries will be bolstered in their resistance to the domination of international communism. The United States could help these countries by better understanding the grave economic problems facing them. By getting more qualified men to administer our aid and technological assistance programs, we could gain this understanding.

Thanks to **George Friede** and **Sam Martin,** we have learned that **Frell Owl,** who is Superintendent of the Fort Hall, Idaho Indian Agency, spoke on December 5 before the Portland, Ore., City Club. Frell's subject was "Moccasins to Shoes," and his talk was concerned with the problems being encountered by the Indian in adjusting from his traditional way of life to the white man's mode of living. Hoot is well qualified to talk on this subject, having devoted his entire life since graduation from college to working among the Indians, and now occupying the highest administrative post held by anyone of his race. He has always argued for the greater acceptance and integration of the Indian as an equal citizen, and believes that education is the key to this transition.

George Friede, who made the arrangements for Hoot's talk, gave a small all-Dartmouth cocktail party in his honor, which was attended by **Sam and Ellen Martin, Dud and Sue Sercombe, Paul and Sue Woelfel,** making up a 100% representation of 1927 in Portland, as well as by Henry Morton Jr. '39 and Paul Hanlon '43 with their wives. George is editor of the Multnomah Lawyer, the journal of the Multnomah County Bar Association, and co-moderator of the Portland Chap-

Charlie Goldsmith '29, MGM executive in London, played an important and very helpful role in the successful visit of the Dartmouth rugby team to England during Christmas vacation. With him are John Hessler '59 (left), team captain, and Dick Liesching '59 (right), president of the Dartmouth Rugby Club.

ter of the National Conference of Christians and Jews. Last summer, returning from a six weeks' vacation in Denmark, Sweden, Finland, Norway and Ireland, George was booked on the ill-fated KLM airliner which fell into the Atlantic, with all 99 persons aboard killed. Fortunately, at the last moment he decided to prolong his trip, and changed his reservation to a plane leaving two days later.

Hank Copeland has been appointed as legislative assistant by New York state senator Harold A. Jerry Jr., of Elmira.

Although we are supposed to be at the age where we are settled down, some of us still seem to be moving around. The latest moves: Ledlie H. Berry, from Bowdoinham, Me., to 564 Pineapple Ave., Eau Gallie, Fla. (Does this mean that you are planning on taking things a little easier, Led?) Lt. Col. Elmer H. Worth, from Lackland Air Force Base to 214 Springvale Ave., San Antonio 27, Tex. (Looks as though he finally found a decent house.) Henry F. Hale from Jamaica Plain to 23 Converse Ave., Newton 58, Mass.; Lee N. Slinkard from Whittier, Calif., to 594 G St., Chula Vista, Calif.; **Col. Charles M. Townsend** from an APO to 8614 Hartsdale Ave., Bethesda 14, Md.

'28

Secretary, OSMUN SKINNER
Van Dyne Oil Co., Troy, Pa.

Treasurer, CRAIG B. HAINES
First National Bank, Boston 6, Mass.

Bequest Chairman, CHARLES F. BRUDER III

Dana Condon, United Fruit Co. Traffic Manager for Central America, writes of another 1928 reunion in Guatemala:

A gentle tingle of the phone and a strange voice applied for a job in my office as "Sweeper or lower" during the afternoon of December 31. Being somewhat mellowed for the occasion I settled that problem in a hurry. Finally he identified the voice as that of Bob Reid. Shortly after graduation Bob took a trip through Europe while I was pitching hay on my father's farm to pay him back the $50 I had borrowed to bring Verna up to graduation. Then Bob and I joined the United Fruit Company independently and by a wild coincidence became housemates out in the jungles of Costa Rica for a few months. He apparently couldn't stand the gaff (or maybe wanted more money) and finally quit, in favor of selling hand-made paper scratch pads and similar.

We were both single when last we parted — and now I boast two grandchildren. That's what can happen in a mere 30 years between visits.

A year ago Bob made a similar business trip for American Pad & Paper Co. which included just about all of South America. Formerly Manager for United Fruit in Havana, Dana was promoted and moved to Guatemala two years ago.

John and Ethel Nixon's son, Jack, has become engaged to Jane Petersen of Kirkwood, Mo., who is a junior at Washington University in St. Louis. Jack is a senior at Babson Institute, a member of Delta Kappa Epsilon and a member of the Naval Reserve.

Charlotte and Red Edgar have moved from 21 Oxford St. to 20 Stowell Road, also in Winchester, Mass., going from a large house to a smaller one, adequate for the two of them and a pair of cats. Their son Bill is a freshman at Hanover and is currently the freshman hockey goalie. His previous net-minding experience was acquired in one year at Hebron. Their daughter, Carolyn, now Mrs. Peter T. Goodrham, is living in London and has a daughter named Charlotte. The grandparents are going to England for three weeks in April.

Lane Dwinell will step down as Governor of New Hampshire in a few days, after serving two terms. He told Red Edgar recently that he really regrets leaving public office.

Mutt Jennings, as president of the Dartmouth Alumni Association of Boston, will preside over the first annual dinner at which wives and girl friends are to be included.

Jack Phelan, following the trend from central cities to suburbs, has moved his law office from Boston to Needham. His son Jack's picture appeared in the New York Herald Tribune of January 5 with a write-up about the St. Mark's hockey team, of which Jack is captain. On Dec. 22 at Madison Square Garden, Jack's team walloped Hill, 9 to 0.

Don and Carolyn Norris are the proud parents of a daughter born late in November. They now have a lively family of three boys and three girls, the oldest being 23.

Craig Haines Jr., '58, is now at Newport, R. I., doing his active duty stint with the Naval Reserve.

Larry Sleeper died on December 30 of a coronary thrombosis at the Mary Fletcher Hospital in Burlington, Vt. Larry was manager of the Hotel Huntington in Burlington and lived in Essex Junction, Vt. The funeral was in Lynn, Mass., and **Craig Haines** went to the funeral home and conveyed the sympathy of the Class to Larry's widow, daughter and son. Larry had no warning — on the afternoon of his death he was working in his office, felt a little uncomfortable so went home and told his wife he felt a little discomfort in his chest. Helen called the doctor who suggested that she drive him to the hospital. They gave him an examination and did not seem to find anything, but put him to bed. A few minutes later he died.

Larry's death brings to five the number of '28ers who passed on last year — three from heart attacks, one from a bee sting, and one from an auto accident. In 1957 eleven of our classmates died, all of heart attacks.

Howie Payne, a top authority on tuberculosis, is now superintendent of the Middlesex County Sanatorium in Waltham, Mass. He is glad that he gave up the 14-hour-a-day grind of practice and teaching in Washington. His oldest son, Howard, is playing his third year of varsity basketball at Mackin High School in Washington, Bill attends school in Waltham. Howie says, "We have Harvard junior medics out here for clinical training and I have been pleased to see quite a few bright young men from Hanover."

Bill and Greta Cogswell leave January 22 on a two-month cruise on the "Augustus" to the Mediterranean.

A telephone call to the Nestle Co. in White Plains, N. Y., to arrange a luncheon date with **Jerry Pitts** revealed that he retired a year ago, has been traveling a lot, but still lives in Riverside, Conn.

Harold Moody resigned as superintendent of schools of Athol, Mass., to accept a similar position in Dartmouth, Mass. He will assume his new duties January 12. His older son, Dick '54, is with the Employes Group Insurance Co. in Boston. Their younger son, Clifford, graduated from the University of New Hampshire last June and is now a freshman at George Washington University in Washington.

The '28er most frequently seen in the newspapers these days is **John Turkevich,** distinguished physical chemist at Princeton. John is in great demand as a speaker — his latest appearance was as the featured speaker at a science forum for 100 high school science teachers, held at the Esso Research Laboratories in Linden, N. J. In addition to being a Princeton professor, John is a consultant to the Atomic Energy Commission and the National Science Foundation.

'29

Secretary, CHRISTIAN E. BORN
Center Rd., Woodbridge, Conn.

Treasurer, EDWIN C. CHINLUND
2 Gateway Center, Pittsburgh 22, Pa.

Bequest Chairman, JACK D. GUNTHER

We are extremely sorry to report that **John Dickey** has had to undergo surgery for a recurrence of his phlebitis of the leg. We are most pleased, however, to be able to state, at the time of this writing, that he is convalescing at home. We hope that he will be back on both legs at an early date. We have also heard that prior to his trip to Dick's House, John did a masterful job in replying to questions, at the inaugural of WDCR's "Forum" series, put to him by WDCR Station Manager Ronald F. Kehoe '59 on topics

ranging from publication of faculty salaries to the admission of Red China to the intercourse of free nations. WDCR, as most of you know, now has an FCC license and broadcasts to the surrounding countryside in lieu of transmitting only over the College's electrical wiring system to the dormitories and other buildings as in former years.

News has also come in that **Bob Monahan** has recently announced, in Hanover, the opening, for the seventh season, of the College's Golf Course ski tow, while in Concord, he has teamed up with another state representative to file a bill in the new Legislature to help local communities with water pollution control costs in a manner comparable to laws already effective in Vermont and Maine. Coincidentally, from Bob, we have a couple of clippings concerning **Joe D'Esopo.** One of these quotes Joe as saying "I just can't imagine getting nearer to the magic carpet" of his recent familiarization flight on the B.O.A.C. Comet 4 Jetliner over Cape Cod and New York at 36,000 feet. The other concerns the fact that Joe made a visit to the Mary Hitchcock Memorial Hospital for a hernia operation (from which he also is convalescing). The local newspaper inadvertently said "Mrs." D'Esopo had gone to the hospital which caused considerable consternation among those townspeople who met her on the street or found her on the office phone during the following few days.

We have just seen a newsphoto from the Manchester (N. H.) Union showing **Art Bergeron** conversing, on the USS Boston, with the Boston's commanding officer, Capt. Luther C. Heinz, USN. The Boston is the world's first guided missile cruiser.

Dr. Wayne Bryer, of Hampton, N. H., was awarded, this year, a 10-year Certificate of Appreciation by President Eisenhower, and endorsed by Governor Dwinell, in grateful recognition of service to the nation as an uncompensated member of the Selective Service System of New Hampshire. Wayne has been serving as Medical Advisor to Local Board 8 in Exeter.

"Not too good" was **Karl Michael's** way of describing the prospects for this year's swimming team. Ten lettermen who were on last year's squad cannot be counted on this year — five were lost through graduation and five have not gone out for the team this year, for one reason or another, and these include "the top backstroke and breaststroke men in the school" according to Karl. In addition, sixteen men who had won freshman numerals in swimming during the past two years did not come out this year.

A very nice note was received from **Hank Stein** enclosing a clipping from the Jan. 4 New York Times concerning the successful Dartmouth Rugby team's visit to England and the following quote — "The visit of the team to Britain had some official sponsorship under President Eisenhower's 'people-to-people' program. But during the team's twenty-one days in Britain, its expenses have been met largely by the community of Dartmouth alumni. Among the leaders in that effort have been **Charles Goldsmith** of Metro-Goldwyn-Mayer Pictures, Ltd., London, and Norman Crabtree '31, of the Schaefer Pen Company." Also, in mentioning that five of the members of the team had been on the 1958 Ivy League championship football team, Al Krutsch of Denver, captain of the football team, 5 feet 11 inches tall and weighing 212 pounds, was likened by a British sportswriter to "a caterpillar tractor, only more mobile." Hank also mentioned that daughter Connie graduated from Connecticut College in 1957 and is now employed by Polaroid Corp. in Cambridge, and younger daughter Clare is a senior in high school and beginning to look forward to her college career starting next fall.

Carter Strickland, president of the Smith-Lee Co., Inc., of Oneida, N. Y., announced, just before Christmas, a profit-sharing plan for the 400 employees of Smith-Lee and the Milwaukee Lace Paper Co. (Milwaukee, Wis., a wholly-owned subsidiary), who had been regularly and continuously employed for one year or more prior to Dec. 12.

Imagination and Liberal Education

Thirtymen interested in analyzing the work of the College as it operated upon them, and as it has continued to affect succeeding generations may wish to recall some comments of a wise Princetonian, Hoyt Hudson. His posthumous little book *Educating Liberally* (1945) revolves about an apt and simply stated thesis. It is useful as a gauge for measuring in retrospect the Dartmouth tradition and accomplishment as evidenced in our own educational experiences in Hanover.

Hudson noted three enemies which have continually attacked mankind, and which persist in our own time. And these enemies are not, as one might think, Russia, Cancer and the Atomic Bomb. They are more powerful, more widespread, and more difficult to defend ourselves against. The first is *ignorance;* the second *muddleheadedness;* the third *crassness.*

The defense against ignorance is knowledge — and the world forges ahead on that front with more success in some areas than in others, but is gradually pushing back the cloud of ignorance. The defense against muddleheadedness is the establishment of an operative logic. This can be done, and in some areas is being done. Thoughtful planning, administrative know-how, and the application of method, are things with which we as Americans have concerned ourselves, perhaps have taken unjustified pride in.

Crassness, however, is something else again. It is activity based on lack of understanding, lack of sympathetic imagination, lack of appreciation of another's point of view. It has led, and unfortunately continues to lead, every man-jack of us from time to time not only to the brink, but over the brink of stupid blundering deportment. The only defense is the creation of a sympathetic understanding, and of imagination in as many of us as are capable of attaining these qualities. Anything, therefore, that can administer to the imagination and can exercise it may in the end acquire a utility undreamed of by most of us.

But these enemies are apt to come upon us as a combined force, rather than by single instance. They must be met by combined force, and not by any single and overdeveloped antidote. Upon this base the liberal education takes its stand. "Let us not too early, or on too light grounds," wrote Professor Hudson, "divert students or allow them to be diverted into a partial intellectual experience. Limitations enough will be imposed by the circumstances of life outside and after college. Many young people never see college at all, and many will be caught in an illiberal mental life — though not merely because they miss college since the liberal attitude, and the essentials of a liberal education, can be arrived at outside of school or college. But within the circle of education let us not consciously and systematically maim the intellect itself. To do so is to condemn our student out of hand to the fate of being a fractional person, a fate which the liberal education is designed to avert."

How stands Dartmouth amid the defenses against these perennial foes? A question to be asked and a question to be answered as we search our hearts, minds and pocketbooks for the support the College needs. If we believe, as so many of us do, that our liberalizing experience at the College in the late '20s is continuing, we'll help the faculty and administration gird for the expensive future. The College needs more and larger gifts. Thirty hopes, we hope, that they will flow from appraisal of the way the College continues to fulfill its function, and in anticipation of continued educational leadership among liberal arts colleges.

G. W. STONE JR. '30

Secretary, RICHARD W. BOWLEN
Reading, Vt.

Treasurer, WALLACE BLAKEY
30 Boxwood Dr., Stamford, Conn.

Bequest Chairman, JOHN F. RICH

Your Class Notes this month, fellows, will be remembered more for their brevity than their inclusiveness. Few are the bits of news for the column.

We are more than pleased, though, to be able to report that **Wally Poorman** has just been elected a vice president, director and member of the executive committee of Esso Export Corporation. He has been an Esso Standard vice president since 1956 and a director since 1954.

Promotion has also come to **Jim Tyler** who has become manager of finance for the large motor and generator department of General Electric. Jim is living in Schenectady where his headquarters are located.

In New Hampshire the Class has been twice honored recently. Once when **Read Lewin** was awarded a Certification of Appreciation for fifteen years of uncompensated service to the nation as a medical advisor to the Selective Service Board of his county. Second, when **Bill Putnam** gave another of his well-known talks, this time on "Personal Stewardship," before the members of the Congregational Women's Guild in Lebanon, where he is also president of the medical staff of the local hospital.

Dick Tilt in Ridgewood, N. J., has just been awarded a special plaque by the New Jersey Society of Certified Public Accountants in recognition of his service as vice president of the group. The award was made at the annual dinner at the Down Town Club in Newark.

From the All Pets magazine comes an excellent review of the accomplishments of **Harold Kaplan:**

Harold M. Kaplan is a professor of physiology at the Southern Illinois University, and is active in various animal-life groups. Among the latter are the Herpetologists' League and the American Society of Ichthapologists and Herpetologists. Dr.

Kaplan is also a member of the Animal Care Panel, vice president of the American Society of Professional Biologists, and on the animal research committee of the Illinois Academy of Science.

He has written over thirty published papers on blood and animal diseases, a book, "The Rabbit in Experimental Physiology," published by the Scholars' Library, and has a second book under contract with the McGraw-Hill company, called "The Anatomy and Physiology of Speech."

And now, before concluding, we want to direct your attention to the third splendid paper by **Win Stone** about the College, the Capital Gifts campaign, and you. He has done a grand job in the adjoining columns, and you'll be a better Dartmouth man for reading it.

Treasurer, PETER B. EVANS
The Elms, 2701 S. Dort Highway
Flint, Mich.

Bequest Chairman, JAMES B. GODFREY

Last month's report to my class constituency ended with the announcement that the Chicago Alumni Association would have as its guest speaker at the January luncheon **Gale Freeman,** vice president of the First National Bank of Chicago. Because the luncheon meeting took place today, I will begin this month's chronicle by recording that Gale gave the Chicago Alumni group an exceptionally fine talk in which he painted the business picture for the first half of this year. As I listened to Gale I had a strong inner wish that many of you classmates could have heard him — for two reasons: first, that you might have heard at first hand from a senior vice president of a major banking institution his predictions for a strong six months of business activity, and second, that you would have been proud in the realization that this solid appraisal was being delivered by a classmate. Sandwiched in with Gale's preparation efforts for his six-month business predictions was the marriage of his daughter Nancy during the holiday season. **Oz Bliss** and I heard Gale's talk and although **Dr. Sey Burge** had planned to attend he had to miss because one of his maternity clients had reached the point of imminent delivery. Sey reported that **Dr. Swede Nelson,** Denver pediatrician, was in Chicago recently attending a meeting of the American Society of Pediatrics. Continuing in the maternity field, permit me a personal item to the extent that my daughter Ann, who is married to Anthony Newey, Dartmouth '56, is expecting and is under the care of **Dr. E. Seymour Burge.** Certainly when Sey and I first met as members of the freshman soccer squad in the fall of 1927 neither of us had the remotest idea of this latest family relationship.

From Harry B. Johnson, secretary of the class of '04 and a resident of Pittsfield, Mass., comes a thoughtful personal note accompanied by a clipping about **Rex Fall.** The article covers Rex' abundant civic activities and includes a picture suggesting that he is still as lean and lithe as in his undergraduate days when he captained the varsity tennis team. Rex, who parlayed his English major into newspaper work immediately after graduation and is presently news editor of The Berkshire Eagle, is, in Harry Johnson's words, "your distinguished and very public spirited classmate, highly respected by his fellow townspeople and held in affectionate regard by his Dartmouth associates in Berkshire county."

During the recent holiday season Ruth and I attended a party given by Doug Keare, Dartmouth '56, to introduce to his Chicago friends his fiancée Virginia "Ginger" Clark, daughter of our **Len Clark.** Ginger is a Skidmore senior and by an interesting coincidence she and her Dartmouth man are following the same matrimonial pattern as her parents, for her mother Dorothy is a Skidmore graduate.

James D. North '32 has been promoted to the newly created position of assistant general manager, marketing, of the Birds Eye division of General Foods Corp.

A couple of months ago in this column I quoted **Johnny Johnson's** report that **Beany Thorn** was "quietly hibernating." A substantial rebuttal is now at hand from Mr. 100 Yard Dash of 1927 to 1930 inclusive, reporting that affairs are quite otherwise than previously recited. Beany clears his record by reporting that he and Eleanor have been in New Orleans for the National Convention of Insurance Agents; at Crawford Notch as guests of the New Hampshire State Insurance Agents Association; and that Craig 4th, their third grandson, arrived three weeks ago — all of which clears the record and proves again that Beany is not yet to be classified as a Catskill Rip Van Winkle. Beany reveals an impressive statistic in the direction of **Johnny Feltner** who at this writing is the father of eight children of whom five are boys, including twins. Their oldest is attending the University of Rochester and their youngest was born last May. John and his wife Barbara were at Lake Placid recently with four of their tribe for a week of skiing. Johnny is an orthopedic specialist in Rochester, N. Y., and we all remember him as manager of Winter Sports and a genuine DOC enthusiast. Beany remarks that he remembers Johnny as a very serious guy — from the above record there is no evidence that he either has or dares to change at this stage. In all seriousness, Johnny, congratulations to you and your spouse on heading up such a great cadre.

A recent announcement reveals that **Doug Morris,** whom we know most recently as a tireless class secretary as well as an indestructible 25th Reunion auctioneer, has been named senior vice president of Lambert & Feasley, advertising agency. In addition, Doug is chairman of his company's planning board.

Nothing could have pleased me more during this winter solstice than the letter received from **Chuck Mendell,** written from the salubrious environment of Winter Park, Fla., where he has been a member of the faculty of Rollins College in the department of English for the past 23 years. Armed with a professional lifetime in English literature, Chuck and his wife Phyllis spent three months last summer driving all thru England and Scotland. The full text of Chuck's fine letter will appear in a forthcoming issue of **Russ Beckwith's** Wah-Hoo Wampum.

And now, gentlemen of the Class of 1931, I urge you to send me a bit of class news about yourselves, your families, and classmates you see frequently, or rarely but recently — written in longhand, in pencil or invisible ink, on butcher paper, scratch paper or filter paper. Give it a try — now!

'32

Secretary, ALBERT E. ZINGGELER
27 Hamilton Dr., N.
North Caldwell, N. J.

Treasurer, WILLIAM A. LIESON
120 Bridle Path Rd., Springfield 9, Mass.

Bequest Chairman, JAMES D. CORBETT

From **Mike Cardozo** comes a detailed account of the trip which he and the family took last summer through the romantic Middle East and Southern Europe on their roundabout way to Brussels, where Mike is spending his sabbatical year on a Fulbright-Guggenheim fellowship studying the workings of European international organizations. He tells of voyaging to Naples and Athens, then driving a Consul (British Ford) station wagon to Istanbul. Leaving the family there, he flew over to Tel Aviv to attend the International Lawyers Convention. Returning, they drove back through Greece, Yugoslavia, Italy, Switzerland and France to Brussels, where they are now bedded down at 55, ave. de Tervueren. Any of you who may be contemplating a similar junket had better write to Mike for details.

Ralph Elias arrived in New York from sunny La Jolla for a brief visit during the latter part of December. Ralph is an old New York boy, and the big city still looked attractive to him despite one of the bitterest cold spells we have had in quite a while. After taking some professional examinations, however, and taking in a few shows and visiting old friends, he headed back to the west coast where he has a flourishing practice as a psychiatrist and neurologist.

On the day after Christmas **Fred Gage** died at Kingsbridge Veterans Hospital in New York, following an illness of nearly two years. He leaves his wife Jeanne and two young children, Dorothea and Petersen, for whom our Class feels the deepest sympathy. Fred's interest in the College never lapsed, and it was by his expressed wish that "Dartmouth Undying" was among the musical selections at his funeral service. An "In Memoriam" by **Art Allen,** who knew Fred perhaps better than any of us, will appear in this or a later issue of the MAGAZINE.

Two '32ers broke into the local news by making public addresses recently: **Ping Ferry** gave a talk in his home town, Briarcliffe, N. Y., on "The Role of Private Corporations and the Role of Political Parties in a Democracy." His talk was based on studies made by the Ford Fund for the Republic, of which Ping is a vice president. In Claremont, N. H., **Bob McConnochie** was the speaker at a meeting of the Industrial Management Club. According to the news release, Bob is assistant director of training for Eastern Gas and Fuel Association of Boston, and is an instructor in Creative Thinking and Business Conference at Northeastern University.

An address change received in December from the Alumni Records Office indicates that **Don MacPhail** is back from Tunis, where he was deputy director of the U. S. Operations Mission, and has settled down at 3110 Hawthorne St. NW, Washington 8, D. C. Perhaps this notice will prod him into giving us the scoop on some of his recent activities.

'33

Secretary, WESLEY H. BEATTIE
80 Mooreland Rd.
Melrose 76, Mass.

Treasurer, GEORGE N. FARRAND
Young and Rubicam, Inc.
2 Park Ave., New York 16, N. Y.

Relax fellas and gals. No less an authority than **George Rideout,** vice-president of Babson's Reports, has just predicted a 5 to 7% increase in business over 1958. George did his "crystal-balling" at the 45th Annual Business Conference of his organization's clients. He looks for improvement in all lines except foreign trade and railway equipment, but anticipates declines here will be more than offset in other lines. His outlook is for an increase of 1,000,000 cars over 1958 production with its attendant favorable effects throughout the economy.

A quick correction of particular interest to **Gay Milius** and all you radio hams — Gay's call letters are W 4 N J F — and not as erroneously reported in December.

If you haven't seen Time's article on **Ted Okie,** dig out the November 24th issue and turn to page 83. Ted is president of J. M. Mathes, Inc., a New York advertising agency, grossing over $20 million annually. He is described as "warm, handsome . . . easy-mannered man" who believes in people and in what he calls "the citizenship side to advertising." It points out that he "makes Madison Avenue fictional stereotypes seem as contrived and unreal as vaudeville backdrops." That should be enough to whet your appetites and get you to read the full tribute to Ted whose picture (for those of you who haven't seen him recently) accompanies the article.

Kent Rhodes, director of manufacturing and distribution for Reader's Digest, is the new chairman of the Magazine Publisher's Association. Kent has been in magazine production work ever since graduation — with Time and Life, production manager of Fortune in 1936, and then to the Digest in 1944. He is credited with fostering his publication's use of a new rotary web offset press for high speed printing in five colors. This was back in 1946 and represented a gamble of some $1,000,000. Kent's faith in this type of press, originally adopted for printing of overseas issues in countries where color reproduction facilities were limited, has paid off many-fold both for his company and the graphic arts industry, since it represents one of the major factors in the industry's post-war adoption of offset printing. Another innovation by Kent was the installation of a Univac to increase efficiency in the accomplishment of another of his responsibilities — subscription fulfillment. As a result, the Digest was the first in the industry to have such a device and is well on its way to having its subscribers' names all on magnetic tape.

Actions of this nature lie behind his selection to this high post in the publication field. In this additional assignment, two of his goals are: the increase of magazines as advertising media; and, the promotion in Washington of an atmosphere more understanding of the problems of advertising and publishing. Kent and his wife, Christine, live in Bedford, N. Y., with their two boys and a daughter, aged five, four and two. His hobby is skiing, both snow and water, the latter of which we understand he uses as an excuse for frequent jaunts to Nassau.

Johnny Monagan, in acknowledging the official class congratulations on his election as Congressman, says election day "was the first time, since the Republicans stole the election to the Presidency from Tilden, that the Democrats got control of the House in Connecticut — 1876 that was." John got a big bonus on his paid admission to the Princeton game by sitting on the Princeton side next to the Tigers 1934 football captain and watching him gnash his teeth.

R. L. Dickson '33, formerly Administrative Vice President of the Walter Kidde Co., has been named Kidde's new Executive Vice President. He is also currently president of the Controllership Foundation Inc.

Another victor in the field of politics is **Bob Coulson** by his reelection to the Illinois State Legislature. After leaving Hanover, Bob graduated from the University of Chicago Law School in 1936. He was assistant State's attorney for four years and subsequently Mayor of Waukegan for eight years. This is in addition to five years as an infantry officer, Lt. Colonel, and an OSS agent in China during WW II.

Stan Colla has been appointed as Resale Sales Manager for the New England Division of Socony Mobil Oil Incorporated. He has been with Socony Mobil for 26 years and lives with his wife, Adele, and their son, Stanley, at their new address — 2 Ivy Circle, Wellesley, Mass. His other son, Coleman, graduated from Dartmouth last June.

Johnny Rockwell writes that he recently had lunch with **Sam Black** in Chicago where Sam was involved in some patent litigation for the Stanley Works for which he is General Counsel and Secretary. John, a partner in a Chicago law firm, says Sam is one of the younger looking members of the class. One of the luckier members of our class is **Bob Fairbank** who has two sons in Hanover: Robert L. Jr., a junior, and Jonathan T., a freshman. Bob Jr. is majoring in geography and history and is on the varsity basketball squad. His Dad says, "he is fighting for a position as guard and hopes to see some action this coming season." We hope so, too. From what we understand, he will see quite a lot. The younger son, Jon, participated in wrestling as his main sport in high school and plans to engage in freshman wrestling when it starts. An outdoor enthusiast, he is already in the D.O.C. and Cabin and Trail, has already been on several trips and is looking forward to learning how to ski. Both boys feel that the new three-semester system makes real sense by permitting greater concentration on three courses, instead of five, at one time.

Two other '33ers with the magic touch are **George Davis** and **Mel Katz.** Both have two sons in attendance. George has Dix F. in the senior class and George A. in the sophomore class. Mel's boys are Leonard W., a junior, and Robert S., a freshman, about whom you read in the December Newsletter.

According to our records, **Bob Taylor** has the distinction of being, not only the first '33er to have a son at Dartmouth — Robert R. '55 — but also, the first grandfather in the class with a grandson born November 23, 1955. Can anyone beat that? He has another born May 3, 1957. **Bob Doscher's** son Crile was the second '33 son of Dartmouth, being in the class of 1956. With the class of 1957, we began to roll and had four '33 Dads represented: **Phil Byers** — Philip C.; **Burt Hack** — Bruce H.; **Sam Lovejoy** — Sam, Jr., and **Dan Rollins** — Philip A.

Proud fathers with sons in the class of 1958 are: **Bill Clark** — Stuart C.; **Stan Colla** — Coleman P., now at Thayer School; **Al Gemberling** — Bruce A.; **Fran Harrington** — Fran Jr.; **Ken Spang** — Aubrey M. Marchard at Tuck; **Van Van Deusen** — Hobart D.; and **Charlie Webster** — Philip C. 1933 is further represented in the classes currently in school by two in the senior class, nine juniors, five sophomores and twelve freshmen. We'll list those by name in subsequent issues. In the meantime, we'd like to have these fathers write us about their respective sons' Hanover activities so that we can include this information in these columns for the rest of us who are naturally interested.

Incidentally, you fathers with sons in Hanover and too far away to get to Hanover to see them should let your secretary know if you would like us to make personal contact with your sons for any reason. We can do it either personally or through classmates in Hanover or others in this area who get to Hanover frequently.

One of our brethren, who shall go unnamed, reports that a recent issue of Skiing carried a picture including **Dick Goldthwaite, Tom Mann** and **Bill Dewey.** The sub-caption mentioned them as some of the "original prototypes of the wide-open technique." Our informant's comment, "Very appropriate, I would say," is subject to your own interpretation.

Bun Mudge, guidance counselor at Boston University and former football great at Amesbury, Mass., High School, was scheduled to emcee the annual citizens' complimentary banquet to the football squad and present the letter sweaters.

Latest address changes are: Edwin H. Jackson, P. O. Box 27, Fort Worth, Texas; Edward S. Lord, 173 Summit Ave., Upper Montclair, N. J.; Robert S. Sands, Superior Oil Co., Apartado 168, Maracaibo, Venezuela; and Ferdinand G. Galbos, R. D. #1, Newbury, Ohio.

'34

Secretary, HENRY WERNER
120 Broadway, New York 5, N. Y.

Treasurer, WILLIAM L. WILSON
Hovey Lane, Hanover, N. H.

I would like to acknowledge my thanks to so many of you who were kind enough to send **Bill Wilson** your class dues and append an item or two about yourselves. In looking over the Treasurer's shoulder I see that **Dan Bordett** who hasn't been heard from in many moons came through with his dues and we cordially welcome his return to the loyal group of '34. The same fine sentiments to **Bob Reschke** also a nongraduate but a contributor to the Alumni Fund. It's always good to see a rallying of the tribe. We hope it's the approaching Reunion that brings out the best.

Our literary globe-trotter, **Ernie Barcella** flew to Brussels in seven hours and nineteen minutes from Baltimore. He was on the pre-inaugural jet clipper flight of the Pan-American Overseas Airways. We saw another world wanderer, **Jerry Danzig,** on a two-hour television show. He was recounting his experiences on his recent trip to Russia. Jerry was far more interesting and observant than the two other travelers who were also on the program. Too bad this occurred during the newspaper strike in New York City with the resulting lack of publicity. We told a lot of people to look in at the wrong hour.

From likable and lovable **Phil Glazer:** "Following the Big Green via newspaper. They seem to be doing right well but I wish I

had the opportunity to see them in action." From always amusing and a maestro in any field, **Jack Gilbert:** "Sorry Jane and I couldn't get up to Hanover this fall. We had just returned from a wonderful trip to Colorado Springs. See you in June." Also planning to "reune" is **Bill Gilmore** whose oldest boy, Bill, is at school at Verde Valley in Sedona, Ariz. His son, Tom, is the top backstroke swimmer in the state in his age group as well as being one of the best junior horsemen. Tracey (the nine-year-old girl) is almost as proficient. Bill says that **Dick Benedict** has moved into the neighborhood from Los Angeles and they get together once in a while.

Dick Wells back in October wrote: "The ducks and pheasants are flying up here (Wayzata, Minn.) and golf clubs are being put away. Thermal longies and storm coats are brought out of the mothballs and winter is on the way. The ALUMNI MAGAZINE and Newsletters are so welcome as we seem sort of far away."

A short note from **Tom Cass:** "Still doing business at the same old stand and as the older members of my harem approach college age there seems to be a renewed interest in Dartmouth around the house."

A somewhat longer and very welcome letter from **Dr. Johnny Spiegel** with a new address, 10 Channing Place, Cambridge, Mass. Johnny and Babette have three children in college. Heli is at Swarthmore '60, Adam at Haverford '62 and Mary at Barnard '62. Their youngest, Polly, attends Shady Hill School. Last year Johnny received an appointment as associate clinical professor of psychiatry and divided his time between teaching at the Harvard Medical School and in the Department of Social Relations at the college. This year he is taking a leave of absence from all teaching and lecturing in order to write a book about the four years of research which he has carried out with Dr. Florence Kluckhorn on the relation between mental illness, family structure, and the social background of the family.

We missed the presence of Gert and **Nelson McClary** in Hanover last fall. This was satisfactorily explained in a note which said they were passing up the Penn game for the victory at Cornell. Life goes on serenely in their neck of the woods, Constable, N. Y. An almost identical explanatory card from Marian and **Mike Joseph** looking forward to and promising to be back in June.

The Practicing Law Institute in New York City has been featuring the lectures of **Sey Lewis** partner in the well known law firm of Rosenman, Goldmark, Colin & Kaye. Sey who was formerly Special Assistant to the Attorney General in the Antitrust Division of the Department of Justice has been clarifying the interrelation of the Sherman, Clayton and Federal Trade Commission Acts for both lawyers with little experience in the antitrust field and for the experienced practitioners. Hope to be able to hear one of his talks in this very important area of the law.

John Foley in his capacity as personnel counsel of the New England Electrical System spoke to the guests of the Lynn Industrial Management Club. This organization is composed of men in supervisory capacity representing top management of the Greater Lynn industries. We have never congratulated John (and we apologize for the oversight) for receiving the Berlin Award given each year by the Holy Cross Institute of Industrial Relations to those men who have made significant contributions to the field of industrial relations. We also take this opportunity to felicitate **Jack Dineen** on adding another directorship to his already impressive list. This time he has been elected a director of the Rockingham National Bank of Exeter.

I read in the Hanover Gazette that **Spike Fulton** is exceedingly happy with his new work as teacher of social studies in the Hanover High School. He has always taught where outdoor living could be combined with school work. Deer hunting is a favorite pursuit of his with bow, rifle or 8mm movie camera. Effie, his wife, is active in Girl Scouting and a full time job looking after Judy, Tom and one-year-old John. I think **Dick Gruen** is counting on them to help with some of the youngsters in June. My intelligence scouts tell me that another scholar of ours is **Joe Slechta** who is now teaching at Tulane and is a candidate for a Ph.D.

Am sure that the recent strike among the New York City papers permitted some of you to catch up on your book and magazine reading. I enjoyed "From The Terrace" by John O'Hara and "Exodus" by Leon Uris. Hope the rest of you saw the "Sports Illustrated" special holiday issue of December 22, 1958. The article on the Silver All-Americas was a honey. **Bill Embry** received one of the 25 awards made to those college seniors of a quarter of a century ago who won their letters in football and who have most signally distinguished themselves in American professional, business and community life in the generation since the fall of 1933. Bill richly deserved this honor although I'm sure some of his Dartmouth team-mates were equally well considered. Bill recently merged his own company, the Embry Container Corporation into the Alton Box Board Company. He is now the General Manager of their Louisville Container Division. I don't know where he finds the time to handle all the civic and philanthropic work and at the same time serve as a member of the Dartmouth Alumni Council as well as President of the General Association. Also selected were Art Lane of Princeton and Larry Goodyear of Yale, both of whom were classmates of ours at Harvard Law School. Bill is only the second Dartmouth man selected. As I recollect **Rolly Morton's** brother, Bill, was the first.

At the risk of being called a name dropper I will now mention two wonderful guys who have recently dropped me a line. One was **Sam McCray** a senior partner in the Dayton, Ohio law firm of Vradelis, McCray and O'Hara. He thanked us for our interest in his son Alfred, a member of the present freshman class. The other w.g. was **Bill Haist.** He, too, is the father of a Dartmouth freshman, Dave Haist. He and Dorothy have a daughter Linda, who is a junior at Skidmore. Bill has moved from Connecticut to Michigan and his stationery bears the emblem of Detroit Controls, a division of American Standard.

John H. Irish '35 who has been manager of the Swift & Co. plant at Scottsbluff, Neb. since 1956 has been made manager of the New England Dressed Meat and Wool Co.

The punch line from my January column was excised. That's why it looked so bare. My editor should know the only person who likes to have his sentence interrupted is a convict.

'35

Secretary, MILBURN MCCARTY
17 East 45th St.
New York 17, N. Y.

Treasurer, FRANCIS C. CHASE
62 Prince St., West Newton 65, Mass.

Far different from the usual routine of our friends who are businessmen in New York, or lawyers or doctors in Boston or Chicago, is the life of **Morris P. Sherman,** a classmate of ours who now lives in Mayaguéz, on the western coast of Puerto Rico.

Morris (known as "Mush" in undergraduate days) originally came from Westchester, but by the time he got to Dartmouth he had developed a very definite interest in the Spanish language and Spanish-speaking people. He worked for a short period in New York after graduation, but in '37 struck off for the Caribbean, ending up in Mayaguéz with an $80 a month job, and the opportunity of living with a native family so he could perfect his Spanish.

Morris now has a handkerchief manufacturing business under his own name in Mayaguéz, and lives high up in the mountains outside of town, where he also manages a chicken farm.

When Nell and I were in San Juan recently, Morris invited us to fly over one Sunday for a party. The trip from San Juan to Mayaguéz took only thirty minutes, and Morris met us at the airport and drove us the short distance up the mountains to his home. There we were greeted by his attractive wife, Helen, and the Shermans' two children, David, 14, and Ann, 12. Their modern ranch-type house nestles in a sea of giant poinsettias and waving sugarcane, and from their veranda you get a magnificent view of the Caribbean and the Atlantic — at the same time!

Morris' handkerchief business is principally one of converting materials sent down from the States. He has 40 to 50 regular employees, and 100 or more part-time ones. The chicken-raising was started principally for fun, but has developed into a real business, and Morris proudly took us on a tour to show us some 5,000 chicks and the modern scientific methods he uses in raising them. Generally, Morris has baby chicks (only a few days old) flown in from Florida, and after raising them to fryer or broiler size, sells them in the local markets.

Besides the chickens, the Shermans keep horses and cows, and also raise boxer puppies. Growing in abundance about their house are bananas, papayas, several varieties of beans, mangoes, and various other fruits and vegetables.

Helen was the daughter of an American Army officer who had retired in Puerto Rico, and she and Morris met and were married back in the late '30's. She was a commentator on a local radio program for several years, but now gives her full time to running the house and helping Morris with the chicken business.

There is a saying in Puerto Rico that a party in Mayaguéz, once started, is likely to last a week. The measure of the Shermans' hospitality that day, and the conviviality of their friends who gathered to greet us, was indicative that this might be so, but unfortunately we had to catch a late plane that afternoon back to San Juan. If any of Mush's old friends get to Puerto Rico, we suggest they give him a call....

Helen and Morris Sherman '35 entertain Nell and Milburn McCarty '35 (center) at the Shermans' mountaintop home outside of Mayaguez, Puerto Rico.

Two other '35's who have spent some time in Puerto Rico are no longer there: **Howie Croninger** was moved on down to Montevideo, Uruguay, by his company, General Electric, and **Elmer Adkins,** formerly with the F.B.I. office in San Juan, has moved on to another post and we were unable to get further information on him.

'35 REPORTS

Bucks Weil, from Montgomery, Ala.: "Still in cotton business and in midst of one-year term as president of the American Cotton Suppliers Assn. **Win Garth** is doing big job for Deering Milliken."

Bill Lionett, who was voted "busiest" man in our class in our senior year, keeps up the same pace. He reports from Worcester, Mass., that he is currently "Wage Administrator of Norton Company, world's largest manufacturer of abrasive products; Treasurer, Wachusett Regional School District; writer of a weekly editorial for local paper; and instructor in Worcester Junior College. . . ."

Dr. Phelps Luria writes from Far Rockaway, Long Island, that he has "moved to a new house at 218 Broadway, Lawrence, L. I. Intend to have my office in wing of the mansion. Please come down for a visit. I won't charge you."

Marvin Rauch, also from Far Rockaway, writes that "Luria and I have been desperately clinging to our past and our hair. **Charlie Lebeaux** is my sister-in-law's professor in Detroit. Been keeping busy with orthodontia and teaching at N.Y.U. Dental."

From **Sam Milesky,** a specialist in teaching handicapped children, and who is headquartered in Madison, Wis.: "Spent a week recently in Northampton at a meeting of American Executives of Schools for the Deaf. Now I'm going to Minneapolis in January to help advise University of Minnesota on training teachers of the Blind."

NOTES FROM HERE AND THERE

From Galesburg, Ill., comes the news that **Charles William Kempf** was recently married to Miss Betty Jeanne Grahn. Kempf is a supervisor at Gale Products in Galesburg, and the new Mrs. Kempf has also been working with the same company. This column has no record of Kempf having been previously married, so must conclude that he is one of the last of the bachelor hold-outs.

Ted Harbaugh reports that he spent an evening recently visiting **John and Lee Howe,** who are temporarily back at their home on Long Island after a sustained tour abroad for the United Nations. "John has done a great deal to build respect for the United States among foreign people who don't know us well," reports Ted. "I think the class should take note of men like him who have performed a service which benefits us all."

Dick Muzzy, mentioned recently as an officer of the Daggett Chocolate Company, has, according to a late report, been made president of the Cambridge, Mass., candy concern.

Stan Britten, sales director of the Rubberset Company of Newark, N. J., has been elected second vice president of the Sales Executives of Northern New Jersey. Stan also serves on the board of the First Federal Savings and Loan Association of Westfield, N. J.

Nationally known ski consultant **Sell Hannah** has been one of the developers of the new million-dollar ski center scheduled for Saddleback Mountain at Rangeley, Me.

Al Sherwood, New York CPA, was recently publicized in the Westchester newspapers for his fine performance in an amateur production of "The Man Who Came To Dinner."

Doc **Cliff Mills** elected President of the Norwald Medical Society, also appointed to the Westport Advisory Board of the Connecticut National Bank.

Brad York left McCall's Magazine to become a sales executive with Life.

'36

Secretary, JOHN A. SAWYER
287 Rutledge Ave.
East Orange, N. J.

Treasurer, FRANK T. WESTON
753 Upper Blvd., Ridgewood, N. J.

Christmas cards and news gathered from mutual friends at Christmas parties have refreshed my mail bag. Thanks to so many of you who sent cards to Nancy and me this year. Two former '36 class secretaries, **Dick Morton** and **Norb Hofman,** have been very considerate in sending along news of classmates. Norb, who is promotion director for McCall's Magazine sent me the photograph of **Charlie Brooks** and his family that appeared in this column in December. **Dick Morton,** who is an advertising representative for the Saturday Evening Post has sent a number of clippings throughout the year including a recent photograph of **Steve Stiles** and two associates in the National Wholesale Hardware Association of which Steve is president.

Wedding bells have rung for **Jim Gidney.** One of our most desirable bachelors took the step on November 16 when Jim married Mary Ruth Ritchey in a Baptist ceremony at the home of the bride's parents, Mr. & Mrs. Jesse S. Ritchey of Wellsboro, Pa. The bride is a graduate of Mt. Holyoke and has a Master's Degree from George Washington University. Jim has a Master's Degree in psychology from Columbia and is employed by the Cuyahoga County, Ohio, Juvenile Court. His brother John A. Gidney '41 was best man. Mr. & Mrs. Gidney will reside in Shaker Heights.

Clarence Mark Jr., who is now vice president and director of his family's multi-million dollar water well supply company, Clayton Mark & Company in Evanston, Ill., has two sons who have made their "mark" at Notre Dame. The older son, Tom, graduated last June and is now working on his Master's Degree at Northwestern in Business Administration. The number two son, Jim, is a freshman at Notre Dame. Clarence also has three beautiful girls in his family, one is his wife, the former Germaine Dreis, whom he married in 1935 and his daughters, Mary Jean and Kathleen, who are in high school and grade school respectively.

Joe Berman has been appointed vice president of the New England Football Officials Association. Joe is a teacher in the high school at Hull, Mass. — **George McCleary,** who was formerly manager of advertising and sales promotion of the Film Division at the Olin Mathieson Chemical Company in New York City, has been transferred to their paper plant near Asheville, N. C. — **Gil and Fran Balkham** have moved into a new home at 153 Tahlulah Lane, West Islip, Long Island. Gil is on the Dartmouth Club of New York's bridge team this year, continuing his masterly interest in the game. — **Dr. Joe Haddad** has returned to our old home town of Waterbury, Conn., to practice. His home is 603 Bunker Hill Ave., Waterbury 8, — **Al Bunker,** who is with the Marketing Division of Standard Oil Co. of California, has moved from Seattle to 19 Coleman Place, Menlo Park, Calif. Al's office is at 225 Bush St., San Francisco, in case you're travelling near the Golden Gate. — **Dick Crosby** leaves on February 1 for England on his sabbatical year from Colby Junior College where he is a professor of English — **Gordon Gregory** has moved down to 504 South Highland Avenue in Champaign, Ill., and **Blair Rainey** is out at 2472 East 23rd St., Tulsa, Okla. — **Oliver P. Brown** is division merchandise manager of the Carlisle Allen Co. in Painesville, Ohio. "O.P." married Mary Hart in Salem, Mass., in 1942 and they have six children. The sixth, is news to this column, and is a girl to follow the five boys. The older two sons, O.P. III and Stephen Russell, aged 17 and 16, have their sights set on

the Hanover Plain. The Browns live at 812 Marshall Drive, Painesville, Ohio.

If you know what Ophthalmic Inventories are you know what **Bob Eaton** manages, for that's what he does at the American Optical Company in Southbridge, Mass. He also serves as instructor of advertising and statistics at Nichols Junior College in the nearby town of Dudley. Bob has just reactivated the P.T.A. in the Junior High School in Dudley, Mass., and for his efforts he has been made president and his wife, the former Caroline Stewart of New Haven, Conn., has been made corresponding secretary.

Joe Schaeffer is Director of the Rehabilitation Institution of Detroit. This is a move by the good doctor from Peoria — **Fred and Lib Gonnerman** with their four children are settled down at 5701 Rockmere Drive, Washington 16, D. C. Fred commuted from Saddle River, N. J., to Washington for nearly a year, before he sold his beautiful home in the country. Fred has his own company in the Munsey Bldg. representing industrial firms to the Federal Government — The Cummins Engine Company, Inc. of Columbus, Ind., has placed **Reece Hatchitt** at the top of their Cummins Diesel Export Division to explore the possibilities of establishing additional manufacturing plants in Europe, the Far East and Latin America. Reece was formerly director of foreign operations of Dresser Industries in Dallas, Texas. — **Roy Adams** passes along the information that you can always tell a lady because she will sit side-saddle on a bar stool.

'37

Secretary, ALAN W. BRYANT
25 Old Stamford Rd.
New Canaan, Conn.

Treasurer, ARTHUR H. RUGGLES
17 High St., Greenfield, Mass.

As I promised last month, **Frank Danzig** was trapped into writing this month's column. To gather his information, he ran a "West Coast Survey," the results of which, in Frank's own words, are presented herewith:

From the Far West, where 46 members of the Class of 1937 pitch their teepees, greetings. Seldom seen, not often heard, some have smog in their lungs, others rainwater in their thinning hairlines. But 83% of them believe that the West Coast is by far the best place in which to live, and these and other facts come from the just completed Class of 1937 West Coast Survey, with slightly less than two-thirds of all precincts reporting.

Nevertheless, 63% voted "yes" to the question, "my wife says I wear the pants in the family" and 60% voted same to, "I believe I wear the pants in the family." Figure that one out.

Out in the Far West, your classmates expect to retire at 70.6 years of age; now have 2 children; own 1.6 cars; 1.3 TV sets, 4.5 radios; expect to vacation 2.7 weeks this year; are 83% Republican; widely favor the Dodgers and the Rams; overwhelmingly read Time Magazine; smoke eleven cigarettes a day; and prefer Bourbon.

Up San Rafael way, **Art Falk** is now Superintendent of Disability Claims with Fireman's Fund Insurance Co. in Frisco. He reports that he and wife Bette visited **Connie** and **Mary Schuck** in Buffalo awhile back. And attorney **Eric Rafter** in Hermosa Beach has another grandson and/or granddaughter on order for April, 1959. He challenges **Hal Evans** to match that one.

Fifty percent of your classmates from out this way hope to attend the 25th reunion; 64% are bullish about the stock market; and 91% claim "my boss is a good guy."

Speaking of apples, up Washington State way, **Phil Swain** says he ran into **Dave Rainey** (of Mansfield, Ohio) who in turn ran into **Bob Hahn** (of Fair Haven, N. J.) who said he was going to Reunion this past spring and didn't. How come? Phil has a daughter graduating from Stanford in 1962.

Milton S. Johnston '36 has been named assistant general manager of the eastern area for General Package-Foodtainer Division of the Diamond Gardner Corp.

Regarding television (no two of your classmates have the same favorite show) 43% feel their family spends much too much time watching the little black box.

Don Frank in Los Angeles reports he is book-buyer for Vromans, largest book wholesaler on the Coast, and third largest in the nation. **Stu Naramore** (same area) writes that last summer he made his first trip to Connecticut since coming West in 1951, and briefly visited Hanover. He reports "I have been with the Inspection Department of Weston Hydraulics, Ltd. since 1951, where I am a very important, over-paid, nobody." (Don't you believe it. — Ed.) Stu reports seeing **John Palumbo** from time to time, and John reports seeing Stu from time to time. Figures. John writes "What we need are more Kim Novaks — sympathetic ones for the unclaimed single men of our class."

Incidentally, 50% voted "Brigitte Bardot is the greatest," 38% said this was not so, and on this important issue, 12% didn't vote. DIDN'T VOTE?

Ed Skowrup, an Investment Counsellor in San Marino, claims that "Dartmouth needs more men from west of the Mississippi." While **John Follett** in Sacramento "hasn't seen a '37 man in 10 years."

"I work so hard I deserve more money" brought an astounding 79% vote in the affirmative, while only 30% admit "I drink too much." I wonder why the workers don't start to drink?

Carl Stern, an investment banker in San Francisco, recently saw the late **Tom Cohen's** parents who visited San Francisco over New Year's. He reports seeing **Frank Rothschild** in Chicago this past fall. And from **Art Hislop:** "Between commuting to San Francisco, pruning my orchard of apricots, and struggling with 6th grade arithmetic, I manage to stay out of trouble. Kitty and I have three boys, ages 11, 10 and 7. Hope they all go to Dartmouth. We shall all be present at the 25th."

Concerning the statement: "In thinking it over, I really behaved myself at Winter Carnivals," 62% of the West Coast '37ers said they did, but how about the other 38% who didn't?

And how about **Clint Doriss,** ex-1937 whom many of you will remember from freshman year, who modestly wonders why he's being queried? Clint writes "hello" to **Brad Petersen** whom he hasn't seen since 1935. And Brad Petersen, one of two brave West Coasters to attend the recent class reunion, spent some time in New England thereafter, and then lost his appendix. Patient now fully recovered and still a big legal-eagle at Columbia Pictures and Screen Gems. From **Rod Harloe** unfortunate news that "my wife has been a very sick gal for the past few years and I have been sticking close to home. Did get up to Hanover and Lyme Lodge a few summers ago, and hope to make it again this year."

"Rock and Roll is on the way out." Them's the happy sentiments of 63% of your classmates in the Far West.

Harry Bamford, a lawyer in San José, writes "We live in Palo Alto, a community whose schools are reputed to have the highest intelligence level in the U.S. My wife tells me we have helped to swell this depressing statistic. Need I tell you that she went to Vassar, and that my evenings are lonely baby sitting during her numberless alumnae meetings." From Oregon, **Don Bauer** notes that the steelhead fishing this winter will be the best. He claims he caught and released lots of 'em over five pounds last year, and that fishing for steelhead "can be done resting in a boat (strictly for cardiacs) or wading — and that is the secret of our trim physiques in Oregon, I think."

Incidentally, 49% of the Westerners feel that Southern California is over-rated. Turnabout: 49% feel that it rains all the time in the Northwest.

Bob Cone has joined the home office staff of Security Title Insurance Co. in Los Angeles and is busy learning the intricacies of the 27 counties in which this giant outfit operates. Bob reports a daughter, Carol, who is a junior at Stanford "and doing much better than I did with the grades." Another daughter, Marcia, is a sophomore at San Marino High School "and both of us are having trouble with plane geometry." Bob is an interviewer for Dartmouth admissions but says that "all the top high school football players go to Cal or Stanford." From Menlo Park comes the refrain from **Morse Cartwright:** "I don't get around much any more. Reason: My wife, Sally, a converted Californian, and I, a dyed-in-the-wool native, are wrapped up in our two adopted native Californians, Susan Roberts, born May, 1956, and Peter Morse, born December, 1957." And from Riverside and **Dave Mann** who enclosed a Christmas card photo of two most attractive gals: "These are our two teenagers who will hardly qualify for Dartmouth. We have been in Riverside for five years now and are very happy here. Please keep your LA smog at home rather than sending it all in this direction." (What will we do with it? — Ed.)

In regard to living costs, 87% felt they are higher in the West, according to the class Coast Survey. And 21% felt that the A Bomb changed the weather pattern out here.

George Loff's first novel, "The Fork in the Road," will be published early in 1959. His instructions to all men in 1937 — "Buy it. And rave about it." Dr. **Bill Thomas,** sole representative of our illustrious class in the fair (weather) city of Portland, never can honestly say he runs into anyone from '37. However, he writes that a year ago in the Middle West he had a nice visit with Dr. **Jack Richter** in La Porte, Ind., and also with **Brice Sheets** in Rockford, Ill. From **Bill Miller** in Los Angeles, where he's a management consultant, a nice invite for lunch (for the whole class, Bill?) and the report that he recently ran into **Bill Tongue** who is living in Chicago and is an economist for the Jewel Tea Company.

In a most gracious frame of mind, 80%

of the 1937 Westerners voted that Eastern education is generally superior to that offered in the West. And because they're in good shape, only 30% noted that they needed to go on a diet.

Bob Ekin from San Lorenzo claims "we have a good group here in San Francisco. Come up and see us and get the smog out of your system." And a final note from **Charlie Schaff,** a confirmed Southern Californian: "Outside of an occasional glimpse of **Eric Rafter** and **Brad Petersen,** I don't see many '37ers. Still am employed by Hughes Tool Co., have the same wife, Fern; and the same children, Susan, 14, and Carol, 8." And then he adds, "The other day I ran into **Frank Danzig** who is living in sin and luxury and seems to be doing a job as a pitchman and highbinder." (T'ain't true, Charlie, but thanks.)

And thanks to all the Class of 1937 guys on the West Coast for coming through with the survey and the notes to make this column possible. The response was terrific. And despite all this jazz, only 40% wish they could go back to college and start all over again. How about that?

'38

Secretary, MARTIN R. KING
2945 Fairmount
Cleveland 18, Ohio

Treasurer, PETER SCHAEFFER
Purchase St., Purchase, N. Y.

Advertising men among us often judge the effectiveness of mailing pieces we send out by the reactions we receive when we discontinue the mailings. We consider our stuff good when someone writes they miss it. On this criteria you fellows like the Alumni Notes Column you've been reading since the fall of 1938. The lapse in December notes has caused near violent reaction. I'm amazed that the **Baron** didn't up and fire me in behalf of his Peers, the Class Executive Committee; or, at least, rub in the flawless job done by **John Emerson** and his predecessors. All Baron did was ask: "It's none of my business, but what in 'ell happened?" Then **Pete Schaeffer** whispered, via mail: "Undoubtedly, all your faithful correspondents let you down as usual and you were minus any material." **Colonel Charlie Hathaway** followed the same tack. He said: "Our Class seems to be unusually worthless, or perhaps I should be saying reticent about sending news to the Secretary."

Boy, do I feel like a heel. But we explained this all in the last issue, and the case about rests. Guilt lies with a tiny boy named Toddbo. He is very intelligent, and I think he burned up the notes to make each of you write more often.

The Professor, John Stearns, our Class Advisor and now head of the Art Department, spoke at a Cleveland luncheon Christmas week for alumni and 1963 applicants. Scholar John is fit, trim and alert. He paints a fine picture of excellence for Dartmouth in the days ahead. Perhaps the years have mellowed him some. After lunch he told me 1938 was a fine class with "not so bad" a gang.

Sox Calder, says the Montclair, N. J., Times, has been re-elected a Director of the National Paperboard Association. This is an industry-wide post for the president of the Union Bag and Paper Corporation.

Russ Dow, whom I believe lived in Crosby while at Hanover, voted for Alaskan statehood and will cast his first vote for President in 1960. Russ' address is Box 667, Palmer, Alaska, where the Dows experienced a damaging flood last summer. A new home site was inundated causing building delay until late this spring. Good luck, Russ. Write and tell us if you really have it all over Texas up there, **Henry Beck** would really like to know.

Class Treasurer, **Peter Schaeffer,** writes "that my dunning activities for the Class Treasury have been quite successful this fall. I don't have the exact count on the men who have sent in their Class dues and subscription fees for the ALUMNI MAGAZINE, but it seems to me we are 15 or 20% ahead of last year." — Good, Pete!

Leighton B. Tuck '39 has been elected Vice President in the real estate loan section of the California Bank of Los Angeles.

Bob Tomlinson has forsaken the contracting business in Bridgeport, Conn., and is teaching at a Junior High in Amsterdam, N. Y. His address is 13 Matthias Avenue there.

Wellington Wales is now hanging his hat at 2 P Bjerge Gade, St. Thomas, Virgin Islands, and **Benjamin N. Baldwin,** now office manager for Armour & Co. in this area, has joined the Cleveland Glass contingent and is living at 3395 Superior Park Drive in Cleveland Heights.

As **John Emerson** used to say, we have reached the bottom of the shoe box, and we hope some of you will take pen in hand and send in some news to fill it up again, or we won't have anything to report in these columns next month.

'39

Secretary, ROBERT L. DAVIDSON
1908 Coolidge Dr.
Dayton 19, Ohio

Treasurer, JOHN L. COULSON
15 Meridan Pl., Huntington Station, N. Y.

The balance of our class records arrived the day after Christmas in three boxes via parcel post. One box labeled S & W Southern Yams contained some 700 cards with vital statistics circa 1953 on each of you. A Brooks Bros. shirt box contained a scrapbook of 1939 clippings from the ALUMNI MAGAZINE apparently assembled by **Dick Jackson** covering our class from graduation through the year 1949. The third box which once contained a suit from J. Press revealed eleven manila folders full of correspondence from predecessors extolling the difficulties involved in keeping our class cohesive during the years of World War II and since.

Having spent the major part of the day scanning these frustrated pages of ancient lore, I've come to a few conclusions:

1. A pitifully small percentage of our classmates, and not necessarily those who were undergraduate politicos, have toiled long, laboriously, and unselfishly (i.e., with no aspirations for personal gain), to keep the balance of the class informed, unified, and competitive.

2. The average classmate is unaware of the personal interest Dartmouth takes in its graduates. He is unaware of the constant detailing and surveillance of the Alumni Records Office in his every activity and progression since graduation.

3. Snobbish sophistications engendered as undergraduates tend to melt with each successive postgraduate year improving class cohesion — particularly during periods of reunion. But, this spirit is difficult to motivate and manifest itself "between" times.

4. We are sentimentalists, and the College counts heavily on this, both to keep us working on its behalf and for financial support. Nostalgia frequently substitutes for current common interest, but there is a sort of religion in this. We can use more of it.

5. As a class (except for that pitifully small percentage), we haven't the foggiest idea how we administer ourselves.

These learned gleanings were quite evident from the files of our past secretaries beginning with **Bob Gibson** after graduation and shunting (illegally frequently, as far as our "constitution" was concerned) through the "acting" secretariats of the war years, **Jackson, Dickgeisser, Falconer, Hirschland,** then, after the war's end, back to Jackson again. It was during our Tenth Reunion when legal order was restored and Topliff Hall needed restoring afterward. But even then something went amuck, and by December '49 **Chuck Grant,** the legally elected chairman of our executive committee, finally announced the committee's appointments of **Tom Brooks** as secretary, **Don Wheaton** as treasurer, **Dunc Farr,** class agent, and **Bert McMannis** as editor of the class newsletter. As the constitution describes the duties, this fortunate cabal was privileged to administer the class until the Fifteenth Reunion in 1953.

By then, we "unanimously" elected our legal limit of eleven on the executive committee: Jack Graham, Jim Corner, Jack Coulson, Al Bodge, Bob Sullivan, Dick Clark, John Perry, Bob Dickgeisser, Irve Naitove, Charlie Neer, and as chairman, **Rodger Harrison.** The committee then appointed **Vincens** as secretary, cajoled **Wheaton** into stringing along as treasurer for a few more years until someone could be trained to understand his double entry system, ultimately made **Browny** class agent.

When our Titillating Twentieth arrived last June the well greased administrative wheels of our organization had already appointed a three-man nominating committee whose slate received no opposition from a one-party class system robust from breakfasting on bloody marys. The new and current executive committee: Coulson, Cumming, Harrison, Darby, Naitove, T. Brooks, Endy Smith, Wakelin, Vincens, Wyman, Merriam, and as chairman, **Bud Clifford.** Appointed as secretary, **Davidson;** as treasurer, **Coulson;** as class agent, **Merriam;** as newsletter editor, **Vincens.** These lucky beggars will serve until our 25th Reunion in 1964 when we hope there will be enough surviving classmates to usher in a change of faces.

Dispensing with class organization now for years to come, we hope, let's turn to class news. Your letters are flowing in like glue. In order to get choice tidbits of information, recipes, weather reports, etc., we may be forced to spend half the class treasury on these new expensive postal cards in order to bring our 1953 files up-to-date. You're all at least forty now and there's nothing to hide. In fact, there is probably much that can at long last be said. Share it!

On behalf of the 200th Anniversary Development Fund we had a most profitable visit with **Jack Reeder** last week. When Jack left Hanover at the end of his freshman year he attended a business college, went into the Army Air Force emerging a Major with many missions in medium bombers over Italy and Ploesti. He married, quit flying — in planes, that is — and entered the family's Dayton Coca-Cola Bottling Co. where he is now president. He is an ex-city commissioner of Dayton, Ohio, having resigned to escape the noc-

turnal phone calls of irate citizens whose garbage had not been collected. He and Ollie have a daughter and two sons, four horses, three dogs, a swimming pool and a small lake stocked with ten thousand bluegill. Their address is 200 Tait Road. Fishing is lousy, however.

A Christmas card from **Paul Winship** explained his and Sue's absence at Reunion. They were fixing up a cottage on the Cape. Windy escaped from Madison Ave. a couple of years ago to return to his first love, teaching English Literature. He is at the Holderness School in Plymouth, N. H. They have five kids.

Bud Finck sent a little card in a little envelope that I thought was an invitation to a cocktail party, but it turned out to be an announcement of the arrival of Kenneth M. Finck, born November 30, '58 and currently residing at 118 Paseo Contento, Nogales, Ariz. How many does that make, Bud?

Last night the Dayton Dartmouth Alumni Assn. entertained some thirty prospective freshmen and had the good fortune of having coach Bob Blackman as the guest speaker. If any of you can swing it through your own local alumni groups to get him, by all means do so. He's a fine guy with a lively sense of humor. He speaks with great conviction, and is a marvelous recruiter.

Arriving just in time to make the deadline is a wedding announcement. I know none of the particulars, but it reads as follows: Mr. Charles Philip Geyh announces the marriage of his sister, Marguerite Athalie, to **J. Moreau Brown** III on Saturday, December 20, 1958, at St. Andrew's Episcopal Church, Lincoln Park, N. J. At Home: 12 Omley Place, New City, N. Y. Congratulations, Browny! I don't know where New City is, but I think we've scooped the Records Office for once!

'40

Secretary, J. MALCOLM DE SIEYES
Hemphill, Noyes and Co.
15 Broad St., New York 5, N. Y.

Treasurer, DONALD G. RAINIE
88 North Main St., Concord, N. H.

While most of us are getting over the effects of the holidays and worrying about the bills still to be paid, **Hugh Dryfoos** is busily planning for Christmas, 1959! He is about to launch his Christmas ornament sales campaign for the next Yuletide and to start the machines turning to make the decorations that you and I will be purchasing many months from now.

Scott Dillingham writes from Warsaw, N. Y., that he is still selling textbooks for Macmillan. He is residing with his wife, two children and a foolish beagle. During the gubernatorial campaign, he worked hard at the local level to get out the votes for Nelson Rockefeller, a successful endeavor which he regrets will not excuse him from state income taxes. In calling on his clientele, he saw **Jim Malaney** in Buffalo between history classes.

Bill Sinclair says that he spent two wonderful weeks last August at **Bob Austin's** West Wind Village on Lake Winnepocket in Webster, N. H. He cannot wait to get back there next summer at the same time as **Dr. Bill Huffman** who will come east from Cleveland. It seems that more and more classmates are availing themselves of the Austin hospitality and their enthusiasm is contagious.

Dick Funkhouser has been working for over a year on the merger of several of his family's companies with the Ruberoid Company. The formal agreement was signed in October and the deal was finalized in January. From here on Dick will be on the Ruberoid payroll, but still based in Hagerstown, Md., we presume. He says that he hopes he never has to go through a merger again with all the headaches it entails, and he is already looking forward to trips to Lake Fairlee next summer where his four children will be in camp.

Bob Dingwall is a vice president of Charles W. Hoyt advertising agency. He is living in New York with his wife and has been spending some of his limited leisure time working on the capital gifts campaign. This endeavor has brought him into contact with various classmates. He reports that **Frank Orenstein** is in the research department of the advertising firm of McCann-Erickson, that **Tuffy Reeves** is knocking himself out with great success producing package television shows, and that **Dr. Alan Johnson** has dedicated himself to medical research at New York University-Bellevue Medical Center in New York. Frank and Alan are living in New York while Tuffy makes his home in Great Neck, Long Island.

Bob Reid is sales manager of the needle division of the Torrington Company in Connecticut. He is also in charge of the company's development program in Europe, which has necessitated a great deal of travel away from home in Litchfield, Conn.

Fred Eaton and extensive family have moved from Atlanta to West Palm Beach. From personnel work for Sears Roebuck, he has gone over to the management of that company's large new store. This may be a promotion, but it also leaves the Eatons wide open as a target for visiting firemen in the Palm Beach area. As soon as Fred's new address has been received, it will be forwarded to classmates upon request!

Bud and Louise Hewitt have returned from their honeymoon trip to Williamsburg, Va.; while **Joe and Joyce Adams,** having travelled the marriage road slightly farther, report that they are on the ragged edge of having their fifth child; and **Ron Woodbury,** still more advanced, is working on getting his son into Dartmouth.

Turk Lake will be going to Hanover in February to interview applicants for employment with Procter & Gamble. He is taking his family with him and plans to combine business with pleasure by taking to the slopes for a few days.

From the Laconia, N. H., paper:

The manger at the Christmas creche on the library lawn proved the only warm spot that a shivering dog could find Christmas Eve. The dog was found nestled in the hay among the artificial figures and animals paying homage to the Christ Child, police said. The dog was identified as a full-blooded boxer, belonging to Atty. Stephen S. Jewett. It is believed to have sought shelter from the severe cold, saving itself a long trudge home. The boxer is an inveterate follower of its master — who chose to remain indoors that night — and remains on guard outside his office door every day, and accompanies him, when allowed, on most trips about the city.

And now to close on a very serious note. It has been announced by the Hopkins Center Building Committee that the large Garden Court in the center of the group of buildings is under consideration as a memorial to those who gave their lives in the armed services between 1939 and 1948. As one of the three classes who suffered the most in the number of men lost (31) we have a great interest in this project. It indeed appears a fitting memorial — under the open sky and framed by flowers and trees. We feel certain that all members of the class will applaud this undertaking.

'41

Secretary, JOHN J. O'CONNOR JR.
26 Broadway, New York 4, N. Y.

Treasurer, STEWART H. STEFFEY
30 Summit St., Chestnut Hill
Philadelphia 18, Pa.

It is frigid everywhere these days, except in Cuba. Maybe the sub-zero weather gripping most of the country these first days of the New Year is responsible for the news wires being so frozen that it is going to require a lot of ice-chipping to ferret out enough news to even begin to meet the usual span of my monthly journalistic venture.

Among the numerous stops that Santa made at Christmas time was at the home of **Harry and Isabel Maxwell** in Sharon Hill, Penna., where he left the wonderful gift of a promotion for Harry from Assistant Personnel Manager to Personnel Manager of the Sun Oil Company for the Philadelphia area.

Attending the December wedding of Louise Palette and Robert W. Hewitt '40 in New York were: (standing, left to right) Lincoln H. Weld '21; Stuart L. May '41; William Kramer; Alan Hewitt '34, brother of the groom; J. Steele Brown '41; Louise Palette, the bride; Robert W. Hewitt '40, the groom; John E. Moore '23; Thomas A. Hession '27; Dr. Leonard B. Gutner '38; kneeling in front are Aldan O. Markson '51 and Richard C. Woodman '38.

Shown at a '41 gathering after the Yale game are (front row, l to r) Bruce Friedlich, Pat Stillman, Frank and Sue Hall, Agnes and Red O'Connor (back row) Kathy Friedlich, Don Stillman, Polly and Dick Hill, Bailey and Dan Provost, and Winnie and Bob Tepper.

Harry first joined Sun in 1938 as a laboratory technician at the Marcus Hook Refinery. He was appointed Assistant Personnel Manager in Philadelphia in 1950. I'll wager that the Maxwells never run out of oil these cold, wintry nights.

Nor does **John Williams** or **Don Salisbury**, not that they need heat where they are now located, I hope. John is now situated in Abqaiq, Saudi Arabia, with the Arabian-American Oil Company. Don is in San Francisco, Calif., as Director of Public Relations of Richfield Oil Corporation.

The New Year has brought with it the emergence of a Dartmouth dynasty in the government of New York State. Just to be sure that Governor Nelson A. Rockefeller '30, has able assistance, before handing over the destiny of the state to him, the former governor appointed our own **Monk Larson** a member of the Council of the State University College on Long Island.

There appear to have been some recent reassignments to the guys still in the Armed Forces. **Lt. Col. Ed Marks** is now a member of the staff and faculty of the U.S. Army Staff and Command School at Ft. Leavenworth, Kan. **Lt. Col. Phil Hallam** is somewhere overseas with the 5th Air Force. **Capt. Dick Jachens,** recently reported back in the USA from Japan, has taken up a new residence in Arlington, Va. **Col. Bob Dixon** is now at the Air War College at Maxwell Air Force Base, Montgomery, Ala.

Bob Barr has taken on a new chore for 1959, that of Vice President of the Dartmouth Society of Engineers. Bob was elected to this post at the October dinner of the Society in New York. **Rick Davidson** was on hand for this gala occasion.

While Rick was busy casting his ballot in a Dartmouth organization, **Norm Locke** was busy nominating candidates to head another Dartmouth organization. Norm recently undertook this task as chairman of the Nominating Committee of the Dartmouth Club of Bridgeport, Conn.

Out Ohio way, **John Reed** is also an eager beaver. In addition to being active in the Dartmouth Club of Cleveland, John served as a chairman in the Capital Gifts Campaign.

Down Pennsylvania way, **Stu Steffey** recently mounted the soap box (again) to laud the exploits of the 1958 Big Green Eleven before a monthly luncheon of the Dartmouth Club of Philadelphia.

Recently, Stu wrote to me about the prospect of drumming up interest in a new class directory. **Lew Johnstone** also made the same suggestion some time ago. Among us, we have obtained several recent directories from other classes that are very well done. My personal opinion is that well in advance of our next reunion it would be an excellent idea to have in the hands of all interested members of the class an up-to-date directory. The price that it could be put out for would not be prohibitive. What are your thoughts on the matter, folks? Let's hear from some of you as to your reaction to this suggestion.

When you write to me, and I hope you all will, please include a little news. I am hurting! Witness the brevity of this epistle, for which I apologize, but over which I have no control at the moment.

'42

Secretary, RICHARD W. BALDWIN
209 Beech St., Cranford, N. J.

Treasurer, IRA L. BERMAN
34 Thaxter Rd., Newtonville 60, Mass.

Sputnik, Explorer, Atlas, Lunik! When I want to find out what is going on in outer-space, or how far it is to the moon or sun and how long it would take to reach there with today's know-how, I call in the same expert that everyone does — the young son who thinks nothing of jets at 2000 mph and rockets to the moon (incidentally, I don't think much of them either, although I must admit it's fantastically fascinating). I'm not intending at this point to tell you of the '42er just back from a winter vacation on Venus but from this point on I know you wouldn't be a bit surprised with any such report.

Slowing down to the speed of my typewriter, let's swing leisurely around the country to relate news of '42s doings, both solicited and otherwise. **Kent Barclay** was recently appointed as the Ford Division's marketing services manager of Ford Motor Company in Dearborn, Mich. Kent had joined Ford in 1949, after several years with Carrier Corp., as a financial analyst in the product planning department. In 1952 he moved into the sales department where he rose to manager of Ford Division's market representation department prior to his current appointment.

Just a short step to the West in Chicago, we note the election of **Jim Ingersoll** as president of Reflectal Corp., a subsidiary of Borg-Warner Corp. As you might suspect, Jim has been covering a lot of ground in the past several years as he learns the details of the very diversified Borg-Warner industrial enterprise. I believe he started with Ingersoll Steel, of which he became president, prior to operating Ingersoll Products, both divisions of Borg-Warner.

Leaving the mid-west for the West coast, we follow **Dr. Mel Figley** who, "after years of pleasurable and productive life in Ann Arbor, Mich.," has moved to Seattle. Here, as professor and executive officer of the Department of Radiology at the University of Washington, Mel has also enjoyed association with the new University Hospital nearing completion in which he has designed equipment and had the "good fortune" to staff the Radiology Department. Margaret and their three sons are as delighted with the Northwest as is Mel. He's a gardener by choice and still able to poke a good drive down the fairway although he allows as how other interests have forced golf to take a back seat.

About the same time that Mel arrived in Seattle, **Randy Gilpatric** left to go to Anaheim, Calif., where Union Oil moved him into distribution from his former work in market research and sales forecasting. Despite the many problems which plagued them on their move, Marge and Randy with their three sons are rapidly assimilating themselves into southern California, where Union Oil has its home office in Los Angeles. And while we are here, **Ernie Friez,** the genial resident manager of the La Playa Hotel in Carmel has moved on to a new challenge. (Incidentally, last July **Bill Dorrance** from Wayne, Pa., and his son Rickey visited Esther and Ernie on his way home to his pediatrician practice from the A.M.A. convention in San Francisco.) Ernie's move takes him to the Mission Valley Country Club in San Diego where the Stardust Motor Hotel, a unit of the Handlery Hotels, is under construction. As manager, Ernie says they will have something for everyone — a 27-hole championship golf course, two swimming pools, stables, night club, etc. (anyone for tennis?) It will open in March so you had best make your reservations now.

Swinging back through the South, we stop to congratulate **Bill** (Colonel) **Lain,** who 22 years ago was office boy for the Galveston, Texas, Chamber of Commerce and last November became the second youngest man of at least the last half-century to become president of this organization. Jim has been a life-long resident of Galveston and in 1945, following Army service, joined the investment firm of Rotan & Mosel & Co. where today he is the resident partner. Active participation in the Chamber is nothing new to Jim for he has always taken a keen interest in civic and welfare movements and has been a staunch supporter of Chamber policies although he has not previously held an elective office in the organization.

At this point we leave the typewriter and return to the East, via the moon rocket, where the slow mail accumulates.

EDITOR'S NOTE: In the January issue, the obituary of Arthur Charles Hunt erroneously appeared under the 1942 heading when it should have been for the Class of 1925.

'43

Secretary, STANTON B. PRIDDY
Glen St., Dover, Mass.

Treasurer, DR. ROBERT L. CRAIG
242 Shermer Rd., Glenview, Ill.

Gentlemen, the holiday season has come and gone and I, throughout it all, survived the ordeal satisfactorily. From my vantage point in Dover, I succeeded in further complicating our settling problems in our new home by presenting my growing family with a small eight-weeks'-old pup of no particular description other than that his mother must have been a thoroughbred German shepherd

dog. This new arrangement leaves the upstairs to my wife and the young daughter and the basement area to my pup and myself to do with as we can.

A new medium of dispensing news occurred to the **Don Crances** as Pat, Don's wife, added a very interesting note on the back of their Christmas card which was a picture of their family of three girls and one young Dartmouth prospect. Pat comments that Peter Wadsworth Crance was born on July 7 and joins their family of Stephanie — 14, Wendy — 12, and Deborah — 6. She points out that young Peter was named after his grandfather Peter Winship '15 and as Ad Winship '42 and Bob Kimball '46 are godfathers, young Peter should be headed in the right direction toward the Hanover Hills. Don is now District Sales Manager in New England for Lederle Laboratories and the family is very happy to be back in this part of the world after 5 years in the Middle West.

Our usual birthday cards, although not as numerous as before, go as follows: **Dick Livingston,** now residing at 424 N. Willey Street, Seaford, Del., writes that he has two children who are now old enough to cause him to make noises like a worried parent. Dick's job remains the same, namely, development of unproved processes for the manufacture of nylon. Dick also compliments **Bus Mosbacher** on his achievements in sailing. If my memory serves me correctly, Dick was one of the young Corinthians of our class while at Dartmouth.

Dr. Clifford A. Baldwin Jr., 522 Maple Avenue, Wilmette, Ill., sends thanks for remembering him on his birthday; states that wife, Dotty, sons Jeff — 5½ and Gary — 3, are all well and happy. Cliff is Chairman of the Department of Anesthesiology at the Evanston Hospital, Evanston, Ill., and runs into **Bob Craig,** our worthwhile treasurer, every so often. Thanks for the note, Cliff.

Jim Doucette, one of our past regular correspondents, comes up with news after a long silence; four daughters — Jacqueline 9, Michele 5, and twins Pam and Sue 2! Over the latter years Jim has had five jobs, four in education and now at last out in the cold world as a Selection Consultant with Raytheon. He wonders why he didn't make this move much sooner. Jim and his family now live at Candy Hill, Sudbury, Mass.

Tom Munn writes from New York that he is still with Mutual Benefit Life of Newark, N. J., and states that there are a number of Dartmouth men in their organization. **Bob McQueen,** our mechanical wizard in the Class of '43, is the director of group insurance for Mutual Benefit. Tom thinks this should quiet New England Mutual Life from tooting its horn about all the Dartmouth men they have. How is the rest of your family, Tom? Let's have some more information.

The historic church of St. Peter's Episcopal at Third and Pine Streets, Philadelphia, Penna., has announced the election of a new rector, none other than the Reverend **Joseph Koci Jr.** formerly the rector of St. Anne's Parish, Middletown, Del., since 1952. The article states that Joe spent two years of the World War aboard a destroyer, took part in seven major campaigns from Guadalcanal to Okinawa. After this experience he entered the Episcopal Theological School in Cambridge, Mass., where he graduated in 1950. He was married in 1952 and has two sons, aged two and four. It is interesting to note that St. Peter's Church was opened in 1761, and it is an unusual example of Colonial architecture perfectly preserved.

Alden Taylor has been promoted by the Phoenix of Hartford Insurance Co. from Director of Public Relations to Assistant Secretary in charge of Public Relations and Advertising. He served in the U.S. Air Force in World War II, and was a B-17 pilot in the European Theater. Prior to joining the Phoenix in 1950 he served on the staff of the New York Herald Tribune as a member of the Insurance Advertising conference.

John W. Hill '42 has recently been named as the new market research director of the Miehle-Goss-Dexter Corporation.

Dr. Samuel C. Bullock receives a writeup in the Phila. Midtown Crier concerning his speech on mental health entitled "Mental Health Problems in Children." Sam is currently connected with the Phila. Dept. of Public Health Psychiatrists. Sam earned his M.D. degree at New York University. He was an interne and resident in medicine at Freedman's Hospital, Washington, D. C., a resident in psychiatry with the Veterans Administration in Philadelphia and instructor and associate in psychiatry at the University of Pennsylvania Hospital. Sam seems to be doing extremely well by himself. How about a note about your family activities?

John L. Muchemore writes from his foreign base address c/o F.E.C.-D.Y.E., Municipal Airport, Montreal, Quebec, "Contrary to the statement of our old friend in the ALUMNI MAGAZINE, there has been quite a bit happen since the last writing." His greatest news was the birth of his first son and fifth child on Feb. 6, 1958, at Subic Bay Naval Base, Zambales, Philippines. Naturally he was named John Jr. and he weighed in at 8½ lbs. At 8 months he has achieved the total weight of 22½ pounds and apparently is thriving according to John. On March 19 John and his family left Manila to return to the States. Stopping off in Tokyo he managed to catch up with classmate **Nobi Mitsui,** who is still connected with the Reader's Digest. They had a terrific evening which included dinner and reminiscing about old times. John spent most of the spring and summer relaxing and getting used to the U.S. once more before he took a job with Federal Electronic Corporation, an outfit which operates and maintains the Dew Line. His job is one of Coordinator for a construction program that is under way across the Line. The program although relatively small in scope covers 3,000 miles under difficult conditions and isolated areas and is being done under C.P.F.C. construction. The work is split into sectors of about 500 miles each and he is currently assigned to the Dye sector which is at Cape Dyer on Baffin Island. I certainly agree with John that it must be a rugged country if, as he says, the winds reach at least 80 knots once a week and have been recorded as high as 120 knots. Before coming to Dye he was assigned to the Can sector situated at Cambridge Bay on Victoria Island. This is an entirely different type of landscape, flat as a pancake with average temperatures of 20° colder than the Dye area. When John says colder, he certainly means it because they have 60° below temperatures several times a year. He questions what an inveterate lover of hot weather like himself is doing above the Northern Lights. John's family remains in New Jersey with his wife's family. Thank you, John, for asking the Thayer School of Engineering to forward your letter to us.

This about closes the books for now. Hope we will have more news to bring you in March.

'44

Secretary, ROBERT A. MILLER
1105 Center St., Milford, O.

Treasurer, WILLIAM H. MCELNEA JR.
Ballwood Rd., Old Greenwich, Conn.

It is with sorrow that we report that **Russ Baldridge** suffered a fatal heart attack in November.

When **Joe Vancisin** took his Eli basketball team to Raleigh for the Dixie Classic he realized he faced some formidable opposition, with four of the invited eight teams ranked within the first ten in the nation. His charges didn't win, but acquitted themselves in admirable fashion and won the respect of the partisan North Carolina crowd. Joe was even smiling when his boys took the floor against N. C.!!

Fritz Hier and family are back in Europe, this time in Geneva, Switzerland, from where Fritz will operate as European Director for the International Rescue Committee. We'll have to foment some international crisis to take place in Hanover in June for him to come over and rescue, like secreting Mikoyan's attaché case in a keg of Haffenreffers. I received a kind word of praise for **Norm Simpson** from Dr. Robert Fairchild '29 who enclosed with his letter a bulletin from the Park Central Presbyterian Church of Syracuse, on which program the anthem authored by Norm was first sung by the choir. Dr. Fairchild writes, "We in the church are very indebted to Norm for his work with the choir over the years. He was very active when the Dartmouth Glee Club visited Syracuse last year, and was recently honored at a dinner of local Dartmouths for serving ten years as secretary of The Dartmouth Club of Central N. Y."

And speaking about church choirs, **Dr. Dick Sholl** is one of the stars up in Janesville, Wis. Aside from his surgical practice, teaching "clinical surgery" one day a week, medical studies at the U. of Wisconsin, and serving as president of the local YMCA Men's Club, Dick still gets in his singing and in addition to his church work is a member of a local quartet. He and Cynthia and the four youngsters are real mid-Westerners now after five years in Wisconsin, but still slip East to Cape Cod for vacations and route themselves through Hanover.

And now since we're on Wisconsin, **Maria and Johnny Lesher** recently moved in when Weyerhauser Sales Company transferred John from Tacoma to Appleton. Naturally, coming from the wilds of the Pacific Northwest, they settled down on Lake Winnebago where the duck and goose hunting is good (John potted a Canadian honker the first day of the season) and the skiing playgrounds only twenty miles away. But like the Sholls, when vacation time rolls around they point the iron east for the Lesher camp in Maine.

And on the topic of woodsmen, Forester **Bob Hyde** seems to have been tamed since being appointed Ass't to Forestry Director for St. Regis Paper Co. and suffering the plight of the successful romantic has been subjugated to the horrors of the commuter, from Plainfield to 42nd St. I'll bet he's got some pretty fancy landscaping to tend, tho.

Snooky Hughes, the boy with the Silver Star for holding the Ramagen bridgehead, is

teacher-coach at Melrose High, trying to get his athletic charges to do as well on the playing fields. Snook and Irene boast four youngsters, aged one to seven.

Dr. Bill Stahl was recently elected Fellow of the American College of Surgery. He is also a diplomate of the American Board of Surgery, attending surgeon at Danbury (Conn.) hospital, surgical consultant at Fairfield State Hospital, and on the surgical staff at Beekman Downtown Hospital in NYC. In addition, Bill is president of the Danbury Branch of the American Cancer Society and the Danbury Area Health Council.

I forgot to mention when we were speaking about the Sholls being in Janesville, Wis., that **Merle Hagen** is making his home there, too. He's marketing research manager for the Parker Pen Co. After the dreary Princeton game that **Hose Craig** and I meandered 700 miles from home for in '57, we flushed it this year. At least **Bill and Joan Barrett** kept the faith and split a couple of buckets of sours with the **Win Martins, Tom Miners, Dave Wilsons, Tom Trott,** and others as the Green picked up their over-due title. I suppose this ties in lumbermen Lesher and Hyde, but Bill working out of Berwyn, Penna., is in the wholesale lumber business, the Lawrence R. McCoy Co. of Worcester, Mass.

You can be sure that Baltimore **Al Barrett** wound up '58 in good style with his Colts coming through in sudden death as they did. If you're a Browns or Giants fan, get your case well documented with facts and figures when you try to convince Al in June why his team was lucky. Either that, or he'll change the subject and sell you an additional 20 G's of insurance. Al and Pat have four offspring, three of them demure little girls.

It's been a long time since we've written about **Rolfe de Leuw,** but he's safe and sound in St. Louis, associate to the Gen. Counsel of International Shoe Co. I hope that the good people from Wisconsin that we wrote about earlier keep their Radio-TV sets tuned to WTMJ-TV in Milwaukee and catch **Bill Davies** doing his bit. He's made quite a name for himself up in Brave-town.

The next time your lawn mower breaks down and you have a warranty problem with the dealer, contact the friendly controller of the Toro Manufacturing Co. in Minneapolis, none other than **Wally Benjamin.**

Any of you who read the "Anatomy of Murder" observed the author's acknowledgment to **Ezz Hale's** legal publishing firm. And with the better publishers is **Dick Ettinger,** president of Wadsworth Publishing Company in San Francisco. Dick and Barbara and their five favorite dependents make their home in Atherton, Calif. **Dr. Monte Duval** is Associate Professor of Surgery at the U. of Oklahoma Medical Center and the man to contact if you want liaison with **Bud Wilenson** for a seat to a Sooner's game. **Dan "the Bear" Donahue** is now in Chicago with one of the nation's top management consulting firms, Booz, Allen, and Hamilton, makes his home in suburban Barrington.

Among our more enterprising young men is **Wayne Eves** who in Omaha owns both the Mid Continent Tabulating Card Co. and the Mariotte Insurance Agency. And for our good constituents in the South who might not be too inclined to buy insurance from Baltimore **Al Barrett** since his town took a rather shady position during the hostilities of the '60s, you've got **Big Rog Antaya** in Atlanta representing New England Mutual and presenting the case in a honey dripping fashion that would knock over Scarlett's daddy, even after Sherman came.

Early indications are that we'll have a whale of a turn-out at our June Reunion. The Easterners, scribing a giant circle from Hanover to Pittsburg, will be there en masse. A lot of Hinterlanders are planning to make the move, we've got a few from the Coast on the ledger already, and there is every indication that we'll outstrip the great assortment that congregated on the Plains for our Tenth.

I think you'll be pleased with the Directory we're making up. Aside from the names and numbers of all the players, you'll be able to spot all the '44s in the towns you pass through, spot those in any line of work you're in, and give your wife a correct Christmas mailing list. We'll have this out to you before the June Reunion.

'45

Secretary, SAMUEL E. CUTLER JR.
Middlesex School, Concord, Mass.

Treasurer, ROBERT D. OLDFIELD JR.
5143 Stoney Ridge, North Ridgeville, Ohio

Although the news is not abundant this month, it is most certainly noteworthy. With reunion but a season away, and the necessity of making definite plans an increasing necessity, news of fellow classmates, their families, their doings, etc., becomes more significant. For numbered among one of life's most embarrassing moments is the "I remember the face but not the name" experience. Not many of us have that enviable faculty of being able to associate name, face, and a brief history in a moment's flash. Also, not many of us know much about any of us so it behooves us all to do a little homework in preparation for the great day of reunion. That's June 19, 20, 21, and I expect to see one and all there. If I take sick this time it'll be in the Mary Hitchcock Hospital.

Interesting facts are in abundance and yours for the asking. For instance, did you know that **Phil DeBarard** has been appointed South Florida Division Public Relations Manager for the Southern Bell Telephone and Telegraph Co. at Miami, Fla.? Or that **Al Lott** has been named a director of the Permatex Co. of Huntington, L. I.? Probably not. And have you been waiting for me to announce the marriage of Dr. **Ed McCrum?** Probably. For the curious, and aren't we all, Ed married Hope Griswold last Nov. 29, in Brookline, Mass. A "fait accompli" and we hope to see them both at reunion.

Or perhaps you'd prefer to hear what the New York World-Telegram and Sun has to say about **Jack Wachtel.** O.K.

Tony G. Anthony '46 was recently appointed to the position of sales manager for the hotel and institutional department of the S. M. Flickenger Co., a wholesale food house.

Jack Wachtel has latched onto an idea which he is pursuing with all the scientific training that his Dartmouth and M.I.T. years enriched him. He is now fighting the battle of "sameness" in products. As he puts it, "Every business is looking for new developments to keep ahead of the pack. We see these ideas sprout everyday — quilting aluminum foil, piggy-back for ball-point refills, flo-thru tea bags, refillable lipsticks." Such improvements, he says, did not involve product development but were the result of creative analysis; briefly, somebody sparked a needed idea. He's set up Product Counselers, Inc., on E. 57th St. and is geared for action.

But no, maybe you'd rather hear what a few of your classmates have to say about themselves. Like **Maury Baruth,** for instance? Well, Maury, a lawyer, states succinctly that "I have been elected State Commander of AMVETS in Pennsylvania and have been appointed to the Pennsylvania Veterans Commission by Governor George Leader." And **John Bernheim** gladly informs you that he is "back from Japan after four years at the American Embassy in Tokyo. You can reach all of us — wife Doris, son Alfred, 6, and daughter Emily, 3 (born in Tokyo) — at the following address: 111 Holmes Run Rd., Falls Church, Va."

And then there's **Don Cole,** a doctor up Portland Way, who is "too busy with the family of growing youngsters and a medical practice to have any spectacular news," but manages to see the '45s in the area from time to time — Howie Sawyer, Charlie Patton, Murray Smart, Harris Hinckley, John White, and Bob Haffenreffer. And who is, of course, looking forward to the reunion.

Finally there's that voice from the deep blue, Dr. **Bud Thomas,** reporting from San Diego. "Hi — long lost Bud Thomas got tired of Navy life after eight and a half years. Decided to settle in San Diego. Have completed surgical training and certified by the American Board of Surgery. Now hope to become a solid citizen again. Have two children and we're expecting Dec. 17." Nice to hear from you, Bud, and how about some info. on the latest.

And now, especially for your reunion files, here's a brief dossier on some far-flung classmates: **"Jug" Agry,** with Simmons Mattress, now in New York is residing at 1 Park Ave., behind the green door. **Ted Belfit,** in sales with the Kraft Bag Div. of the Gilman Paper Co., lives in Haworth, N. J. In Stamford, Conn., you'll find **Howie Germain** as Sales Manager for International Latex Corp. While down in New Orleans is **Andy Dewing,** serving as manager of the Special Risks Div., New Orleans Branch of Continental-National Group. **Stu Chalfant,** in Santa Monica, Calif., holds a position which arouses my curiosity. He's an anthropologist with the System Development Corp. of that city. I'd like to hear more about your work, Stu.

It would certainly be nice to see all of you in four months but I know that's impossible. Nevertheless, don't be caught holding an empty bag when reunion rolls around. Pack it and come along. It's going to be a whopper.

'46

Secretary, THOMAS H. GILLAUGH
N.E. Mut'l Life Ins. Co.
505 Third National Bldg.
Dayton 2, Ohio

Treasurer, ANDREW J. MURTHA
850 Eustis Ave., Indianapolis, Ind.

Dayton Visitors — While calmly watching the old TV one night last week, our phone jangled and I was delighted to find on the other end Russ Chase '45 and my old Beta buddy **Jud Hannigan.** They are both with International Paper and were in Dayton doing some work at our McCall Corp. (pub-

lishers of Newsweek, McCall's, etc.). Russ is in sales with headquarters in New York City and Jud is Assistant Plant Manager of the Hudson River Mill at Corinth, N. Y. Both seemed to be prospering and it was good to hear from them both.... **Mack Grove** "hit town" the other day and coincidentally we ran into one another at a local restaurant here. The next day **Dick Scharrer** and I had lunch with Mack and he brought us up-to-date on his activities. After freshman year, he left Hanover and went into the Service, spending a good amount of that time in the Navy in California. About the same time his folks moved to that "sunny state" and upon discharge Mack stayed out there and enrolled at San Diego State College, graduating in 1949 with a Business Administration degree. After spending a year in the life insurance business with the Lincoln National, he went with Convair Aviation in 1951 in procurement and is still with the Convair Division of General Dynamics Corp. He lives in La Mesa, Calif., and is married to the former Beverly Carter of San Diego and they have two girls, ages 8 and 5. Mack brought us up-to-date on a couple of his old buddies — **Bob Bogart,** his high school buddy from Toledo, is back in that city in sales work and is married to the former Sally Straw, sister of Pete Straw '49 — **Gene Lucey** is in the wholesale hardware business on Long Island and the firm he partially owns, does a lot of business with the Air Force. Mack was here in Dayton on business for his company at Wright-Patterson Air Force Base and it was good to see him.

Up the Ladder — Our beloved **Reg Pierce,** Class Chairman and predecessor of yours truly as Secretary of the Class and conductor of this column, has been made a Vice President (Veep, that is!) of his firm — Kenyon and Eckhardt, large New York advertising agency — congrats, Reg! ... **Frank Gaylord** has been named Home Office training supervisor for Equitable Life of Iowa in Des Moines. Frank started in the insurance business in the Spokane, Wash., agency of Equitable Life in 1947 and in 1950 was recalled to active Naval duty. He returned in 1952 and was appointed regional agent of that agency in 1953. In 1955 he was named Home Office Field Assistant assigned to the West Coast with headquarters in Oakland, Calif., and was there until his most recent appointment. ... **Herm "Obie" Obermayer,** one of our eminent journalists, has been elected to the board of governors of the Monmouth Medical Center in Long Branch, N. J. In addition to running his own newspaper, Obie has been very active in the civic affairs of his community as he is a director of the Monmouth County Council of the Boy Scouts and the Long Branch Chamber of Commerce and is president of the Long Branch Growth Committee, Inc. — keep up the good work, Obie. ... **The Rev. George Razee,** curate of Christ Episcopal Church in Stratford, Conn., has been appointed the new rector of Trinity Episcopal Church in Waterbury as of December 1, 1958. We have written about George in recent issues and we're glad to see this further appointment. George and the former Nancy Foote Griggs of Waterbury have one child, Caroline, born last June — Nancy is a former grade school teacher having graduated from Wheelock College in Boston and taught in the Evanston, Ill., school system before marriage.... **Hugh Bennett** has been named District Manager for the Ayerst Co. in Atlanta. Hugh started with the company as a salesman in 1950 in the Los Angeles area and in 1956 was named a Clinical Research Associate and transferred to Philadelphia before his recent appointment. Hugh is married to the former Barbara Alice Bennett and they have three girls and one boy to move to the southern city of Atlanta.... **Ashley W. "Bill" Burner** is a Vice President of a new public relations agency called Creative PR, Inc. This firm has

Art Young '46 holding his first godchild, Betsy Ann Bogardus, daughter of Shirley and Peter Bogardus '51 of San Francisco.

been organized as a subsidiary of Anderson & Cairns Advertising Agency; Bill has been with that firm for five years as director of public relations. The firm will handle public relations programs of companies having their advertising placed with other agencies and Bill is a member of the board of directors of the new company. Prior to going with Anderson and Cairns, Bill was an editor at Fairchild Publications, Inc. for five years, coming to them from newspaper reporting posts on the Passaic, N. J., Herald-News and the Plainfield, N. J., Courier-News. I remember seeing Bill when he was in Plainfield and I was with the National Newark & Essex Bank in Newark. Nice work and keep up the good work, Bill!

In the News — It's wedding bells for **Graham Brush** as he placed the wedding ring on Miss Katherine Van Renesselaer Ulman of Lloyd Neck, L. I. — they were married in New York on December 27. Katherine is a graduate of St. Timothy's School and Vassar College — Congrats to them both! ... **Andy Bullis,** director of municipal affairs of the Pennsylvania Department of Internal Affairs recently addressed the Berks County Boroughs Association at its bi-monthly meeting. Andy has been with the State Government of Pennsylvania since 1957 having served in similar work for the Connecticut State Government. He started in this field as a budget examiner in 1949 under Chester Bowles, then governor of Connecticut. After college, Andy was a teaching fellow at Wesleyan University and during '49 and '50 did some graduate work at Syracuse University and taught political science at Muhlenberg College in Allentown, Pa.... **Stan Waterman** continues his skin diving activities and has been making a number of personal appearances on the lecture circuit. He recently spoke in Portland, Ore., and showed colored movies of some of his underwater work in the Bahamas. Stan is achieving quite a reputation for his work in underwater photography and skin diving. ... **Len Ackerman** is a motion picture producer with Allied Artists in Hollywood.... **Bill Beaven** is practicing medicine and is associated with Doctors Hospital in Washington, D. C.... **Johnny Condit** is a sales representative for Ditto in Chicago and living in Evanston.... **Jerry D'Amore** is a civilian with the Department of the Army and is stationed at Perlacher Forst, near Munich, Germany. ... **Dick Esperon** is with Kodak Portugesa, Ltd. in Lisbon, Portugal.... **Jim Kelley** is with the America Fore Ins. Group in Chicago.... **Dick Leary** is an administrator for the National Health Association in New York City and living out on Long Island in Hicksville.... **Bob Pensmith** is also in the Big City as an accountant for Standard Oil and living in Wyckoff, N. J.... **Ignatius "Iggy" Tikelis** is an M.D., practicing in Wilmington, Del.... **Dr. Thorndike Toops** is "psychiatrist in charge of female service" (wow!) at Larue D. Carter Memorial Hospital in Indianapolis. ... **Mike Ward** is a sales representative for the Food Machinery and Chemical Corp. in Hoopeston, Ill., and **El Van Etten** is a Plant Accountant for Corning Glass in Harrodsburg, Ky. (that's the home of the famous Beaumont Inn).... That's it gang — see you next month!

'47

Secretary, HARRIS J. CHADWELL
304 Saratoga Rd., Snyder 26, N. Y.

Treasurer, JOSEPH G. KUREY
14 Fen Court, Madison, N. J.

Next month we expect to have a full report of the December 15 meeting of the Class Executive Committee at the Dartmouth Club in New York City.

Bob Bohn is a Sales Manager with Preferred Utilities Manufacturing Corporation in New York City, living in West Redding, Conn. **Steve Bucklin** continues his teaching career at the USAF DEP School, Det. 3, U.S. Forces APO 324, New York, N. Y. Professor **Bill Geber** is associated with the Department of Physiology at the University of South Dakota Medical School. **Walter Anderson** and family have been in England since the first of September 1958. Walter is senior representative for the Westinghouse Electric Corporation working in conjunction with the Aero Division of Rolls-Royce Ltd. of Derby. Assigned to England for two years, Walter is chiefly concerned with insuring a continuous flow of information concerning gas turbine design to and from Westinghouse Engineers in Kansas City.

Christmas greetings are much appreciated from: The **Bildners, Allen,** Joan, Robbie and Jimmy; The DARTMOUTH ALUMNI MAGAZINE; Barbara, **Dick,** Lynn and Robbie **Madison;** The **Cahoons, Roy,** Louise, Barbara, Cathy and Martha; **Bun Harvey,** Janet and his wonderful family of eight children; Marge and **Bill Knight** in Shrewsbury, Mass.; **Hal** and Oma **Johnston** in Guatemala, Central America; The **Clint Holtons** in Latham, N. Y.; The **Samuels, Rube,** Di, Adam and Julie; The **Lum Luhmans; Bob,** Barbara, Joanne and Judy **Keane;** The **Cunninghams, Leo,** Cathy, Judy and Rickie.

Don and Edith Shedd have published their Christmas Report from Des Moines, Iowa. Don travels the state of Iowa and the city of Des Moines with Liberty Mutual Insurance Company. He is active in the chamber of commerce and serves as the Chairman of the Advancement Committee for their district Boy Scouts. The Shedds enjoy camping in the Midwest with their fine family of four children. Kathy, Louise, Janie and recently-arrived-Alan spent the weekends and summer vacation with their parents camping in Iowa's State Parks and in Endovalley Campground in Rocky Mountain National Park. The Shedds are members of the local chapter of National Campers and Hikers Association and expect to be featured with several other NCHA families in an article on camping in Better Homes and Gardens next summer. Interest in camping equipment led to the beginning of Beaver Camping Sales, Edith's home business interest, selling pretty colorful tents made by Pop Tent Corporation.

George and Connie Cohn are the proud parents of Jeffry Alan, four months; David, two years; Cathy Lou, three and a half years;

and George Junior, five years. George expects to continue at the Yale University School of Medicine, Department of Internal Medicine for the next two to five years.

'48

Secretary, JOHN A. VAN RAALTE
110 Old Farm Rd.
Pleasantville, N. Y.

Treasurer, JOHN S. FENNO
120 North Lincoln Ave., Niles, Mich.

With the north wind howling around my house and the temperature hovering around zero, again my memories of the New Hampshire plains are brought sharply to the fore. It is a good time to light a fire in the hearth and tell our wives and children about those winters up in Hanover, especially 1947-48, in case you have forgotten.

During the holidays Barb and I visited in Rochester, N. Y. We enjoyed an evening spent with **Dick Weaver,** who drove over from Buffalo to see us. Dick is still a carefree bachelor hitting all the good ski areas between here and the West coast. He also spends some time selling lumber for the A. H. Weaver Lumber Co. and acting as sales agent for a new vinyl coated flexible wooden wall covering called "Furnaflex." The product has an aluminum backing and its possible applications are diverse.

Another salesman in the class is **Jack Clemence.** Since their departure from Wigwam about 10 years ago the Clemence family has been residing in Short Hills, N. J., and, I might add, has grown considerably. Jack and Ruth's roster now numbers five, as follows: Kathy, ten and one half; Christine, nine; Karen, five; Jack Jr., two and one half; and Carol, one. Jack works for Hankins Container Corp., a division of Flintkote, selling corrugated shipping containers. Although they see quite a few Dartmouth men, Jack hasn't found too many '48's nearby.

Jay Rutledge called me recently while on a visit to New York. Jay keeps very busy in the investment business in Oakland, Calif. During the summer, he reports seeing quite a bit of **Jerry Wensinger.** Jerry was at the University of California at Berkeley working on his doctorate degree. He is now on a year's leave of absence from his teaching position at Wesleyan while completing this work at the University of Michigan.

Ken Saunders is continuing to advance with the Continental Casualty Company in Chicago where he has worked since graduation. Recently he was given the responsibility of setting up the new merchandising and promotional unit in the accident and health department. Ken and his family live in Mt. Prospect, Ill.

A few months ago the Brockton, Mass., newspaper carried a picture of **Bob Sebilian** having his new rank insignia pinned on by his wife. Bob was promoted to major in the Marine Corps and is stationed at the Marine Corps recruit depot at San Diego, Calif. He is presently battalion training officer for headquarters.

It appears as if **Rog Tenney** likes to sell those things that give one pleasure in life. He has recently switched from selling imported sports cars in his hometown of Rockford, Ill., to selling and constructing swimming pools and is manager of this newly formed division of the Glenview Construction Co. in Glenview, Ill. Rog, his wife and two children will move to Glenview so that Rog can be closer to the Chicago area.

Another '48 living in Short Hills, N. J., is **Wendell Griffith,** with his wife, Barbara, and daughters Barbara, nine and Jody, six and a half. Wendell is now the chief industrial engineer for Colgate Palmolive in charge of cost control. I certainly hope he's found a little time to keep up his skiing.

It was certainly nice to receive a note recently from **Bill Wright.** Bill for the past three and one half years has been principal of the Athol, Mass., high school. He has now been promoted to Superintendent of Schools for the Athol School District and Athol-Royalton Regional District succeeding Harold Moody '28. Bill, his wife and three daughters live in Athol. Keep up the good work, Bill.

In the field of athletics **Dave Kurr** certainly hasn't lost his touch or stamina. Dave played number one on the Philadelphia B team in the tri-city squash racquets matches between Boston, Philadelphia, and New York for the Lockett Cup and won both his matches. Incidentally, Dave defeated Bill Foster '52, who was number one on the New York team. When not playing squash Dave works for Reynolds Metals Corp.

Since our class is still on the move, I have a few more changes of address for you. Below are the new addresses: Alvin Battison, 109 Eldredge Drive, Vestal, N. Y.; Frederick T. Comstock, Jr., 27 Hillview Ave., Clinton Heights, Rensselaer, N. Y.; Robert H. Cormack, Village Street, Millis, Mass.; Edward C. Curtis, 1302 Filmore Street, Hollywood, Fla.; James B. Eckman, 8604 Whipps Bend Road, Lyndon, Ky.; Arthur Hendler, 995 Ceil Place, Baldwin, N. Y.; Dr. Robert Kirkpatrick, 230 Mt. Hope Street, Meadville, Penna.; Thomas V. Rafferty, 62 W. Quaker Street, Orchard Park, N. Y., Theodore Susen, 30100 Ashton Lane, Bay Village, Ohio; Dudley K. Wright, 2336 Oakmont Ave., Santa Ana, Calif.

See you next month, but in the meantime now that winter is here and you have a little more time, drop me a note telling me what is new in your life — work, children, travel, etc.

'49

Secretary, ROBERT H. ZEISER
50 Tryon Ave.
East Providence, R. I.

Treasurer, WILLIAM A. WHITE 3RD
21 Crescent Dr., Whippany, N. J.

The holidays have just ended as I write this, and I hope the Bearded One was as good to you and yours as he was to me and mine. It's always a shock to go from light-hearted holiday season to cruel realization that there are some who expect me to work for a living!!!

Pat and I were delighted to receive cards from the following celebrants: Art and Betty Wallace, John and Joan Sweetland, John and Nancy Stockwell, Terry Maphis, Ed and Marge Clogston, Bob and Joan MacArthur, Jack and Peggy Kilmartin, Harv and Jane Nolan, Bob and Nadine Jackson, Bert and Sue Rodman, King and Jody Ball, Tom and Ann Swartz, Summy and Nonie Arneson, Bill and Nomi Ballard, Fred and Jeannie Briscoe, Al and Joyce Wagner, Carll and Barbara Tracy, Dave and Mimi Vogels, Herb and Ann Gramstorff, Bob and Persis Alden, Dave and Kay Strasenburgh, Mike and Lois McGean, Jay and Barbara Rosenfield, Lew and Dee Geer, Chet Palmer, and Paul and Cathy Erwin. Thanks so much to all of you.

How many of you saw the magnificent article in the December 29 issue of Newsweek about ad-man **Ed Graham?** It was a whole-page spread about one of our most successful brethren. Ed's done a tremendously clever job in the commercial industry of both radio and television. Even the most rabid commercial-haters among us smile when Emily Tipp tries to sell us Tip-Top Bread and also when Danfield Nes and his valet, Rudy, pitch for Nescafé. These two as well as the famous Bert and Harry Piel Beer-men are Ed's creations. A tip of Emily's Tip-Top hat to you, Ed.

Another clipping which caught my eye last week was in a sports page clipping in the Boston Herald. In it, the article explained that a young man named Arnie Springer of Winthrop High School scored 40 points against Andover High in a Northeastern Conference basketball game to break the old Conference scoring record of 39, set by **Jim Zafris** of Newburyport High in 1944. If my memory and records are correct, that should be our Jim Zafris, now a resident of Newbury, Mass. Records are made to be broken, but Jim's held up for 14½ years.

Os Skinner '28 sends me a clipping about **Bob "Rocket" Reed** which complements what I wrote last month of Rocket's promotion with Tidewater Oil. Bob is now #2 man in Tidewater's Eastern Division, extending from Maine to Virginia. He is now the eastern division marketing manager and a member of the division operating committee.

Accompanying his generous dues-check, **Ort Hicks** writes of his many travels in behalf of the Foreign Service in Oslo, Norway. He hopes to make reunion, though distances involved make it a big problem. He's also working on **Cris Bugge** (still a bachelor and a 12-month-a-year skier) to accompany him.

Dave and Kay **Strasenburgh** intend to ski this winter and hope that Pat and I can join them somewhere, as we did some seven years ago at Lake Placid (it doesn't seem possible that it was that long ago), so we'll scan our winter weekend schedules and hope to work out something. Time certainly slips by faster than we care to admit.

Got a fine letter from **Ed Grant** up in Worcester who announces the birth of John Raymond Grant, born November 25. This is Ed and Betty's third, Mary Ellen being 9 and Eddie Jr. 7. Ed is a Manufacturers' Agent covering the New England territory for several appliance and housewares manufacturers. Ed says business is excellent which is a welcome sound to hear from anyone near us. He and Betty definitely plan to make reunion in June.

One engagement to announce this month — that of **Ed "Ritchie" Hunt** of East Bridgewater, Mass. (working for Providence-Washington Insurance Company as a marine underwriter in New York City) to Miss Elizabeth Ann Everett of East Orange, N. J. Only a few days after I received this clipping via the News Service in Hanover I met Ed in the Providence Home Office of P-W, and we had a coffee together, discussing reunion plans and old friends.

A couple of vocation-listings — **George F. Day** is a graduate student at Harvard.... **Dick Desmond** is with Avondale Mills in Dallas, Texas.... **Brud Becker** is Manager of Sales Engineers, Bay State Abrasive Products Co. in Westboro, Mass.... **Jack Flanagan** is President of Hennigan & Flanagan Dist. Inc. in Phoenix, Ariz.... **Dana Miller** is a statistician with George B. Bock, Consultant Actuary in New York City.... **Phil Noyes** is a salesman with Washington Hardware Co. in Tacoma, Wash.... **Paul Richwagen** is an administrative assistant at the Buckley Country Day School in Roslyn, N. Y.

Don't forget to pay your dues if you haven't already. Returns have been real good so far, but there are many "regulars" still outstanding. DO YOUR SHARE.... And don't forget the big dates of June 19-21 — that is REUNION TIME.... BE THERE....

'50

Secretary, SCOTT C. OLIN
71 Tompkins Ave.
Pleasantville, N. Y.

Treasurer, SIMON J. MORAND III
506 Washington Ave., Wilmette, Ill.

It has been our custom to remind the noble breadwinner readers of this column that on the fourteenth day of this month they stand in danger of being transformed into

gnarled warts or burning at the stake, if not both. It is fortunate that we can offer you salvation from this potentially horrible fate ...go buy your wife a box of candy and a Valentine's Day card!

The annual good deed thus accomplished, we turn happily to a survey of activities over in...

CUPID'S CORNER

Whoop! Halloo! We have a wedding to record for the first time in several moons. The glad tidings dated December 5, 1958, proclaim the marriage of **Dick Ribble** and Nan Jones Adams in Hollywood, Calif. They are at home at 1326 North Vista Street. Rip is slaving for NBC in their film production department. Presumably he's also managing a few ski jaunts and maintaining an adequate surveillance of the area's Injuns.

What ho! Here's another live item, first of its ilk since early fall. **Jim Austin** is treading the final fifty-two eighty (walking the last mile, that is) as proved by the November announcement of his engagement to wed Ann Cary Woolfolk of Pittsburgh. Ann is an alumna of Chatham Hall and Connecticut College. Jim's employer and extracurricular activities were not revealed. Steeltowners, please advise.

RATTLE PRATTLE

The annual influx of yuletide greetings, appreciated in and of itself, brings a second blessing in the form of revelations on the blessings brought forth on this continent during the past year. We can report three girls and two lads whose first birthdays will occur later this year.

Eldest of the baby-sans is a daughter born to **Bill and Helen Hawkins** last May. The lady's name is Angela Marie and is a welcome relief "after two hell raising boys." Bill is divisional sales manager at Consolidated Electrodynamics in California.

A phone call to **Archie McAllaster** cleared up his comment about number three. The third is David, born October 24. So that you will not share our confusion on the point, number three means there are two other youngsters at the Westport, Conn., homestead, not a total of three in the family. Eldest is Archie Jr. born February 20, 1955, and Sara is the middle member with a birth date of August 1, 1956. Archie has been working for W. C. Pitfield & Co., Inc., in New York's financial district. Specializes in Canadian securities.

Dick Putney says, "See you in 'Sixty" at the end of his note, which is a good comment to make, but the earlier portions are even better. He notes "that Ginny and I have forsaken Ann Arbor's academic atmosphere...for the hazy hollows of the Hudson, on the banks of which I labor for the Imperial Paper and Color Corp. Alan Kent Putney provided a third mouth to feed on November 15, 1958." This number three, we think, makes only a trio all told in the family. See how confusing it gets though?

Jay and Mary Buck considered their Christmas stocking most pleasantly filled with a bundle of joy named Susan Keatley on December 13. With so little time to get off a note to the North Pole before Santa's trip, she had to ask for help from sister Julie.

Finally, **Mary Lou and Harry Van Benschoten** had a girl on December 17. The Carnival Queen of 1979 or thereabouts answers to Diana Joy. Two weeks later another important announcement was made to the effect that Harry had been admitted to partnership with Pogson, Peloubet & Co., certified public accountants.

Congratulations to all you fine folk!

INKADENTAL INTELLIGENTZ

John Bowman has been made sales manager for the A & B Travel Agency, Inc., in New Haven. He's in charge of tours, group travel, industrial accounts, and sales incentive programs there. Formerly John was assistant sales manager at Southern New England Telephone Co.

Bud Bray is working for the Milwaukee agency of Connecticut General Life Insurance Co. as brokerage consultant and insurance planner. He and his wife, the former Shirley Clark, have a daughter, Sallie, who is three, and an heir, Michael, two years old.

Bowing low and apologizing profusely to **Hugh Brower's** spouse, Jane, we acknowledge that their canine companion, du Pont, is not "a basset-type hound" as we stupidly identified him a few months ago. "du Pont is a basset hound pure and simple," says Meach. Okay, we'll turn in our K. C. application blank anonymously and brush up on doggy data one of these days.

John Moulton is now teaching at Reed College in Portland, Ore.... **Jim Farmer** passed his National Boards in radiology this fall and started in practice with a Cleveland firm, Hill and Thomas, on January first. The brood includes two boys and three girls currently.... **Bush Keeler** has a year and a half to go at Virginia Seminary. With three children and five pups, Bush advises some of the latter are available at reasonable rates on a permanent loan basis.

Jim and Bunny Myers are enjoying all the charm of Jolly Olde England these days. Jim is comptroller of Campbell Soups Ltd.—England and a director of Campbell's Soups S. p. A. in Italy where they spent six weeks last summer. Three young lads in a photo are all smiles and obviously chortling in cockney accents by now.

Stan Schneider is manager and production chief of Ace Service and Supply Company in High Point, N. C. He's looking for Tarheel brethren and we trust any in the area will drop him a line at P. O. Box 667.

Cal Sia completed his residency last July and opened his own practice of pediatrics in Honolulu where he's treating healthy babies and worried mothers. There are two boys in the clan with a report in the Rattle Prattle section due soon.

Bill Pulley got his M.B.A. from Miami (Ohio) a year ago after the night school grind and states that 1950 members are scarce in his neck of the woods. Glimpsed from time to time, however, are the **Gordon Hoods and Tom and Jean Sours.** Little Pulleys include Chip, six; Mary Lynn, four; and Jeff, not quite one year old.

As you all know, it is strictly against the rules to place any "personal" notices in a column such as this, so we cannot honor the request of **Dick Ceely** to publish, **"Ned Weir! All is forgiven."** Trust you understand our predicament, Dick. Nice to know you had the comfort of such companions as **Ben Shaver, John Cobb, Joe Magoon** and **Ed Tuck** at the Harvard game last autumn. You forgot to reveal your own doings, though.

With mixed emotions we conclude these ramblings by telling you that **Tom O'Connell** has passed the chairmanship of the Class of 1950 on to **Bob McIlwain** upon concurrence of your Executive Committee. "Crash" will hold office until our next reunion and, of course, is a wonderful choice to head up our horde. We're sorry to lose Tommy's talents to the U. N. Technical Assistance Board in Quito, Ecuador, however, and hope he can square away enough problems down there in time to join us at the tenth in 1960!

Where all may read and nod their heads in agreement, we'd like to say thanks to Tom for a job well done over the past four years. Hurry back, fella, we can use you, too! For your information, Bob McIlwain can be reached care of McKinsey & Co., 60 East 42 Street, New York City 17.

That about wraps it up till March, gang. Unless someone can help us scrape together some tidbits for broadcast, we are thinking of giving this space up for a paid political announcement or the picture of a Varga girl next month. While that would be a decided improvement, some of you must be egotistical enough to want to see your names in print. Let us hear from you!

And now, this is the lonesome polecat....

'51

Secretary, LOYE W. MILLER JR.
3125 Pinehurst Place
Charlotte 9, N. C.

Treasurer, KENNETH M. HENDERSON JR.
406 E. Montclair, Milwaukee 17, Wis.

'Tis the month of Valentines, Abe Lincoln, George Washington—and the marriage of **Andy Timmerman.**

Our spies tell us Andy finally succumbed to a charming miss named Lois Pyle from Paramus, N. J., with the engagement announced in November and a trip to the altar any time now. Lois is a Katherine Gibbs gal with New York ad agency experience. And Andy, these days, is in the driver's seat for Caterpillar sales promotion in Peoria.

Down at Wesleyan University (Conn.) the dean of freshman and one of his associates have hauled down a $5,000 federal grant to study what the average college student wants in a career—and what factors influence his selection. This is particularly interesting to '51's, for said dean of freshmen is none other than **Don O'Dowd.**
